| <b>2009 Request</b>          | <b>0</b>            | <b>0</b>   | <b>2,947,000</b>   |
| Total Change 2008-2009       | 0                   | 0          | 204,000            |

FEMA requests \$2,947 million for this activity. This is an increase of \$204 million including an additional \$15 million for NFIP marketing activities operating expenses over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within one year of the time they are identified as flood-prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes. In addition, federally regulated funding institutions cannot provide loans to nonparticipating communities with an identified flood hazard.

More than 20,300 communities in all states and territories participate in the NFIP. Structures built to NFIP criteria experience 80 percent less damage through reduced frequency and severity of losses. The floodplain management program requirements are estimated to save in excess of \$1 billion per year in flood losses avoided. The NFIP limits the impact of disasters by encouraging property owners and others to manage their risk through flood insurance and other hazard insurance mechanisms.

The American Institutes for Research completed an independent evaluation of the NFIP in October 2006. The 14 evaluation reports address the occupancy and use of floodplains, the cost and consequences of flooding, the role of actuarial soundness in the NFIP, compliance with floodplain management requirements, hazard identification in flood-prone areas, insurance market penetration, and the mandatory purchase requirement. In FY 2008, the recommendations arising from the NFIP evaluation will be subject to a thorough internal review and decisions will be made on how to best implement the recommendations to improve the efficiency and effectiveness of the NFIP.

FEMA uses three strategies to increase the number of flood insurance policies in force: Lender compliance; Program simplification; and Expanded marketing. FEMA is educating financial regulators about the mandatory flood insurance requirement for properties that are located in floodplains and have mortgages from federally regulated lenders.

In FY 2009, FEMA will continue to pay claims and issue policies. In addition, FEMA will:

- Continue implementation of NFIP modernized systems (NextGen) that build an information technology infrastructure which streamlines the insurance process, provides faster and more accurate access to NFIP data, and provides the capability to increase policy sales and improve

responsiveness to customers' claims through the use of a centralized rating engine and online claims module that is available via the Internet.

- Continue implementation of recommendations from the NFIP evaluation. Specific recommendations for implementation will be identified during the FY 2008 internal review of the evaluation.

PPA: SEVERE REPETITIVE LOSS MITIGATION

FEMA requests \$80 million and 7 FTE for this activity. This is an increase of 7 FTE over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a five-year pilot program for the mitigation of Severe Repetitive Loss properties. The pilot program focuses on a subset of the repetitive loss properties – Severe Repetitive Loss (SRL) properties - that have the largest impact on claims paid from the NFIP. This legislation provides new incentives for states and communities to mitigate SRL properties by creating the SRL program. Implementation of the new SRL program assists states by providing additional grant resources and increased Federal cost share for projects mitigating SRL properties. Furthermore, as State and local governments identify their SRL properties, they also increase their awareness of the location of the most severe risks.

Not counting those properties lost during the 2005 Hurricane Season, there are currently about 7,000 of these properties that have either had four or more losses exceeding \$5,000 each or two or more losses exceeding the property value. Under this program, funding is provided for the acquisition of the structure and underlying property for the purpose of creating open space uses in perpetuity; relocation of flood-prone residential structures to areas outside the hazard area; elevation of existing residential structures; demolition and rebuilding of structures; construction of minor localized flood control projects that provide protection to severe repetitive loss properties and NFIP properties; and certain floodproofing techniques for historic structures. Mitigating these properties will result in savings to the NFIP. This program is funded from mandatory, premium collections.

In FY 2007, regulations to implement the Severe Repetitive Loss (SRL) grant programs were developed, along with the electronic application tool for State and local governments. The regulations guide the implementation of certain provisions of the Bunning-Bereuter-Blumenauer Flood Reform Act of 2004, which amended the National Flood Insurance Act of 1968.

In FY 2008, the regulations implementing the SRL program were published in the Federal Register (October 31, 2007). The application period will open and grant applications will be solicited and awarded. This initial implementation year will include funding from the FY 2006, FY 2007 and FY 2008 funding.

In FY 2009, FEMA will award SRL grants, continue efforts to streamline the grant award process for all hazard mitigation assistance program grants and thereby increase the number of grants awarded. In addition, FEMA will hire additional personnel needed to ensure proper implementation, oversight and administration of the program.

PPA: REPETITIVE FLOOD CLAIMS

FEMA requests \$10 million for this activity. This represents no increase over FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a grant program, which provides a mechanism to mitigate properties that have experienced repetitive losses where the state or community does not meet eligibility requirements under the Flood Mitigation Assistance program. Although not necessarily focused on Severe Repetitive Loss properties as defined above, the Act does direct FEMA to give priority to “Worst-Case Properties” that would result in the greatest savings to the NFIF. This program is funded from mandatory, premium collections.

FY 2006 was the first year of the Repetitive Flood Claims (RFC) program. Guidance was developed and issued to enable communities and states to apply for grants. Project applications were received in June 2006, and all awards completed by the end of the Fiscal Year. \$9.8 million was awarded to 16 communities for the acquisition of 41 repetitive loss properties.

In FY 2007, 12 awards were made to communities for the acquisition of 40 properties. Grants guidance was issued in November 2006, with the close of the application period on February 28, 2007. The application period was moved forward to expedite obligation of program funds. The focus of the program expanded in FY 2008 to also include elevations of at risk structures, dry floodproofing of non-residential structures and minor localized flood control projects to provide the greatest savings to the National Flood Insurance Fund. Expanding mitigation activities will allow FEMA to spread program funds to more communities. FEMA will continue its efforts to engage state and local partners and educate them on the program.

Repetitive Flood Claims – Award Summary for FY 2007

|                   |                       | <b>Award Federal Share</b> | <b>Properties</b> |
|-------------------|-----------------------|----------------------------|-------------------|
| <b>New Jersey</b> | Little Falls Township | \$1,506,600                | 4                 |
|                   | Frenchtown Borough    | \$1,013,900                | 3                 |
|                   | <b>State Total*</b>   | <b>\$2,635,748</b>         | <b>7</b>          |
| <b>Virginia</b>   | City of Chesapeake    | \$1,230,578                | 3                 |

| <b>Florida</b>    | Clay County FL        | \$262,017                  | 1                 |
|                   | Lynn Haven FL         | \$273,495                  | 1                 |
|                   | Port Orange FL        | \$1,076,855                | 4                 |
|                   | <b>State Total*</b>   | <b>\$1,773,203</b>         | <b>6</b>          |
| <b>Georgia</b>    | DeKalb County         | \$1,204,638                | 3                 |
|                   | <b>State Total*</b>   | <b>\$1,272,306</b>         | <b>3</b>          |
| <b>Ohio</b>       | Morgan County         | \$141,500                  | 1                 |
|                   | Carlisle Township     | \$76,848                   | 1                 |
|                   | <b>State Total*</b>   | <b>\$229,348</b>           | <b>2</b>          |
| <b>Texas</b>      | Hardin County         | \$2,010,871                | 15                |
|                   | Jefferson County      | \$134,750                  | 1                 |
|                   | <b>State Total*</b>   | <b>\$2,145,621</b>         | <b>16</b>         |
| <b>Oklahoma</b>   | Miami                 | \$345,308                  | 3                 |
|                   | <b>State Total*</b>   | <b>\$378,194</b>           | <b>3</b>          |
| <b>Total</b>      |                       | <b>\$9,664,998</b>         | <b>40</b>         |

*\* State total awards include State management costs*

In FY 2008, the focus of the program expanded to also include elevations of at risk structures, dry floodproofing of non-residential structures and minor localized flood reduction projects to provide the greatest savings to the National Flood Insurance Fund. Expanding mitigation activities will allow FEMA to spread program funds to more communities. FEMA will continue its efforts to engage State and local partners and educate them on the program.

In FY 2008, FEMA will continue efforts to streamline the grant award process for all hazard mitigation assistance program grants, including RFC. Grant guidance was issued on October 30, 2007 opening the application period earlier in the calendar year. In FY 2008, FEMA expects to make approximately 15 awards to communities for the mitigation of 35 to 40 properties, through elevation, acquisition, floodproofing, and minor physical flood reduction projects. Efforts to engage partners and coordinate the RFC program with the expanded SRL program will be continued.

In FY 2009, FEMA will continue efforts to streamline the grant award process for all hazard mitigation assistance program grants, including RFC. Guidance will again be issued early in the fiscal year so as to open and close the application period earlier. In FY 2009, FEMA expects to make approximately 15 awards to communities for the mitigation of 35 to 40 properties, through elevation, acquisition, floodproofing, and minor physical flood reduction projects. Efforts to engage partners and coordinate the RFC program with the expanded SRL program will be continued.

| Total Change 2008-2009       | 0                   | 0          | 35,700        |

FEMA requests \$35.7 million for this activity. This represents an increase of 1.7 million over mitigation assistance FY 2008 funded under a separate National Flood Mitigation Fund appropriation. Beginning in FY 2009, these activities are requested within NFIF.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Flood Mitigation Assistance supports activities that reduce the risk of flood damage to structures insurable under the NFIP. Flood Mitigation Assistance provides flood mitigation assistance planning support to states and communities. Any state agency, participating NFIP community, or local organization is eligible to participate in FMA. Two types of grants are available: Planning Grants and Project Grants.

*Planning*

Planning is the foundation of FMA. FEMA provides grants to communities to identify ways to reduce their flood risk by preparing Flood Mitigation Plans. Hazard mitigation planning is the process State, local, and tribal governments use to identify risks and vulnerabilities associated with natural disasters, and develop long-term strategies for protecting people and property in future hazard events.

*Projects*

Eligible projects are those that reduce the risk of flood damage to structures insurable under the NFIP. Examples of activities funded under Project Grants include elevation of insured structures, acquisition of insured structures and property, and relocation or demolition of insured structures. Priority is given to projects that mitigate insured structures with multiple flood losses.

The Flood Mitigation Assistance (FMA) program has evolved significantly since 1997, when FMA interim regulations were first published. Over time, FMA has found its place among the FEMA pre-disaster programs as a unique program, paid for by the National Flood Insurance Program (NFIP) policyholders, through fees generated by the sale of flood insurance policies, with the very specific goal of funding projects and planning activities in states and NFIP participating communities that will help reduce or eliminate the risk of repetitive flood damage to buildings, manufactured homes and other structures insured by the NFIP. Eligible FMA projects include elevations of insured structures, acquisition, relocation and demolition of insured structures, and construction of minor flood control projects.

In FY 2007 and FY 2008, the activities under this PPA were funded from the National Flood Mitigation Fund appropriation, via a transfer of funds from the National Flood Insurance Fund. In FY 2009, FEMA proposes to operate the FMA directly from the NFIF without a transfer of funds.

In FY 2009, continued growth in the number of flood insurance policies will result in up to \$35.7 million available for FMA. FEMA will continue efforts to streamline the grant award process for all hazard mitigation assistance program grants, including FMA.

PPA: NFIF OFFSETTING COLLECTIONS - DISCRETIONARY

**Justification of Proposed Changes in National Flood Insurance Fund**  
**Appropriation Language**

For activities under the National Flood Insurance Act of 1968, *as amended* (42 U.S.C. 4001 et seq.), and the Flood Disaster Protection Act of 1973, *as amended* (42 U.S.C. 4001 et seq.), [\$145,000,000] \$156,599,000, which shall be derived from offsetting collections assessed and collected under section 1308(b)(3) of the National Flood Insurance Act of 1968, (42 U.S.C. 4015(b)(3)), which is available as follows: (1) not to exceed [\$45,642,000] \$49,418,000 for salaries and expenses associated with flood mitigation and flood insurance operations; and (2) no less than [\$99,358,000] \$107,181,000 for flood [hazard mitigation] *plain management and flood mapping*, which shall [be derived from offsetting collections assessed and collected under section 1307 of the National Flood Insurance Act of 1968 (42 U.S.C. 4014), to] remain available until September 30, [2009 including up to \$34,000,000 for flood mitigation expenses under section 1366 of that Act (42 U.S.C. 4104c), which shall be available for transfer to the National Flood Mitigation Fund under section 1367 of that Act (42 U.S.C. 4104) until September 30, 2009] 2010: *Provided*, That any additional fees collected pursuant to section [1307] 1308(b)(3) of [that Act] *the National Flood Insurance Act of 1968 (42 U.S.C. 4015(b)(3))* shall be credited as an offsetting collection to this account, to be available for flood [hazard mitigation expenses] *plain management and flood mapping*; *Provided further*, That in fiscal year [2008] 2009, no funds shall be available from the National Flood Insurance Fund [under section 1310 of that Act (42 U.S.C. 4017)] in excess of: (1) [\$70,000,000] \$85,000,000 for operating expenses; (2) [\$773,772,000] \$869,905,000 for commissions and taxes of agents; (3) such sums as are necessary for interest on Treasury borrowings; and (4) [\$90,000,000] \$125,700,000 which shall remain available until expended for flood mitigation actions, [with respect to] *of which \$80,000,000 is for severe repetitive loss properties under section 1361A of [that Act] the National Flood Insurance Act of 1968 (42 U.S.C. 4102a), [and] of which \$10,000,000 is for repetitive insurance claims properties under section 1323 of [that Act] the National Flood Insurance Act of 1968 (42 U.S.C. 4030), [which shall remain available until expended:] and of which \$35,700,000 is for flood insured properties under section 1366 of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c) notwithstanding subparagraphs (B) and (C) of subsection (b)(3) and subsection (f) of section 1366 the National Flood Insurance Act of 1968 (42 U.S.C. 4104c) and notwithstanding subsection (a)(7) of section 1310 of the National Flood Insurance Act of 1968 (42 U.S.C. 4017): Provided further, That amounts collected under section 102 of the Flood Disaster Protection Act of 1973 and section 1366(i) of the the National Flood Insurance Act of 1968 shall be deposited in the National Flood Insurance Fund to supplement other amounts specified as available for section 1366 of the National Flood Insurance Act of 1968, notwithstanding 42 U.S.C. 4012a(f)(8), 4104c(i), and 4104d(b)(2)-(3): Provided further, That total administrative costs shall not exceed 4 percent of the total appropriation. (*Department of Homeland Security Appropriations Act, 2008.*)*

**Explanation of Changes:**

The FY 2009 NFIF budget request increase for commissions and taxes of agents is based on a projected increase in the number of policies in force and the associated increase in premium revenue.

Commissions, Write-Your-Own (WYO) program costs and taxes are based on the premium revenue generated by the projected number of policies in force. In FY 2006 policy growth was an unprecedented 14% and policy growth is predicted to be 5% for FY 2008 and FY 2009. This necessarily drives up WYO program costs. . The property and casualty insurance companies including agents that sell and service federally-underwritten flood insurance policies under their own names retain a percentage of the premium for the cost of administration and production. For FY 2009, the 85 WYO companies will retain 30.8% of premium revenue for each flood policy they write based on the average industry expense ratios for selected categories of expenses as published in *Best's Aggregates and Averages*.

The floodplain management funding includes language emphasizing that floodplain management funding will be used for flood mapping as well. In FY 2009, there will be an increased investment from the National Flood Insurance Fund's program fees to \$98.2 million for flood mapping efforts. Combined with directly appropriated funding for the Flood Map Modernization program, FEMA will preserve the Flood Map Modernization investment at a level comparable to the past 5 years. This will allow FEMA to advance and make progress towards meeting needs in levee and coastal areas and to transition to a future multi-year mapping endeavor.

The budget request has also been revised to reflect a change in the way Flood Mitigation Assistance is funded. Flood Mitigation Assistance is targeted to directly reduce losses to the NFIF caused by repetitive loss and other high risk properties. The effective return on investment that will result from investing in reducing the number of repetitive loss and other high risk properties has been demonstrated. The changes reflected align Flood Mitigation Assistance with its partner repetitive loss programs to increase the effective delivery of all three programs and strengthen the NFIF.

Note: Obligation requirements in the Congressional Justifications and Budget Appendix may differ due to rounding.

**PPA Mission Statement**

Resources under this activity support the salaries and expenses of FTE managing the National Flood Insurance Program (NFIP) and flood mitigation programs. In FY 2009, FEMA will continue to support the NFIP and to provide operational and administrative support for the Community Rating System and will enhance oversight of the program.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$27,949                | \$38,342                | \$38,706                | \$364                          |

Salaries and Benefits includes costs for 330 FTE. The FY 2009 net increase is due to the annualization of FY 2008 position increases and inflationary increase.

|               | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$1,479                 | \$2,305                 | \$2,349                 | \$44                           |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 net increase is due to the annualization of FY 2008 position increases and inflationary increase.

|                                 | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

## PPA Mission Statement

Through Floodplain Management programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Through the delivery of mitigation programs, FEMA leads a national effort to: identify and improve the understanding of communities' hazards and their risks; develop and improve techniques and planning processes which mitigate those risks; provide an environment at the State and local levels that is conducive to applying those techniques and processes; provide financial and technical assistance to facilitate application of those techniques and processes; and support development of incentives and disincentives which make application of those techniques and processes a social, political and/or economic priority.

The FY 2009 request allows FEMA to: develop a variety of outreach materials to assist all entities of Federal, State, and local governments to effectively maintain sound floodplain management practice, and educate the general public on mitigation actions that may be taken in a pre-disaster environment; provide ongoing map maintenance activities, issue map revisions, and enhance distribution services, including provisions for digital products, subscription services, and links to other hazard data; provide funding to States for the development of the capability and capacity to manage the production of and to maintain flood hazard data (these efforts complement and support the Flood Map Modernization Fund activities); and provide technical assistance to the 20,000 communities participating in the NFIP and monitor the compliance with program requirements

### Summary Justification and Explanation of Changes

|                 | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------|-----------------|-----------------|-----------------|------------------------|
| <b>GSA rent</b> | \$815           | \$815           | \$831           | \$16                   |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 increase is due to an inflationary increase.

|                 | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------|-----------------|-----------------|-----------------|------------------------|
| <b>Printing</b> | \$1,350         | \$1,353         | \$1,657         | \$304                  |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 increase is due to an inflationary increase.

|   | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|---|-----------------|-----------------|-----------------|------------------------|
| <b>Advisory and Assistance Services</b> | \$245           | \$2,100         | \$2,822         | \$722                  |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 increase is due to an inflationary increase.

|                       | <b>2007</b>     | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |

### PPA Mission Statement

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within 1 year of the time they are identified as flood-prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes. In addition, Federally regulated funding institutions cannot provide loans to nonparticipating communities with an identified flood hazard.

More than 20,000 communities in all States and Territories participate in the NFIP. Structures built to NFIP criteria experience 80 percent less damage through reduced frequency and severity of losses. The flood mitigation program requirements are estimated to save in excess of \$1 billion per year in flood losses avoided. The NFIP limits the impact of disaster by encouraging property owners and others to manage their risk through flood insurance and other hazard insurance mechanisms.

In FY 2009, FEMA will continue to pay claims, issue policies, pay interest on borrowing from the Treasury, and pay operating expenses of the NFIF.

#### Summary Justification and Explanation of Changes

|                 | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-----------------|-----------------|-----------------|-----------------|------------------------|
| <b>Printing</b> | \$2,100         | \$2,100         | \$2,205         | \$105                  |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 increase is due to an inflationary increase.

|                       | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |

| <b>Indemnity</b> | \$1,250,188     | \$1,251,305     | \$1,399,640     | \$148,335              |

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act.

|                               | 2007<br>Actuals | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|-------------------------------|-----------------|-----------------|-----------------|------------------------|
| <b>Interest and Dividends</b> | \$717,166       | \$717,807       | \$802,898       | \$85,091               |

The FY 2009 decrease is due to the FY 2007 carryover into FY 2008.

**PPA Mission Statement**

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a five-year Pilot Program for the Mitigation of Severe Repetitive Loss Properties. The Pilot Program focuses on a subset of the repetitive loss properties – severe repetitive loss properties - that have the largest impact on claims paid from the NFIF. Not counting those properties lost during the 2005 hurricane season, there are currently about 5,400 of these properties that have had four or more losses exceeding \$5,000 each or the properties where cumulative losses exceed the property value. Mitigating these properties will result in savings to the NFIF. This program will be funded from mandatory, premium collections.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|---------------|----------------|----------------|---------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Salaries and Benefits</b> | \$0           | \$880          | \$1,693        | \$813               |

Salaries and Benefits includes costs for seven FTE. The FY 2009 net increase is due to the annualization of FY 2008 position increases.

Note: Obligation requirements in the Congressional Justifications and Budget Appendix may differ due to rounding.

**PPA Mission Statement**

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a grant program which provides a mechanism to mitigate properties that have experienced repetitive losses where the State or community does not meet eligibility requirements under the Flood Mitigation Assistance program. Although not necessarily focused on Severe Repetitive Loss Properties, the Act does direct FEMA to give priority to “Worst-Case Properties” that would result in the greatest savings to the NFIF. This program will be funded from mandatory, premium collections.

**Summary Justification and Explanation of Changes**

|                                       | <b>2007</b>    | <b>2008</b>     | <b>2009</b>     | <b>2008 to 2009</b> |
|---------------------------------------|----------------|-----------------|-----------------|---------------------|
|                                       | <b>Actuals</b> | <b>Enacted</b>  | <b>Request</b>  | <b>Change</b>       |
| <b>Grants/Subsidies/Contributions</b> | <b>\$0</b>     | <b>\$10,000</b> | <b>\$10,000</b> | <b>\$0</b>          |

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY 2009 request equals the FY 2008 request.

**PPA Mission Statement**

The Flood Mitigation Activities (FMA) support activities to eliminate at-risk structures that are repetitively flooded. Through fee-generated discretionary funds transferred from the National Flood Insurance Fund (NFIF), FMA supports activities to eliminate at-risk structures that are repetitively flooded, and provides flood mitigation assistance planning support to States and communities.

These activities were previously funded from the National Flood Mitigation Fund appropriation.

**Summary Justification and Explanation of Changes**

|                       | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$0                     | \$0                     | \$722                   | \$722                          |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Prior to FY 2009, this activity was funded by the NFMF Appropriation. The increase shown above reflects the new appropriation structure eliminating a transfer from the NFIF to the NFMF.

|                                       | <b>2007<br/>Actuals</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------------|-------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Grants/Subsidies/Contributions</b> | \$0                     | \$0                     | \$34,978                | \$34,978                       |

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. Prior to FY 2009, this activity was funded by the NFMF Appropriation. The increase shown above reflects the new appropriation structure eliminating a transfer from the NFIF to the NFMF.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **NATIONAL FLOOD MITIGATION FUND**

### **I. Appropriation Overview**

#### **A. Mission Statement for National Flood Mitigation Fund (NFMF):**

The NFMF supports activities that reduce the risk of flood damage to structures insurable under the National Flood Insurance Program (NFIP). Priority is given to projects that mitigate insured structures with multiple flood losses.

#### **B. Budget Activities:**

Through funds transferred from the National Flood Insurance Fund (NFIF), the NFMF supports activities to eliminate at-risk structures that are repetitively flooded, and provides flood mitigation assistance planning support to states and communities.

#### **C. Budget Request Summary:**

Funds for the National Flood Mitigation Fund are no longer requested to be transferred into this account. Beginning in 2009, National Flood Mitigation Fund activities will be funded directly from the National Flood Insurance Fund appropriation.

FEMA requests no funding for this activity in NFMF. For FY 2009, FEMA requests that the NFMF activities be funded within the NFIF appropriation, eliminating the need for a transfer.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The NFMF supports activities that reduce the risk of flood damage to structures insurable under the NFIP. The NFMF provides flood mitigation assistance planning support to states and communities through the Flood Mitigation Assistance (FMA) grant program. Any state agency, participating NFIP community, or local organization is eligible to participate in FMA. Two types of grants are available: Planning Grants and Project Grants.

*Planning*

Planning is the foundation of FMA. FEMA provides grants to communities to identify ways to reduce their flood risk by preparing Flood Mitigation Plans. Hazard mitigation planning is the process state, local, and tribal governments use to identify risks and vulnerabilities associated with natural disasters and develop long-term strategies for protecting people and property in future hazard events.

The process results in a mitigation plan that offers a strategy for breaking the cycle of disaster damage, reconstruction, and repeated damage, and a framework for developing feasible and cost-effective mitigation projects. Under the Disaster Mitigation Act of 2000 (Public Law 106-390), state, local and tribal governments are required to develop a hazard mitigation plan as a condition for receiving certain types of non-emergency disaster assistance. The planning process promoted by the Disaster Mitigation Act of 2000 is as important as the resulting plan because it encourages jurisdictions to integrate mitigation with day-to-day decision making regarding land-use planning, floodplain management, site design, and other functions.

Based on a risk assessment completed as part of the planning process, state, local and tribal governments are able to develop mitigation goals and objectives, and a strategy for mitigating disaster

losses. The strategy sets forth an approach for implementing activities that are cost-effective, technically feasible, and environmentally sound. History shows that the physical, financial, and emotional losses caused by disasters can be reduced significantly through mitigation planning.

Mitigation focuses attention and resources on solving a particular problem (such as reducing repetitive flood losses), and thereby produces successive benefits over time.

### Projects

Eligible projects are those that reduce the risk of flood damage to structures insurable under the NFIP. Examples of activities funded under Project Grants include elevation of insured structures, acquisition of insured structures and property, and relocation or demolition of insured structures. Priority is given to projects that mitigate insured structures with multiple flood losses.

Hazard mitigation is the most proactive and successful method for reducing the physical, financial, and emotional losses caused by disasters. In fact, the Multi-Hazard Mitigation Council (established in 1997 as a voluntary advisory, facilitative body of the National Institute of Building Sciences) released a report in December of 2005 that stated that mitigation saves society an average of four dollars for every dollar spent. The study further stated that mitigation results in significant net benefits to society as a whole—to individuals, states and communities—in terms of future reduced resource losses and savings to the Federal Treasury in terms of future increased tax revenues and future reduced hazard-related expenditures.

The Flood Mitigation Assistance (FMA) program has evolved significantly since 1997, when the FMA interim regulations were first published. Over time, FMA has found its place among the FEMA pre-disaster programs as a unique program funded by the sale of flood insurance policies in the National Flood Insurance Program (NFIP), with the very specific goal of funding projects and planning activities in states and NFIP participating communities that will help reduce or eliminate the risk of repetitive flood damage to buildings, manufactured homes and other structures insured by the NFIP. Eligible FMA projects include elevations of insured structures, acquisition, relocation and demolition of insured structures, and construction of minor flood control projects.

### **Accomplishments**

In FY 2007, \$31 million was made available for FMA. The FY 2007 FMA priority was to fund flood mitigation activities that reduce the number of repetitive loss structures currently insured by the National Flood Insurance Program. Applications for FY 2007 FMA funds were accepted for eligible, cost-effective flood mitigation activities that reduced the risk of flood losses to any property currently insured under the NFIP, whether repetitive loss or not.

For FY 2008, continued growth in the number of flood insurance policies resulted in a request of \$34 million for FMA. FEMA will continue efforts to streamline the grant award process for all hazard mitigation assistance program grants, including FMA.

For FY 2009, FEMA requests that these activities be funded from the NFIF appropriation to eliminate the unnecessary transfer of funds into a separate account.

FEMA requests that the NFMF activities be funded out of NFIF in FY 2009.

#### **IV. Program Justification of Changes**

Not applicable.

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
Federal Emergency Management Agency (FEMA)  
Justification of Proposed Changes in National Flood Mitigation Fund  
Appropriation Language**

[Notwithstanding subparagraphs (B) and (C) of subsection (b)(3), and subsection (f), of section 1366 of the National Flood Insurance Act of 1968, as amended \$34,000,000 (42 U.S.C. 4104c), to remain available until September 30, 2009, for activities designed to reduce the risk of flood damage to structures pursuant to such Act, of which \$34,000,000 shall be derived from the National Flood Insurance Fund.] (*Department of Homeland Security Appropriations Act, 2008*.)]

#### **Explanation of Changes:**

No language or funding for the National Flood Mitigation Fund is requested for FY 2009. NFMF activities will be funded out of the National Flood Insurance Fund beginning in FY 2009. This new structure will increase management efficiency by administering the repetitive loss, severe repetitive loss, and FMA grant program from one appropriation. It will also simplify the financial management of the appropriation by eliminating the transfer from one appropriation to another.

**PPA Mission Statement**

The National Flood Mitigation Fund (NFMF) supports activities to eliminate at-risk structures that are repetitively flooded. Through fee-generated discretionary funds transferred from the National Flood Insurance Fund (NFIF), the NFMF supports activities to eliminate at-risk structures that are repetitively flooded, and provides flood mitigation assistance planning support to States and communities.

In FY 2009, NFMF activities will be funded out of the National Flood Insurance Fund appropriation.

**Summary Justification and Explanation of Changes**

|                       | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) NATIONAL PRE-DISASTER MITIGATION FUND

### **I. Appropriation Overview**

**A. Mission Statement for National Pre-Disaster Mitigation Fund:** This program provides competitive grants for pre-disaster mitigation (PDM). Operating independently of the Disaster Relief Fund (DRF), which provides *post*-disaster mitigation funding, the PDM program provides a stable, year-to-year funding source for qualified projects that is not dependent upon Presidentially declared disaster activity.

### **B. Budget Activities:**

FEMA's PDM program provides technical assistance and competitive grant funding to state, local, and tribal governments to reduce the risks associated with disasters. Resources support the development and enhancement of hazard mitigation plans, as well as the implementation of pre-disaster mitigation projects.

### **C. Budget Request Summary:**

The FEMA FY 2009 request for the National Pre-Disaster Mitigation Fund is 15 positions, 15 FTE, and \$75,000,000. There is no change to the permanent position base. A program change decrease of \$39,017,000 is requested.

FEMA requests \$75 million for Pre-Disaster Mitigation in FY 2009, a decrease of \$39 million from FY 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The PDM program assists state, local and tribal governments in implementing cost-effective hazard mitigation activities that complement a comprehensive mitigation program.

The PDM program provides funds to states, territories, tribal governments, and communities for hazard mitigation planning and the implementation of mitigation projects prior to a disaster event. Funding these plans and projects reduces overall risks to the population and structures, while also reducing reliance on funding from actual disaster declarations. PDM grants are to be awarded on a competitive basis.

PDM projects vary widely and range from acquisition of repetitively flooded homes and other properties to improvements of drainage and sewage systems and land stabilization projects. Communities that participate in the PDM program are able to identify, plan for, and mitigate repetitive loss situations that negatively impact their residents or present a threat to life and property. Approved projects go through an extensive review process to verify cost savings, engineering feasibility, and environmental and historic site reviews. The final approved projects may eliminate the risk of flooding due to drainage system backups and blockage, protect primary transportation arteries and homes from landslides and flooding, reinforce critical infrastructure to protect against damage during a seismic event, or mitigate repetitive damage to homes in a flood prone area. PDM projects specifically related to flood mitigation provide an additional cost savings by reducing future claims on the National Flood Insurance Program.

Hazard mitigation is the most proactive and successful method for reducing the physical, financial, and emotional losses caused by disasters. In fact, the Multi-Hazard Mitigation Council (established in 1997 as a voluntary advisory, facilitative body of the National Institute of Building Sciences) released

a report in December of 2005 that stated that mitigation saves society an average of four dollars for every dollar spent. The study further stated that mitigation results in significant net benefits to society as a whole—to individuals, to states and to communities—in terms of future reduced resource losses and savings to the Federal Treasury in terms of future increased tax revenues and future reduced hazard-related expenditures.

FEMA developed and initiated the PDM competitive process in FY 2003, with the actual competition for FY 2003 funds occurring in FY 2004. In order to establish an annual cycle where the funds could be awarded in the same year as they were appropriated, FEMA made a decision to combine the FY 2004 (\$150 million) & FY 2005 (\$100 million) funding for grants, technical assistance, and program support into one competitive process that was conducted in FY 2005.

In FY 2006, FEMA received grant applications requesting a total of \$141 million for the \$50 million in appropriated funding. Consequently, numerous eligible applicants did not receive funding. A limited waiting list was established for applications that did not receive funding.

In FY 2007, \$100 million was available for PDM. FEMA received 470 mitigation applications for a total of \$302,211,078 requested. The National Evaluation was held on March 5 – 16, 2007. All of the applications were reviewed in accordance with the FY 2007 PDM Program Guidance, and were evaluated by peer review panels in partnership with emergency managers at the state, local, tribal and territorial level. In accordance with PDM statutory authority in FY 2007, each state and territory will receive an allocation of at least \$500,000 in set-aside funding for applications that were submitted if those applications met all PDM requirements. States and territories that submitted less than \$500,000 in applications will only receive the amount requested, provided those applications are determined to be eligible. The maximum PDM award for any one state shall not exceed \$15 million. There is a \$1 million cap on federal share available for plans and a single federal share cap of \$3 million for projects. During FY 2007, FEMA obligated \$51.9 million of FY 2007 grant funds. All remaining funding are dedicated for specific projects and will be obligated in FY 2008.

In FY 2008, FEMA will undertake the following risk reduction activities:

- Provide technical and financial assistance to state, local and tribal governments to assist in the implementation of pre-disaster hazard mitigation measures that are cost-effective and are designed to reduce loss of life and damage and destruction of property, including damage to critical facilities under the jurisdiction of states or local governments.
- Provide technical and financial assistance to state and local governments for developing and enhancing hazard mitigation plans that identify risks, and develop strategies to reduce those risks.
- Continue to streamline the evaluation process so that funds are obligated more effectively and efficiently and on a more timely basis.
- Develop additional and enhance existing processing and information systems for managing data on mitigation projects implemented. This data will be used to track and validate program performance and benefits.

In FY 2009, FEMA will undertake the following risk reduction activities:

- Provide technical and financial assistance to state, local and tribal governments to assist in the implementation of pre-disaster hazard mitigation measures that are cost-effective and are designed to reduce loss of life and damage and destruction of property, including damage to critical facilities under the jurisdiction of states or local governments.
- Provide technical and financial assistance to state and local governments for developing and enhancing hazard mitigation plans that identify risks, and develop strategies to reduce those risks.
- Enhance and maintain processing and information systems for managing data on mitigation projects implemented. This data will be used to track and continuously verify program performance and benefits.

#### **IV. Program Justification of Changes**

Not applicable.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in National Pre-Disaster Mitigation Fund  
Appropriation Language**

For a pre-disaster mitigation grant program under [title II] *section 203* of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. [5131] *5133* [et seq.]), [\$114,000,000] \$75,000,000, to remain available until expended: *Provided*, That grants made for pre-disaster mitigation shall be awarded on a competitive basis subject to the criteria in section 203(g) of such Act (42 U.S.C. 5133(g)): *Provided further*, That total administrative costs shall not exceed 3 percent of the total amount made available under this heading. (*Department of Homeland Security Appropriations Act, 2008.*)

#### **Explanation of Changes:**

No substantive changes are proposed.

**PPA Mission Statement**

Funding requested through this account is dedicated to competitive grants for pre-disaster mitigation (PDM). Operating independently of the Disaster Relief Fund (DRF) assures that funding remains stable from year to year and is not subject to spikes in disaster activity.

In FY 2009, FEMA will provide technical and financial assistance to states and to local and tribal governments to assist in the implementation of pre-disaster hazard mitigation measures that are cost-effective and are designed to reduce loss of life and damage and destruction of property, including damage to critical facilities under the jurisdiction of the states or local governments. The PDM competitive grant program will continue to assist states and communities to reach a higher level of risk management and risk reduction, through planning and mitigation actions before disasters occur.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$618                  | \$637                   | \$655                   | \$18                           |

Salaries and Benefits include costs for 15 positions and 15 FTE. The FY 2009 increase of \$18,000 is due to inflation.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Travel</b> | \$450                  | \$1,063                 | \$442                   | (\$621)                        |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 decrease of \$621,000 correlates to the travel associated with grants management and the permanent reduction to grants.

|                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>GSA rent</b> | \$123                  | \$125                   | \$128                   | \$3                            |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 increase of \$3,000 is due to inflation.

|   | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Advisory and Assistance Services</b> | \$11                   | \$26                    | \$11                    | (\$15)                         |

Advisory and Assistance Services includes services acquired by contract from non-federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 request is a \$15,000 decrease from the FY 2008 enacted.

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$5,681                | \$13,424                | \$5,574                 | (\$7,850)                      |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 decrease of \$7,850 is a reduction of administrative costs associated with the permanent reduction to grants.

|                                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Grants/Subsidies/Contributions</b> | \$69,497               | \$164,217               | \$68,190                | (\$96,027)                     |

Grants/Subsidies/Contributions include cash payments to States, other political subdivisions, corporations, associations, and individuals. The FY 2009 decrease of \$96,027,000 is due to the permanent reduction to grants.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **EMERGENCY FOOD AND SHELTER**

### **I. Appropriation Overview**

#### **A. Mission Statement for Emergency Food and Shelter (EFS):**

The Emergency Food and Shelter (EFS) Program provides grants to nonprofit and faith-based organizations at the local level through the National Board to supplement their programs for emergency food and shelter.

#### **B. Budget Activities:**

EFS funds are used to supplement food, shelter, rent, mortgage, and utility assistance programs for people with non-disaster related emergencies.

The EFS Program is administered via a national board of volunteer agencies chaired by FEMA. The National Board qualifies jurisdictions for annual EFS funding awards based on criteria involving current population, unemployment, and poverty levels. Grants are awarded to nonprofit community and government organizations that are chosen by local boards in the qualifying jurisdictions.

#### **C. Budget Request Summary:**

The FEMA FY 2009 request for the EFS program is 0 positions, 0 FTE, and \$100,000,000. This request represents a decrease of \$53,000,000 from FY 2008. There are no adjustments to base.

FEMA requests \$100 million for this activity, representing a decrease of \$53 million from FY 2008.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The EFS program provides grants to nonprofit and faith-based organizations at the local level to supplement their programs for emergency food and shelter. Nearly 12,000 nonprofit and local government agencies in over 2,500 cities and counties across the United States receive awards.

Funding for this program is distributed by the National Board which consists of designees from six charitable organizations - United Way of America, The Salvation Army, the National Council of Churches of Christ in the USA, Catholic Charities USA, United Jewish Communities, and the American Red Cross. The National Board is chaired by a representative from FEMA.

Local jurisdictions (city or county) are eligible for EFS support when they have the highest need for emergency food and shelter services as determined by unemployment and poverty rates. For Fiscal Year 2007, the National Board used three measures to determine highest need eligibility: 1) Those with 13,000 or more residents unemployed and an unemployment rate of at least 3.8 percent; 2) Those with between 300 and 12,999 residents unemployed and an unemployment rate of at least 5.8 percent; or 3) Those with 300 or more unemployed and a poverty rate of at least 11 percent. Final distribution is determined by a formula that divides the total amount available by the number of unemployed within all eligible jurisdictions to arrive at a per capita rate of funding per unemployed person.

Funding may also be provided to jurisdictions that do not meet the initial eligibility requirements through a state set-aside. The National Board reserves a portion of appropriated funds and distributes funding to states based on a discretionary determination that allows for a constant level of funding based on a ratio of per capita state set-aside to per capita direct funding. The state set-aside allows states to address pockets of homelessness and poverty or address the immediate needs of a locality that might be going through a high economic impact event, such as a plant closing.

## **Accomplishments**

FY 2007 funds have provided more than 75 million meals and 4 million nights of lodging. The funding was also used to provide 153,162 rent and mortgage payments, and 156,837 utility bills to those in the most desperate need of assistance. All 50 states, the District of Columbia, Puerto Rico, and four territories received funds in FY 2007.

In FY 2008 (\$153 million) and FY 2009 (\$100 million), the estimated services rendered will provide 70 million meals and 1.3 million nights of lodging. The funds will also be used to provide approximately 98,179 rent and mortgage payments and 231,929 utility bill payments.

Description of Item

FEMA requests a reduction of \$53,000,000 in the EFS program for FY 2009.

Justification

The FY 2009 request reflects a refocus of resources on the primary mission of preparing for and coordinating disaster response and recovery efforts while still providing substantial support for the EFS program.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
Federal Emergency Management Agency  
Justification of Proposed Changes in Appropriation Name  
Appropriation Language**

To carry out an emergency food and shelter program pursuant to title III of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11331 et seq.), [\$153,000,000] *\$100,000,000*, to remain available until expended: *Provided*, That total administrative costs shall not exceed 3.5 percent of the total amount available under this heading. (*Department of Homeland Security Appropriations Act, 2008.*)

#### **Explanation of Changes:**

No substantive changes are proposed.

### PPA Mission Statement

The Emergency Food and Shelter (EFS) Program provides grants to nonprofit and faith-based organizations at the local level to supplement their programs for emergency food and shelter.

In FY 2008, the estimated services rendered will provide 70 million meals and 1.3 million nights of lodging. The funds will also be used to provide approximately 98,179 rent and mortgage payments and 231,929 utility bill payments.

The FEMA FY 2009 request will continue to provide funding to supplement local efforts to provide meals, shelter, and emergency assistance for mortgage, rent, and utility payments.

### Summary Justification and Explanation of Changes

|                                       | <b>2007</b>      | <b>2008</b>      | <b>2009</b>      | <b>2008 to 2009</b> |
|---------------------------------------|------------------|------------------|------------------|---------------------|
|                                       | <b>Actuals</b>   | <b>Enacted</b>   | <b>Request</b>   | <b>Change</b>       |
| <b>Grants/Subsidies/Contributions</b> | <b>\$151,470</b> | <b>\$153,000</b> | <b>\$100,000</b> | <b>(53,000)</b>     |

The FY 2009 request includes a decrease of \$53,000,000. The FY 2009 request reflects a refocus of resources on the primary mission of preparing for and coordinating disaster response and recovery efforts while still providing substantial support for the EFS program.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)** **CERRO GRANDE FIRE CLAIMS**

### **I. Appropriation Overview**

The Office of Cerro Grande Fire Claims was established by Public Law 106-246 to provide consideration and settlement of claims arising from the Cerro Grande Prescribed Fire. Funds for administration of the compensation process and for the payment of claims are available until expended.

No additional funding is requested. FEMA requests that \$9 million of the remaining balance be rescinded as there is no expectation of significant future obligation.

| 91.0                       | Unvouchered                                | ---           | ---            | ---            | ---                 |
| <b>Total, Cerro Grande</b> |  | <b>\$205</b>  | <b>\$94</b>    | <b>\$0</b>     | <b>(\$94)</b>       |
| Full Time Equivalents      |  | 2             | 2              | ---            | (2)                 |

**PPA Mission Statement**

The Office of Cerro Grande Fire Claims was established by Public Law 106-246 to provide consideration and settlement of claims arising from the Cerro Grande Prescribed Fire. Funds for administration of the compensation process and for the payment of claims are available until expended.

No additional funding is requested. FEMA requests that \$9 million of the remaining balance be rescinded as there is no expectation of significant future obligation.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$91                   | \$94                    | \$0                     | (\$94)                         |

Salaries and Benefits includes regular salaries and wages, and personnel benefits paid to employees. No additional funding is requested.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------|------------------------|-------------------------|-------------------------|--------------------------------|

## A. Mission and Description of Federal Emergency Management Agency (FEMA)

The Federal Emergency Management Agency was created in 1979 by Executive Order of the President and in 2003 became an essential component of the Department of Homeland Security (DHS). FEMA's primary mission is to reduce loss of life and property and protect the Nation from all hazards, including natural disasters, acts of terrorism, and other man-made disasters, by leading and supporting the Nation in a risk-based, comprehensive emergency management system of preparedness, protection, response, recovery, and mitigation.

FEMA manages and coordinates the Federal response to domestic disasters of all types in accordance with the Robert T. Stafford Disaster Relief and Assistance Act, its primary authority. The agency works proactively to anticipate disaster assistance needs that may arise and responds to requests for support from governors of affected States. While many significant emergencies are capably managed with local and State resources alone, FEMA stands ready when greater assistance is needed, prepared to act as both leader and partner to address each community's needs.

In the 29 years since its creation, FEMA has responded to more than a thousand disasters across all fifty States, the District of Columbia, Puerto Rico, Guam, the Pacific Island Trust Territories, and the U.S. Virgin Islands.

FEMA also administers the National Flood Insurance Program in accordance with the National Flood Insurance Act of 1968, as amended, that authorizes the Federal Government to provide flood insurance on a national basis. Currently, there are over 5,300,000 policyholders and over 20,300 communities participating in the program.

In October 2006, the President signed into the law the Post-Katrina Emergency Management Act. The Act brought additional functions into FEMA, primarily National Preparedness, Grants Management and the U.S. Fire Administration. The Act also called for FEMA to:

- Improve the Agency's core capabilities and strengthen the regions;
- Expand FEMA's mission to include preparedness and protection along with the Agency's traditional missions of mitigation, response and recovery;
- Engage new constituencies such as the law enforcement community;
- Establish a national emergency management system; and
- Implement a national preparedness system.

As the integration of these new elements and the restructuring of existing functions, to include the transition of specific categories of temporary disaster employees to full-time permanent employees are complete; the new FEMA will consist of approximately 4,300 full-time staff and more than 3,240 disaster employees. In addition to FEMA's headquarters in Washington, D.C., FEMA has 10 regional offices and 3 area offices that carry out the Agency's operations throughout the U.S. and its dependent areas.

FEMA's major mission components include Logistics Management, Disaster Assistance, Disaster Operations, Grant Programs, National Preparedness Directorate, U.S. Fire Administration, National Continuity Program, and Mitigation.

## B. Major Activities and Key Strategic Issues

### *Logistics Management*

FEMA's Logistics Management Directorate provides property management, logistics systems, and logistical operations for FEMA and its emergency management partners. This organization, which was carved out of the Disaster Operations Directorate in 2007, provides FEMA with the foundation to re-define disaster logistics and move beyond simply providing commodities (i.e., ice, water, tarps, and MREs) to a comprehensive management approach.

In FY 2007, the Total Asset Visibility (TAV) capability has been improved to provide order visibility, order management, and in-transit visibility. In FY 2008, the Logistics Management Directorate will continue its transformation efforts by recruiting and hiring a permanent workforce to fill an additional 25 positions as well as develop and implement new internal management controls. The Emergency Housing Unit's business practices for storing, issuing, refurbishing and disposing of the units will be refined to improve efficiency and program delivery.

In FY 2009, the Logistics Management Directorate plans to transform logistics management of supplies and services by engaging the private sector and incorporating industry best practices. Additional staff will be brought on board with the goal of completing the transformation of the Logistics Management Directorate by the end of FY 2009.

### *Disaster Assistance*

FEMA's Disaster Assistance Program works to ensure that individuals and communities affected by disasters of all sizes, including catastrophic events and terrorist attacks, receive rapid, situation appropriate, and accurately targeted disaster assistance through FEMA's Individual Assistance and Public Assistance programs. In addition, FEMA leads Federal agencies, State and local governments, and representatives of non-governmental organizations in developing, coordinating, and implementing the National Disaster Recovery Strategy and the National Disaster Housing Strategy.

In FY 2007, FEMA responded to 68 major disaster declarations, 11 emergency declarations, and 54 fire management assistance declarations. FEMA also continues to work on Hurricane Katrina related activities and disaster assistance funding included \$313 million provided to 58,000 households for Housing and Other Needs Assistance, and \$1.5 billion has been obligated to continue to provide reimbursement to clear debris and rebuild roads, schools, libraries, and other public facilities.

In FY 2008, FEMA plans to refine its evacuee hosting guidance and complete five State hosting plans for large numbers of evacuees. FEMA will complete enhancements to systems that support mass care and housing activities following a disaster. Debris management strategies will be tested and improved. Standard protocols and staff training will be developed for long-term recovery planning. FEMA will continue to develop plans and procedures for managing disaster assistance operations under the varying conditions of different catastrophic and extraordinary disaster scenarios.

In FY 2009, FEMA will continue to improve its plans and capabilities for managing mass evacuations and the resulting displaced populations, including additional State and local plans and development and expansion of evacuee tracking systems. The agency will also continue to improve and test/exercise its capabilities for all of its Individual Assistance functions (mass care, emergency assistance, housing, and human services).

### *Disaster Operations*

FEMA's Disaster Operations Program provides the core Federal operational capabilities needed to save lives, minimize suffering, and protect property in a timely and effective manner in communities overwhelmed by acts of terrorism, natural disaster, or other emergencies. Disaster Operations offers a unique capability that ensures that Federal emergency response systems and capabilities are properly poised to support Federal decision makers and immediately receive and react to requirements necessary to support states overcome by an emergency or major disaster.

In FY 2007, FEMA concentrated on improving operational core competencies, in incident management, operational planning, emergency communications, and catastrophic disaster response planning. Real time information sharing is now occurring at the local, State, and Federal levels. FEMA is using advances in technology satellite imagery, radios, and frequency management to perform its operational mission. For the Urban Search and Rescue (US&R) program, FEMA has implemented operational readiness evaluations and training to increase task force operational capabilities. Site-specific catastrophic disaster response planning was initiated for three high risk areas of the U.S.: the New Madrid Seismic Zone; a Category 5 Hurricane impacting Southern Florida; and earthquakes in California.

In FY 2008, FEMA will establish Incident Management Assist Teams (IMATs), the next generation of rapidly deployable interagency National and Regional emergency response teams. These teams, designed to provide a forward Federal presence to better manage and coordinate the National response for catastrophic incidents, will rapidly deploy to an incident or incident-threatened venue, provide leadership in the identification and provision of Federal assistance, and coordinate and integrate inter-jurisdictional response in support of the affected State(s) or U.S. Territories. Disaster Operations plans to enhance the staffing of operational planners at FEMA HQ and each FEMA Region. To improve disaster workforce management, we will continue to standardize recruitment, hiring, training, and credentialing of all disaster responders and develop a website for communication of policies and procedures to all disaster responders. We will provide increased functional training to US&R Task Force members and will sponsor catastrophic scenario-driven workshops will be held for states affected by the New Madrid Seismic Zone and for a Category 5 Hurricane impacting Southern Florida.

In FY 2009, Disaster Operations plans to continue efforts to expand the emergency management body of knowledge and strengthen emergency management education improve FEMA's incident management capability through 24/7 situational awareness; strengthen FEMA's Regional operations and partnerships; and continue the transition to the next generation of rapidly deployable interagency National and Regional emergency response teams. FEMA will support the development of operational planning capabilities at all levels of emergency management as well as of vertically and horizontally-integrated response plans compliant with the National Incident Management System and the National Response Framework.

### *Grant Programs*

The Grant Programs Directorate (GPD) awards and administers funds to thousands of grant recipients annually. GPD grant programs serve the public by providing support to assist federal agencies, states, territories, tribal, and local jurisdictions to prepare, prevent, plan for, and respond to acts of terrorism and major disasters. GPD also serves as the executive agent for development of grant guidance including the formulation of the risk methodology used to support grant allocations. GPD is fiscally responsible for approximately 17,000 open grants and is programmatically responsible for more than two-thirds of those grants. GPD subject matter experts provide on-site programmatic monitoring and technical assistance to grantees, while analyzing, evaluating and ensuring accountability and program effectiveness. This directorate also manages the business processes necessary for announcing, awarding, monitoring, and reporting on FEMA's grant programs. The grant programs administered by GPD include the Homeland Security Grant Program (HSGP), Infrastructure Protection Program (IPP), Public Safety Interoperable Communications (PSIC) Grant Program, Assistance to Firefighters Grant Program (AFG), and Emergency Management Performance Grants (EMPG).

In FY 2007, over \$2.305 billion in grants were provided to states, territories, fire departments and emergency medical services organizations. State Preparedness Grants, which include State Homeland Security Grants, Emergency Management and Performance Grants, Citizen Corps, Law Enforcement Terrorism Prevention Plan and Metropolitan Medical Response System Grants, totaled \$1.113 billion. The Urban Areas Security Initiative Grants Program and Infrastructure Protection Program Grants awarded \$747 million and \$445 million, respectively.

The Assistance to Firefighter Grants (AFG) Program received 20,739 applications and will issue approximately 5,000 grant awards. Of the 20,739 applications received for AFG, 1,276 (6.2%) of these were from urban jurisdictions, 3,436 (16.6%) from suburban jurisdictions, and 16,027 (77.2%) from rural jurisdictions. AFG Grants awards began in July 2007 and are expected to continue through the calendar year.

FEMA also administered the Public Safety Interoperable Communications Grants with the Department of Commerce, a \$1 billion program providing grants to public safety agencies.

In FY 2008, the budget for State Preparedness Grants, Urban Areas Security Initiative Grants, and Infrastructure Protection Program Grants is \$2.5 billion. FEMA will continue to refine the national homeland security planning process to align resources with National Priorities and target capabilities established by the Interim National Preparedness Goal. The AFG program will complete the first stage of strategic planning and establish enhanced performance measures and performance measure reporting as recommended by National Academy of Public Administration.

In FY 2009, the budget for State Preparedness Grants, Urban Areas Security Initiative Grants, and Infrastructure Protection Program Grants is proposed to be \$1.9 billion with an additional \$300 million in Assistance to Fire Fighter Grants. FEMA plans to update the Homeland Security State/Urban Areas Strategies as necessary, and refine and implement the funding allocation methodology based on risk analysis and anticipated return on investment. The AFG program will begin to collect and utilize performance measure data to improve program effectiveness.

### *National Preparedness*

The National Preparedness Directorate works to ensure that the nation is prepared for disasters of all kinds, regardless of cause. It also coordinates and brokers agency and interagency planning initiatives in support of operational response and recovery objectives for the National Response

Framework (NRF) and for the National Incident Management System (NIMS). National Preparedness directs the Office of State and Local Government Coordination (OSLGC), the activities of the Emergency Management Institute (EMI), the Radiological Emergency Preparedness Program (REPP) and the Chemical Stockpile Emergency Preparedness Program (CSEPP).

In FY 2007, National Preparedness participated in revising the National Response Plan (now called the NRF) based on results of lessons learned from the FY 2005 hurricane season, including Hurricane Katrina. FEMA worked with the White House, other Federal agencies, as well as State and local governments, and private and non-profit sector partners to revise the National Response Plan and to write the NRF. FEMA helped to ensure that the more than 5700 comments provided by these groups and the public were taken into account during the revision process. As of FY 2007, 279,334 State students and 1,222,726 local students have been trained in IS700 National Incident Management System (NIMS), an introduction Independent Study course. NPD implemented a revised review and audit process for NPD training courses. The Center for Domestic Preparedness trained 60,000 responders in resident, non-resident, and Train-the-Trainer programs through 2,605 course iterations. The Radiological Emergency Preparedness Program (REPP) provided support and oversight to conduct, evaluate, and report findings to the Nuclear Regulatory Commission (NRC) on 28 joint exercises, and conducted routine and comprehensive reviews to identify and address vulnerabilities.

In FY 2008, NIMS/Incident Command System and NRF training programs will be expanded with DHS training partners (Coast Guard, Federal Law Enforcement Training Center (FLETC), Center for Domestic Preparedness, etc.), other federal agencies, and state and local partners. All National Preparedness training courses will be reviewed at the three year limit. REPP will provide support and oversight to conduct, evaluate, and report findings to the NRC on 31 joint exercises and any associated remedial exercises.

In FY 2009, the Emergency Management Institute will continue to develop and deliver its national-level training program and evaluate the effectiveness and the impact on local, tribal, State, Federal, public, and private sector officials. Training courses will be reviewed and realigned to the target capabilities listing. REPP plans to provide support and oversight to conduct, evaluate, and report findings to the NRC on 33 joint exercises and any associated remedial exercises; and participate in activities associated with the 19 reactor licensing applications anticipated for FY 2008 and 6 addition applications anticipated in FY 2009.

#### *U.S. Fire Administration*

The U.S. Fire Administration prepares the Nation's fire responders through ongoing and, when necessary, expedited training, regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all hazard and terrorism emergencies.

In FY 2007, the National Fire Academy (NFA) delivered 3,010 training programs to 75,675 fire and emergency response personnel; launched NFA Online, a new web-based learning management system for distance learning training; and began development of a new preparedness curriculum. USFA staff provided facilities and support services to the national Emergency Training Center (NETC) in Emmitsburg, MD. The National Fire Data Center disseminated preparedness, prevention, response, and recovery information nationwide via various media and enhanced the National Fire Incident

Reporting System (NFIRS) data collection and analysis methodologies and tools. USFA also supported the rebuilding of the New Orleans fire department after Hurricane Katrina.

In FY 2008, USFA plans to maintain delivery of training programs; ensure the operation and maintenance of the NETC facility in compliance with applicable standards and codes; implement improvements in NFIRS reporting and improve the capability of the Student Admissions System; and develop, manage, and maintain activities related to USFA's responsibilities in the National Response Framework.

In FY 2009, USFA programs and activities will be maintained at the FY 2007 level by capitalizing on the NFA online web-based Learning Management System (LMS) distance learning training.

#### *National Continuity Programs*

FEMA's National Continuity Program provides Executive Agent leadership to guarantee the survival of an enduring constitutional government by ensuring continuity of national operations in response to national emergencies. The Office of National Continuity Coordination ensures that FEMA maintains an appropriately resourced, staffed, and equipped ability to provide Executive Agent leadership for Continuity and National Contingency Programs, and serves as the Federal Executive Agent for the Integrated Public Alert and Warning System (IPAWS).

In FY 2007, FEMA conducted fifty Interagency/state and local continuity exercises. Fifteen Interagency and state and local continuity manager's train-the-trainers courses were delivered, resulting in 452 additional individuals trained and certified and reaching all 30 major departments and agencies and all fifty states. FEMA conducted a major exercise, Quiet Sentinel 07, which included participation of 18 FEMA Offices, Administrations and Directorates. Fifty COOP tabletop exercises were conducted. Fifteen COOP manager's train-the-trainers courses were delivered, resulting in 452 additional individuals trained and certified and reaching all 30 major departments and agencies. At the end of FY 2007, FEMA conducted a series of pilots to support the mandate of Executive Order 13407, Public Alert and Warning System, to upgrade the Nation's emergency alert systems to meet the requirement to broadcast alert and warning messages to 90 percent of the viewing public within 10 minute. In FY 2008 these exercises will be combined under the National Exercise Plan and executed in accordance with HSPD-20/NSPD-51; National Continuity Policy signed May 4, 2007.

FY 2008 base resources will be used to sustain contingency programs that are well-developed and operational; to continue to enhance interagency communications to support national-level command and control systems; and to develop and deploy new technologies to improve contingency system programs. The IPAWS will continue work in the categories of: protocols, standards and procedures; architecture for delivery over many paths; related test, training and exercises; public education, conferences, and web based opt-in alerts to computers, pagers, etc.; begin incremental deployment of the first iteration of IPAWS capabilities; and begin expanding the number and capabilities of the Primary Entry Points (PEP) stations. It will also begin implementing Digital Emergency Alert System (DEAS) to utilize public broadcast systems satellite network to distribute audio, text, and video to PBS affiliates nationwide. FY 2008 funding to Mt. Weather will initiate mechanical infrastructure upgrades, increase the electrical power input and distribution, and enhance environmental compliance.

In FY 2009, FEMA will continue to serve as the Executive Agency for Federal Continuity, assisting government agencies in the implementation of Continuity policy and requirements.

FEMA will also sustain the IPAWS emergency warnings through broadcasts and other distribution paths to reach 90 percent of the public within 10 minutes.

### *Mitigation*

FEMA's Mitigation Program works to strengthen mitigation nationwide to reduce the Nation's risk to natural disasters or other emergencies, and to facilitate adoption and enforcement of up-to-date design and construction practices through State and local building codes. Mitigation supports activities that result in sound risk management decisions by individuals, private and public sector entities, State, local and tribal governments, and Federal agencies. The Mitigation programs are conducted through three core activities: risk identification and assessment, risk reduction, and insurance against flood risk. These core activities work in tandem to create safer communities by reducing the loss of life and property, to enable individuals to recover more rapidly from floods and other disasters, and to lessen the financial impact on the U.S. Treasury, States, and local and tribal communities.

In FY 2007, Mitigation Programs prevented an estimated \$2.4 billion in potential property losses, disaster recovery, and other costs. FEMA awarded nearly \$50 million to communities nationwide through its Pre-Disaster Mitigation (PDM) grant program, which provides funding for implementing cost-effective hazard mitigation planning and projects before disasters occur. FEMA's Flood Map Modernization program updated and transformed additional flood maps into more reliable, easy-to-use, and readily available digital products using the latest mapping technology. New flood maps were produced for jurisdictions representing approximately 60 percent of the Nation's population. Maps currently under development represent an additional 32 percent of the population. In FY 2007, regulations to implement the Severe Repetitive Loss (SRL) grant programs were developed, along with the electronic application tool for State and local governments. The SRL program provides funding to mitigate those properties that have the largest impact on claims paid from the National Flood Insurance Fund, and was established by the Bunning-Bereuter-Blumenauer Flood Reform Act of 2004, which amended the National Flood Insurance Act of 1968.

In FY 2008 and FY 2009, the Mitigation Program will continue to administer over 5 million flood insurance policies and provide technical and financial assistance to States, tribes, and local governments for activities that mitigate the risk from future disasters. In addition, with funding through FY 2008, the Mitigation Program will continue its major effort to modernize and update the Nation's flood maps, resulting in improved digital flood maps for the entire Nation. In FY 2009 FEMA is requesting \$150 million to ensure the Map Modernization investment is preserved and make progress toward addressing flood hazard data needs for communities who rely heavily on structural flood control defenses as well as those communities along the Nation's open coasts. Further, the requested FY 2009 funding will allow FEMA to smoothly transition to a future multi-year mapping endeavor.

### *National Capital Region Coordination*

The Office of National Capital Region Coordination (NCRC) advances homeland security, including all hazards preparedness, in the National Capital Region. NCRC serves as a model for other regions of the country. NCRC focuses on developing and refining a common regional approach to homeland security that result in integrated strategies and interoperability among Federal, State, local, regional and private/non-profit stakeholders. NCRC's primary responsibilities include coordinating and participating in programs and initiatives aimed at enhancing the homeland security posture of the region.

## Key Strategic Issues

*Vision for New FEMA: The Nation's Preeminent Emergency Management and Preparedness Agency.* FEMA will be an organization in touch with America, and valued across all jurisdictions – Federal, state, local and tribal, and by the private sector and other non-governmental organizations - as an engaged, agile, responsive, and trusted leader and partner in preparedness and emergency management. The new organization will reflect the expanded scope of FEMA's responsibilities; one that supports a more nimble, flexible use of resources. It will strengthen coordination among FEMA elements and with other DHS components and it will enable FEMA to better coordinate with agencies and departments outside of DHS. It will also deliver enhanced capabilities to partners at the state and local levels and engage capabilities of the private sector.

*Assuming a Broad New Mission.* FEMA will capitalize on the requirements set forth within the Post-Katrina Emergency Management Reform Act of 2006 to exercise national leadership and provide more complete service to the American people and Federal, state, local, and tribal counterparts. Never before has such a broad scope of homeland security prevention, protection, response, and recovery missions for all hazard events resided within a single component of the Department of Homeland Security. A successfully integrated and supported FEMA will result in a nation that is prepared to reduce the loss of life and property.

Substantial progress has already been made to integrate and support operational and preparedness missions that transferred to FEMA in FY 2007, and much work remains to ensure their alignment is synchronized with the "Vision for New FEMA." Additional steps are underway to unify strategic planning efforts, build robust disaster operations, disaster assistance, and logistics capabilities, and integrate grants, training, exercise, technical assistance, and communications platforms.

FEMA regions will have an expanded role in executing the broad national mission entrusted to FEMA because their operations provide an invaluable perspective to properly shape policy and planning performed at headquarters. Regions are also uniquely situated to facilitate continuous coordination with other Federal counterparts, state and local governments, the public and private sectors, and citizens. Together, the enhancement of core emergency management functions combined with new missions gained through the Post-Katrina Emergency Management Reform Act will enable FEMA and the Federal government to provide more complete emergency management services.

*Priorities.* The "New FEMA" will focus on initiatives the American public deserves and expects from the Nation's preeminent emergency management agency. The FY 2009 priorities for building this capability center on the following priorities:

- **Modernize & Integrate FEMA Information Technology (IT) Systems.** FEMA's IT systems are the tools that enable every mission and business process for the Agency and serve as the primary building blocks for New FEMA. It is imperative that FEMA develop and deploy a consistent architecture that will support information integration for the agency. By employing new technologies to enhance capabilities and efficiencies of service, FEMA will strengthen and unify DHS operations and management.

- **Invigorate FEMA Logistics.** Delivering the right material, to the right place, at the right time is one of the most critical missions FEMA coordinates and performs. FEMA is embarking on a process to develop an effective and efficient logistics planning and operations capability similar to Department of Defense strategic level logistics organization. To accomplish this goal, FEMA elevated its logistics function to the Directorate level and will develop it as a core competency area. FEMA will transform its logistics operating capability and enhance logistics management by leveraging public sector partnerships and incorporating industry best practices to efficiently support domestic emergencies.
- **Fill FEMA's Capacity Gaps.** FEMA's mission set and the expectations of performance for the Agency have substantially changed in the Post-Katrina environment. To ensure that FEMA meets Congressional intent and the American public's expectations, the agency must grow the permanent workforce in key strategic areas and provide the right educational and training opportunities for the current workforce. FEMA will work with its partners to build a professional workforce in emergency management and in key business areas to ensure FEMA's mission success. FEMA will also ensure the workforce has a safe, healthy, and efficient work environment.

## C. Resources Requested and Performance Impact

### **Major Changes within the Base level**

FEMA's FY 2009 budget request reflects an ongoing examination of the base budget to more effectively apply resources to meet legislative mandates and implement the FEMA vision. The FEMA Management and Administration appropriation has been restructured to reflect the realignment of core management and administration functions and resources from appropriations for the Disaster Assistance Direct Loan Program, the United States Fire Administration, and the Disaster Relief Fund. The proposed realignments will improve management efficiency and accountability, and provide a stable operating budget for non-disaster fixed-costs. Going forward, FEMA expects further revisions to increase management efficiencies by requesting authorization to include management costs for State and Local Programs within the FEMA Management and Administration appropriation.

### **Increments over current service level**

In FY 2007 and FY 2008, FEMA has begun a transformation to achieve the Agency's vision for the future. The \$5.7 billion requested in FY 2009 includes a \$233.4 million net increase in base funding in the Operations, Management and Administration account to continue to transform the agency by modernizing and integrating IT systems, and filling capacity gaps, both in the facilities infrastructure and in the workforce.

#### *Information Technology (\$20.8 million)*

Employing technology as a strategic tool is crucial to FEMA's success in meeting the huge challenge of becoming the preeminent emergency management agency. Our systems must not only be easily accessible to our users and business partners, but also include processes that contribute to FEMA's providing rapid, compassionate, and simply- accessed disaster assistance for every disaster victim and affected community.

#### *Facilities (\$10.0 million)*

This funding will be used to cover projected costs for relocations associated with expiring leases of five (5) FEMA Regional Offices and FEMA Headquarters; build-out costs for new FTEs.

*Shape the Workforce (\$33.8 million and 118 Positions/59 FTE)*

The additional positions and dollars will allow us to continue to increase our base resources and further the development of the operational core competencies necessary to achieve our vision, restore public confidence, and ensure the ability to successfully respond to future Katrina-sized events. In FY 2009, FEMA will grow the permanent workforce in key areas and complete critical training programs in the core competencies such as incident management, operational planning, disaster logistics, etc. Resources will also be used to provide the necessary equipment and other support needed for staff. Providing the workforce resources at the requested level will allow FEMA to strengthen the following key areas:

- *Incident Management Assessment Teams* (\$5.0 million/15 positions)

These resources continue the plan of forming three National and ten Regional Incident Management Assistance Teams (IMAT) to integrate the Federal government's emergency preparedness, protection, response, recovery, and mitigation activities to better address all-hazards, threats, disasters and emergencies. In FY 2009, FEMA plans to deploy the second National IMAT and begin the establishment of the fifth Regional IMAT.

- *RRCC 24/7 Watch Capability* (\$1.9 million/15 positions)

FEMA will move towards 24/7 operational awareness capability at its Regional Response Coordination Centers (RRCCs) with the addition of 15 positions. The additional positions will allow for continued progress towards reaching the goal of establishing a sustainable 24/7 watch in all regions.

- *Operational Planning* (\$1.3 million/10 positions)

The additional resources will be used to continue to expand FEMA's capability to work with State partners on the development of operational plans and more fully develop executable plans at the state/regional levels in accordance with the requirements of HSPD-8 Annex I.

- *Emergency Communications* (\$2.2 million/0 positions)

Mobile Emergency Response Support (MERS) is one of DHS/FEMA's most valuable disaster emergency communications mission support assets. It must be maintained and improved to ensure effective catastrophic disaster interoperable communications response support consistent with FEMA's Vision for emergency communications. MERS will deploy tactical command, control, and communications vehicles designed to provide voice, data, video, and tactical interoperable communications to both first responders on-scene, and to link critical Federal and state incident management centers. The funding increase will help provide necessary upgrades to existing equipment and for new equipment purchase to maintain and support communications systems to deliver tactical communications when necessary. Priority investments areas include Tactical Incident Response Vehicles, Tactical Network Switch Vehicles and Power Generation Equipment units.

- *Disaster Logistics* (\$10.3 million/30 positions)

The additional Logistics staff will help to institutionalize command and control of strategic logistics planning, operations and management while pushing operational control down to the most effective level of execution. This includes Logistics Planners at both the Regions and Headquarters; Logistics Operations Specialists, and National Emergency Housing Unit Site Managers. Additional resources will be used to transform and maintain a robust logistics capability by incorporating a comprehensive Third Party Logistics environment into the FEMA logistics structure; implement a modernized enterprise logistics property management system; and develop and maintain a logistics management certification program to ensure a pool of technically qualified personnel and a robust logistics community.

- *Disaster Assistance* (\$1.0 million/8 positions)

The additional staff anticipated in FY 2009 will contribute to continuing to implement the human resources strategic plan for Disaster Assistance. Specifically, the positions will be distributed to the Regions for Individual or Public Assistance Programs. The combination of these efforts will begin to address the shortage of personnel with Individual Assistance expertise, especially at the management level. The region's capabilities will be enhanced to avoid abandoning regional work due to new disasters. The enhanced management capabilities and subject matter expertise available will better enable the Directorate to meet the increased scope of and expectations for the disaster assistance mission as a result of new legislation, White House recommendations, and lessons learned as a result of Hurricane Katrina. Finally, we will begin to cement FEMA's leadership role for ESF #6 under the National Response Framework.

- *Hazard Mitigation* (\$4.0 million/4 positions)

This increase will add staff and dollars for several program activities including Mitigation Planning, the National Earthquake Hazards Reduction Program (NEHRP) and Building Sciences. These activities work together to play a role in the creation of safer communities nationwide by reducing the loss of life and property. These resources will further improve the risk assessment and risk prioritization of our Nation's aging dam infrastructure. It will also provide for the development of a web-based Mitigation Plans Repository; provide an increase of \$4 million for State grants to enable States to implement earthquake mitigation activities; and address two critical projects within Mitigation's Building Science programs: a) the Wind Hazard Mitigation Studies/Guidance and b) the Risk Management Series (RMS), which provides design guidance for mitigating multi-hazard events and are extensively used to conduct risk assessments of critical infrastructure by Federal departments and agencies.

- *Capacity Building for Business Activities* (\$8.0 million/36 positions)

In FY 2007 and 2008, FEMA initiated Phase I of transforming FEMA in to the *Nation's Preeminent Emergency Management Agency*. Through our vision for a New FEMA, we are strengthening core capabilities and the partnerships and people that comprise the Nation's preparedness and emergency management system. Our core competencies must be grounded in an ethos that employs a Business Approach to Achieving Desired Results. This business approach will enable wise business decisions backed by finance, budget, acquisition management, human resource and information systems support capabilities designed and scaled to enhance FEMA's mission success. Resources will be targeted at the following support services areas within FEMA to ensure adequate coordination, oversight, internal controls, and compliance with regulatory requirements.

- Regional Administrators (4 FTP)
- Office of Policy and Program Analysis (5 FTP)
- Office of the Chief Financial Officer (Budget, Financial Management, Internal Controls) (20 FTP)
- Office of the Chief Counsel (2 FTP)
- Office of Management (Executive Office, Acquisition) (5 FTP)

These resources will also provide for an increase in staff training and professional development FEMA-wide, to include certification, tuition assistance and leadership training.

*National Security Activities* (\$10.413 million)

The requested funds will support upgrades to the Mt. Weather Emergency Operations Center (MWEOC) critical and essential infrastructure. These upgrades include mechanical infrastructure improvements, safety enhancements, information technology site improvements, and utility distribution systems. Increased funding will also ensure compliance with environmental laws and regulations. New funding is necessary to ensure the immediate readiness of facilities that house FEMA disaster response support activities, 24-hour watch centers, centralized Automated Data Processing (ADP), protected telecommunications infrastructure as well as essential national security missions and capabilities.

*Fixed Disaster Support Costs*(\$149 million/298 positions)

The requested funds and positions will allow FEMA to complete the conversion of 4-year CORE employees to permanent Operating Activities positions and to provide resources for activities that are not disaster specific or disaster readiness and support activities.

As FEMA's mission has evolved, the distinction between activities funded through the Disaster Support Account and through the OMA appropriation has blurred. Today, both accounts fund similar types of activities that support the agency's preparedness, mitigation, response, recovery, administrative, and support functions. Funds also are used for line items such as salaries, benefits, travel, rent, purchase of equipment, necessary upgrades, maintenance of information technology systems, and maintenance of property. For FY 2009, FEMA requests to fund these activities in the OMA account to allow for more efficient administration and increase budgetary discipline and accountability.

Over the past ten years, FEMA has relied on temporary employees hired under the authority of the Stafford Act to staff positions at fixed facilities, headquarters, and regional offices. The current

workforce structure has not kept pace with the changing demands and organizational transitions within FEMA and DHS. The level of preparedness and response capability required of FEMA demands a restructuring of its workforce to include a transition of 4-year CORE personnel from temporary employees to permanent full-time employees (PFT). As FEMA's workload has increased and the mission has evolved, the Agency has come to rely heavily on workers hired under the temporary authority whose workload remains constant and whose duties are no different from those of Title 5 employees. The only difference between PFT and CORE personnel is that the Stafford Act employees may only work on DRF-funded activities and programs. This has led to inequity issues, and in some cases, inefficiencies because functions and operations that support both DRF-funded and non-DRF funded programs are often identical in nature.

The FY 2007 Homeland Security Appropriations Act, P.L. 109-295, Section 682, provided \$30,000,000 to fund up to 250 permanent staff to replace existing temporary Stafford Act workforce. The FY 2008 Omnibus Bill provided for the transfer of \$60,000,000 from the DRF to OMA to provide FEMA with additional personnel resources to more efficiently and effectively manage both DRF and non-DRF funded operations by establishing a core cadre of full-time, deployable subject matter experts to provide continuity, supervision, and leadership during disaster response and recovery operations.

#### *Reduction to Urban Search and Rescue*

FEMA requests a programmatic reduction of \$7,500,000 for the Urban Search and Rescue in FY 2009. The reduction in the Urban Search and Rescue Program is based on several factors including the substantial level of funds awarded over the past five years and a reprioritization of FEMA resources. Even at the reduced level, FEMA will continue to improve the programs' effectiveness as a national program to enhance overall preparedness.

#### D. FEMA Programs and Performance Goals – Alignment to DHS Goals and Objectives

The following list of programs with their performance goals are followed by the DHS goals and objective they support.

*Logistics Management Program Performance Goal* – Ensure Logistics Management capabilities to include management of all-source range of assets, teams, equipment and supplies are available to respond to federally declared disasters quickly and efficiently.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.1 - Response and Recovery

*Disaster Assistance Program Performance Goal* – Help individuals and communities affected by federally declared disasters return to normal function quickly and efficiently, while planning for catastrophic disaster recovery operations.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.1 - Response and Recovery

*Disaster Operations Program Performance Goal* – Ensure the capability and readiness of all FEMA disaster response teams and logistics capabilities to respond quickly and effectively to provide assistance when and where needed.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.1 - Response and Recovery

*Grants Program Performance Goal* – Enhance the Nation's preparedness by increasing the capability of states, territories, and local jurisdictions to prevent, protect against, respond to, and recover from terrorism and all-hazard events through the provision of grants, first responder training, technical assistance, and exercises.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.2 - Preparedness

*National Preparedness Performance Goal* – Help ensure the nation is ready to respond to and recover from acts of terrorism, natural disasters, or other emergencies through implementation of the National Incident Management System (NIMS) and the provision of emergency management training.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.2 – Preparedness

*Fire and Emergency Assistance Performance Goal* – Maximize the health and safety of the public and firefighting personnel against fire and fire-related hazards by providing assistance to fire departments and by training the Nation's fire responders and health care personnel to prevent, protect against, respond to, and recover from fire-related events.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.2 – Preparedness

*National Continuity Program Performance Goal* - Ensure all Federal Departments and Agencies have fully operational Continuity of Operations (COOP) and Continuity of Government (COG) capabilities.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.1 - Response and Recovery

*Mitigation Program Performance Goal* - Reduce the impact of natural hazards on people and property through the analysis and reduction of risks and the provision of flood insurance.

Goal 4 - Build a nimble, effective emergency response system and a culture of preparedness  
Objective 4.2 – Preparedness

E. Performance Based Budget Highlights by Program

For each major program, the performance goal, main performance measure/s, indicators, budget including allocation of non-programmatic overhead, and FTE are shown below. A complete listing of performance measures may be found on the OMB website Expectmore.gov. In a few instances program names in PARTweb may differ slightly from those used in the Performance Budget.

| <b>Program: Disaster Assistance</b>   |             |              |              |             |             |             |
|---|-------------|--------------|--------------|-------------|-------------|-------------|
| <b>Performance Goal:</b> Help individuals and communities affected by federally declared disasters return to normal function quickly and efficiently, while planning for catastrophic disaster recovery operations. |             |              |              |             |             |             |
| <b>DHS strategic objectives supported and % allocation of activities:</b>   |             |              |              |             |             |             |
| <b>Fiscal Year:</b>   | FY 2004     | FY 2005      | FY 2006      | FY 2007     | FY 2008     | FY 2009     |
| <b>\$ Thousands</b>   | \$3,266,582 | \$33,812,600 | \$20,730,361 | \$5,104,310 | \$4,207,827 | \$1,732,235 |
| <b>FTE</b>  | 2,821       | 4,406        | 6,995        | 3,191       | 2,820       | 3,216       |

Performance Plan Measures

| <b>Measure: Percent of customers satisfied with Individual Recovery Assistance</b>  |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Description of Measure:</b> The percent of Americans affected by disaster or other emergency who indicate satisfaction with the Individual Disaster Recovery Assistance provided by FEMA to help them return to normal and function quickly and efficiently. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 90%     | 90%     | 91%     | 92%     | 93%     |
| <b>Actual:</b>  | None    | 93%     | 91%     | 92.2%   | N/A     | N/A     |

| <b>Measure: Percent of customers satisfied with Public Recovery Assistance</b>  |         |                    |         |         |         |         |
|---|---------|--------------------|---------|---------|---------|---------|
| <b>Description of Measure:</b> The percent of communities affected by disaster or other emergencies who indicate satisfaction with the Public Disaster Recovery Assistance provided by FEMA to help them return to normal and function quickly and efficiently. Assistance includes debris removal, emergency protective measures, and repair or replacement of damaged infrastructure. |         |                    |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005            | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 87%                | 88%     | 88%     | 90%     | 90%     |
| <b>Actual:</b>  | None    | Data Not Available | 88%     | 88%     | N/A     | N/A     |

| <b>Program: Disaster Operations</b>   |             |             |             |           |           |           |
|---|-------------|-------------|-------------|-----------|-----------|-----------|
| <b>Performance Goal:</b> Provide the core Federal operational capabilities needed to save lives, minimize suffering, and protect property in a timely and effective manner in communities overwhelmed by acts of terrorism, natural disaster, or other emergencies. |             |             |             |           |           |           |
| <b>DHS strategic objectives supported and % allocation of activities:</b>   |             |             |             |           |           |           |
| <b>Fiscal Year:</b>   | FY 2004     | FY 2005     | FY 2006     | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>   | \$1,692,165 | \$9,468,000 | \$1,115,945 | \$666,547 | \$307,838 | \$425,430 |
| <b>FTE</b>  | 1,220       | 1,554       | 801         | 695       | 694       | 694       |

**Performance Plan Measures**

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of response teams reported at operational status.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The percent of FEMA's response teams indicating they are ready to respond quickly and effectively to acts of terrorism, natural disasters, and other emergencies. This measure tracks the readiness of three types of teams: the 28 task forces of Urban Search and Rescue (USR); the five Mobile Emergency Response Support (MERS) detachments; and the two Federal Incident Response Support Teams (FIRSTs). |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 50%     | 85%     | 88%     | 91%     | 94%     |
| <b>Actual:</b>  | None    | 50%     | 85%     | 88%     | N/A     | N/A     |

|  |         |             |             |             |             |             |
|--|---------|-------------|-------------|-------------|-------------|-------------|
| <b>Program: Grants Program</b>   |         |             |             |             |             |             |
| <b>Performance Goal:</b> Enhance the Nation's preparedness by increasing and measuring the capability of States, territories, and local jurisdictions to prevent, protect, respond, and recover from terrorism and all - hazard incidents. |         |             |             |             |             |             |
| <b>DHS strategic objectives supported and % allocation of activities:</b>  |         |             |             |             |             |             |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005     | FY 2006     | FY 2007     | FY 2008     | FY 2009     |
| <b>\$ Thousands</b>  | None    | \$2,871,718 | \$2,683,809 | \$3,354,555 | \$3,934,049 | \$2,105,627 |
| <b>FTE</b>   | None    | 62          | 184         | 216         | 341         | 357         |

**Performance Plan Measures**

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of analyzed capabilities performed acceptably in exercises.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> Exercises form a critical part of the backbone of national emergency preparedness. During an exercise, a jurisdiction is required to implement its critical capabilities under circumstances as close as possible to an actual emergency. Historically exercises were evaluated using critical tasks; now they are evaluated using capabilities as described by the Homeland Security Exercise and Evaluation Program. Exercises expose areas of strength, weaknesses in plans and abilities, and areas of possible improvement. As such, exercises are the most cost - effective and accessible means of demonstrating whether or not a jurisdiction has attained a desired level of emergency capabilities. |         |         |         |         |         |         |

|--|---------|---------|---------|----------------|---------|---------|
| <b>Measure:</b> Percent of state and local homeland security agency grant recipients reporting significant progress towards identified goals and objectives. |         |         |         |                |         |         |
| <b>Description of Measure:</b> This measure reflects grantee progress against goals and objectives identified in homeland security strategies.               |         |         |         |                |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007        | FY 2008 | FY 2009 |
| <b>Target:</b>   | None    | None    | None    | Baseline (25%) | 26%     | 27%     |
| <b>Actual:</b>   | None    | None    | None    | 67%            | N/A     | N/A     |

|  |         |         |         |          |         |         |
|--|---------|---------|---------|----------|---------|---------|
| <b>Measure:</b> Percent of urban area grant recipients reporting significant progress towards identified goals and objectives.   |         |         |         |          |         |         |
| <b>Description of Measure:</b> This measure reflects grantee progress against the goals and objectives identified in their Urban Area homeland security strategies. This measure will be collected during the monitoring visits conducted by the FEMA/National Preparedness Directorate (NPD) Preparedness Officers (PO). Each objective is measured on a 0 - 5 scale with 0 meaning zero progress and 5 meaning the objective has been completed. The term "significant" means a 0.1 increase in the average progress of all of the objectives in the grantee's strategy. |         |         |         |          |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007  | FY 2008 | FY 2009 |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent reduction in firefighter injuries in jurisdictions receiving Assistance to Firefighter Grants funding compared to national average.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure compares the percent reduction in fighter injuries in jurisdictions that receive AFG grants to the average percent reduction in firefighter injuries nationwide. The measure assesses improvements in firefighter safety in jurisdictions that receive AFG funding. Comparing AFG - funded jurisdictions to the national average shows the impact of AFG grant awards on reducing firefighter injuries. The measure specifically focuses on line - of - duty firefighter injuries, not any injury that a firefighter may have. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Average time in hours to provide essential logistical services to an impacted community of 50,000 or fewer.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The average response time in hours to provide essential logistical services to a community of 50,000 or fewer, in the event of a natural disaster or other emergency. FEMA provides logistical services to communities which include ice, water, meals ready to eat, and other commodities. Start time is measured from the driver pick up time and end time is measured as delivery to the destination. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 64      | 60      | 60      | 56      | 36      |

| <b>\$ Thousands</b>  | \$27,865 | \$60,600 | \$129,342 | \$157,770 | \$215,552 | \$228,228 |
| <b>FTE</b>   | 116      | 132      | 227       | 309       | 251       | 262       |

### Performance Plan Measures

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of Federal Departments and Agencies with fully operational Continuity of Operations (COOP) capabilities   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The Federal Emergency Management Agency (FEMA) works with Federal departments and agencies to develop and exercise plans that ensure the continuation of federal operations and the continuity and survival of an enduring constitutional government. FEMA collects the results of exercises and self - assessments to measure the percentage of departments and agencies that have in place the necessary plans and capabilities. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 90%     | 95%     | 100%    | 100%    | 100%    |
| <b>Actual:</b>  | None    | 90%     | 95%     | 100%    | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of fully operational Continuity of Government (COG) capabilities  |         |         |         |         |         |         |
| <b>Description of Measure:</b> The percentage of federal departments and agencies that have developed and exercised plans to ensure the continuity of government operations and essential functions in the event of crisis or disaster. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 80%     | 70%     | 80%     | 90%     | 100%    |
| <b>Actual:</b>  | None    | 20%     | 70%     | 80%     | N/A     | N/A     |

|   |           |           |           |           |           |           |
|---|-----------|-----------|-----------|-----------|-----------|-----------|
| <b>Program: National Preparedness</b>   |           |           |           |           |           |           |
| <b>Performance Goal:</b> Improve the nations ability to respond to and recover from acts of terrorism, natural disasters, or other emergencies through implementation of the National Incident Management System (NIMS) and the provision of emergency management training. |           |           |           |           |           |           |
| <b>DHS strategic objectives supported and % allocation of activities:</b>   |           |           |           |           |           |           |
| <b>Fiscal Year:</b>   | FY 2004   | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>   | \$345,286 | \$136,300 | \$210,551 | \$393,238 | \$327,381 | \$257,250 |
| <b>FTE</b>  | 589       | 620       | 340       | 517       | 698       | 730       |

**Performance Plan Measures**

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent increase in knowledge, skills, and abilities (KSAs) of State and local homeland security preparedness professionals receiving training   |         |         |         |         |         |         |
| <b>Description of Measure:</b> Percent improvement in knowledge, skills, and abilities (KSA) of state and local homeland security professionals after the completion of training, which demonstrates strengthened first responder preparedness and mitigation with respect to acts of terrorism, natural disasters, and other emergencies. Measuring these improvements indicates the impact of training services on the nation's preparedness level. This measure evaluates the gain in knowledge, skills, and abilities of students through pre and post course assessments. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>   | N/A     | 37%     | 38%     | 27%     | 27%     | 28%     |
| <b>Actual:</b>   | None    | 38.5%   | 27%     | 25%     | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of Federal, State, Local and Tribal Governments compliant with the National Incident Management System (NIMS)   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure tracks the percentage of critical partners who are compliant with the National Incident Management System (NIMS). Federal Agencies were required to identify a point of contact within their agency to act as a liaison with NIMS Integration Center (NIC), create a NIMS Implementation Plan, incorporate NIMS into their respective Emergency operations Plans, and train all appropriate personnel in the NIMS standard training curriculum. States are required to submit self - certification of compliance based on 23 compliance requirements in the NIMCAST system. The DHS Office of Grants and Training (OGT) and the NIC coordinate to monitor the previous year's submission of NIMS implementation within States. Selective data audits, field monitoring and continuous refinements on reporting metrics to identify inconsistencies and errors are used to ensure reliability. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 100%    | 100%    | 100%    | 100%    | 100%    |
| <b>Actual:</b>  | None    | 82%     | 100%    | 100%    | N/A     | N/A     |

|   |         |         |         |         |         |         |
|---|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of Radiological Emergency Preparedness Program communities with a nuclear power plant that are fully capable of responding to an accident originating at the site.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> Percentage of U.S. communities surrounding a nuclear power plant that are prepared and capable of responding to and recovering from an accident or terrorist attack. This assessment is based on first responder performance in exercises conducted at the facilities. |         |         |         |         |         |         |
| <b>Fiscal Year:</b>   | FY 2004 | FY 2005 | FY 2006 | FY 2007 | FY 2008 | FY 2009 |
| <b>Target:</b>  | None    | 89%     | 100%    | 100%    | 100%    | 100%    |
| <b>Actual:</b>  | None    | None    | 100%    | 100%    | N/A     | N/A     |

|  |         |         |         |         |         |         |
|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of respondents reporting they are better prepared to deal with disasters and emergencies as a result of training   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The percent of students attending training at the Emergency Management Institute (EMI) and FEMA's Employee Development program who responded to a survey and indicated that they are better prepared to deal with disasters and emergencies as a result of the training they received. This training provides Federal, State, local and tribal officials having key emergency responsibilities with the knowledge and skills needed to strengthen nationwide preparedness and respond to, recover from, and mitigate against acts of terrorism, natural disasters, and other emergencies. |         |         |         |         |         |         |

| <b>Measure:</b> The per capita loss of life due to fire in the U.S.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure is based on data that analyzes the reduction in the rate of loss of life from fire - related events by one percent per year. It examines the fatalities in the U.S. per million population using modified targets based on the review of historical data. The National Fire Protection Association (NFPA) reports data in September for the previous year. NFPA Survey data are analyzed to produce the report on fire related civilian fatalities. FY 2006 actual results are the most recent data available and will be updated when NFPA reports the data in September of the current fiscal year. |         |         |         |         |         |         |

**iii. Status of Congressionally Requested Studies, Reports, and Evaluation**

**Department of Homeland Security  
U.S. Citizenship & Immigration Services**

| <b>Fiscal Year</b> | <b>Due Date</b> | <b>Reference/Citation</b>              | <b>Requirement</b>  | <b>Status</b>  |
|--------------------|-----------------|--|---|--|
| 2006               | 2/10/2006       | House Report 109-79, Title IV, p. 100  | Basic Pilot Program--The Committee requests that CIS submit a comprehensive report that outlines the issues involved in requiring all United States employers to electronically check the legal work status of all new employees. The report should include the costs of such a requirement, options and impediments to charging a user fee for such service, and any plans for instituting such a requirement. | USCIS will submit a report which addresses fee and cost issues associated with a mandatory E-Verify program if it were enacted, as well as the current voluntary program. The anticipated delivery date to Congress is early spring. |
| 2007               | Quarterly       | Senate Report 109-273, Title IV, p. 84 | Backlog Elimination Status Report--provide a quarterly status report on progress in eliminating the backlog. This report should describe the current backlog data, as well as information about the process of backlog reduction.   | Fourth Quarter report is anticipated to for submission to Congress by 3/15/2008.   |

1/ Adjudication Services District Operating Expenses FY 2008 Enacted level reflects \$20M in Emergency funding provided in P.L. 110-161.

2/ E-Verify FY 2008 Enacted level reflects \$60M in Emergency funding provided in P.L. 110-161.

3/ FY 2008 Enacted level reflect proposed reprogramming adjustments.

**Justification:**

The proposed restructuring serves several goals. First, the new structure improves the depiction of USCIS activities. Given the increased focus on both immigration status verification and fraud detection, the new structure uniquely identifies and depicts an integrated budget request in both areas. Immigration operations activities are better integrated and simplified within a single budget category, in particular by reducing the breakout of adjudication activities and incorporating information and customer service spending.

A second goal is the desire to simplify the report-level breakout by combining pay and non-pay line items. USCIS fully intends to internally execute and monitor annual resources with breakouts between pay and non-pay. For those movements that have a significant program, resource, or policy implication, USCIS would continue to keep the Committee apprised irrespective of the revised line item breakout. In addition, most DHS components do not have pay and benefits broken out separately within the appropriations budget structure.

Our final goal concerns the desire to better align activities with organizational units and activity costs. USCIS is continuing to refine its activity-based cost structure. This revised budget structure improves PPA alignment with our activity-based cost structure by bringing core immigration operations under a single PPA category.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. CITIZENSHIP & IMMIGRATION SERVICES SALARIES AND EXPENSES

### I. Appropriation Overview

#### **A. Mission Statement for Salaries and Expenses:**

The U.S. Citizenship and Immigration Services (USCIS) will secure America's promise as a nation of immigrants by providing accurate and useful information to our customers, granting immigration and citizenship benefits, promoting an awareness and understanding of citizenship, and ensuring the integrity of the immigration system. USCIS has established six goals: (1) ensure the security and integrity of the immigration system, (2) provide efficient customer-oriented immigration benefit and information services, (3) increase understanding of citizenship and its privileges and responsibilities, (4) ensure flexible and sound immigration policies and programs that meet the needs and obligations of the nation, including our international treaties on humanitarian protection and trade, (5) strengthen the infrastructure necessary to achieve USCIS' mission, and (6) operate as a high-performance organization and position USCIS as an employer of choice.

The USCIS is a component of the Department of Homeland Security (DHS) that facilitates legal immigration for people seeking to enter, reside, or work in the United States. USCIS possesses the authority to grant or deny immigration benefits – approving over six million immigration benefits each year. These immigration benefits range from work authorization documents to asylum and refugee applications, to petitions for immediate relatives to immigrate to the United States.

The Salaries and Expenses account encompasses the organization's discretionary funding, which currently supports operation of the E-Verify program. E-Verify is an automated, voluntary system that allows U.S. employers to electronically verify name, DOB, and SSN, along with immigration information for non-citizens, against Federal databases to ensure the employment eligibility of both citizen and non-citizen new hires.

The account also funds resources to support the operations of the Cuban-Haitian Entrant Program (CHEP), as well as the Moscow Refugee and Humanitarian Parole programs. These programs transferred into USCIS from ICE in FY 2007, and the Congress provided appropriations to help pay for this cost starting in FY 2008.

#### **B. Budget Activities:**

The budget requests funding to both continue operational support of E-Verify and to expand and upgrade systems to enable growth in employer utilization. Funding will also contribute toward current services support to CHEP and Parole programs. Finally, funding is requested to support implementation of the information sharing and verification requirements of the REAL ID Act.

### **C. Budget Request Summary:**

USCIS requests 262 positions, 262 FTE and \$150,540,000 for the FY 2009 Request. Excluding emergency funding provided in P.L. 110-161, the total adjustment-to-base increase is 66 FTE and \$82,379,000. This amount includes an adjustment of \$22,000,000 to continue the E-Verify program at current service levels, which were partially funded in FY 2008 by no-year carry forward balances from FY 2007. Program increases include 2 positions, 2 FTE and \$67,188,000 for implementation of the REAL ID Act and enhancements to E-Verify.

### **D. Proposed PPA Structure:**

USCIS proposes to change the programs, projects, and activities (PPA) structure. The proposed restructuring serves several goals. First, the new structure improves the depiction of USCIS activities. Given the increased focus on both immigration status verification and fraud detection, the new structure uniquely identifies and depicts an integrated budget request in both areas. Immigration operations activities are better integrated and simplified within a single budget category, in particular by reducing the breakout of adjudication activities and incorporating information and customer service spending.

A second goal is the desire to simplify the report-level breakout by combining pay and non-pay line items. USCIS fully intends to internally execute and monitor annual resources with breakouts between pay and non-pay. For those movements that have a significant program, resource, or policy implication, USCIS would continue to keep the Committee apprised irrespective of the revised line item breakout. In addition, most DHS components do not have pay and benefits broken out separately within the appropriations budget structure.

Our final goal concerns the desire to better align activities with organizational units and activity costs. USCIS is continuing to refine its activity-based cost structure. This revised budget structure improves PPA alignment with our activity-based cost structure by bringing core immigration operations under a single PPA category.

1/ FY 2008 Enacted includes emergency funding of \$60M provided in P.L. 110-161 for this activity.

Funding is requested for 255 positions, 255 FTE and \$100.0 million. Excluding Emergency funds provided, the adjustment-to-base increase is \$82.8 million. This reflects the funding necessary to maintain program current service levels from the FY 2008 Budget level, which also utilized \$22 million of the \$46.5 million no-year, carried-forward funding. In addition, there is an adjustment to annualize authorized FTEs.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

USCIS re-branded the Employment Eligibility Verification Basic Pilot program in August 2007 and the program is now called E-Verify. E-Verify, a program within USCIS' National Security, Records and Verification Directorate, allows employers to use a free, automated system to run employment authorization checks against DHS and Social Security Administration (SSA) databases. E-Verify has been a key component of the Administration's comprehensive immigration reform plan. Along with helping U.S. employers maintain a legal workforce and protect jobs for authorized U.S. workers, use of E-Verify also improves the accuracy of wage and tax reporting. Over the last few years, voluntary use of the program has increased significantly. Currently, the E-Verify program is growing by approximately 1,000 new employers each week.

In FY 2008, USCIS is enhancing and expanding E-Verify. As part of the Administration's 26 initiatives announced in August 2007 to improve border security and our immigration system, USCIS is working to acquire access to passport data and passport and visa photos owned by the Department of State. This addition will expand upon the photo tool addition in FY 2007, which allows employers to verify the authenticity of a new hire's immigration documents. Access to the Department of State's passport and visa photos will provide employers increased capability to detect instances of identity and document fraud in the employment authorization process. Currently, participating employers have

access to photos from immigration documents held by USCIS. In FY 2008, USCIS is also assessing the inclusion of Department of Motor Vehicles (DMV) photos in E-Verify.

In FY 2008, USCIS is working to increase the number of users and the ability of E-Verify to handle a higher volume of information requests. E-Verify is maintaining an outreach and advertising campaign to increase the number of employers using the program and a customer contact center is being developed to provide additional channels of communication for E-Verify users.

To accommodate the growth in E-Verify employers, an E-Verify regional office is being established to improve the effectiveness of immigration status verifications and compliance and monitoring of employers accessing the E-Verify system. USCIS will build reporting and metric systems to track monitoring and compliance issues and reach out to employers to assist those who may be misusing the system. The expansion of E-Verify into the field and development of monitoring and compliance functionalities will begin in FY 2008 and continue throughout FY 2009.

USCIS will work to migrate the Verification Information System (VIS) database to a government controlled data center. VIS is the system used by E-Verify and consists of an integrated database that pulls verification data from other related agency systems, as well as processing functions for handling verification requests. USCIS also will begin to transfer verification applications to the Enterprise Service Bus (ESB). USCIS will work to add database system capacity to match future query growth. In addition, USCIS is working to analyze and provide recommendations on non-web methods for employment verification.

In FY 2009, USCIS will continue to register employers for E-Verify and add system capacity to match query growth as needed. System capacity will be increased through technological enhancements to VIS. A comprehensive independent audit of E-Verify will occur to identify areas for improvement. Contingent upon the growth of E-Verify, USCIS will stand-up and staff regional offices to increase the effectiveness of monitoring and compliance assessment. Additional outreach and training activities will also occur in FY 2009 including seminars across the U.S. Enhancements are also planned for E-Verify's Internet and Intranet websites.

There is a planning estimate of approximately 13 million E-Verify queries in FY 2008 and 25 million queries in FY 2009. Planning estimates of employer participation are 525,000 employers in FY 2008, and another 530,000 employers added in FY 2009 for a total of 1.1 million employers. In FY 2007, there were 3,271,871 queries and 24,480 registered employers. These estimates take into account the recent significant growth in users, an assumption that additional States may require employers to use E-Verify (e.g., Arizona), and the expectation that an amendment to the Federal Acquisition Regulation will require Federal contractors to use E-Verify.

Current services resources support the cost of status verifiers, compliance staff, marketing and outreach, and support contracts (e.g., Help Desk, translation services, and the customer contact center). Funding also supports the operation of the Verification Information System (VIS). Program staff will continue to inform employers about responsibilities under the program, advising them on how to get additional information, and responding to program and procedural questions. Outreach efforts in FY 2009 will focus on the States enacting laws requiring use of E-Verify, certain critical infrastructure sectors, and HR and tax professional organizations and associations.

Current resources also support program administration including operations and policy direction. Funding also supports ongoing support contracts for project management, administration, and independent evaluation.

1/ FY 2007 Actual reflects prior-year charges.

2/ FY 2008 Enacted includes emergency funding of \$20M provided in P.L. 110-161.

Funding is requested for 5 positions, 5 FTE and \$0.540 million to support the Cuban-Haitian Entrant Program (CHEP), as well as the Moscow Refugee and Humanitarian Parole programs. Excluding Emergency funds provided, the adjustment-to-base decrease is \$0.433 million. This includes an inflationary adjustment of \$0.017 million for the Parole programs, and a non-recurring decrease of \$0.450 million in one-time funding for Immigration Services projects received in FY 2008.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Resources will continue current support of up to five positions within the Asylum, Refugee, and International Affairs Division, which houses the management and administration of the Cuban-Haitian Entrant Program (CHEP), as well as the Moscow Refugee and Humanitarian Parole programs. These programs transferred into USCIS from ICE in FY 2007, and the Congress provided appropriations to help pay for this cost starting in FY 2008.

**Program Increase 2:** REAL ID Act Implementation

Strategic Goal & Objective: Protect our nation from dangerous people  
Enhance the integrity of the legal immigration system.

Description of Item

Resources are requested for activities associated with the implementation of the REAL ID Act. Specifically, resources would be used to develop a Consolidated State Validation Center that will allow States to verify document information with the Federal and State source agency as well as enable States to share information.

Justification

The REAL ID Act requires, among other things, that before a State can issue a driver's license or identification card to a person the State must verify the issuance, validity, and completeness of each document required to be presented by the person seeking to obtain a REAL ID compliant driver's license or identification card. The FY 2008 Omnibus Appropriations Act provided \$50 million to the Federal Emergency Management Agency in FY 2008 to help States comply with the provisions of this law.

The FY 2009 funding requested for USCIS is aimed specifically at the development of an information sharing and verification hub that will allow States to verify data against Federal and other State databases as well as improve state-to-state information sharing. USCIS will work with the States on the development of this capability. Once operational this REAL ID Consolidated State Validation Center will be operated by the States and will provide a technical solution for jurisdictions to verify source document information presented by individuals. The Center will provide centralized connectivity to the specific databases States are required to verify against in the Act. These systems include:

- Social Security On-line Verification System (SSOLV) – verifies social security numbers.
- Systematic Alien Verification for Entitlement (SAVE) system – verifies evidence of lawful immigration status.

- Association of Public Health Statistics and Information Systems (NAPHSIS) – verifies birth record information.
- U.S. Department of State systems such as those tied to passports, Consular Report of Birth Abroad, and visas.

Overall, the Center will perform two key, interrelated functions. First, the Center will enable States to submit a single query directed to appropriate databases for validation, with responses combined and a single response delivered to the sender. Second, it will manage State-to-State data exchanges mandated by the REAL ID rule. The Act requires each jurisdiction to refuse to issue a driver's license or identification card to a person holding a driver's license issued by another State without confirmation that the person is terminating or has terminated the driver's license. The Department is currently working to develop necessary State partnerships and develop the Center through the American Association of Motor Vehicle Administrators.

Funding is included within USCIS because it is the core operating agency within DHS that will facilitate through its verification systems State compliance with the REAL ID Act. DHS Policy will continue to provide operational guidance and support.

Continued grant funding to assist States in meeting other requirements of the Act has been requested under the State and Local Grants program within the Federal Emergency Management Agency.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

By facilitating effective information exchanges between government agencies and States, DHS is working directly with States to implement a key component of the REAL ID Act. Our Nation can be protected from dangerous people if persons with actual or potential nefarious goals can be prevented from receiving State, local, or Federal public benefits. In addition, the integrity of the immigration system is facilitated if State efforts through REAL ID discourage the use of false immigration information to unlawfully obtain benefits.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

For necessary expenses for citizenship and immigration services, [\$80,973,000] **\$150,540,000**: Provided, [That of the amount provided under this heading, \$80,000,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act): Provided further, That of the total, \$20,000,000 is provided to address backlogs of security checks associated with pending applications and petitions and shall not be available for obligation until the Secretary of Homeland Security and the United States Attorney General submit to the Committees on Appropriations of the Senate and the House of Representatives a plan to eliminate the backlog of security checks that establishes information sharing protocols to ensure United States Citizenship and Immigration Services has the information it needs to carry out its mission: Provided further,] **That of the total, \$100,000,000 is provided for the E-Verify program to assist U.S. employers with maintaining a legal workforce. Additionally, \$50,000,000 is to support implementation of the REAL ID Act to develop an information sharing and verification capability with States.**

That notwithstanding any other provision of law, funds available to United States Citizenship and Immigration Services may be used to acquire, operate, equip, [and] dispose of **and replace** up to five vehicles for areas where the Administrator of General Services does not provide vehicles for lease: Provided further, That the Director of United States Citizenship and Immigration Services may authorize employees who are assigned to those areas to use such vehicles between the employees' residences and places of employment. (Department of Homeland Security Appropriations Act, 2008.)

### **Explanation of Changes:**

USCIS proposes to delete a provision related to the designation of emergency funding provided for USCIS in FY 2008, and deletes another provision related to funding provided to address the FBI name check backlog. No funding is requested for this purpose in FY 2009.

1/ The FY 2008 Enacted level includes \$60M in emergency funding provided in P.L. 110-161 and \$22M in FY 2007 funding carried forward.

### PPA Mission Statement

This account will fund the operation of the E-Verify Program. The E-Verify Program, a key component of the Department's Secure Border Initiative, involves electronic verification checks of the Social Security Administration and DHS databases, using an automated system to verify employment authorization. In FY 2009, USCIS is using \$24.5 million in anticipated funding carried forward from FY 2008.

### Summary Justification and Explanation of Changes

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$4,033</b>         | <b>28,000</b>           | <b>\$28,812</b>         | <b>\$812</b>                   |

Salaries and Benefits includes costs for 255 FTEs. The FY 2009 request includes an increase of \$812,000 for the proposed increase in personnel compensation.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------|---------------|----------------|----------------|---------------------|
|               | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Travel</b> | \$88          | \$3,300        | \$3,800        | \$500               |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request reflects a \$500,000 increase.

|                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------|---------------|----------------|----------------|---------------------|
|                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>GSA rent</b> | \$3,349       | \$3,386        | \$3,454        | \$68                |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request reflects a \$68,000 increase.

|                   | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |

1/ Reflects prior-year charges.

2/ The FY 2008 Enacted level includes \$20M in emergency funding provided in P.L. 110-161.

**PPA Mission Statement**

Through a network of 250 local offices, Application Support Centers, Service Centers, and Asylum offices, USCIS is responsible for the timely and quality processing of:

- Family-based petitions - facilitating the process for close relatives to immigrate, gain permanent residency, work, etc.;
- Employment-based petitions - facilitating the process for current and prospective employees to immigrate or stay in the U.S. temporarily;
- Asylum and Refugee processing - adjudicating asylum applications and the processing of refugees; and
- Naturalization - processing applications of those who wish to become U.S. citizens.

The Adjudication Services program within the Salaries & Expenses account includes funding for Immigration Services projects, the Federal Bureau of Investigation (FBI) background checks; and, the Cuban-Haitian Entrant Program, the Moscow Refugee Program, and the Humanitarian Parole Program which were transferred from ICE.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$0</b>             | <b>\$523</b>            | <b>\$540</b>            | <b>\$17</b>                    |

Salaries and Benefits includes costs for 5 FTEs. The FY 2009 request includes an increase of \$17,000 for the proposed increase in personnel compensation to fund the Cuban-Haitian Entrant Program, the Moscow Refugee Program, and the Humanitarian Parole Program transferred from ICE.

**PPA Mission Statement**

The SAVE Program is an intergovernmental information-sharing initiative designed to aid employers in determining an applicant's/recipient's immigration status, and thereby ensure that only entitled applicants/recipients receive Federal, state, or local public benefits. The USCIS SAVE Program is an information service for benefit granting agencies, institutions, and other entities. The USCIS does not make determinations on any applicant's/recipient's eligibility for a specific benefit. Beginning in FY 2008, the SAVE program will be entirely fee-funded through the Immigration Examinations Fee Account.

**PPA Mission Statement**

The REAL ID Act requires, among other things, that before a State can issue a driver's license or identification card to a person the State must verify the issuance, validity, and completeness of each document required to be presented by the person seeking to obtain a REAL ID compliant driver's license or identification card.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$0</b>             | <b>\$0</b>              | <b>\$750</b>            | <b>\$750</b>                   |

Salaries and Benefits includes costs for 2 FTEs. The FY 2009 request includes an increase of \$750,000 for personnel compensation.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. CITIZENSHIP & IMMIGRATION SERVICES IMMIGRATION EXAMINATIONS FEE ACCOUNT

### I. Appropriation Overview

#### **A. Mission Statement for Immigration Examinations Fee Account:**

The Immigration Examinations Fee Account (IEFA) is the primary program funding source for USCIS, comprising approximately 95 percent of the total USCIS budget. Fees collected from the filing of immigration benefit applications are deposited into the IEFA and used to fund the cost of processing immigration benefit applications and associated support benefits; the cost of providing similar benefits to asylum and refugee applicants; and, the cost of similar benefits provided to other immigrants where fees were waived.

#### **B. Budget Activities:**

##### Adjudication Services

Through a network of 250 local offices, Application Support Centers, Service Centers, and Asylum offices, USCIS is responsible for the timely and quality processing of:

- *Family-based petitions* - facilitating the process for close relatives to immigrate, gain permanent residency, work, etc.;
- *Employment-based petitions* - facilitating the process for current and prospective employees to immigrate or stay in the U.S. temporarily;
- *Asylum and Refugee processing* - adjudicating asylum applications and the processing of refugees; and
- *Naturalization* - processing applications of those who wish to become U.S. citizens.

Premium processing revenue collected into this account also funds the Business Transformation Program which is a multi-year effort to modernize USCIS business processes and supporting systems.

##### Information and Customer Services

Through multiple channels of available assistance, including the USCIS website, toll-free call center (National Customer Service Call Centers), and face-to-face appointments; these services make it easier for customers to get the information they need, when they need it. On an annual basis, USCIS:

- Serves more than 16 million customers via the National Customer Service Call Centers; and
- Serves approximately 3 million customers through information counters at local offices.

##### Administration

The Administration activity supports a variety of headquarters offices including Administration, Chief Financial Officer, Chief Counsel, Communications, Congressional Relations, Policy and Strategy, Chief Human Capital, and Security and Integrity.

### Systematic Alien Verification for Entitlements (SAVE)

The SAVE program assists organizations by providing a non-citizen applicant's immigration status, in order to determine eligibility for Federal, state, or local public benefits. The program also supports implementation of the requirements of the REAL ID Act of 2005 by making it easier for States to verify immigration status for the issuance of state-issued driver's licenses and state-issued identification cards.

### **C. Budget Request Summary:**

USCIS requests 10,234 positions, 10,234 FTE, and \$2,495,186,000 for FY 2009. The total adjustments-to-base is \$314,000, which is for pay inflation for the SAVE Program. The remainder of the IEFA is the same as FY 2008 since the adjustment of the immigration benefit application and petition fee schedule addressed the FY 2008 and FY 2009 biennial periods.

### **D. Proposed PPA Structure:**

USCIS proposes to change the programs, projects, and activities (PPA) structure. The proposed restructuring serves several goals. First, the new structure improves the depiction of USCIS activities. Given the increased focus on both immigration status verification and fraud detection, the new structure uniquely identifies and depicts an integrated budget request in both areas. Immigration operations activities are better integrated and simplified within a single budget category, in particular by reducing the breakout of adjudication activities and incorporating information and customer service spending.

A second goal is the desire to simplify the report-level breakout by combining pay and non-pay line items. USCIS fully intends to internally execute and monitor annual resources with breakouts between pay and non-pay. For those movements that have a significant program, resource, or policy implication, USCIS would continue to keep the Committee apprised irrespective of the revised line item breakout. In addition, most DHS components do not have pay and benefits broken out separately within the appropriations budget structure.

Our final goal concerns the desire to better align activities with organizational units and activity costs. USCIS is continuing to refine its activity-based cost structure. This revised budget structure improves PPA alignment with our activity-based cost structure by bringing core immigration operations under a single PPA category.

1/ FY 2008 Enacted reflects base level staffing and proposed reprogramming adjustments.

USCIS requests \$1.935 billion to process millions of immigration benefit applications while maintaining backlog goals, and ensuring the security and integrity of the immigration system. There are no changes in funding from FY 2008 since the adjustment of the immigration benefit application and petition fee schedule addressed the FY 2008 and FY 2009 biennial periods. There is an adjustment-to-base increase of 7 FTE for annualization of FTE from FY 2008 to FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

FY 2009 planned funding for Adjudication Services includes \$764 million for payroll, \$526 million for District Operations, \$330 million for Service Center Operations, \$90 million for Refugee, Asylum, and International Operations, \$86 million for Records Operations, and \$139 million for Business Transformation.

Each year, millions of people apply for various types of immigration benefits from the U.S. government. Adjudications Officers determine eligibility for a wide variety of benefits. They review applications and often conduct interviews of the applicants. Adjudications Officers have the dual responsibility of providing courteous service to the public while being alert to the possibility of fraud and misrepresentation. Adjudications Officers are assigned to one of 70 field offices located in 26 Districts nationwide. In addition, there are also Adjudication Officers assigned to one of four Service Centers located in St. Albans, VT; Lincoln, NE; Irving, TX; and Laguna Niguel, CA.

The Refugee Affairs Division, which includes the specially trained Refugee Corps, is responsible for adjudicating refugee claims overseas to determine eligibility for resettlement in the United States. In meeting this humanitarian mission, officers are

vigilant to safeguard the integrity of the program by deterring and detecting fraud or threats to national security.

Asylum Officers determine eligibility for asylum under the Immigration and Nationality Act and relief under section 203 of the Nicaraguan Adjustment and Central Relief Act (NACARA). Asylum Officers also conduct protection screenings for certain individuals in the expedited removal process or subject to administrative removal. Officers are specially trained in country conditions, asylum and international law, interviewing techniques, and legal analysis, including credibility analysis. The Asylum Officer Corps also leverages specialized resources, including professional interpreters, to adjudicate cases and deliver timely and accurate provision of legal protection to individuals who qualify for asylum status and to identify and minimize fraud in the program. There are eight Asylum Offices throughout the U.S.: New York, NY, Newark, NJ, Arlington, VA, Miami, FL, Houston, TX, Chicago, IL, San Francisco, CA and Los Angeles, CA.

The International Operations Division is the face of USCIS overseas, encompassing 30 field offices, which are located in embassies and consulates around the world. Division offices play a critical role in extending immigration benefits to eligible individuals and exercising vigilance in matters of fraud detection and national security, while upholding the laws of the United States and honoring its international obligations.

In coordination with DHS and other Federal agencies, USCIS combats immigration benefit fraud through the Office of Fraud Detection and National Security (FDNS). FDNS staff analyzes and identifies fraud patterns and trends, and document evidence of fraud for administrative action. USCIS will continue to implement fraud detection measures in Service Centers, field offices, and Refugee and Asylum programs and train adjudications staff to proactively identify fraud/security profiles while considering an application. Also, USCIS works in coordination with other bureaus of DHS, and with agencies such as the Departments of Labor and State, and with the Federal Bureau of Investigation (to conduct background checks).

Adjudication includes funding for business transformation efforts. Funding is being used to transform USCIS' current paper-based data systems into a modern, world-class digital processing resource that will enhance customer service, better prevent future backlogs, and improve USCIS efficiency while also strengthening security.

During FY 2007, USCIS worked to lay the foundation for improvements to our business processes that support redesigned account-based, customer-centric operations. This includes establishing a Transformation Office, consolidating and re-working forms and instructions, beginning the identification of business requirements and rules, and initiating pilot projects to demonstrate the viability of information technology to support transformed business processes.

Pilot projects have been selected to satisfy key objectives of business transformation: *Identity management*, to uniquely associate an individual with biometrics; *data sharing* to improve national security by sharing information with partners; and *digitization* of our

files, which is essential to a transformed business process. The pilots, implemented in FY 2007, include an enumeration service for identity management, which enables the secure and encrypted storage, transmission, and retrieval of electronic biographic and biometric information, digitizing paper files, and acquiring the commercial off-the-shelf software licenses for electronic adjudication management.

Significant accomplishments in FY 2007:

- The Domestic Operations Directorate:
  - Processed over 1 million employment authorization applications
  - Processed 600,000 adjustment of status applications
  - Processed 600,000 naturalization applications
  - Processed over 500,000 applications to replace permanent resident cards
  - Processed 400,000 nonimmigrant worker petitions
  - Processed 30,000 orphan petitions
- The Transformation Program Office implemented pilots for:
  - Integrated Digitization Document Management Program (IDDMP) – scanning of case file records into an electronic repository and creation of metadata to facilitate searching
  - Biometric Storage System (BSS) – replacement of a disjointed collection of legacy systems with centralized storage and re-use of biometrics,
  - Enumeration Services – a joint effort between US-VISIT and USCIS to assign an enumerator to a set of fingerprints thus enabling unique identification of an individual
  - Inter-Country Adoptions – a case management system to support inter-country adoptions as a proof of concept for a customer account based system utilizing the enumerator
- The Refugee, Asylum and International Operations Directorate:
  - Developed and began implementing plans to expand biometric capture to all applicants for refugee resettlement
  - Developed and implemented procedures to adjudicate material support exceptions based on Secretary's exercise of discretion
  - Developed and implemented enhanced security processing for Iraqi refugee cases
  - Decreased processing time for asylum and NACARA 203 applications to less than six months
  - Completed the majority of new asylum cases within 60 days of receipt and the majority of credible fear cases within 14 days of receipt
  - Drafted Interim Rule to implement Hague Convention on Intercountry Adoptions
  - Established Humanitarian and Children's Issues branches

As part of the adjusted immigration benefit application fee schedule, USCIS received \$530 million in additional resources for the biennial period covering fiscal years 2008 and 2009. The following are current plans and program goals for several of the core program enhancements during FY 2008-2009.

- Adjudications and support staff enhancements (1,004 FTE and \$126.8 million). Fee rule enhancement positions are anticipated to be hired and on-board by the end of the third quarter of FY 2008.

In FY 2009, USCIS will monitor staffing levels to ensure that current vacancies are actively filled in order to meet processing goals and mission responsibilities, and will monitor all pending workload to determine if monthly completions are in line with agency prescribed processing goals.

- Second full-service card production facility and card production workload (4 FTE and \$32.4 million). In FY 2008, USCIS plans to award the technology refreshment contract for new secure identity document production equipment for its current card facility with sufficient scalability to equip the second card facility. In addition, USCIS will complete a facility risk factors assessment to determine potential site locations and initiate a requirements package to issue a solicitation for the award of a design contract.

In FY 2009, USCIS intends to award the contract for construction and/or build-out of space at the site selected for the facility, and will begin Certification and Accreditation (C&A) activities, as appropriate.

- Fraud prevention and detection (170 FTE and \$31.3 million). During FY 2008, USCIS plans to enhance the Benefit Fraud Assessment (BFA) methodology, implement methods to analyze fraud reactively, and identify emerging fraud trends in a proactive manner; work collaboratively with the FBI to improve the national name check process; provide enhanced fraud detection/national security training to USCIS components and other involved federal agencies, and develop tools that help adjudicators better recognize various types of fraud; and, leverage FDNS' national security resolution capabilities by distributing the vetting of non-known and suspected terrorist cases (non-KST) to field offices, leaving headquarters analysts available for advisory, policy, and KST issues.

In FY 2009, USCIS will pursue the development of the technology needed to better support anti-fraud and security-check related operations, including a case management system that captures the data necessary to measure performance and the analytics needed to identify and flag known fraud indicators, and track fraud and national security cases from referral to completion to ensure all instances of fraud are captured. In addition, FNDS will review aspects of the FDNS system to improve security check processing to safeguard against individuals and entities that may seek to defraud our nation's immigration system. FNDS will also design a system (or enhance existing systems) that, as necessary, allows for efficient policy and procedural changes when a vulnerability or fraud activity has been detected.

- Delivery of secure documents (\$31.6 million). USCIS and the USPS have partnered to develop and implement a process wherein the documents will be delivered via

USPS priority mail (2 to 3 day delivery) with delivery confirmation. USCIS awarded a contract in October to perform a requirements study to be completed by early February. Design, development, and test phases will then take several months. Implementation of the capability is targeted for the end of June.

In FY 2009, all Permanent Resident Cards, Employment Authorization Documents and Travel Documents will be sent via this new secure mail process.

- FBI background checks (\$12.4 million). The FBI implemented a new price structure for FY 2008 increasing fingerprint costs from \$16 to \$17.25. The average cost of a name check rose from \$5.00 to \$10.00. In October, USCIS obligated all of this funding through an Interagency Agreement.

In FY 2009, USCIS will continue to monitor its current projected workload for name and fingerprint checks. Current base funding of \$51.3M in addition to the \$12.4M fee enhancement will provide for an estimated 2.3M cases.

- National security systems and processes (\$4 million). Resources support efforts to enhance the FDNS Data System (FDNS-DS) and other supporting systems. In FY 2008, resources will be used to conduct a review of FDNS-DS; establish a tracking and reporting system for operational assessments and reporting progress in meeting program goals; provide enhanced reporting capabilities for national security cases and establish an effective tracking and reporting system; and, create a data collection mechanism to track fraud and national security cases sent for digitization.

In FY 2009, USCIS will enhance FDNS-DS capabilities to integrate the system with systems being developed for biometrics and background check processing, to streamline reporting of fraud and national security trends and analysis, and to provide predictive analytic capabilities.

- USCIS training program (25 FTE and \$43.2 million). In FY 2008, resources will be used to establish the USCIS Academy with its various components and programs developed and made available to employees; hire Academy staff and develop policies, procedures and capabilities; publicize and promote the Academy's programs and a culture of continuous learning throughout the USCIS federal workforce; align training program options with career development levels to create a structured set of opportunities that promote both employee and agency goals; and, develop coaching and mentoring practices that complement annual training-oriented Individual Development Plans to promote both learning and professional development.

In FY 2009, USCIS will institutionalize the Academy's programs and offerings; develop the Academy's programs into strategic pathways for employees to focus on current excellence and their future development; and, fully integrate Human Resource and Training strategies with organizational development needs to synergy among programs that address individual employee training, position and career path alignment, leadership development, and succession management.

- Information technology upgrades (88 FTE and \$124.3 million). Resources are being used to add staff, upgrade existing systems, refresh hardware, and add new technologies. During FY 2008, USCIS anticipates the following actions:
  - Hiring, training, and equipping all new IT staff.
  - Achieving key milestones for the Baseline Automated Support Infrastructure for Citizenship Services (BASIC) program including establishing perimeter control, ensuring access control, developing and deploying monitoring, and ensuring secure remote monitoring of all IT devices.
  - On IT governance, making significant progress in areas such as the development of an enterprise architecture and capital planning process. USCIS will also ensure FISMA compliance of 90% or better.
  - Making significant progress with CLAIMS 3 Program Optimization (C3PO), an effort to consolidate smaller database islands into one consolidated central database.

During FY 2009, USCIS anticipates:

- Completing deployment of BASIC encrypted data services and a secure user interface.
  - Completing an e-CISCOR operational data store (this will be a common data warehouse to support reporting needs of CLAIMS 3 information).
  - Complete all currently-planned IT governance improvements such as completion of an Enterprise Architecture, implementation of IT portfolio management, compliance with earned value management standards, and execution of a capital planning process.
- Rent and lease acquisition resources (\$33.1 million). In FY 2008, the lease acquisition program (LAP) enhancement of \$18.1 million is being used to replace, renew, or expand 14 facilities. Requirements for this work have been submitted to the General Services Administration (GSA), and planning and/or design work is underway. All planning work will be completed by the end of this year. The remaining \$15 million in resources is being used to pay for GSA rent increases over the FY 2008-2009 period.

In FY 2009, USCIS will be using requested funds to complete remaining phases of the 14 projects. In addition, FY09 resources will be used for facility sustainment. The USCIS real property inventory includes 188 facility leases, with an estimated sustainment funding level of \$34 million.

Business Transformation. As in 2008, \$139 million in current services premium processing revenue will facilitate modernization of processes and systems to improve sharing of immigration information, eliminate paper-based processing, and improve the ability of USCIS to respond more effectively to changing workload while enhancing the integrity of the immigration system.

During FY 2008, USCIS will award contracts to a solutions architect and necessary support contractors. The first increment of transformation – citizenship – will be started and completed during FY 2009. Services will encompass end-to-end adjudication and will include web-based account setup and electronic filing by customers; identity management, a new case management system, electronic workflow, expansion of scan-on-demand, and data-sharing with ICE and CBP. Work on increment two – immigration – will commence during FY 2009.

Asylum and Refugee. In FY 2009, USCIS plans to develop and implement a comprehensive refugee mission standard operating procedure and complete expansion of biometric capture to all applicants for refugee resettlement. USCIS will also work to enhance the integrity of the asylum process through expansion of overseas investigations, information-sharing agreements with other refugee-receiving countries, and obtaining access to additional biometric databases. Funds will be used to establish an International Operations Division centralized waiver adjudication unit and complete the FY 2009 phase of footprint realignment.

1/ FY 2008 Enacted reflects base level staffing and proposed reprogramming adjustments.

USCIS requests \$167.8 million to provide timely, consistent, and accurate information to our customers. There is no change in funding from FY 2008 since the adjustment of the immigration benefit application and petition fee schedule addressed the FY 2008 and FY 2009 biennial periods. There is an adjustment-to-base increase of 127 FTE for annualization of FTE from FY 2008 to FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

FY 2009 planned funding for Information and Customer Services include \$93 million for payroll, and \$54 million for National Customer Service Centers, and \$21 million for Information Services.

Through the Information and Customer Services Program, USCIS reduces the frequency of repeated, redundant applicant contact with USCIS employees, thus improving agency efficiency. USCIS makes it easier for our customers to get the information they need,

when they need it through multiple channels of available assistance, including the USCIS website, toll-free call centers (National Customer Service Call Centers), and face-to-face appointments.

On an annual basis, USCIS:

- Serves more than 16 million customers via the National Customer Service Call Centers; and
- Serves approximately 3 million customers through information counters at local offices.

Each year millions of people apply for various types of benefits under the Immigration and Nationality Act. The Immigration Information Officer (IIO) provides information about immigration and nationality law and regulations. They assist with a wide variety of requests, including questions on how to complete required forms, and explaining the administrative procedures and normal processing times for each application. IIOs provide a range of customer services from certain case services to problem resolution assistance on applications and petitions. IIOs also process and make decisions on a limited array of applications and petitions. Positions are located throughout the country in Districts, Field Offices, and Service Centers.

Through the National Customer Service Center's six telephone centers, USCIS provides toll-free nationwide assistance to customers calling from within the U.S. Customers can access live assistance from 8:00 AM until 6:00 PM, Monday through Friday. They can also access recorded information (including information about the status of their specific case) 24 hours a day/7 days a week. Both live and recorded service is available in English and Spanish. Callers from outside the U.S. can access more limited information through a separate toll number.

USCIS receives about 1.4 million direct information and customer service related contacts monthly, or more than 16 million contacts per year. Today, over 82 percent of all information and customer service interactions are self-service. The self-service options give customers new choices that are simpler and more effective to both customers and USCIS. This option also results in significant cost avoidance when compared to what it would cost USCIS to provide live assistance to all these customers.

In-person service continues to be a critical component of the USCIS service model. To improve service levels, USCIS shifted to offering most in-person service by appointment scheduled via website. This has helped mitigate long lines and wait times, and address customer concerns and inquiries.

In FY 2007, USCIS accomplished the following:

- Reduced customer wait time when calling the NCSC to less than one minute
- Reduced customer abandonment rate to less than two percent
- Launched Change of Address On-line
- Launched new Service Request Management Tool (SRMT) customer interface to provide more efficient data capture system within the call centers

- Installed Q-flow customer queuing system in all but 14 local offices
- Launched Military Help-line
- Streamlined InfoPass appointment categories to provide ease of use by customers and USCIS staff
- Developed a Product Index Card for all customer service related materials to be used by local offices
- Implementation of Departure Codes within the call centers to improve call handling efficiency and customer experience

Planned activities for FY 2008 include:

- Complete Q-flow customer queuing systems in remaining 14 local offices
- Upgrade Q-flow customer queuing system to allow interface with appointment scheduling software, create a knowledge management system, and display presentations geared to educating customers in the information waiting rooms
- Introduce a pilot program to introduce adjudication appointment customers into Q-flow customer queuing system to enable the capture of adjudicator performance metrics
- Review and revise Inter-Active Voice Response (IVR) system to improve efficiency of the system and the effectiveness of the information provided
- Implement National Appointment Scheduling System integrating various disparate ICS scheduling tools
- Develop strategy and launch customer scripts or “How To” information currently used by call centers on the web for external customer use
- Deploy SRMT on-line for external customer use, thereby improving self-service by allowing customers to file self-file SRMT requests
- Improve Customer Processing Times Matrix

In FY 2009, USCIS will primarily focus on enhancing self-service through improved on-line scripts, continued enhancements with the automated appointment scheduler, and will also look to enhance call center efficiencies and improve customer service with the implementation of Computer Telephone Integration (CTI).

<sup>1/</sup> FY 2008 Enacted reflects base level staffing and proposed reprogramming adjustments.

USCIS requests \$373.9 million to strengthen key management processes, systems, and administrative support activities; and to facilitate mission success and enhance the

timeliness, accountability, efficiency and effectiveness of service delivery. There is no change in funding from FY 2008 since the adjustment of the immigration benefit application and petition fee schedule addressed the FY 2008 and FY 2009 biennial periods. There is an adjustment-to-base increase of 78 FTE for annualization of FTE from FY 2008 to FY 2009.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

FY 2009 funding for Administration is comprised of \$89 million for payroll and \$285 million for operating expenses. Outside of the offices of the Director and the Deputy Director, core offices include:

**Office of Administration** plans, develops, implements, and evaluates agency-wide policies, procedures, and programs for Acquisition, Asset, Facilities and Logistics Management, for the operation of centrally managed, agency-wide support activities, and for the direct delivery of administrative support to Headquarters.

**Office of Chief Counsel (principal legal advisor)** consists of dedicated legal divisions advising and representing USCIS Operations both at Headquarters and in the field. Divisions include Adjudications Law, Refugee and Asylum Law, Commercial and Administrative Law, Ethics, Field Operations, Training, and Liaison. Each division is responsible for reviewing, interpreting, and providing legal advice and guidance to USCIS operational components and OCC field staff.

**Office of Communications** oversees and coordinates communication to both internal and external stakeholders to empower employees with the tools needed to perform their jobs, educate the public regarding USCIS benefits and services, and facilitate consistent messaging and imaging for USCIS.

**Office of Congressional Relations (OCR)** maintains communication with Congress through responses to constituent concerns, promoting USCIS' priorities, proactive outreach on issues of interest, and ongoing educational activities for Members of Congress and their staff.

**Office of Ombudsman Liaison** serves as the Director's representative to the DHS CIS Ombudsman and provides customer relationship management oversight and evaluation.

**Office of Equal Opportunity and Inclusion (OEOI)** ensures individuals are not denied opportunities in employment or program-services delivery because of their race, color, religion, sex, national origin, age, disability, sexual orientation, status as a parent, genetic information or reprisal. In FY 2007, OEOI terminated a portion of a Service Level Agreement (SLA) with ICE and began staffing the office with USCIS employees. The remainder of the SLA with ICE will be terminated by the end of FY 2008.

**Office of Policy and Strategy** directs, prioritizes, and sets the agenda for agency-wide policy, strategy, and long-term planning activities, as well as for the conduct of research and analysis on immigration services issues.

**Office of Security and Integrity (OSI)** leads a multi-disciplined security and integrity program to protect and safeguard USCIS personnel, facilities, information and assets. The Office manages the personnel and industrial security, administrative/special security, communications security, and physical security programs and oversees the security awareness training program. The Office also manages a comprehensive internal management review program of USCIS functions and protects the integrity of USCIS programs by investigating allegations of employee misconduct related to waste, fraud, abuse or mismanagement.

**Office of the Chief Financial Officer** integrates annual planning, performance management, budget formulation and execution, and financial management functions. Grouping these activities supports strategic initiatives outlined in the President's Management Agenda regarding budget and performance integration as well as financial management.

**Office of the Chief Human Capital Officer (CHCO)** leads the strategic management of human capital in organizationally aligning and integrating workforce planning, recruiting, orientation, training, leadership and career development, and performance standards in achieving USCIS' mission. The Office is responsible for establishing an enterprise-wide environment for continuous learning and a culture of professional excellence and includes the Human Capital Management Division and the Training and Career Development Division.

**Office of Emergency Management and Safety (EMS)** develops, maintains and enhances USCIS' Emergency Preparedness and Continuity of Operations, and Occupational Safety and Health programs to protect our employees, ensure a safe and healthy work environment, mitigate and minimize damage or destruction of property and vital records, and ensure the continued performance of USCIS' essential functions during unexpected emergencies and/or catastrophic events.

Significant accomplishments in FY 2007 include:

Growth Management Oversight Unit (Deputy Director's Office):

- Developed an integrated project plan to assist the agency's leadership in meeting project implementation goals in a timely manner.
- Established the Growth Management Oversight Group, the leadership council chaired by the Deputy Director that meets monthly to review progress on growth-related projects.

Office of Administration:

- Developed a standard facility model for community-based offices across the US.

Office of Equal Opportunity and Inclusion:

- Led USCIS efforts to increase its hiring of individuals with disabilities. About 13 percent of permanent hires in FY 2007 have disabilities.
- Launched a computer based training module on employee rights and responsibilities in EEO, and approximately 8,000 employees successfully completed the training. Staff traveled to 18 different offices across the country and provided in-person training. The EEO piece of the new supervisor training course was redrafted and launched, as was the Cross Cultural Communications piece of the Officer Training Course at FLETC.

Office of Security and Integrity:

- Restructured organization to enhance existing USCIS functions that focus on management integrity, individual integrity, and securing employees and facilities.
- Established a Fraud Task Force to assess system-wide vulnerabilities that may have been exploited by an employee to commit fraudulent acts in the administration of immigration benefits.
- Restructured the Personnel and Industrial Security Division and centralized major functions in Burlington VT.
- Fully staffed the Central Region Office of Security and Integrity Investigations Office located in Houston, TX.

Office of Congressional Relations:

- Successfully held the National Congressional Relations Training Conference in Washington, DC for 52 Congressional Liaisons.
- Responded to more than 6,550 telephone calls and 1,250 written inquiries.
- Coordinated more than 81 hearings, briefings, and meetings.
- Participated in 13 field and outreach meetings for Members of Congress and staff.

Office of the Chief Human Capital Officer (CHCO):

- Established the Leadership Education and Development (LEAD) program.
- Redesigned and implemented a new basic training program (BASIC).
- Unified within CHCO all training and human capital functions to integrate and sharpen the focus on USCIS' recruitment, hiring and development of the USCIS workforce.

In FY 2008, USCIS plans to focus on the following activities:

Office of Administration:

- Improve facilities conditions at up to 10 percent of the current inventory

Office of Equal Opportunity and Inclusion:

- Complete operational transfer from ICE, and focus on training, as well as the hiring and inclusion of individuals with disabilities into the workforce.

Office of Security and Integrity:

- Expand the functions covered by Internal Self-Inspection Tracking and Evaluation System (INSITE) and develop field review capability.
- Publish updated guidance for reporting waste, fraud, abuse, mismanagement and misconduct allegations, and implement Management Inquiry Program and training for managers.

Office of Congressional Relations:

- Coordinate the National Congressional Relations Conference for all Congressional Liaisons.
- Maintain effective and timely response to congressional inquiries.
- Participate in at least 12 congressional seminars held in the field.

Office of the Chief Human Capital Officer:

- Launch Advanced Immigration Training, Continuous Learning, and Back-To-School programs associated with the fee rule training enhancement.

In FY 2009, USCIS has outlined the following goals and objectives:

Office of Administration

- Conduct quarterly facilities project reviews.
- Update the Three-Year Plan for Capital Improvements (facilities).
- Develop Fiscal Year 2010 Lease Acquisition Program.
- Streamline personal property inventories through technology.
- Establish and deploy independent logistical teams to evaluate support services and ensure compliance with established USCIS Management Directives in all logistics functional areas.

Office of Equal Opportunity and Inclusion:

- Focus on implementing measures to improve the quality and speed of processing internal EEO complaints.

Office of Security and Integrity:

- Initiate service-wide reporting on integrity and control related matters.
- Continue implementation of Management Inquiry training for managers.
- Develop specialized training tailored to program managers on the safeguarding of classified NSI and SBU information and other security programs.

Office of Congressional Relations:

- Coordinate the National Congressional Relations Conference for all Congressional Liaisons.
- Maintain effective and timely response to congressional inquiries.
- Participate in at least 12 congressional seminars held in the field.

PPA: Systematic Alien Verification for Entitlements (SAVE)

1/ In FY 2007, SAVE was funded through discretionary appropriations under the Salaries and Expenses Account.

2/ FY 2008 Enacted reflects base level staffing and proposed reprogramming adjustments.

USCIS requests \$18.8 million to fund existing operations. The adjustment-to-base is \$314 thousand for pay adjustments. The SAVE program assists organizations by providing a non-citizen applicant's immigration status, in order to determine eligibility for Federal, state, or local public benefits. There is an adjustment-to-base increase of 50 FTE for annualization of FTE from FY 2008 to FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The SAVE program helps State, local, or Federal agencies determine a non-citizen's eligibility for public benefits by checking immigration status. In total, about 365 agencies use SAVE services. Large agency customers include the Social Security Administration, the U.S. Departments of Housing and Urban Development and Education, and the California Department of Motor Vehicles.

SAVE supports implementation of the requirements of the REAL ID Act of 2005 by making it easier for States to verify immigration status for the issuance of state-issued driver's licenses and state-issued identification cards. Specifically, the Act requires the routine verification of lawful status through the SAVE Program of all non-citizen applicants for a driver's license or state-issued identification card.

USCIS will finalize REAL ID requirements and launch the program with state DMV's that are ready to participate. REAL ID is a nationwide effort intended to prevent terrorism, reduce fraud, and improve the reliability and accuracy of identification documents that State governments issue. USCIS aims to sign MOU's with a total of 30 states by the REAL ID start date of May 11, 2008. As of December 26, 2007, the SAVE program had signed MOU's with 29 states.

USCIS aims to improve internal and external SAVE processes to increase efficiency and improve user access. USCIS will migrate all SAVE billing and collection operations to the Burlington, Vermont, USCIS Finance Center. Also in FY 2008, USCIS will work to automate the Form G-845 process. Benefit issuing agencies and institutions can submit a

Form G-845 to request immigration status information to determine an applicant's eligibility to receive federal, state or local public benefits.

A referral protocol will be established by USCIS to provide relevant information to the appropriate enforcement agency. This protocol will allow the USCIS to refer cases of possible misconduct or illegal activity to the appropriate federal enforcement agency (e.g., U.S. Immigration and Customs Enforcement, the Federal Bureau of Investigation) for further action.

For FY 2009, the request level assumes the SAVE program will increase fees charged to users of the program. Currently, the program recovers approximately \$1 million in program costs through user fees. In FY 2009, fees are anticipated to recover approximately \$5 million in program costs. A new fee schedule will be disseminated during FY 2008 early enough for Federal, State, and local users to plan for the increased cost.

USCIS will also work to reduce SAVE secondary verifications through technological enhancements to the Verification Information System (VIS) and improvements to the database's accuracy. A reduction of SAVE secondary verifications would reduce the costs of using SAVE for participating entities.

In FY 2007, the SAVE program had 9,051,195 queries. The planning estimate for SAVE queries in FY 2008 is approximately 25.1M and the planning estimate for SAVE queries in FY 2009 is approximately 49.9M. There are currently 365 agencies using SAVE. The planning estimate for agencies enrolled in the SAVE program in FY 2008 is 426 and in FY 2009, 503.

The FY 2009 budget for the SAVE program covers the cost of information status verifiers (ISVs), monitoring and compliance, and program management staffing. Funding is split between ISV and monitoring/compliance staff, and program management.

### PPA Mission Statement

The funds from the Immigration Examinations Fee Account (IEFA), Adjudication Services Program, is the primary funding source and Program supporting USCIS' mission. USCIS requests \$1.9 billion to process millions of immigration benefit applications; maintaining backlog goals achieved at the end of FY 2006, and ensuring the security and integrity of the immigration system. \$139 million will also be used for the Business Transformation Program.

**Summary Justification and Explanation of Changes**

|                              | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|------------------------------|---------------|----------------|----------------|---------------------|
|                              | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Salaries and Benefits</b> | \$597,644     | \$742,345      | \$763,873      | \$21,528            |

Salaries and Benefits includes costs for 7,999 FTEs. The FY 2009 request includes an increase of \$21,528,000 for the proposed increase in personnel compensation.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------|---------------|----------------|----------------|---------------------|
|               | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Travel</b> | \$16,628      | \$17,933       | \$17,933       | \$0                 |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request reflects no change from FY 2008.

|                                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------------------------|---------------|----------------|----------------|---------------------|
|                                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Transportation of Things</b> | \$2,527       | \$3,004        | \$3,004        | \$0                 |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to transportation of things. The FY 2009 request reflects no change from FY 2008.

|                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------|---------------|----------------|----------------|---------------------|
|                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>GSA rent</b> | \$97,859      | \$77,942       | \$90,564       | \$12,622            |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request reflects a \$12,622,000 increase.

**PPA Mission Statement**

The funds from the Immigration Examinations Fee Account (IEFA), Information and Customer Services Program, are used to provide timely, consistent, and accurate information to its customers that will reduce the frequency of repeated, redundant applicant contact with USCIS employees, thus improving agency efficiency. Through multiple channels of available assistance, including the USCIS website, toll-free call center (National Customer Service Call Center), and face-to-face appointments; USCIS will make it easier for our customers to get the information they need, when they need it.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | <b>\$68,739</b>        | <b>\$89,977</b>         | <b>\$92,587</b>         | <b>\$2,610</b>                 |

Salaries and Benefits includes costs for 1,357 FTEs. The FY 2009 request includes an increase of \$2,610,000 for the proposed increase in personnel compensation.

|               | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---------------|---------------|----------------|----------------|---------------------|
|               | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |

1/ In FY 2007, SAVE was funded through discretionary appropriations under the Salaries and Expenses Account.

2/ FY 2008 position and FTE levels reflect adjustments in base level staffing and proposed reprogramming adjustments.

**PPA Mission Statement**

This program funds the operations of the SAVE Program. SAVE is an intergovernmental information-sharing program that verifies an individual's immigration status to ensure that only those eligible receive Federal, state, or local public benefits.

**Summary Justification and Explanation of Changes**

# BUDGET REQUEST AND SUPPORTING INFORMATION

## U.S. CITIZENSHIP & IMMIGRATION SERVICES H-1B NONIMMIGRANT PETITIONER ACCOUNT

### I. Appropriation Overview

#### **A. Mission Statement for H-1B Nonimmigrant Petitioner Account:**

The H-1B Visa Reform Act of 2004 requires employers who participate in the H-1B program to pay an additional \$1,500 (\$750 for those petitioners who employ less than 25 full-time equivalent employees), in addition to the base-processing fee of \$190 to file a Petition for a Nonimmigrant Worker (Form I-129). USCIS receives five percent of these funds, as well as the entire base-processing fee. These funds comprise approximately one percent of the total USCIS budget.

#### **B. Budget Activities:**

Funding from the H-1B Nonimmigrant Petitioner Account primarily supports the Domestic Operations Directorate. Fee revenues are used primarily for contract activities (mail, file, biometric and data entry) and facility rent expenses related to the processing of immigration benefit applications at USCIS service centers.

Domestic Operations manages four regionally based Service Centers which receive, process, and adjudicate applications, petitions and their related fees for immigration benefits not requiring face-to-face contact with the applicant, petitioner, or beneficiary. This office also oversees the operations of USCIS document production operations at the production facility in Corbin, KY, and at two of the Regional Service Centers. The Service Centers also provide data entry and card production support for some District Office and Asylum Office workloads, as well as processing of immigrant visas for incoming immigrants.

#### **C. Budget Request Summary:**

The USCIS requests \$13,000,000 in FY 2009 to maintain current service levels. These funds will continue to support contract activities and facility rent expenses for the processing of immigration benefit applications.

#### **D. Proposed PPA Structure:**

USCIS proposes to change the programs, projects, and activities (PPA) structure. The proposed restructuring serves several goals. First, the new structure improves the depiction of USCIS activities. Given the increased focus on both immigration status verification and fraud detection, the new structure uniquely identifies and depicts an integrated budget request in both areas. Immigration operations activities are better integrated and simplified within a single budget

category, in particular by reducing the breakout of adjudication activities and incorporating information and customer service spending.

A second goal is the desire to simplify the report-level breakout by combining pay and non-pay line items. USCIS fully intends to internally execute and monitor annual resources with breakouts between pay and non-pay. For those movements that have a significant program, resource, or policy implication, USCIS would continue to keep the Committee apprised irrespective of the revised line item breakout. In addition, most DHS components do not have pay and benefits broken out separately within the appropriations budget structure.

Our final goal concerns the desire to better align activities with organizational units and activity costs. USCIS is continuing to refine its activity-based cost structure. This revised budget structure improves PPA alignment with our activity-based cost structure by bringing core immigration operations under a single PPA category.

USCIS requests \$13 million for contract activities and facility rent expenses that support the processing of immigration benefit applications. The requested amount is set by Congressional statute providing USCIS with five percent of the fees collected for the H-1B visas (Nonimmigrant Petitioner), in addition to the base-processing fee to file a Petition for a Nonimmigrant Worker (Form I-129).

**CURRENT SERVICES PROGRAM DESCRIPTION:**

USCIS Domestic Operations receives, processes and adjudicates applications, petitions and their related fees for immigration benefits not requiring face-to-face contact with the applicant, petitioner, or beneficiary; which includes:

- *Family-based petitions* - facilitating the process for close relatives to immigrate, gain permanent residency, work, etc.; and
- *Employment-based petitions* - facilitating the process for current and prospective employees to immigrate or stay in the U.S. temporarily

Domestic Operations also provides data entry and card production support for some District Office and Asylum Office workloads, as well as processing of immigrant visas for incoming immigrants.

On average, USCIS annually processes millions of immigration benefit applications at its Service Centers. The \$13 million for contract activities and facility rent expenses is a portion of the total operations contract support, and Service Center rent. The difference is covered by fees collected into the Immigration Examinations Fee Account.

In FY 2007 funding was used to:

- Support the ongoing mail, file, data entry and file room functions being performed by contractor staff at the four USCIS Service Centers located in St. Albans, VT; Lincoln, NE; Irving, TX; and Laguna Niguel, CA.

- Finance the payment of a portion of the rent costs associated with housing the contractor staff within the Service Centers.

In FY 2008 and FY 2009, USCIS plans to:

- Ensure that the mail, file and data entry functions being performed by contractors located within the four Service Centers continues uninterrupted.
- Continue funding for Service Center facility rent expenses.

### PPA Mission Statement

The funds from the H1-B Nonimmigrant Petitioner Account, comprising approximately one percent of the total USCIS budget request, are specifically targeted to contracting activities and facility rent expenses related to processing immigration benefit applications. These funds are the result of the H1-B Visa Reform Act of 2004, which requires employers who participate in the H1-B program to pay an additional \$1,500 (\$750 for those petitioners who employ less than 25 full-time equivalent employees), in addition to the base processing fee of \$190 to file a Petition for a Nonimmigrant Worker (Form I-129). USCIS receives five percent of these funds, as well as the entire base processing fee.

### Summary Justification and Explanation of Changes

|                 | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------|----------------|----------------|----------------|---------------------|
|                 | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>GSA rent</b> | <b>\$2,000</b> | <b>\$2,000</b> | <b>\$2,040</b> | <b>\$40</b>         |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request reflects a \$40,000 increase for rent. This amount is a portion of the Service Center rent; the difference is covered by fees collected into the Immigration Examinations Fee Account.

|                 | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------|---------------|----------------|----------------|---------------------|
|                 | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Printing</b> | <b>\$14</b>   | <b>\$14</b>    | <b>\$14</b>    | <b>\$0</b>          |

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2009 request reflects no change from FY 2008.

|   | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|---|----------------|----------------|----------------|---------------------|
|   | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Advisory and Assistance Services</b> | <b>\$1,947</b> | <b>\$1,940</b> | <b>\$1,940</b> | <b>\$0</b>          |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2009 request reflects no change from FY 2008.

|                       | <b>2007</b>    | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|-----------------------|----------------|----------------|----------------|---------------------|
|                       | <b>Actual</b>  | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Other Services</b> | <b>\$8,980</b> | <b>\$8,989</b> | <b>\$8,949</b> | <b>(\$40)</b>       |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 request reflects downward adjustment of \$40,000 to offset the increase for rent.

|  | <b>2007</b>   | <b>2008</b>    | <b>2009</b>    | <b>2008 to 2009</b> |
|--|---------------|----------------|----------------|---------------------|
|  | <b>Actual</b> | <b>Enacted</b> | <b>Request</b> | <b>Change</b>       |
| <b>Purchase from Government Accounts</b> | <b>\$57</b>   | <b>\$57</b>    | <b>\$57</b>    | <b>\$0</b>          |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2009 request reflects no change from FY 2008.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **U.S. CITIZENSHIP & IMMIGRATION SERVICES FRAUD PREVENTION AND DETECTION ACCOUNT**

### **I. Appropriation Overview**

#### **A. Mission Statement for Fraud Prevention and Detection Account:**

Funding in the Fraud Prevention and Detection Account is used for activities related to preventing and detecting fraud of immigration benefit applications as stipulated in the L-1 Visa Reform Act of 2004 (later amended by Public Law 109-13, Section 403). The law requires petitioners to pay \$500 toward this purpose for a beneficiary's initial grant of H-1B, H-2B, or L nonimmigrant classification, as well as if they are changing a beneficiary's employer within these classifications; and pay \$150 for H-2B benefit in addition to the base-processing fee for a Petition for a Nonimmigrant Worker (Form I-129). USCIS receives a one-third share of these fees.

#### **B. Budget Activities:**

Funding supports Fraud Detection and National Security (FDNS) efforts related to the H-1B, H-2B, or L nonimmigrant classifications. FDNS develops coordinates and leads national anti-fraud operations for USCIS and oversees and enhances policies and procedures pertaining to the performance of law enforcement (background) checks on applicants and petitioners.

#### **C. Budget Request Summary:**

USCIS requests 124 positions, 124 FTE, and \$31,000,000 to reflect the USCIS share of fee collections for FY 2009.

#### **D. Proposed PPA Structure:**

USCIS proposes to change the programs, projects, and activities (PPA) structure. The proposed restructuring serves several goals. First, the new structure improves the depiction of USCIS activities. Given the increased focus on both immigration status verification and fraud detection, the new structure uniquely identifies and depicts an integrated budget request in both areas. Immigration operations activities are better integrated and simplified within a single budget category, in particular by reducing the breakout of adjudication activities and incorporating information and customer service spending.

A second goal is the desire to simplify the report-level breakout by combining pay and non-pay line items. USCIS fully intends to internally execute and monitor annual resources with breakouts between pay and non-pay. For those movements that have a significant program, resource, or policy implication, USCIS would continue to keep the Committee apprised irrespective of the

revised line item breakout. In addition, most DHS components do not have pay and benefits broken out separately within the appropriations budget structure.

Our final goal concerns the desire to better align activities with organizational units and activity costs. USCIS is continuing to refine its activity-based cost structure. This revised budget structure improves PPA alignment with our activity-based cost structure by bringing core immigration operations under a single PPA category.

| 2009 Program Change          | 0                 | 0          | \$0             |
| <b>2009 Request</b>          | <b>124</b>        | <b>124</b> | <b>\$31,000</b> |
| Total Change 2008-2009       | 0                 | 26         | \$0             |

USCIS requests 124 positions, 124 FTE, and \$31 million for this activity. The requested level reflects the likely one-third fee collection level for H-1B, H-2B, & L visas fraud prevention and detection activities. There is an adjustment-to-base increase of 26 FTE for annualization of FTE from FY 2008 to FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

FDNS, in partnership with U.S. Immigration and Customs Enforcement (ICE), Office of Investigations, has dual missions: detecting and combating fraud, and identifying threats to the national security and public safety posed by those seeking immigration benefits. FDNS is also an active member of the ICE-led interagency Document and Benefit Fraud Task Forces (DBFTFs), for which there are currently 17 strategically located throughout the U.S. The cooperative work between ICE and FDNS promotes the efforts to combat H&L Visa fraud more effectively and identify and pursue solutions.

FDNS is in the process of completing a Benefit Fraud and Compliance Assessment (BFCA) for the H-1B (specialty occupation) and is in the process of conducting an assessment of the L-1A (multi-national executive or manager) nonimmigrant visa classifications. With respect to L-1A specifically, FDNS is reviewing and analyzing data, identifying possible fraud trends, and conducting overseas verification requests.

FDNS is in the process of establishing overseas H and L Anti-fraud Officer positions at 8 high volume H & L posts. Currently it is anticipated that there will be 8 FDNS IO positions and 9 Foreign Service National positions. These units will help develop FDNS's capacity overseas to conduct H & L visa inquiries based upon requests for verification of information from USCIS officers.

In addition, FDNS has developed an Administrative Site Visit Verification Program (ASVVP). This program will have contractors conducting site visits on select cases. It is anticipated that the ASVVP will be the vehicle used to conduct post adjudication compliance site visits on select H & L visa petitions.

FDNS was also tasked with directing, overseeing, and improving the completion of background checks on the millions of visa applicants, beneficiaries, and petitioners each year. As with the fraud detection mission, this task requires a delicate balance between facilitation and diligence. FDNS has developed and implemented the Fraud Detection and National Security Data System (FDNS-DS), which is a case management tracking system with analytical capabilities aimed at improving the integrity of the fraud detection mission. Over the past year, FDNS has conducted a comprehensive review of the background check process, and made a number of changes that enhance quality and processing times associated with background checks. It has placed priority emphasis on the resolution of national security hits, and has developed a criminal alien referral policy jointly with its ICE counterparts. Since October 2004, over 1,500 criminal alien leads have been referred to ICE Investigations, and thousands of suspected absconders with Removal Orders have been reported to ICE Detention and Removal Operations.

Because the majority of immigration benefit fraud begins with the filing of an application or petition with USCIS, it is essential to identify suspect cases as early in the process as possible, ideally before the application or petition reaches an adjudicator for decision making, and, most certainly, before an applicant or beneficiary is accorded a benefit that will enable him or her to enter or stay in the U.S. For these reasons, it is essential that USCIS develop the capacity to detect possible fraud, and work closely with ICE.

Towards this end, USCIS and ICE have developed and implemented a joint anti-fraud strategy that relies upon USCIS to detect suspected fraud, and refer the fraud to ICE for possible criminal investigation and prosecution. FDNS is not authorized to conduct investigations, only inquiries; therefore, all cases that are suspect to fraud are referred to ICE and, based on the information provided by FDNS, ICE may choose to accept or decline the case. On cases that ICE is unable to handle, FDNS may only conduct administrative inquiries in order to prove that fraud is present to validate the denial of a petition. FDNS also proposed to work with the Department of State Headquarters Fraud Prevention Program (FPP) and the Department of Labor's Office of Inspector General in an effort to become the primary conduit for all H and L visa fraud related issues. The necessary structure, resources, policies, procedures, and other organizational crosswalks are now in place to support this strategy.

To enhance the capability to manage this anti-fraud and background check operation, USCIS recently developed and is in the process of enhancing a new fraud tracking system, FDNS-DS. This system will enable FDNS to fully leverage technology in the combating of immigration fraud as well as provide a means by which law enforcement and intelligence entities can access information to support operations that enhance national security. This unprecedented effort will position USCIS/FDNS to quantify and qualify the types of benefit fraud that exist, as well as identify patterns and other vulnerabilities that threaten the integrity of our immigration system. A future interface with the USCIS Central Oracle Repository (CISCOR) will allow real time retrieval and analysis of data relating to the six million applications and petitions received by USCIS yearly.

FDNS is also responsible for reviewing operational malfunctions and systemic deficiencies, and proposing corrective action. This role includes reviewing proposed rules and regulations within USCIS. As part of the overall joint strategy and in partnership with ICE, both agencies identify vulnerabilities in the benefit fraud system and work together to eliminate the potential for exploitation of those vulnerabilities and prosecute the violators. Information on trends in fraud and criminal methodologies are shared among USCIS and ICE to identify and prevent potential abuse of the system.

FDNS is USCIS' primary point of contact with, and conduit to/from, the law enforcement and intelligence communities. This includes participation in a variety of Departmental and Government-wide information sharing initiatives. As subject matter experts in immigration benefit-related laws, regulations, policies, procedures, and operational matters, and custodians of more than 100 million electronic and hard copy immigration records, USCIS (via FDNS) has assigned officers to the Department's Homeland Security Operations Center (HSOC) and the Terrorist Screening Center (TSC). It is in the process of hiring additional personnel for assignments at DHS' Office of Information Analysis, the Department of State's (DOS) Fraud Prevention Program, and other locations. FDNS is also USCIS' lead on systems-related access and information exchanges with other agencies, such as the DOS.

In FY 2007, USCIS used the funds received from the Fraud Prevention and Detection Account to:

- Help expand Fraud Detection and National Security (FDNS) capability.
- Augment the current anti-fraud efforts within USCIS by dedicating more staff and contractor support to conducting system checks that identified known (previously proven) fraud conspirators and their association with future filings.
- Develop a proactive anti-fraud program that bounces key fraud indicators from past (proven) conspiracies against all incoming applications and petitions.

In FY 2008 and FY 2009, USCIS will continue using the funding received from the Fraud Prevention and Detection Account to support security-related initiatives and continue contractor assistance to the FDNS to support the program's ongoing efforts to develop a comprehensive and collaborative approach for detecting, prosecuting, and deterring immigration-related fraud.

Note: FY 2008 reflects proposed technical reprogramming adjustments.

#### PPA Mission Statement

The funds from the Fraud Prevention and Detection Account, comprising approximately two percent of the total USCIS budget request, primarily support the USCIS goal to ensure the security and integrity of the immigration system. These funds are specifically for activities related to preventing and detecting fraud of H & L immigration benefit applications.

#### Summary Justification and Explanation of Changes

|                              | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |

| <b>Salaries and Benefits</b> | <b>\$9,183</b> | <b>\$15,746</b> | <b>\$16,203</b> | <b>\$457</b>          |

Salaries and Benefits includes costs for 124 FTEs. The FY 2009 request includes an increase of \$457,000 for the proposed increase in personnel compensation.

|               | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------|----------------|-----------------|-----------------|-----------------------|
| <b>Travel</b> | <b>\$141</b>   | <b>\$823</b>    | <b>\$823</b>    | <b>\$0</b>            |

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2009 request reflects no change from FY 2008.

|                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------|----------------|-----------------|-----------------|-----------------------|
| <b>GSA rent</b> | \$1,405        | \$1,925         | \$1,964         | \$39                  |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request reflects a \$39,000 increase.

|  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|--|----------------|-----------------|-----------------|-----------------------|
| <b>Communication, Utilities, and miscellaneous charges</b> | \$525          | \$3,054         | \$3,054         | \$0                   |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals and utility services. The FY 2009 request reflects no change from FY 2008.

|                       | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|-----------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Other Services</b> | \$1,431        | \$8,324         | \$7,828         | (\$496)               |

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2009 request reflects a downward adjustment of \$457,000 to offset pay inflation and \$39,000 to offset rent.

|                                 | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|---------------------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Supplies &amp; materials</b> | \$161          | \$935           | \$935           | \$0                   |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request reflects no change from FY 2008.

|                  | 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|------------------|----------------|-----------------|-----------------|-----------------------|
| <b>Equipment</b> | \$33           | \$193           | \$193           | \$0                   |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request reflects no change from FY 2008.

## A. Mission and Description of USCIS

United States Citizenship and Immigration Services (USCIS) is the Federal agency responsible for granting or denying immigration benefits to individuals seeking to reside or work in the United States, and processing millions of immigration benefit applications and petitions annually. USCIS secures America's promise as a nation of immigrants by providing accurate and useful information to our customers, granting immigration and citizenship benefits, promoting an awareness and understanding of citizenship, and ensuring the integrity of the immigration system. USCIS has established six goals:

- Ensure the security and integrity of the immigration system,
- Provide efficient and customer-oriented immigration benefit and information services,
- Increase understanding of citizenship and its privileges and responsibilities,
- Ensure flexible and sound immigration policies and programs that meet the needs and obligations of the Nation, including our international treaties on humanitarian protection and trade,
- Strengthen the infrastructure necessary to achieve USCIS' mission, and
- Operate as a high-performance organization and position USCIS as an employer of choice.

Through a network of 250 field offices, Application Support Centers, Service Centers, Asylum offices, National Customer Service Call (NCSC) Centers, Forms Centers, and the Internet, USCIS works with applicants to collect, process, and grant benefits including: employment authorization documents, asylee and refugee status, classification as an immediate relative for the purpose of immigration to the United States, and U.S. citizenship. USCIS also works in coordination with other bureaus of DHS, and with agencies such as the Departments of Labor, State, and with the Federal Bureau of Investigation to conduct background checks. USCIS prevents adverse impacts on our immigration system and economy by screening thoroughly, making timely adjudication decisions, and giving accurate immigration information.

On average, USCIS annually:

- Processes more than 6 million immigration benefit applications
- Serves more than 20 million customers via the National Customer Service Call Centers
- Serves approximately 3 million customers through information counters at local offices
- Processes nearly 100,000 asylum cases
- Performs nearly 60,000 refugee interviews overseas, and
- Conducts the naturalization of approximately 600,000 new citizens.

## B. Major Activities and Key Strategic Issues

### Adjudication Services

Between six and eight million immigration applications or petitions each year require legal review and adjudication. These include applications by non-immigrants, extensions of a temporary stay, petitions by companies for foreign workers, and applications to naturalize and become a U.S. citizen. For adjudication services, the FY 2009 budget request includes 7,951 FTEs and \$1.78 billion.

During 2007, USCIS finalized rulemaking (effective July 30, 2007) which adjusted the immigration benefit application and petition fee schedule. The intent of the revised fee schedule is to enable the recovery of the full cost of providing immigration benefits and services, as well as devote premium processing revenues to the Transformation Program.

Under Transformation, modernization across all lines of business is anticipated to take up to five years although the program has been designed to be implemented in the multiple phases throughout those five years. By the end of FY 2008, USCIS is working to ensure full implementation of a set of core business services specific to Citizenship business activities. These core services will cover account set up, workflow management, and digitization of records. Starting in FY 2009, this core set of service will begin to be expanded to additional functional business areas. The other three business areas are Immigrant, Humanitarian, and Non-Immigrant activities. The following table provides a notional outline of incremental phases of the Transformation effort:

### Business Services By Increment

| <b>Increment 1<br/><i>Citizenship</i></b>   | <b>Increment 2<br/><i>Immigrant</i></b>  | <b>Increment 3<br/><i>Humanitarian</i></b>   | <b>Increment 4<br/><i>Non-Immigrant</i></b>  |
|---|--|--|--|
| <b>Account Setup and Case Intake</b> <ul style="list-style-type: none"> <li>▪ Expand use of E-Filing to accept Citizenship applications</li> <li>▪ Accept and deposit fees electronically</li> <li>▪ Create Accounts for Individuals and Representatives</li> </ul> | <b>Account Setup and Case Intake</b> <ul style="list-style-type: none"> <li>▪ Create Accounts for Employers and Certifiers</li> <li>▪ Expand use of E-Filing to accept Immigrant Benefits</li> </ul> | <b>Account Setup and Case Intake</b> <ul style="list-style-type: none"> <li>▪ Expand use of E-Filing to accept Humanitarian Benefits</li> <li>▪ Capture Biometrics Remotely</li> </ul> | <b>Account Setup and Case Intake</b> <ul style="list-style-type: none"> <li>▪ Expand application capability to include Non-Immigrant Benefits</li> </ul>               |

| <b>Notification to Customers</b> <ul style="list-style-type: none"> <li>▪ Biometric, interview, and Oath ceremony appointment notification</li> </ul>   | <b>Notification to Customers</b> <ul style="list-style-type: none"> <li>▪ Case Status notification</li> <li>▪ RFE notice generation</li> </ul>   |  |  |

| <b>Increment 1<br/><i>Citizenship</i></b>  | <b>Increment 2<br/><i>Immigrant</i></b>  | <b>Increment 3<br/><i>Humanitarian</i></b>   | <b>Increment 4<br/><i>Non-Immigrant</i></b>   |
|--|--|--|---|
| <b>E-Records / Data Sharing</b> <ul style="list-style-type: none"> <li>▪ Implement Tri-Bureau data-sharing with CBP and ICE</li> </ul>   | <b>E-Records / Data Sharing</b> <ul style="list-style-type: none"> <li>▪ Expand to include DOL and DOS</li> </ul>  | <b>E-Records / Data Sharing</b> <ul style="list-style-type: none"> <li>▪ Expand to include Courts, International, State and Local</li> </ul> |   |
| <b>Manage Agency and Manage Knowledge</b> <ul style="list-style-type: none"> <li>▪ Case escalation</li> <li>▪ Production and performance reporting for citizenship workload</li> <li>▪ Access to legacy repositories (e.g. Call Center Scripts)</li> </ul> | <b>Manage Agency and Manage Knowledge</b> <ul style="list-style-type: none"> <li>▪ Enhanced performance reporting</li> <li>▪ Enhanced access to policies and procedures</li> </ul> |  | <b>Manage Agency and Manage Knowledge</b> <ul style="list-style-type: none"> <li>▪ Generate H-1B Cap Count</li> </ul> |

In general, the new fee rule will help USCIS modernize processes and systems to improve sharing of immigration information, eliminate paper-based processing, and improve the ability of USCIS to more effectively respond to a changing workload, while enhancing the integrity of the immigration system. Additionally, modernization will make operations easier and faster for customers to electronically file immigration benefit applications, receive updates on the status of their applications, and, receive immigration benefits as appropriate.

*Immigration Security and Integrity*

Activities encompass Fraud Detection and National Security programs with responsibilities in detecting, pursuing, and deterring fraud; ensuring law enforcement (background) checks are conducted on all persons seeking benefits; identifying systemic vulnerabilities and other weaknesses that compromise the integrity of the immigration system; performing as USCIS’ primary conduit to and from the law enforcement and intelligence communities; and coordinating interagency policies, procedures, and other issues with Customs and Border Protection (CBP) and Immigration and Customs Enforcement (ICE).

For this area, the FY 2009 budget request includes 1,418 FTEs and \$511 million to operate a program of comprehensive quality assurance and security measures to ensure that benefits are granted only to eligible individuals. The requested amount is based on projected fee levels per the fee review of immigration benefit applications.

*Information and Customer Services*

Activities encompass information and customer service functions, operations, policies and activities, and customer service call center operations, such as:

Operations:

- Funds the operation of the Los Angeles and New York City Telephone Call Centers. These two locations provide live Immigration Information Officer (IIO) assistance to applicants that were unable to have their inquiries answered via the 1-800 contractor call center information line.
- Reduced customer wait time when calling the NCSC to less than 1 minute.
- Reduced customer abandonment rate to less than 2 percent.

Policies:

- USCIS has developed a new series of fact sheets focused on particular kinds of customers and services available to them. It will also include a fact sheet focused on customers after they file an application, setting out criteria for case services to do a better job of responding to the questions and concerns of customers.
- Launched a new Military Help-line to provide targeted support to the armed forces personnel.
- Review and update operational policies and procedures to ensure polite, professional and courteous service to the customer.

Activities:

- Launched Change of Address On-line.
- Launched new Service Request Management Tool (SRMT) customer interface to provide more efficient data capture system within the call centers.
- Installed Q-flow customer queuing system in all but 14 local offices.
- Launched Military Help-line.
- Streamlined our InfoPass appointment categories to enhance the ease of use by customers and USCIS staff.
- Developed a Product Index Card for all customer service related materials to be used by local offices.

These help customers understand eligibility rules and procedures, provide case status information, and answer thousands of written inquiries and millions of phone calls.

For this initiative, the FY 2009 budget request includes 803 FTEs and \$222 million. The requested amount is based on projected fee levels per the fee review of immigration benefit applications.

Citizenship

Activities promote civic integration of immigrants and increases public awareness of the benefits and responsibilities associated with U.S. citizenship; provide instruction and training on citizenship rights and responsibilities; and provide immigrants with information and tools necessary to successfully integrate into American civic culture. Activities cover work with community and faith-based organizations, other federal agencies, state and local governments, adult educators, and groups that directly interact with newly arrived immigrants, and those beginning the formal naturalization process such as:

- Regional training sessions to prepare adult educators nationwide to teach students who will be taking the new naturalization test.
- Task Force on New Americans roundtable discussions with different sectors of society (businesses, public libraries, community-based groups) to research best practices in integration.
- Meetings of the members of the inter-agency Task Force on New Americans to coordinate federal efforts to promote assimilation.
- Presentations on "lessons learned" in promoting integration to counterparts from other countries.
- Setting up informational booths and giving presentations on Office of Citizenship educational tools at library conferences.

For this initiative, the FY 2009 budget request includes 21 FTEs and \$7.8 million. The requested amount is based on projected fee levels per the fee review of immigration benefit applications.

#### Immigration Status Verification

Activities encompass three programs – the Systematic Alien Verification for Entitlements (SAVE), E-Verify (formerly the Employment Eligibility Verification) and the REAL ID Act programs. The SAVE program assists organizations by providing a non-citizen applicant's immigration status, in order to determine eligibility for Federal, state, or local public benefits. E-Verify helps employers verify work authorization. REAL ID is a nationwide effort intended to prevent terrorism, reduce fraud, and improve the reliability and accuracy of identification documents that State governments issue.

For this initiative, the FY 2009 budget request includes 427 FTEs and \$168.8 million. Both SAVE and E-Verify are central elements of the Administration's comprehensive immigration reform strategy. In August, the Administration announced a set of initiatives tied to these USCIS programs:

- Commence a rulemaking process to require all Federal contractors and vendors to use E-Verify to ensure employees are authorized to work in the U.S.
- Increase assistance to States with outreach and technical assistance to encourage E-Verify use.
- Improve system data sources to improve ability to catch identity theft.
- Seek voluntary State partners willing to share DMV photos and records with E-Verify.

In FY 2007, the SAVE program had 9,051,195 queries. There are currently 365 agencies using SAVE. E-Verify had 3,271,871 queries and 24,480 registered employers.

During FY 2008, USCIS is working to reduce SAVE secondary verifications through technological enhancements to the Verification Information System (VIS) and improvements to the database's accuracy. USCIS is also working to increase the number of users and the ability of E-Verify to handle a higher volume of information requests. In FY 2007, USCIS had an independent evaluation conducted on the E-Verify program and will implement improvements to the system based on the findings in this report. USCIS intends to continue to have independent evaluations performed in FY 2008 and beyond on key programs.

The FY 2009 request level assumes the SAVE program will increase fees charged to users of the program. Currently, the program recovers approximately \$1 million in program costs through user fees. In FY 2009, fees are anticipated to recover approximately \$5 million in program costs. A new fee schedule will be disseminated during FY 2008 early enough for Federal, State, and local users to plan for the increased cost.

Resources for E-Verify will be used to enhance systems, improve compliance and monitoring, and expand marketing activities. USCIS is planning for employer utilization to more than double between FY 2008 and FY 2009, from about 525,000 employers to 1.1 million.

In addition, the FY 2009 request includes \$50 million for REAL ID. These resources would be used to develop a Consolidated State Validation Center that will allow States to verify document information with the Federal and State source agency as well as enable States to share information.

### C. Resources Requested and Performance Impact

USCIS requests a total of 10,620 FTEs and \$2.7 billion. Excluding emergency funding provided in P.L. 110-161, this is an increase of 2 positions, 356 FTE and \$149.9 million over FY 2008 levels. This includes an adjustment to base to sustain the E-Verify and SAVE programs at current levels and the following program increases: \$17.2 million for E-Verify and \$50 million for REAL ID Act Implementation.

The total request will ensure the security and integrity of the immigration system, enhance service delivery, and continue investments in business transformation efforts to incrementally establish a new technology and business process platform.

D. How USCIS Programs and Performance Goals Align to and Support the DHS Goals and Objectives.

The following list of USCIS programs with their performance goals are followed by the DHS goals and objectives they support.

Immigration Security and Integrity program performance goal – Enhance the integrity of the legal immigration system.

- Goal 1 – Continue to protect our nation from dangerous people
- Objective 1.2 – Immigration

Adjudication Services program performance goal – Provide immigration benefit services in a timely, consistent, and accurate manner.

- Goal 1 – Continue to protect our nation from dangerous people
- Objective 1.2 – Immigration

Information and Customer Services program performance goal – Provide timely, consistent, and accurate information to our customers.

- Goal 1 – Continue to protect our nation from dangerous people
- Objective 1.2 – Immigration

Citizenship program performance goal – Enhance educational resources and promote opportunities to support immigrants’ integration and participation in American civic culture.

- Goal 1 – Continue to protect our nation from dangerous people
- Objective 1.2 – Immigration

Immigration Status Verification program performance goal - Provide efficient and accurate immigration status and employment eligibility information.

- Goal 1 – Continue to protect our nation from dangerous people
- Objective 1.2 – Immigration

## E. Performance Based Budget Highlights by Program <sup>1/</sup>

For each major program, the performance goal, main performance measure/s, indicators, budget including allocation of non-programmatic overhead, and FTE are shown below. A complete listing of performance measures may be found on the OMB web site Expectmore.gov. In a few instances program names in PARTweb may differ slightly from those used in the Performance Budget.

| <b>Program: Immigration Security and Integrity*</b>  |         |           |           |           |           |           |
|--|---------|-----------|-----------|-----------|-----------|-----------|
| <i>* The FY 2008 Enacted level includes \$20M in emergency funding provided in P.L. 110-161.</i> |         |           |           |           |           |           |
| <b>Performance Goal:</b> Enhance the integrity of the legal immigration system.                  |         |           |           |           |           |           |
| <b>Fiscal Year:</b>  | FY 2004 | FY 2005   | FY 2006   | FY 2007   | FY 2008   | FY 2009   |
| <b>\$ Thousands</b>  | None    | \$315,291 | \$321,726 | \$403,483 | \$530,755 | \$510,755 |
| <b>FTE</b>   | None    | 937       | 937       | 1,188     | 1,356     | 1,418     |

|--|---------|---------|---------|---------|---------|---------|
| <b>Measure:</b> Percent of suspected fraud leads where the principal application/petition is ultimately denied.  |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure assesses the proportion of suspected fraudulent petitions/applications that are verified as fraudulent by the Office of Fraud Detection and National Security (FDNS) or Immigration Customs Enforcement (ICE), and ultimately denied. When U.S. Citizenship and Immigration Services (USCIS) field adjudicators determine that applications/petitions may be fraudulent, the files are forwarded to FDNS. After the initial review by FDNS, if administrative investigation is validated, a lead is opened and FDNS conducts additional research. When the results of the research indicate that prosecutorial and/or administrative investigation is warranted, a case is opened and an investigation is conducted, either by ICE or FDNS. Results are provided to the adjudicator handling the application/petition for use in final determination to grant or deny the benefit. |         |         |         |         |         |         |

| <b>Measure:</b> Actual cycle time to process form I - 129 (Petition for Nonimmigrant Worker).  |  |  |  |  |  |  |
| <b>Description of Measure:</b> The amount of time it takes for U.S. Citizenship and Immigration Services to provide a decision regarding an I - 129, Petition for Nonimmigrant Worker, that an employer has filed to petition for an alien to come to the U.S. temporarily as a nonimmigrant worker. To provide immigration benefit services in a timely manner, on a monthly basis, the USCIS collects performance data on applications received, completed, and pending through its Performance Analysis System. Actual Cycle Time is calculated by counting back the number of preceding months until the sum of the monthly receipts equals the current month's End Pending (e.g. if 100 cases are pending and case receipts were 20, 30, 15, 25, and 10 over the past 5 months, then cycle time is 5 months). |  |  |  |  |  |  |

1/ FY 2007 Performance data reflects revised enacted funding and FTE levels.

| <b>Fiscal Year:</b> | FY 2004       | FY 2005       | FY 2006       | FY 2007        | FY 2008       | FY 2009       |
|---------------------|---------------|---------------|---------------|----------------|---------------|---------------|
| <b>Target:</b>      | <=2<br>months | <=2<br>months | <=2<br>months | <=2<br>months  | <=2<br>months | <=2<br>months |
| <b>Actual:</b>      | 1.5 months    | 1.5 months    | 2 months      | 1.69<br>months | N/A           | N/A           |

**Measure:** Actual cycle time to process form I - 485 (Application to Register for Permanent Residence or to Adjust Status).

**Description of Measure:** The amount of time it takes to provide a decision regarding an I - 485, Application to Adjust Status. On a monthly basis, performance data on applications received, completed, and pending is collected via the Performance Analysis System. Actual Cycle Time is calculated by counting back the number of preceding months until the sum of the monthly receipts equals the current month's End Pending (e.g. if 100 cases are pending and case receipts were 20, 30, 15, 25, and 10 over the past 5 months, then cycle time is 5 months). Applications for which no visa number is available are considered pending, but not part of the backlog. Cases are also removed from the backlog calculation if a Request For Evidence is pending for the regulatory period with the applicant, the applicant has requested a later appearance date, or the required name check is pending with the FBI. The out - year targets are set at 6 months due to multiple steps in the application, investigation, and applicant interview process.

| <b>Fiscal Year:</b> | FY 2004        | FY 2005        | FY 2006        | FY 2007        | FY 2008       | FY 2009       |
|---------------------|----------------|----------------|----------------|----------------|---------------|---------------|
| <b>Target:</b>      | <=20<br>months | <=15<br>months | <=6<br>months  | <=6<br>months  | <=4<br>months | <=4<br>months |
| <b>Actual:</b>      | 19.7<br>months | 13.9<br>months | 5.93<br>months | 6.88<br>months | N/A           | N/A           |

**Measure:** Actual cycle time to process form N - 400 (Application for Naturalization).

**Description of Measure:** The amount of time it takes to make a decision on an N - 400, Application for Naturalization. USCIS collects monthly performance data on applications received, completed, and pending. Actual Cycle Time is calculated by counting back the number of preceding months until the sum of the monthly receipts equals the current month's End Pending (e.g. if 100 cases are pending and case receipts were 20, 30, 15, 25, and 10 over the past 5 months, then cycle time is 5 months). Cases are removed from the backlog calculation if the applicant has failed the English/Civics requirement and is waiting the statutory period between testing attempts, is awaiting a judicial oath ceremony for more than one month, the required name check is pending with the FBI, or if a Request For Evidence is pending for the regulatory period with the applicant. In FY 2007, the target is increased from 6 months to 7 months to allow the oath to occur in jurisdictions where it is administered by the U.S. District Courts.

| <b>Fiscal Year:</b> | FY 2004        | FY 2005        | FY 2006        | FY 2007        | FY 2008       | FY 2009       |
|---------------------|----------------|----------------|----------------|----------------|---------------|---------------|
| <b>Target:</b>      | <=14<br>months | <=10<br>months | <=6<br>months  | <=7<br>months  | <=5<br>months | <=5<br>months |
| <b>Actual:</b>      | 11.8<br>months | 10.9<br>months | 5.58<br>months | 5.46<br>months | N/A           | N/A           |

**Measure:** Percent of asylum reform referrals (at local offices) completed within 60 days of receipt.

**Description of Measure:** Asylum is a form of protection that allows refugees to remain in the U.S. Before asylum was reformed in 1995, applicants could obtain work authorization simply by filing for asylum, which made the system vulnerable to abuse. Since asylum reform, work authorization is obtained only if asylum is granted or no negative decision has been made within 180 days. If USCIS finds an applicant ineligible for asylum and the applicant is not in valid/legal status, USCIS refers the application to an immigration judge for final determination in the course

1/ FY 2007 Performance data reflects revised enacted funding and FTE levels.

of removal proceedings. Immigration courts require approximately 120 days to complete adjudications. To meet the 180 day threshold for a decision, USCIS aims to refer 75% of ineligible applications to immigration courts within 60 days of filing. Recognizing that some cases should be exempt due to their complexity or the unavailability of staff at certain times, the program has exempted 25 percent of its workload from this requirement.

|                     |         |         |         |         |         |         |

**Measure:** Number of Refugee interviews conducted.

**Description of Measure:** The number of refugees seeking resettlement to the U.S. who have been interviewed by an immigration officer to get information about the applicant's claim for refugee status. A person is eligible for resettlement to the United States as a refugee pursuant to Immigration and Nationality Act §207 if he or she is of special humanitarian concern to the United States, is a refugee pursuant to Immigration and Nationality Act §101(a)(42), is not firmly resettled in a third country, and is otherwise admissible to the United States. Such person's spouse and unmarried children also derive refugee resettlement status. The Presidential Determination for FY2006 established a refugee admissions ceiling of 70,000. Approximately 90,000 applications must be adjudicated to meet this ceiling. USCIS uses the State Department's Worldwide Refugee Admissions Processing System to capture performance statistics, and ensure that services are provided to refugees in a timely, consistent, and accurate manner.

|                     |                 |                 |                 |                 |                 |                 |

**Measure:** Customer satisfaction rate with USCIS phone centers.

**Description of Measure:** Percentage of people who obtained immigration services and benefits information from USCIS over the telephone, who have indicated satisfaction with the service they received. On a monthly basis, USCIS selects a random group of customers who have called the phone centers. A contracted company with expertise in conducting phone surveys then calls each customer and conducts a survey to rate their overall experience with the service received from the USCIS phone center. A standardized USCIS and General Accountability Office approved survey tool is used to collect customer responses. This satisfaction rate measures our performance in providing timely, consistent, and accurate information regarding immigration services and benefits to immigrants, U.S. employers, and the American public over the telephone. The FY07 and FY08 targets remain below the FY06 actual due to a current transition to two new contractors responsible for managing USCIS call center operation.

| <b>Measure:</b> Percent of targeted language populations with access to citizenship educational materials in their native language.   |         |         |         |         |         |         |
| <b>Description of Measure:</b> The percent of targeted language populations with online access to "Welcome to the United States: A Guide for New Immigrants" in their native language. This guide contains information to help immigrants settle into life in the U.S., and basic civics information that introduces immigrants to the U.S. system of government. The guide gives immigrants tips on getting involved in their communities, meeting their responsibilities, and exercising their rights as permanent residents. First distributed in English in 2004, the guide is now available in 11 languages (English, Spanish, Chinese, Vietnamese, Korean, Russian, Arabic, Tagalog, Portuguese, French, and Haitian Creole). Outreach to three additional populations (speakers of Polish, Urdu, and Basic Literacy English) is planned through FY 2009. This measure is used as a proxy outcome due to the economic and logistic difficulties associated with using a more direct outcome measure, such as level of community involvement and volunteerism. |         |         |         |         |         |         |

| <b>Measure:</b> Number of Significant Citizenship Outreach Events   |         |         |         |         |         |         |
| <b>Description of Measure:</b> This measure describes the number of significant outreach events designed to support immigrant integration. These actions serve a multitude of purposes to assist in accomplishing this goal, such as educating immigrants and encouraging their civic integration, informing stakeholders about the Office's mission and the importance of promoting civic integration, educating counterparts from outside the U.S. government about federal integration efforts, and bringing on new partners to help encourage integration. Significant outreach events include conferences, ceremonies, meetings, media appearances, trainings, and presentations. Outreach efforts encourage immigrants to become more integrated into American civic culture. |         |         |         |         |         |         |

|---|--|--|--|--|--|--|
| <b>Measure:</b> Percent of E - Verify employment eligibility verification queries that required manual review that are later resolved as "Employment Authorized." |  |  |  |  |  |  |
|---|--|--|--|--|--|--|

1/ FY 2007 Performance data reflects revised enacted funding and FTE levels.

**Description of Measure:** Immigration status and employment eligibility verification data is collected in the Verification Information System (VIS) from departmental databases. VIS also has access to the Social Security Administration (SSA) Numident database, which houses Social Security Number (SSN) information. This measure tracks the data completeness of the VIS system by reviewing the percentage of E - Verify Tentative Nonconfirmations and DHS Verifications In Process responses that resolve as Employment Authorized, instead of immediately resolving as Employment Authorized through the Automated VIS System, without the need for manual review by an Immigration Status Verifier (ISV). The ISV determines if USCIS has granted employment authorization status. The more complete the VIS data, the less likely a query forwarded for manual review will later resolve as Employment Authorized. Data completeness results in more efficient program operation and faster overall response time to employers.

**Measure:** Percent of Systematic Alien Verification for Entitlements (SAVE) queries requiring manual review that are later resolved as lawful status.

**Description of Measure:** Immigration status data is collected in the Verification Information System (VIS) departmental databases. This measure tracks the data completeness of the VIS system by reviewing the percentage of verification queries that are submitted by Federal, State, and local government benefit granting agencies to which the VIS system has responded with "Request for Additional Verification," and the ISV has verified the applicant's lawful status, instead of the status being automatically verified through the VIS system. The more complete the VIS data, the less likely a query forwarded for manual review will later resolve as having lawful status. Data completeness results in more efficient program operation and faster overall response time to benefit and license providers.

1/ Authorization Cites

The Secret Service is established in 18 U.S.C. 3056 and 3 U.S.C. 202. 18 U.S.C. 1029 and 1030 specifically authorize the Service to investigate offenses under those sections.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## UNITED STATES SECRET SERVICE SALARIES AND EXPENSES

### I. Appropriation Overview

#### A. Mission Statement for Salaries and Expenses

The United States Secret Service (USSS) performs two critical homeland security missions: protection and criminal investigations. The USSS protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, Foreign Missions and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events (NSSEs). The USSS investigates violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation's financial, banking, and telecommunications infrastructure; and provides critical forensic support for associated investigations for the National Center for Missing and Exploited Children (NCMEC).

In order to accomplish both its protective and investigative missions, the USSS has offices located throughout the United States and in 15 foreign countries. The Service is requesting that \$1,410,621,000 in discretionary funding be provided to support this dual mission. Included in this budget is funding for 6,732 FTE comprised primarily of special agents, uniformed officers, and support personnel.

#### B. Budget Activities

##### Protection

In FY 2007, the Secret Service provided protection to 109 heads of state/government and 56 spouses at the 62<sup>nd</sup> United Nations General Assembly in New York City. Of the participants, four were considered to have high threat levels. The Secret Service continues to constantly adapt security plans to meet the protective needs for the ever-changing number of protectees and to mitigate emerging threats.

In addition, the Secret Service successfully provided protection to approximately 55 protectees who made approximately 6,000 foreign and domestic stops during FY 2007.

**Protection of Persons and Facilities** - The primary purpose of the Secret Service's domestic protection activity is to protect our nation's leaders. To accomplish this, this program operates to ensure protectees' personal protection, and to protect the buildings and grounds where these individuals reside and work (e.g., the White House Complex and the Vice President's residence). Since the September 11, 2001 attacks, there has been a significant increase in the number of

protectees receiving varying levels of protection from the Secret Service. Currently, the Service provides protection to 35 protectees: 22 permanent protectees are authorized under 18 USC § 3056; 5 provisional protectees are authorized pursuant to Presidential Directive; 7 provisional protectees are authorized pursuant to Presidential Directive when the protectee travels abroad, and 1 provisional protectee is authorized by 18 USC § 3056 and DHS Directive pursuant to status as a major Presidential or Vice-Presidential candidate. This budget also provides for the protection of the Vice President for a period of six months after the expiration of his term in January 2009. The Secretary and Deputy Secretary of the Department of Homeland Security have been added as protectees, while maintaining the detail for the Secretary of the Treasury, on a reimbursable basis. The Service estimates that 7,375,680 hours of protection for persons and facilities will be worked during FY 2009.

Part of the protection of persons and facilities program is the protection of foreign heads-of-state/government visiting the United States. Foreign dignitary protection includes: 1) protection for visiting heads-of-state/government, and their spouses, as well as other distinguished visitors to the U.S. as directed by the President; and 2) external security for foreign diplomatic embassies and missions in the Washington, D.C. area (and other limited areas consistent with statute). The Secret Service provides protection to these individuals and foreign missions by strategically placing human and physical assets (agents, tactical support, technical security, explosives detection and weapons-of-mass destruction detection and countermeasures) at these foreign missions and using these assets during foreign dignitary visits to the United States. All efforts are directed toward ensuring that foreign dignitaries and foreign missions receive the optimal level of protection.

The foreign dignitaries who visit the U.S. often are high-profile individuals and are deemed to have medium to high threat levels. Today's environment necessitates the implementation of complex security operations that involve multiple jurisdictions and functions.

The Service has the sole statutory authority to provide a dedicated police presence and response to foreign embassies, chanceries and residences. When a "surge" in protective responsibilities in this area occurs, the Secret Service turns to other entities (i.e., Metropolitan Police Department) for assistance in dealing with such issues as demonstration control. Currently, the Secret Service protects 590 missions located in the Washington, D.C. area.

**Protective Intelligence Activities** - The Service's protective intelligence program is responsible for overseeing the investigation and evaluation of all protective intelligence subjects and for the receipt, analysis, and dissemination of all protective intelligence information. This mission is accomplished by the review, coordination, control and referral of information about individuals, groups and activities that pose a potential threat to persons and property protected by the Secret Service.

**National Special Security Events (NSSEs)** - By statute and Presidential Decision Directive-62 (PDD-62), the Secret Service is designated as the lead agency for designing, coordinating, and implementing operational security plans for NSSEs. As with campaign events, special agents coordinate with the military and Federal, state, county, local, and international law enforcement organizations to ensure the success of NSSEs security operations.

The Secret Service plans and implements security designs for designated NSSEs to ensure the physical protection of the President, the public and other Secret Service protectees who participate in NSSEs.

The events of September 11<sup>th</sup>, 2001 demonstrated that our adversaries are capable of attacking our nation on a grand scale and employing extensive research and surveillance methodologies, acquiring substantial skills and instruction, and striking their targets without warning. Funding to protect our leaders and communities is critical.

**Presidential Candidate/Nominee Protection** – The Secret Service provides protection to major Presidential and Vice Presidential candidates. It also provides protection to their spouses within 120 days of a general presidential election. Candidate/nominee protection began for the FY 2008 Presidential Campaign earlier than any presidential campaign in history. Protective details are activated only after established criteria are met. Campaign protection is a mandatory workload increase, and funding is needed for these presidential campaigns three out of every four fiscal years. The Service has no base budget funding for this activity. All campaign funding is non-recurred from the base budget following a presidential campaign and inauguration.

**White House Mail Screening** - The Secret Service screens White House mail to ensure it is free of harmful toxins.

Due to discoveries of anthrax being mailed in letters to political leaders as well as to members of the press, the Secret Service initiated a program to provide additional screening for mail destined for the White House Complex. This program is indicative of the close partnership the Service maintains with the White House regarding the implementation of security measures. Mail is now being delivered to a facility where it is put through a series of tests and is analyzed to ascertain if any chemical, biological, radiological contamination or explosive material is present.

**Headquarters, Management and Administration:** The Headquarters, Management and Administration program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, and relocation and travel services. It exercises accountability over the collection and disposition of the Secret Service's financial resources and examines and processes documents for payment of contracts, purchase orders, invoices and recurring expenses, including reservations and payments for travel and relocation services. Administration also provides management and program analysis support to all operational and administrative programs involving studies of organizational structuring, workflow efficiencies, and staffing allocations. It maintains organization charts and functional responsibility statements for all Secret Service offices. In addition, it establishes, develops, implements, and manages the strategic planning process for the Secret Service and coordinates Secret Service participation in all Department of Homeland Security and government-wide management improvement and evaluation programs. These tasks serve to assist the Service's leadership in formulating the vision and direction of the Secret Service.

This program also purchases goods via procurement services within the scope of the law and regulations and provides value-added procurement solutions to ensure that government assets and resources are wisely managed.

The program promotes fairness, consistency, and efficiency in the utilization of staffing, scheduling, and travel logistics through the Logistics Resource Center. It analyzes staffing needs and travel logistics alternatives to provide for more informed decision-making by balancing cost considerations with operational needs.

The Administrative Operations Division (AOD) plans, develops, and administers policies and procedures, and performs related activities for a variety of real and personal property management areas in support of the United States Secret Service Headquarters and field elements. AOD functions include space and facilities management, personal property and supply management, vehicle fleet management, mail distribution and screening and printing management. AOD acts as the single acquisition agent between the USSS and the General Services Administration (GSA) and the Department of State for the acquisition, construction and renovation of USSS owned or leased real property.

In addition, AOD organizes and coordinates facilities and property management support activities in support of the Secret Service's protective activities and designated National Special Security Events (NSSEs); manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites; plans, develops, and administers policies and procedures for environmental management, energy conservation and other related programs for the USSS and provides building maintenance management and general repairs and limited labor services support to all Headquarters offices.

**Rowley Training Center** - This program encompasses approximately 270 personnel at the Service's James J. Rowley Training Center (JJRTC), including: instructors, tactical and weapons systems specialists, curricula design staff, computer and web-based faculty/technicians, executive training advisors, administrative support, and maintenance staff. The Service has a separate appropriation, the Acquisition, Construction, Improvements and Related Expenses account which is used to maintain the facility.

The Service's current Strategic Plan provides the following primary objectives with regard to future mission-driven training protocols:

- Enhance JJRTC to provide an academic environment that promotes in-depth critical thinking and innovative strategies in the areas of physical protection, site event security, threat/risk assessments, protection intelligence/counterterrorism techniques, emergency preparedness, criminal investigations, protection of critical financial infrastructure, and executive/management development.
- Maximize training opportunities by using emerging technologies, such as 3-D modeling, computer-generated simulation training, and distance learning.
- Develop and implement training programs consistent with the Secret Service's core mission for Federal, state, and local law enforcement partners in the areas of electronic crimes, counterterrorism/protection, cyber/counterfeit investigations, threat/risk assessment, and operational security for National Special Security Events.

- Establish partnerships with academic institutions and professional associations to assess, confirm, and ensure innovative training methodologies.

The Rowley Training Center supports both the protection and criminal investigation missions, the two critical homeland security missions mandated for the Secret Service.

**Domestic Field Operations** - In order to accomplish its investigative responsibilities, the Secret Service maintains a network of 116 field offices nationwide. Agents assigned to these domestic offices are responsible for investigating violations of laws relating to counterfeiting of obligations and securities of the United States (Currency, Treasury Checks, etc.), and to financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, computer fraud; as well as investigating computer-based attacks on our nation's financial, banking, and telecommunications infrastructure.

**International Field Administration and Operations** - The Secret Service maintains a total of 19 foreign field offices and one domicile office in 15 countries. Similar to their domestic counterparts, agents assigned to these offices are responsible for investigating violations of criminal statutes falling under the Secret Service's investigative mission. Because they do not have arrest authority, agents liaise with their foreign law enforcement counterparts in order to meet their investigative responsibilities. Additionally, these agents augment any protective mission falling within their geographic area of responsibility. Relationships established in foreign countries from conducting criminal investigations greatly enhance the Secret Service's ability to provide a safe and secure environment for the people it protects while they travel overseas.

**Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF)** - In response to the emerging trends involving the use of computers and their peripheral devices, the Secret Service established the Electronic Crimes Special Agent Program, or ECSAP. Special Agents involved with the ECSAP are computer investigative specialists, qualified to conduct examinations on many types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, and other electronic media. Currently, there are over 400 special agents participating in the ECSAP.

In addition to the ECSAP, the Secret Service has established a domestic network of 24 Electronic Crimes Task Forces (ECTFs). The concept of the ECTF model is truly unique since it brings together not only Federal, state and local law enforcement officials from a specific region, but also prosecutors, as well as individuals from private industry and academia. These task forces provide a productive framework and collaborative crime-fighting environment in which the resources of its participants are combined to effectively and efficiently make a significant impact in preventing and detecting electronic crimes.

**Forensic Support for Missing and Exploited Children** – Funding for missing and exploited children includes a \$6M grant provided to the National Center for Missing and Exploited Children and \$2.366M for Secret Service forensic and related support of investigations involving missing and exploited children.

### **C. Budget Request Summary**

The U.S. Secret Service requests 6,762 positions, 6,732 FTE, and \$1,410,621,000 for FY 2009; an increase of \$28,850,000 and 32 FTE to the FY 2008 Enacted Budget. This level of funding is required for and includes the following:

- Complete the staffing required for a new President Bush Post-Presidency detail (35 positions, 18 FTE, and \$4,500,000). Funds are needed for recruiting, hiring, and training additional personnel in advance of President Bush leaving office.
- Additional program increases for the following: protective terrorist countermeasures (\$17,000,000), enhanced protection for White House protectees (27 positions, 14 FTE, and \$4,700,000), rent for the White House mail facility (\$6,000,000), White House mail facility equipment (\$14,500,000) and utility costs for the Joint Operations Center (JOC) (\$2,000,000).
- Adjustments to the base for the following: non-recur funding for the Joint Operations Center (JOC) (-\$28,796,000), 2008 Presidential Campaign (-\$27,918,000), 3<sup>rd</sup> year full funding for the 103 positions hired in FY 2007 (\$6,944,000), and expected cost increases net of management efficiencies (\$29,920,000).

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

| Total Change 2008-2009       | (68)         | (98)         | (\$4,678)        |

The United States Secret Service requests \$849.012 million and 4,142 FTE for this activity. This is a decrease of (-\$4,678) million to the FY 2008 Enacted Budget.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Service is authorized by law to protect:

- 1) the President, the Vice President, (or other individuals next in order of succession to the Office of the President), the President-elect and Vice President-elect;
- 2) the immediate families of the above individuals;
- 3) former Presidents and their spouses for their lifetimes, except when the spouse remarries; (In 1997, legislation was passed limiting Secret Service protection to former Presidents for a period of not more than 10 years from the date the former President leaves office and applies to all former Presidents after President Clinton.)
- 4) children of former presidents until age 16;
- 5) visiting heads-of-state/government and their spouses traveling with them, other distinguished foreign visitors to the United States, and official representatives of the United States performing special missions abroad; and
- 6) major Presidential and Vice Presidential candidates. Protection is also provided for their spouses within 120 days of a general Presidential election.

The functional organization of the Secret Service accommodates of dual missions, permanent protective details dedicated to protection, as well as a worldwide network of field offices to carry out the investigative responsibilities. However, these field offices are not only responsible for

investigations but also routinely provide agents to support the protective mission. That is, agents assigned to these offices spend significant time traveling away from their field office augmenting the Secret Service's permanent and temporary protective details. This is a very efficient way to provide protection as it allows for additional resources when protective mission requirements demand them. Also, agents trained to be good investigators come with these skills when doing protection which is important to the success of the protection mission.

The Secret Service provides protection in two ways, one for permanent protectees and the other for temporary protectees. Permanent protectees, such as the President and the First Lady, have details of special agents assigned to them with additional support, as needed, from field special agents. Temporary protectees, such as candidates and foreign dignitaries, have details of special agents on temporary assignment from Secret Service field offices. The Secret Service does not discuss methods or means in any detail; however, generally speaking, an advance team surveys each site to be visited. From these surveys, the team members determine staffing, equipment requirements, and the location of hospitals and evacuation routes for emergencies. Fire, rescue, and other public service personnel in the community are alerted. A command post is established with full communications facilities. The assistance of the military, Federal, state, county, and local law enforcement organizations is a vital part of the entire security operation.

Before the protectee's arrival, the lead advance agent coordinates the security planning with all law enforcement representatives participating in the visit. Personnel are posted and are alerted to specific problems associated with the visit. Intelligence information is discussed, identification specified, and emergency options outlined. Prior to the arrival of the protectee, checkpoints are established and access to the secured area is limited.

**PPA: Protection of Persons and Facilities**

|                              | Perm<br>Pos. | FTE          | Amount           |

| 2009 Program Change          | 62           | 32           | 28,200           |
| <b>2009 Request</b>          | <b>3,576</b> | <b>3,546</b> | <b>\$710,468</b> |
| Total Change 2008-2009       | 62           | 32           | \$16,933         |

The Secret Service requests \$710.468 million and 3,546 FTE for this PPA. This is an increase of \$16.933 million to the FY 2008 Enacted Budget. Adjustments include President Bush Post-Presidency detail position annualization (\$6.944 million) and other position annualization pay inflation net of management efficiencies (\$10.585 million). (\$-28.796 million) is non-recurred from the base budget for the relocation of the Joint Operations Center. Program changes include an additional \$17 million to fund the purchase of primary limousines (\$9.0 million), the enhancement of White House security systems (\$2.0 million), secure communications maintenance (\$3.3 million), White House re-key (\$1.8 million), the enhancement of portable air security surveillance systems (\$.6 million), and Explosive Ordinance Detection training and equipment (\$.3 million). In addition, the Service requests funding needed to enhance protection

for White House protectees (\$4.7 million), additional positions to complete staffing requirements for the President Bush Post-Presidency detail (\$4.5 million), and to cover utility costs for the relocated Joint Operations Center (JOC) (\$2.0 million).

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service secures the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. The Service also secures the physical safety of visiting heads of state/heads of government, and their spouses, and other distinguished visitors to the United States as directed by the President. In addition, the Service provides external security to foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas, consistent with statute).

In order to protect our nation's leaders, the Secret Service operates to ensure protectees' physical protection and to protect the buildings and grounds where they reside and work. The requested amount addresses the following strategic challenges facing the Service: terrorists' sustained motivation to attack U.S. interests (including its leaders) and the increasing technological sophistication of the threat environment.

#### **Uniformed Division**

The U.S. Secret Service Uniformed Division began as the White House Police, which was originally created as a separate and distinct organization by Public Law 67-300, approved September 14, 1922. The White House Police came under the direct supervision of the U.S. Secret Service in 1930. The original mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involved duties in connection with the protection of the Executive Mansion and grounds in the District of Columbia; any building in which White House offices are located; and the President and members of his immediate family.

The members of the Uniformed Division assigned to the White House Branch perform many functions that thrust them into the public light. These officers process thousands of staff members, other workers, members of the press and those individuals with appointments into the White House Complex on a daily basis. Officers assigned to this Branch provide protection to the White House Complex through the effective use of fixed posts, foot beats, bicycle patrols and police cruisers. Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise to our mission on a daily basis in and around the White House Complex. The Special Operations Section of the Uniformed Division is an additional unit responsible for tours of the White House Mansion and for the coordination of special events such as the Easter Egg Roll, Presidential Receptions and Inaugural events. The White House Vehicle Inspection Team and the Counter Surveillance Unit also help achieve the Uniformed Division's goal of providing a safe and protected environment.

The Uniformed Division provides a safe and secure environment for the President of the United States, his immediate family, the Vice President, their staff members and the myriad other White House employees that work there each day. In addition to these responsibilities, personnel assigned to the White House Branch perform similar functions at the Treasury Building, the New Executive Office Building, the Eisenhower Executive Office Building and other locations which house Presidential Offices. In addition to the White House Branch, other publicly visible

components of the Uniformed Division are the Naval Observatory Branch and Foreign Missions Branch.

Significant accomplishments in FY 2007 include the following:

- The Service provided protection to protectees while they made domestic and foreign stops
- Protection was provided to 109 foreign heads-of-state/government at the 62<sup>nd</sup> United Nations General Assembly
- Planning and construction for the relocation of the Joint Operations Center commenced

Significant planned accomplishments in FY 2008 include the following:

- The Service will continue to provide protection to protectees while they make domestic and foreign stops
- Protection will be provided to approximately 110 foreign heads-of-state/government at the 63<sup>rd</sup> United Nations General Assembly
- Continuing relocation of the Joint Operations Center

Significant planned accomplishments in FY 2009 include the following:

- Protection of the President and Vice President, their families, visiting heads-of-state/governments, other designated individuals, the White House and other buildings within the Washington, DC area will continue as a primary mission of the Secret Service
- The Service will also continue to implement operational security for designated National Special Security Events

**PPA: Protective Intelligence Activities**

|                              | Perm<br>Pos. | FTE        | Amount          |

| Total Change 2008-2009       |              |            | \$2,057         |

The Secret Service requests \$59.761 million and 476 FTE for this PPA. This is an increase of \$2.057 million to the FY 2008 Enacted Budget. Adjustments include position annualization and pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Subjects (individuals and groups) and activities that pose threats to protectees and protected events are investigated. The Secret Service analyzes threats, investigates threats, and conducts intelligence advances in order to minimize the risk of harm to protected persons, property, and events. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasingly technological sophistication of the threat environment.

**PPA: National Special Security Events**

|                              | Perm<br>Pos. | FTE | Amount         |
|------------------------------|--------------|-----|----------------|

| <b>2009 Current Services</b> |              |     | <b>\$1,000</b> |
| 2009 Program Change          |              |     |                |
| <b>2009 Request</b>          |              |     | <b>\$1,000</b> |
| Total Change 2008-2009       |              |     | \$0            |

The Secret Service continues funding of \$1.0 million for this PPA.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service plans and implements security designs for designated National Special Security Events (NSSEs). In addition, the Secret Service ensures the physical protection of the President, the public, and other Service protectees who participate in NSSEs.

Security at NSSEs is strategically crucial to homeland security in that NSSEs, by definition, involve persons, institutions, and landmarks that are integral to the governance of the nation, vital to national and/or global economic stability, or symbolically important to American citizens. The requested amount provides funding for the design, planning, and implementation of operational security plans for NSSEs.

|                              | <u>Pos.</u>  | <u>FTE</u>   | <u>Amount</u>   |
| <b>2007 Actual</b>           | <b>74</b>    | <b>50</b>    | <b>\$11,696</b> |
| <b>2008 Enacted</b>          | <b>250</b>   | <b>250</b>   | <b>85,250</b>   |
| 2009 Adjustments             | <u>(130)</u> | <u>(130)</u> | <u>(44,168)</u> |
| <b>2009 Current Services</b> | <b>120</b>   | <b>120</b>   | <b>\$41,082</b> |
| 2009 Program Change          |              |              |                 |
| <b>2009 Request</b>          | <b>120</b>   | <b>120</b>   | <b>\$41,082</b> |
| Total Change 2008-2009       | (130)        | (130)        | (\$44,168)      |

The Secret Service requests \$41.082 million for FY 2009. This is a decrease of (-\$44.168) million to the FY 2008 Enacted Budget. (-\$27.918) million is non-recurred from the base budget for the 2008 Presidential Campaign. In addition, this request shifts (\$-16.250) million and (130) FTE to the investigative activity as a result of reduced staffing requirements in FY 2009 for candidate/nominee protection.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The 2004 Presidential Campaign and the 2005 Presidential Inauguration were the first such protective events conducted in the post-9/11 environment. Campaign protection successfully concluded following the election, with protection having been provided at 884 different stops. The inauguration took place with integrated multi-agency security protocols in place that afforded the optimal level of protection for Secret Service protectees, invited guests, and the general public.

With President Bush completing his final term and Vice President Cheney indicating that he will not be a candidate for President in 2008, the Secret Service will face an unprecedented situation relative to candidate/nominee protection. There will not be a prospective presidential candidate as a sitting president or vice president under the Secret Service's protection and, as a result, a greater number of candidates/nominees will require protection under the statute. During presidential campaigns, the protective workload increases to provide protection for the designated candidates/nominees

Planning for the 2008 Presidential Campaign is ongoing. In FY 2007, equipment required for the protective details was purchased, the Secret Service began to project required staffing levels and candidate/nominee protection began for the 2008 Presidential Campaign.

Secret Service personnel traveled to Washington, DC to receive candidate/nominee protective detail and operations training needed to mitigate myriad threats. The Service sent personnel to instruct at regional training centers to provide protective detail support training. The Service is also training approximately 2,000 other Homeland Security agents to assist with campaign protection support.

Significant accomplishments in FY 2007 regarding candidate protection include the following:

- The Secret Service provided training to candidate protective detail personnel; supplies and equipment were procured to support candidate/nominee protective operations; and critical protective vehicles and equipment were purchased for the campaign.
- Candidate/nominee protection began earlier than for any previous presidential campaign.

Significant planned accomplishments in FY 2008 include the following:

- Protection will be provided to qualifying presidential candidates/nominees, and their spouses
- Security will be provided at the major political conventions, debates, and at coordinating centers

Significant planned accomplishments in FY 2009 include the following:

- Protection of candidates/nominees during the last month of campaigning will be provided
- Protection of the post-election President and Vice President-elect will be provided along with security for the Inaugural events

**PPA: White House Mail Screening**

|                              | Perm<br>Pos. | FTE | Amount          |

| Adjustments                  |              |     |                 |
| <b>2009 Current Services</b> |              |     | <b>\$16,201</b> |
| 2009 Program Change          |              |     | 20,500          |
| <b>2009 Request</b>          |              |     | <b>\$36,701</b> |
| Total Change 2008-2009       |              |     | \$20,500        |

The Secret Service requests \$36.701 million for FY 2009. This is an increase of \$20.5 million to the FY 2008 Enacted Budget. This request includes a program change of \$6 million needed to cover White House mail facility rent to be paid to the General Services Administration and a program change of \$14.5 million for White House mail facility equipment.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

White House mail screening is a process designed to screen all incoming mail, equipment, supplies and agricultural products destined for the White House Complex, with the goal of identifying lethal threats and containing, mitigating, and investigating vulnerabilities posed by these threats.

## ADMINISTRATION

### PPA: Headquarters, Management and Administration

|                              | Perm<br>Pos. | FTE        | Amount           |
|------------------------------|--------------|------------|------------------|

| 2009 Adjustments             |              |            | 6,170            |
| <b>2009 Current Services</b> | <b>328</b>   | <b>328</b> | <b>\$182,104</b> |
| 2009 Program Changes         |              |            |                  |
| <b>2009 Request</b>          | <b>328</b>   | <b>328</b> | <b>\$182,104</b> |
| Total Change 2008-2009       |              |            | \$6,170          |

The Service requests \$182.104 million and 328 FTE for this activity. This is an increase of \$6.170 million to the FY 2008 Enacted Budget. Adjustments include position annualization and pay inflation.

### CURRENT SERVICES PROGRAM DESCRIPTION:

Administration is responsible for:

- (1) tracking, monitoring, executing, and reporting the financial activities of the Secret Service;
- (2) improving the efficiency and productivity of personnel;
- (3) conducting analyses of program objectives and strategies to examine operational and cost factors impacting the continued viability of ongoing activities and the feasibility of proposed initiatives;
- (4) procuring quality goods and services in a timely fashion; and
- (5) administering the design, construction, acquisition, assignment, maintenance, and disposal of Service properties.

### **Administrative Operations Division (AOD):**

During the past year, scheduled renovations with the necessary security enhancements were accomplished as a result of lease expirations and forced moves by the Facilities Management Branch. The Property Management Branch completed renovation projects on residences and command posts for new individuals receiving protection as well as projects within the White House Complex.

Significant accomplishments in FY 2007:

- Foreign and Protective Management Branch relocated/renovated/opened five foreign offices (Frankfurt, London, Moscow, Brasilia, and Madrid)
- Completed phase one of the Eisenhower Executive Office Building Renovations Project
- Completed the transition for replacement handcuffs and vests to scheduled individuals
- Completed the renovation of the Washington Field Office

FY 2008 planned accomplishments include:

- Open new foreign office in Beijing, China
- Perform scheduled and necessary upgrades to the USSS Headquarters Memorial Building
- Complete the Annual Physical Inventory within the prescribed three month timeframe

FY 2009 planned accomplishments include:

- Continue study of Webster School renovation
- Complete the relocation of the Joint Operations Center (JOC) data center

### **Enterprise Financial Systems Division (EFS):**

The Enterprise Financial Systems (EFS) Division is responsible for systems development in specific business areas including: core financial accounting and reporting; travel and relocation management; property management; and procurement management. EFS develops appropriate interfaces between these and other administrative systems, as EFS supports system users through training, communications, user procedures, and technical support services.

Significant accomplishments in FY 2007:

- Provided system support for closing the financial books within the required Department of Homeland Security timeframes
- Improved customer satisfaction by improving system integration, streamlining business processes and migrating to more efficient infrastructure

FY 2008 planned accomplishments include:

- Implementation of a web-based time and labor distribution system

In FY 2009, EFS will provide the infrastructure to integrate time and labor with the enterprise financial application. This will support the improved financial reporting required by Congress, the Office of Management and Budget and the Secret Service.

### **Management and Organization Division (MNO):**

Continued enhancement of performance metrics to best reflect how Secret Service financial crimes investigations impact the public. MNO refined the analytical methodology for completing the Office of Management and Budget (OMB) Program Assessment Rating Tool (PART) and completed the process for the Secret Service's final program review – Investigations – which received a preliminary score of "effective," the highest score possible. MNO actively participated in the Department of Homeland Security (DHS) Strategic Plan revision process, and subsequently began revising the Secret Service Strategic Plan (FY 2008 – FY 2012) for release in FY 2007. MNO continues to coordinate Secret Service submission of timely responses to quarterly reporting requirements for the President's Management Agenda (PMA), and has facilitated the Service's achievement of scores above the DHS average throughout FY 2007.

Significant accomplishments in FY 2007 include:

- Provided Congress a report entitled the “Investigative Impact Study.” The impetus of this report was to develop new performance metrics to show the impact of the Services’ investigations on the public and the impact of the protective mission on financial crimes investigations
- Facilitated the declassification of several thousand Secret Service records of archival and historical interest to the public.
- Coordinated a comprehensive update of Secret Service criminal investigative policy, encompassing areas such as financial crimes, identity theft, and counterfeit violations

FY 2008 planned accomplishments include:

- Build on the FY 2007 “ Investigative Impact Study” by testing and implementing a new performance metric entitled Return on Investigations, portraying the impact of the Services’ investigations on the public as well as the impact the protective mission has on investigations
- Publish and disseminate the 2008 Campaign Operational Guide

## TRAINING

### PPA: Rowley Training Center

|                              | Perm<br>Pos. | FTE        | Amount          |

| <b>2009 Current Services</b> | <b>273</b>   | <b>273</b> | <b>\$53,189</b> |
| 2009 Program Change          |              |            |                 |
| <b>2009 Request</b>          | <b>273</b>   | <b>273</b> | <b>\$53,189</b> |
| Total Change 2008-2009       |              |            | \$1,235         |

The Secret Service requests \$53.189 million and 273 FTE for this PPA. This is an increase of \$1.235 million to the FY 2008 Enacted Budget. Adjustments include position annualization and pay inflation.

### CURRENT SERVICES PROGRAM DESCRIPTION:

The James J. Rowley Training Center (JJRTC) is responsible for:

- (1) developing, administering, and coordinating training programs for Secret Service employees, and for other federal law enforcement agencies and law enforcement officials from various state and local police departments;

- (2) providing all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel;
- (3) providing training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components;
- (4) providing specialized operational training for the Service's tactical elements (counter-assault, counter-sniper, and emergency response teams), which include the core components of the protective methodology;
- (5) evaluating, selecting, and training all Secret Service explosive detection canines/tactical canines;
- (6) administering and coordinating fitness, control tactics, vehicle operation training, emergency medicine, and water safety programs;
- (7) conducting research and testing of munitions, and related equipment technology; and
- (8) administering the acquisition, storage, maintenance, and issuance of firearms, operational weapons and ammunition to all Secret Service personnel.

Significant accomplishments in FY 2007 include the following:

- JJRTC provided all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel
- JJRTC provided training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components
- JJRTC provided significant training for the 2008 Presidential Campaign

Significant planned accomplishments in FY 2008 include the following:

- JJRTC will continue to provide specialized operational training for the Service's tactical elements (counter-assault, counter-sniper, and emergency response teams), which include the core components of the protective methodology

Significant planned accomplishments in FY 2009 include the following:

- JJRTC will continue to provide all basic and in-service training and specialized operational skills training for the Uniformed Division and other professional personnel
- JJRTC will continue to provide training for executive, supervisory, administrative, cyber/IT solutions, and foreign language training for all Service components
- The human resources and training office will continue enhancing efforts to recruit and hire special agents, Uniformed Division officers and administrative, professional and technical personnel
- Study the efficiencies for competing out uniformed division shooting instructors

## INVESTIGATIONS

| <b>2009 Request</b>          | <b>1,989</b> | <b>1,989</b> | <b>\$326,316</b> |
| Total Change 2008-2009       | 130          | 130          | \$26,123         |

The United States Secret Service requests \$326.316 million and 1,989 FTE for this activity. This is an increase of \$26.123 million to the FY 2008 Enacted Budget.

### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The functional organization of the Secret Service accommodates of dual missions, permanent protective details dedicated to protection, as well as a worldwide network of field offices to carry out the investigative responsibilities. However, these field offices are not only responsible for investigations but also routinely provide agents to support the protective mission. That is, agents assigned to these offices spend significant time traveling away from their field office augmenting the Secret Service's permanent and temporary protective details. This is a very efficient way to provide protection as it allows for additional resources when protective mission requirements demand them. Also, agents trained to be good investigators come with these skills when doing protection which is important to the success of the protection mission.

The Secret Service is mandated by statute and executive order to carry out criminal investigations. The Secret Service was established as a law enforcement agency in 1865, with an original mandate to investigate the counterfeiting of U.S. currency.

This activity:

- (1) exercises broad investigative jurisdiction over a wide variety of financial crimes;
- (2) has a long history of protecting American consumers and industry from financial fraud as being the original guardian of our nation's financial payment systems;
- (3) has primary authority for the investigation of access device fraud, including credit and debit card fraud, and parallel authority with other law enforcement agencies in identity crime cases.
- (4) has experienced an expansion of its investigative mission since the early 1990's to include concurrent jurisdiction with the United States Department of Justice for financial institution fraud; and
- (5) has assumed additional responsibilities as the Internet and use of personal computers became mainstream, and economies of scale made this technology affordable to even the most common criminals.

The combination of the information revolution and the effects of globalization have caused the investigative mission of the Secret Service to change dramatically. As a result, the Secret Service has evolved into an agency that is recognized worldwide for its expertise in investigating all types of financial crimes; and its efforts to detect, investigate and prevent financial crimes are aggressive, innovative, and comprehensive.

**PPA: Domestic Field Office Operations**

|                              | Perm<br>Pos. | FTE          | Amount           |

| <b>2009 Current Services</b> | <b>1,597</b> | <b>1,597</b> | <b>\$241,772</b> |
| 2009 Program Change          |              |              |                  |
| <b>2009 Request</b>          | <b>1,597</b> | <b>1,597</b> | <b>\$241,772</b> |
| Total Change 2008-2009       | 117          | 117          | \$22,030         |

The Secret Service requests \$241.772 million and 117 FTE for this PPA. This is an increase of \$22.030 million to the FY 2008 Enacted Budget. Adjustments include position annualization and pay inflation. \$14.625 million and 117 FTE are reallocated to this program from Presidential Candidate Nominee Protection for the 2008 Presidential Campaign.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The United States Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States, and financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field resources are focused on achieving the Department of Homeland Security strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context which addresses the spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

Significant accomplishments in FY 2007 include the following:

- Cyber Crime Investigations:

A two-year investigation by the Orlando Field Office resulted in three arrests and the service of 33 seizure warrants on 71 E-Gold accounts valued at over \$16 million dollars. The three suspects arrested were charged with violations of Title 18, USC, Sections 1960 (Unregistered Money Remitting Business), 1956 (Money Laundering), 371 (Conspiracy) and 2 (Aiding and Abetting) for their involvement as the developers/owners of E-Gold. E-Gold is a highly favored online payment system utilized by members of criminal web-based forums and other cyber criminals to pay one another for illicit goods and services,

such as stolen credit card numbers, false identification documents, and child pornography. On a typical business day, about 5,000 new E-Gold accounts are established and 40,000 account holders make nearly 55,000 E-Gold trades with an approximate value of \$5 million. The company's 4 million accounts trade approximately \$2 billion in E-Gold annually.

- Data Breach Investigations:

- The San Diego Field Office, through an online undercover operation, identified the largest known distributor of compromised credit card account numbers in the world as a Ukrainian national. This individual is believed to have had access to over 1 million stolen credit card numbers.

On September 11, 2006, based on the work done by the San Diego Field Office, a Federal Grand Jury in the Southern District of California issued a sealed indictment charging the suspect with numerous counts of violating Title 18, USC, Sections 1028 (Identity Fraud) and 1029 (Access Device Fraud). The potential fraud loss in this investigation was nearly \$200 million dollars.

During the course of the investigation, an undercover Secret Service agent conducted two face to face meetings with the suspect, once in Thailand and once in the United Arab Emirates. In July 2007, the suspect told the undercover agent he would be vacationing in Europe and invited the undercover agent to join him at the resort. On July 21, 2007, ten Secret Service agents along with one analyst and the prosecuting Assistant United States Attorney flew to Europe to coordinate with international law enforcement authorities for the arrest and extradition of the suspect. On July 25, 2007, the suspect was arrested for violation of international fraud laws. Deportation and asset forfeiture proceeding are ongoing.

- "*Operation Blinky*" began as an online carding investigation targeting a suspect with the username "Blinky." The suspect was sending large amounts of money, via e-Gold accounts, to known cyber criminals in Eastern Europe in return for tens of thousands of stolen credit card account numbers. After receiving additional information from an informant, Miami Field Office agents focused their investigation on a group of Cuban nationals utilizing stolen credit card numbers throughout southern Florida.

On April 26, 2007, five co-conspirators in the case were indicted by a federal grand jury in Miami for violation of Title 18, USC, Sections 1028A (Aggravated Identity Theft), 1029 (Access Device Fraud), and 371 (Conspiracy). More than 200,000 credit card account numbers have been recovered in connection with the ring's activity. To date, the fraud loss in this case exceeds \$75 million.

- Ongoing Network Intrusion Investigations:

The Secret Service is investigating a massive compromise of debit card and Personal Identification Number (PIN) numbers which have resulted in the unauthorized withdrawal of large amounts of cash from ATM machines in the United States and abroad. The unauthorized withdrawals are now estimated to have exceeded \$10 million dollars, and impact approximately 150 financial institutions.

Recent news articles have reported that one of the possible points of compromise is a large retailer. The Secret Service has been working closely with the victim corporation and other members of the card payment industry to determine the true point of compromise. As one component of this investigation, the Secret Service is examining the labyrinth of third party processors that make up a large part of the card payment system. As a result, we have uncovered many areas of concern regarding the credit/debit card authorization process, and we continue to work with industry partners to gather more information.

In December 2006, the Secret Service was notified by a victim corporation that their servers had been breached. This data breach resulted in the loss of 45 million credit card numbers, the largest single data breach in history. Forensic examination has shown that the original breach began through a wireless connection in Miami, Florida. Later, a remote connection was established with a Russian-owned internet server provider located in San Jose, California. The Secret Service has conducted extensive investigative efforts in the Boston, Pittsburgh, and San Jose districts and continues to coordinate this investigation. An analysis of the network intrusion yielded few leads; however, recent and pending arrests may produce positive results.

Significant planned accomplishments in FY 2008 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas

Significant planned accomplishments in FY 2009 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas

**PPA: International Field Administration and Operations**

The Secret Service requests \$28.342 million and 70 FTE for this PPA. This is an increase of \$.822 million to the FY 2008 Enacted Budget. Adjustments include position annualization and pay inflation.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service provides a comprehensive, internationally-coordinated response to new threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving DHS' strategic objective of economic security (e.g., combating foreign counterfeiting of U.S. currency). The requested amount funds field offices in 15 countries in a strategic context that addresses the worldwide spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization (when a foreign country replaces its national currency with the U.S. dollar).

Significant planned accomplishments in FY 2008 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas

Significant planned accomplishments in FY 2009 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas

| Total Change 2008-2009       | 13          | 13         | \$3,271         |

The Secret Service requests \$47.836 million and 302 FTE for this PPA. This is an increase of \$3.271 million to the FY 2008 Enacted Budget. Adjustments include position annualization and pay inflation. This request includes \$1.625 million and 13 FTE reallocated to this program from Presidential Candidate Nominee Protection for the 2008 Presidential Campaign.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Through the Electronic Crimes Special Agent Program (ECSAP), the Service trains special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through Electronic Crimes Task Forces (ECTF), the Service forms partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTF's combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in a strategic environment characterized by a rise in electronic financial transactions and associated criminal activity.

Significant accomplishments in FY 2007 include the following:

- Electronic Crimes Special Agent Program (ECSAP):

This program seeks to mitigate vulnerabilities to the nation's critical infrastructure and sensitive communications networks by training agents and state/local partners on computers, PDAs, telecommunications devices, and other electronic media to obtain forensic data and investigative leads on organized criminal groups operating domestically and abroad, using new technologies. As part of the Electronic Crimes Special Agent Program, the Secret Service expanded this to the Electronic Crimes State and Local Program, which trains state and local law enforcement counterparts in the same forensic capabilities as our ECSAP trained agents. DHS US-CERT has contracted with the Secret Service to help facilitate the newly established National Computer Forensic Institute

located in Hoover, Alabama. This facility will enable the Secret Service to train state and local investigators, as well as attorneys and judges, in computer forensics network intrusions and judicial strategies.

*ECSAP in support of the National Center for Missing and Exploited Children:*

Miami Field Office agents arrested a suspect for violations of computer pornography and promoting a sexual act with a child. This investigation began when the suspect made contact online with an undercover Miami Field Office agent while seeking children to torture by forcibly submerging them in water until they became unconscious. The suspect flew to Miami to meet a mother (the undercover agent), who would let him "dunk" her 9 and 12 year-old daughters in exchange for \$500 as a form of sexual gratification, as well as having the children perform sexual acts.

Significant planned accomplishments in FY 2008 include the following:

- 240 new agents are scheduled for ECSAP training
- Maintain current investigative operations while continuing to pursue efficiencies within program areas

Significant planned accomplishments in FY 2009 include the following:

- Maintain current investigative operations while continuing to pursue efficiencies within program areas

**PPA: Forensic Support and Grants to NCMEC**

| Total Change 2008-2009       |              |           |                |

The Secret Service requests \$8.366 million and 20 FTE for FY 2009.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U.S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting

examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds to the National Center for Missing and Exploited Children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

Description of Item

The Joint Operations Center (JOC) monitors all sensors, alarms, gates, and communications systems in support of the protection of the President and the White House Complex (24 hours a day / 7 days a week).

Justification

In February 2006, the General Services Administration (GSA) notified the Secret Service that the structural hardening and infrastructure modernization of the Eisenhower Executive Office Building (EEOB) would require the relocation of the Service’s JOC, Emergency Operations Center (EOC) and all supporting systems. Originally, GSA project managers indicated the modernization project would not affect JOC and EOC Operations. However, GSA project managers later determined that the construction would disrupt vital utility and communication lines critical to security operations, rendering the JOC and EOC inoperable both during and following the modernization effort.

The relocation of the JOC and EOC will require the equipping of a new facility, acquisition of additional communications systems to ensure continuity of operations and relocation of information technology systems supporting the current center.

The FY 2008 Enacted Budget includes \$32.796 million for the JOC relocation. \$4 million remains in the base budget in FY 2009 while \$28.796 million is non-recurred. The Secret Service requests an additional \$2 million in FY 2009 for utilities and out-year support services of proprietary systems in support of critical protective communications.

Impact on Performance (Relationship of Increase to Strategic Goals)

The structural hardening and infrastructure modernization at the EEOB requires the relocation of the JOC, EOC, and all supporting systems. The construction will disrupt vital utility and communication lines critical to security operations, rendering the JOC and EOC inoperable both during and following the modernization effort. These systems are integral to achieving a secure environment for Secret Service protectees and facilities 100 percent of the time; anything less than this is unacceptable, and relocating the JOC enables the Secret Service to maintain a secure environment. This initiative supports DHS Goal 3 to Protect Critical Infrastructure by improving our ability to respond to emergency situations. If the initiative is not funded, the Service's ability to meet the program performance target of 100 percent incident-free protection of persons inside the White House Complex will be jeopardized.

**Program Increase 2:** White House Mail Facility Rent

Strategic Goal(s) & Objective(s): This initiative supports IPG priority 9 – Secure Critical Infrastructure Systems and Safeguard Citizens.

PPA: White House Mail Screening

Program Increase: Positions \_\_\_\_\_ FTE \_\_\_\_\_ Dollars \$6,000

1/ Total PPA fund for White House mail screening is \$36,701 (\$16,201 for contractual services, \$14,500 for White House mail facility equipment and \$6,000 for White House mail facility rent)

Description of Item

The new White House mail screening facility will include state-of-the-art environmental screening and examination equipment, specialized chemical, biological, and radiological (CBR) alarms and sensors, laboratory testing and substance analysis screening systems, x-ray and explosive detection systems, and security alarms and camera systems critical to White House security.

Justification

In April 2002, the United States Secret Service and the Executive Office of the President, Office of Administration (EOP/OA), established a White House mail screening facility at an abandoned warehouse located on the U.S. Army’s Edgewood Chemical Biological Center (ECBC) in Aberdeen, Maryland. The purpose of the facility was to screen all mail destined for the White House Complex for select chemical, biological, radiological, nuclear, and explosive (CBRNE) hazards. The plan was for this facility to support this mission on a one-year, temporary basis pending the selection of a permanent site.

In August 2004, the EOP/OA, the Secret Service and the General Services Administration (GSA) met to discuss the potential design, security and site requirements for a permanent White House mail screening facility. Based on these discussions, the GSA proposed building a facility on vacant federal property located at the Anacostia Naval Annex, Washington, D.C. The proposed site is adjacent to the EOP/OA remote delivery site and the Secret Service vehicle support facility. The location meets all security, environmental and operational requirements identified by the EOP/OA and the Service.

The GSA commissioned the services of an architectural and engineering firm to produce a Program Development Study. The scope of the study was to develop a comprehensive facility

design plan and construction estimate based upon the facility's requirements. Staff from the Secret Service, the GSA, the EOP/OA, and the ECBC met as a working group to finalize facility requirements, laboratory space, administrative office space, and environmental safety and support systems.

In February 2005, the GSA received the completed program development study for a White House mail screening facility. The study proposed an approximately 80,000 square foot warehouse/laboratory facility, requiring approximately 24 months to complete; from breaking ground to utilization of the facility. The GSA subsequently included a construction prospectus for the White House mail facility in their 2007 federal budget submission. The estimated construction cost for the facility was \$39.6 million. The facility was to be completed and operational by March 2009. This FY 2009 funding request of \$6 million is for rental payments to the GSA for the completed facility.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

In this time of increased terrorist threats, it is imperative that the Service utilizes state-of-the-art technology to ensure all White House mail is free from harmful toxins. This initiative supports DHS Goal 3 to Protect Critical Infrastructure, and will allow the Secret Service to continue to meet the performance target of 100 percent incident-free protection of persons inside the White House Complex.

**Program Increase 3:** White House Mail Facility Equipment

Strategic Goal(s) & Objective(s): This initiative supports IPG priority 9 – Secure Critical Infrastructure Systems and Safeguard Citizens.

<sup>2/</sup> For FY 07 and FY 08, the funding profile for White House mail equipment is reflected in the White House mail rent program increase request

Description of Item

Funding is requested for equipment to operate the new White House mail facility. Although GSA is constructing the building, the Service is responsible for the build-out of the building, including security enhancement and specialized equipment. The facility is expected to be fully operational by spring 2009 with these resources.

Justification

Specialized equipment necessary to operate the new facility includes unique laboratory systems, specialized ventilation and filtering systems, radioactive detection systems/x-ray equipment, decontamination equipment, and laboratory analysis equipment. The laboratory equipment and environmental screening and surveillance systems will require proprietary Department of Defense maintenance and contractor support services to ensure proper operations and environmental safety. Funding will establish an appropriate scientific and chemical, biological, and radiological specialized equipment replacement cycle. The Service has also identified permanent security and alarm systems to ensure security of operations.

Prior to the anthrax attacks on the U.S. Postal Service, the Secret Service x-rayed White House mail at a remote site and then processed it within the White House Complex. After the anthrax attack, processing of White House mail was moved from the White House to a facility at the Anacostia Naval Annex. On October 23, 2001, the Anacostia facility was contaminated by anthrax and processing of White House mail was relocated to a temporary facility at the Edgewood Chemical and Biological Center in Aberdeen, Maryland. At this location, the Army was tasked with managing contractors to process and test White House mail for chemical and biological contamination. This facility was intended to support this mission on a temporary one-year basis pending the selection of a permanent site. In fact, the current location of the White

House mail screening operation is scheduled to be torn down, but will remain in operation until the mail processing operation can be moved to its new site in Anacostia.

\$14.5 million is requested in FY 2009 to fund new equipment for the facility to ensure a seamless transition from the old to the new site. The Service will operate both sites concurrently until the move has been completed. The new White House mail screening facility will require state-of-the-art environmental screening and examination equipment, specialized chemical, biological, and radiological (CBR) alarms and sensors, laboratory testing and substance analysis screening systems, x-ray and explosive detection systems, and security alarms and camera systems critical to White House security. These new CBR and explosive device detections systems will require out-year funding for support and maintenance. The laboratory equipment and environmental screening and surveillance systems will require proprietary Department of Defense (DoD) maintenance and contractor support services to ensure proper operations and environmental safety.

#### Impact on Performance

Funding the Secret Service at target will enable the Secret Service to work toward achieving DHS Strategic Objective 3.4 to “Secure the physical safety of the President, Vice President, visiting world leaders, and other protectees.” Funding this initiative at the requested level also enables the Secret Service to acquire the necessary equipment needed to screen incoming mail effectively. In this time of increased terrorist threats, it is imperative that the Service utilizes state-of-the-art technology to ensure all White House mail is free from harmful toxins. This initiative supports the IPG priority of “increased preparedness” by providing situational awareness which results in preparedness to respond to emergency situations. Funding for this initiative will allow the Secret Service to continue to meet the performance target of 100 percent incident-free protection of persons inside the White House Complex.

**Program Increase 4:** President Bush Post-Presidency Detail

Strategic Goal(s) & Objective(s): This initiative supports IPG priority 9 – Secure Critical Infrastructure Systems and Safeguard Citizens.

Description of Item

The President Bush Post-Presidency detail provides protection for President Bush after he leaves office.

Justification

It is anticipated that the current President will be active and maintain a high profile after he leaves office, while continuing to be the focal point of terrorists' aggression directed towards the United States. With the current post-September 11 threat environment, the ongoing war in Iraq, and the fact that President Bush is a target for terrorist activity, the President Bush Post-Presidency Detail will require significant resources.

In FY 2007, 103 positions were hired to support the President Bush Post-Presidency detail. The FY 2009 funding request is for an additional 35 positions for staffing requirements of the detail (\$4,500). These resources will ensure the Secret Service effectively anticipates threats and provides the appropriate level of protection for President Bush. The Secret Service will dedicate human and technical resources to ensure security for the former President. This will create greater demands upon field agents, as they investigate and assess threats, perform protective advances and support assignments, and supplement the protective detail staffing as necessary.

Impact on Performance (Relationship of Increase to Strategic Goals)

The realities of the post-September 11 threat environment are such that significantly more resources will be required to effectively anticipate threats and provide the appropriate level of

protection for President Bush after he leaves office. Not funding this initiative will force the Secret Service to fill this detail by reallocating staffing from elsewhere, resulting in not achieving investigative performance targets. Funding this initiative will allow for a smooth implementation of protection and transition of personnel without jeopardizing other critical program operations. Funding this initiative will directly support DHS Goal 3 to Protect Critical Infrastructure, and have a direct impact on Secret Service protective and investigative performance measures.

**Program Increase 5:** Protective Terrorist Countermeasures

Description of Item

This funding will support initiatives and studies that will detail procedures, responsibilities, requirements, and plans that could be utilized in the event of an explosive, chemical, biological, radiological attack at a secured site; identify additional countermeasures that could be deployed to address specific emerging threats; allow the acquisition and deployment of advanced electronic countermeasures; and the purchase of additional primary Presidential limousines.

Justification

Some portion of this request was funded by Congress in FY 2007. However, the Service through a Congressionally-approved reprogramming, re-allocated these funds to cover major shortfalls in funding for base operations. As a result, funding for important classified countermeasures at the White House have been delayed. As new threats evolve and are identified, it is critical the Service have funding to address them. A further delay in the acquisition of protective technologies increases the cost to catch up to developments and enhancements currently available. Technology has been evolving at a rapid pace and with new developments come cost increases.

The Secret Service cannot utilize outdated equipment as adversaries constantly look for new ways to thwart our attempts to counter the threat. It is imperative that the Service have an adequate funding base for the replacement of classified equipment. The Service must continually upgrade permanent and temporary protective site equipment with the latest state-of-the-art equipment available.

The Secret Service seeks additional base funding for the maintenance and life-cycle replacement of equipment to support and enhance critical operational and classified systems. The Service is requesting \$17.0 million for the following protective terrorist countermeasure support programs:

### **Primary Limousines - \$9,000,000**

The vehicle carrying the President essentially becomes the Oval Office when he is traveling beyond the perimeter of the White House Complex. The President's primary limousine contains protection systems classified at the "SECRET" level, and are designed to mitigate the terrorist's offensive capabilities. Armored vehicles play an important role in overall protection of the Service's protectees. Components and sub-systems of the primary armored vehicles contain integrated techniques and specific modifications to the standard armored automotive technologies.

The Secret Service is requesting \$9.0 million to increase the number of and maintain the current inventory of primary Presidential/Vice Presidential armored limousines. The cost of a primary limousine is proportional to its complex design. These vehicles are built from the ground up. There is a significantly higher degree of protection offered by these primary armored vehicles than any other armored vehicle. Funding requested would allow for expansion, maintenance and replacement of the existing Presidential/Vice Presidential armored vehicle fleet. The primary Presidential/Vice Presidential armored vehicles contain state-of-the-art technologies including transparent armor vital to the Secret Service's ability to provide critical protection to the President and Vice President outside of protected sites. The availability and operability of the Service's armored fleet would be greatly enhanced with this additional funding.

### **Technical Surveillance and Electronic Countermeasures Programs - \$3,300,000**

The need for secured communications dramatically increased after September 11<sup>th</sup>. This has accelerated the need for necessary enhancements, upgrades, replacement and maintenance of existing critical classified programs used to identify and mitigate technical and electronic threats to fixed and temporary protected sites visited by the President, Vice President and high-threat protectees.

Without such funding, the Presidential and Vice Presidential communications, protected sites and motorcades will be vulnerable to terrorist attacks via electronic intercepts and activation of chemical/biological/explosives devices. The funding requested is critical to the acquisition of countermeasures to mitigate these threats.

### **White House Complex Security Programs - \$2,000,000**

Funding will be used to enhance, upgrade and replace critical equipment used as part of existing classified programs, implement new state-of-the-art protective countermeasures, and enhance existing technologies and detection systems used at the White House Complex. Systems include state-of-the-art perimeter surveillance and detection systems, low lighting and thermal camera systems, back scatter x-ray systems (fixed and mobile), chemical/biological/radiological/nuclear/air detection and surveillance systems for threat identification and mitigation, complex technical monitoring systems, alarm and notification systems, and specialized countermeasure monitoring equipment.

### **White House Re-key - \$1,800,000**

This initiative provides a solution for the re-keying of the White House Complex and other Secret Service facilities. The Secret Service held the patent for the key mechanisms used over 20 years at the Complex and other Secret Service facilities. This is cause for concern regarding access restrictions. The patented “S” key system has recently become available worldwide to interested entities. With the pending change of administration quickly approaching and considering the number of keys misplaced or lost over the last 20 years, the Secret Service requires funding to re-key all locations.

### **Portable air security surveillance systems - \$600,000**

Funding would be used for the enhancement, operations and maintenance of a classified air security surveillance program. Funding will be used to purchase and deploy state-of-the-art portable radar surveillance systems for air space monitoring around temporary protected sites visited by the President, Vice President and high-threat protectees. The system could be easily transported and integrated into existing air security systems at temporary locations throughout the world to support the protective mission. Air space monitoring will identify threats to persons and venues protected by the Secret Service and allow for rapid response to those threats.

### **Explosive Ordnance Detection Training & Equipment - \$300,000**

This initiative allows for a five-year replacement cycle on equipment provided for military personnel in the performance of explosive device mitigation. Items such as the Explosive Ordnance Detection (EOD) response vehicles, radio firing devices, blasting machines, range vehicles, robotic equipment, and support equipment require routine replacement to afford the best protection tools available for highly dangerous situations encountered by our employees as well as support provided by the military.

### Impact on Performance (Relationship of Increase to Strategic Goals)

#### *Primary Limousines*

Funding this initiative will greatly enhance the ability of the Secret Service to provide protection to the President and Vice President, by allowing for the expansion, maintenance, and replacement of the existing armored vehicle fleet. Because of the level of safety and security these armored vehicles provide, this initiative enhances the Service’s ability to meet the Long Term Performance Goal of the Protection of Person and Facilities program to “protect our Nation’s leaders and other protectees”, as well as support DHS Goal 3 to Protect Critical Infrastructure. Not funding this initiative could have enormous consequences as our limousines would not have the latest state-of-the-art technologies to counter a potential attack. This initiative also has a direct impact on the performance measures of the Protection of Persons and Facilities program, by enabling the Secret Service to continue meeting its main outcome measure – “Percentage of Instances Protectees Arrive and Depart Safely.”

#### *Countermeasures Support Programs*

This funding will support initiatives that will detail procedures, responsibilities, requirements, and plans that could be utilized in the event of an explosive, chemical, biological, radiological attack at a secured site; identify additional countermeasures that could be deployed to address specific emerging threats; and allow the acquisition and deployment of advanced electronic countermeasures. These initiatives support DHS Goal 3 to Protect Critical Infrastructure, and have a direct impact on our Long Term Performance Goal of protecting our nation's leaders, foreign dignitaries, and facilities.

Strategic Goal(s) & Objective(s): This initiative supports IPG priority 9 – Secure Critical Infrastructure Systems and Safeguard Citizens.

PPA: Protection of Persons and Facilities

Program Increase: Positions 27 FTE 14 Dollars \$4,700

Description of Item

Enhance protection services for White House protectees.

Justification

**Hazardous Agent Mitigation – Medical Emergency Response (HAMMER): (15 Special Agents)**

The primary mission of the Hazardous Agent Mitigation Medical Emergency Response Team (HAMMER) is to provide immediate emergency life saving interventions for the Secret Service protectee(s) during incidents involving chemical, biological, radiological (CBR), industrial hazardous materials, and emergency medical situations. HAMMER teams are responsible for ensuring that the most technically-equipped and trained personnel are available when needed.

HAMMER teams consist of operational members utilizing a tactical rescue vehicle/ambulance. Each team member has a special support function to address a variety of emergency situations. HAMMER team members are required to travel throughout the year in support of protective movements. A typical out-of-town HAMMER mission involves transport of the team and support vehicle to the trip site on the car plane at least a day or two in advance of the protectee’s visit. Once on the ground, the team liaises with the HAMMER advance agent and surveys the prospective motorcade routes and sites to develop a tactical hazardous material, medical and rescue response plan.

In order to respond to the increasing need for HAMMER services, it is necessary to hire 15 additional special agents. These positions will replace Uniformed Division officers currently performing these functions, thus releasing valuable resources to the Uniformed Division for use in other critical assignment areas. The training requirements for these individuals are rigorous and frequent. These positions also require professional certification.

### **Airspace Security Branch/Special Operations Division: (12 Detection Systems Specialists)**

The Secret Service Airspace Security Program has continued to foster and develop relationships within the airspace security community in the National Capitol Region (NCR) and nationwide. These relationships have enhanced our standing with our interagency partners on airspace security matters. The staffing of the National Capitol Region Coordination Center (NCRCC) with permanent, highly qualified Detection Systems Specialists (DSS's) will not only enhance airspace situational awareness, but will also improve our communication and coordination with NCRCC partners. All DSS's are cross-trained to work in the NCRCC, Joint Operations Center/Tiger Wall (JOC/TW) and the Joint Air Defense Operations Center (JADOC), which controls the Army's Ground Based Air Defense (GBAD) missile sites. Additionally, all DSS's are qualified to travel to staff Airspace Security Operations Centers (ASOC) in the North American Aerospace Defense Command (NORAD) Air Defense Sectors or to work with the Federal Aviation Administration in Air Traffic Control facilities in support of security for President, Vice-President and National Special Security Events. These personnel greatly enhance the effectiveness of the radar technology the Secret Service has acquired through the implementation of their specialized skills and experience. They have already demonstrated their worth not only to the overall protective mission, but to the airspace security community as a whole.

The Secret Service's effort to hire DSSs has moved forward in a diligent and deliberate manner. This will allow the Secret Service to have DSSs assigned to airspace positions now filled by special agents, thereby relieving the rotating agent personnel currently provided by the Presidential Protective Division, Vice-Presidential Protective Division and the Dignitary Protective Division.

#### Impact on Performance (Relationship of Increase to Strategic Goals)

This initiative will make available the necessary resources to provide the required protection at the White House and temporary protective venues. Due to the high-threat environment post September 11, the resources required to provide the necessary protection has increased, and the Secret Service will do all that is necessary to provide incident-free protection 100 percent of the time. The Service would need to reallocate resources from other areas to meet these protection requirements should this initiative not be funded, and the consequences of this reallocation would include missed performance targets in these other mission-critical areas. The resources provided through this initiative directly support DHS Goal 3 to Protect Critical Infrastructure as they will greatly augment the level of protection provided to our protectees, and enable the Service to continue meeting the Long Term Program Goal of its protection programs.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security  
United States Secret Service  
Justification of Proposed Changes in Salaries and Expenses  
Appropriation Language**

For necessary expenses of the United States Secret Service, including purchase of not to exceed [645] **675** vehicles for police-type use, of which 645 shall be for replacement only, and hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees where a protective assignment during the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty; conduct of and participation in firearms matches; presentation of awards; travel of United States Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act; [if approval is obtained in advance from the Committees on Appropriations of the Senate and the House of Representatives]; research and development; grants to conduct behavioral research in support of protective research and operations; and payment in advance for commercial accommodations as may be necessary to perform protective functions; [\$1,381,771,000]**\$1,410,621,000** [, of which \$853,690,000 is for protective functions]; of which not to exceed \$25,000 shall be for official reception and representation expenses; of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations; of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; and of which \$6,000,000 shall be for a grant for activities related to the investigations of missing and exploited children and shall remain available until expended: Provided, That up to \$18,000,000 provided for protective travel shall remain available until September 30, [2009]**2010**: Provided further, that up to \$1,000,000 for National Special Security Events shall remain available until expended: Provided further, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities, as defined in section 105 of title 5, United States Code, receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year. Provide further, that none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes. (Department of Homeland Security Appropriations Act, 2008.)

### **Explanation of Changes**

[645] **675** – To purchase 30 vehicles for the additional special agent staffing contained in the FY 2009 budget.

[\$961,779,000 and \$311,154,000] **\$1,410,621,000** – No substantive changes proposed

[2009] **2010** – No substantive changes proposed.

### **Authorization Cites**

The Secret Service is established in 18 U.S.C. 3056 and 3 U.S.C. 202. 18 U.S.C. 1029 and 1030 specifically authorize the Service to investigate offenses under those sections

### PPA Mission Statement

Protection of Persons and Facilities - Secure the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. Secure the physical safety of visiting heads of state/heads of government, and their spouses, and other distinguished visitors to the United States as directed by the President. Provide external security to foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas, consistent with statute).

In order to protect our nation's leaders, the Secret Service operates to ensure protectees' physical protection and to protect the buildings and grounds where they reside and work. The requested amount addresses the following USSS strategic challenges: terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing technological sophistication of the threat environment.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$515,829               | \$541,466               | \$25,637                       |

Salaries and benefits includes funding for 3,546 FTE, including an increase of \$6,944,000 for funding of 3rd year full-performance costs associated with 103 positions hired in FY 2007 for the President Bush Post-Presidency detail. The FY 2009 request also includes \$1,598,000 for 27 positions to be hired for enhanced protection for White House protectees, \$1,926,000 for 35 positions to be hired to complete staffing requirements for the President Bush Post-Presidency detail, and an increase of \$17,813,000 to cover increased payroll costs and (\$2,644,000) for management efficiencies.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

National Special Security Events - Plan and implement security designs for designated National Special Security Events (NSSEs). Ensure the physical protection of the President, the public, and other Secret Service protectees who participate in NSSEs.

Security at NSSEs is strategically crucial to homeland security in that NSSEs, by definition, involve persons, institutions, and landmarks that are integral to the governance of the nation, vital to national and/or global economic stability, or symbolically important to American citizens. The requested amount provides funding for the design, planning, and implementation of operational security plans for NSSEs.

**PPA Mission Statement**

Presidential Candidate Nominee Protection - Secure the physical safety of Presidential and Vice Presidential nominees, candidates, and spouses.

In order to protect our nation's leaders, the Secret Service operates to ensure protectees' physical protection and to protect the buildings and grounds where they reside and work. The requested amount addresses the following USSS strategic challenges: terrorists' sustained motivation to attack U.S. interests (including its leaders), the increasing technological sophistication of the threat environment, and the unprecedented protective challenge presented by the 2008 Presidential Campaign.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$43,085                | \$20,948                | (\$22,137)                     |

Salaries and benefits includes funding for 120 FTE. The FY 2009 request includes a decrease of (\$5,887,000) for non-recurring costs relative to the 2008 Presidential Campaign, a resource shift of (\$14,625,000) and (117) FTE to domestic field operations, and a resource shift of (\$1,625,000) and (13) FTE to ECSAP/ECTF.

**PPA Mission Statement**

Protective Intelligence Activities - Investigate subjects (individuals and groups) and activities that pose threats to protectees and protected events.

The Secret Service analyzes threats, investigates threats, and conducts intelligence advances in order to minimize the risk of harm to protected persons, property, and events. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasingly technological sophistication of the threat environment.

**PPA Mission Statement**

Headquarters, Management, and Administration - Plan, direct, and coordinate the administrative functions and programs of the Secret Service including the areas of budget, finance, logistics, procurement, management of property and facilities, administrative functions, and management and program analysis.

Requested funding provides headquarters support to the agency's protective and investigative missions in an environment of increased threat. In the strategic context of industry-wide law enforcement support ratios, the Secret Service is highly efficient.

**PPA Mission Statement**

Rowley Training Center - Ensure Secret Service employees possess the skills and knowledge to successfully accomplish the protective and investigative missions. Assist employees in maximizing their potential and their ability to meet the challenges of the 21st century. Provide innovative training opportunities that emphasize risk management and the judgment skills needed to support the Service's mission.

Requested funding will ensure that the Secret Service's most important resource - its employees - have the knowledge and skills needed to meet the demands of the Service's protective and investigative missions. In a strategic context of heightened threat, the Service must ensure that its training outpaces the threat environment.

**Summary Justification and Explanation of Changes**

**PPA Mission Statement**

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field resources are focused on achieving DHS' strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context of: the spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$169,331               | \$190,009               | \$20,678                       |

Salaries and benefits includes funding for 1,597 FTE. The FY 2009 request includes a resource shift of \$14,625,000 and 117 FTE from Presidential Candidate/Nominee Protection for the 2008 Presidential Campaign and an increase of \$6,053,000 to cover increased payroll costs.

|               | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

International Field Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving DHS' strategic objective of economic security (e.g., combating foreign counterfeiting of U.S. currency). The requested amount funds field offices in 15 countries in a strategic context of: the worldwide spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization (when a foreign country replaces its national currency with the U.S. dollar).

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF) - Through the ECSAP, train special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through the ECTF, form partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTF's combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in a strategic environment characterized by a rise in electronic financial transactions and associated criminal activity.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Salaries and Benefits</b> | \$0                    | \$37,051                | \$40,021                | \$2,970                        |

Salaries and benefits includes funding for 302 FTE. The FY 2009 request includes a resource shift of \$1,625,000 and 13 FTE from Presidential Candidate/Nominee Protection for the 2008 Presidential Campaign, and an increase of \$1,345,000 to cover increased payroll costs.

**PPA Mission Statement**

National Center for Missing and Exploited Children (NCMEC) - Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U.S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds to the National Center for Missing and Exploited Children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

**PPA Mission Statement**

National Center for Missing and Exploited Children (NCMEC) - Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U.S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds to the National Center for Missing and Exploited Children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## UNITED STATES SECRET SERVICE PROTECTION, ADMINISTRATION, AND TRAINING

### I. Appropriation Overview

#### **A. Mission Statement for Protection, Administration, and Training**

The United States Secret Service protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; protects the White House, Vice President's Residence, Foreign Missions and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events.

#### **B. Budget Activities**

##### Protection, Administration, and Training – Protection

**Protection of Persons and Facilities** - The primary purpose of the Secret Service's domestic protection activity is to protect our nation's leaders. To accomplish this, this program operates to ensure protectees' personal protection, and to protect the buildings and grounds where these individuals reside and work (e.g., the White House Complex and the Vice President's residence). Since the September 11, 2001 attacks, there has been a significant increase in the number of protectees receiving varying levels of protection from the Secret Service. In FY 2007, the Service provided protection to 55 protectees pursuant to Title 18 USC 3056 and Presidential Directive. The Secretary and Deputy Secretary of the Department of Homeland Security have been added as protectees, while maintaining the detail for the Secretary of the Treasury, on a reimbursable basis. The Service estimates that 6,999,200 hours for protection of persons and facilities were worked in FY 2007.

Part of the protection of persons and facilities program is the protection of foreign heads-of-state/government visiting the United States. Foreign dignitary protection includes: 1) protection for visiting heads-of-state/government, and their spouses, as well as other distinguished visitors to the U.S. as directed by the President; and 2) external security for foreign diplomatic embassies and missions in the Washington, D.C. area (and other limited areas consistent with statute). The Secret Service provides protection to these individuals and foreign missions by strategically placing human and physical assets (agents, tactical support, technical security, explosives detection, weapons-of-mass destruction detection and countermeasures, and specialized training) at these foreign missions and during dignitary visits to the United States. All efforts are directed to ensuring that foreign dignitaries and foreign missions receive the optimal level of protection.

The foreign dignitaries who visit the U.S. often are high-profile individuals and are deemed to have medium to high threat levels. Today's environment necessitates the implementation of complex security operations that involve multiple jurisdictions and functions.

The Service has the sole statutory authority to provide a dedicated police presence and response to foreign embassies, chanceries and residences. When a “surge” in protective responsibilities in this area occurs, the Secret Service turns to other entities (i.e., Metropolitan Police Department) for assistance in dealing with such issues as demonstration control. Currently, the Secret Service protects 590 missions located in the Washington, D.C. area.

**Protective Intelligence Activities** - The Service’s protective intelligence program is responsible for overseeing the investigation and evaluation of all protective intelligence subjects and for the receipt, analysis, and dissemination of all protective intelligence information. This mission is accomplished by the review, coordination, control and referral of information about individuals, groups and activities that pose a potential threat to persons and property protected by the Secret Service.

**National Special Security Events (NSSEs)** - By statute and Presidential Decision Directive-62 (PDD-62), the Secret Service is designated as the lead agency for designing, coordinating, and implementing operational security plans for NSSEs. As with campaign events, special agents coordinate with the military and Federal, state, county, local, and international law enforcement organizations to ensure the success of NSSE security operations.

The Secret Service plans and implements security designs for designated National Special Security Events (NSSEs) to ensure the physical protection of the President, the public and other Secret Service protectees who participate in NSSEs.

The events of September 11<sup>th</sup>, 2001 demonstrated that our adversaries are capable of attacking our nation on a grand scale and employing extensive research and surveillance methodologies, acquiring substantial skills and instruction, and striking their targets without warning. Funding to protect our leaders and communities is critical.

**Presidential Candidate/Nominee Protection** – The Secret Service provides protection to major Presidential and Vice Presidential candidates. It also provides protection to their spouses within 120 days of a Presidential election. In FY 2007, candidate/nominee protection began earlier than for any previous presidential campaign for the Secret Service. Protective details are activated only after established criteria are met. Campaign protection is a mandatory workload increase, and funding is needed for these Presidential campaigns three out of every four fiscal years. The Service has no base budget funding for this activity. All campaign funding is non-recurred from the base budget following a presidential campaign and inauguration.

**White House Mail Screening** - The Secret Service screens White House mail to ensure it is free of harmful toxins.

Due to discoveries of anthrax being mailed in letters to political leaders, as well as to members of the press, the Secret Service initiated a program to provide additional screening for mail destined for the White House Complex. This program is indicative of the close partnership the Service maintains with the White House regarding the implementation of security measures. Mail is now being delivered to a facility where it is put through a series of tests and is analyzed to ascertain if any chemical, biological, radiological contamination or explosive material is present.

### Protection, Administration, and Training – Administration

**Headquarters, Management and Administration:** The Headquarters, Management and Administration program develops and administers Secret Service-wide policies, plans, and procedures in budget, finance, accounting, financial systems, statements, and relocation and travel services. It exercises accountability over the collection and disposition of the Secret Service's financial resources and examines and processes documents for payment of contracts, purchase orders, invoices and recurring expenses, including reservations and payments for travel and relocation services. Administration also provides management and program analysis support to all operational and administrative programs involving studies of organizational structuring, workflow efficiencies, and staffing allocations. It maintains organization charts and functional responsibility statements for all Secret Service offices. In addition, it establishes, develops, implements, and manages the strategic planning process for the Secret Service and coordinates Secret Service participation in all Homeland Security and government-wide management improvement and evaluation programs. These tasks serve to assist the Service's leadership in formulating the vision and direction of the Secret Service.

This program also purchases goods via procurement services within the scope of the law and regulations and provides value-added procurement solutions to ensure that government assets and resources are wisely managed.

The program promotes fairness, consistency, and efficiency in the utilization of staffing, scheduling, and travel logistics through the Logistics Resource Center. It analyzes staffing needs and travel logistics alternatives to provide for more informed decision-making by balancing cost considerations with operational needs.

The Administrative Operations Division (AOD) plans, develops, and administers policies and procedures, and performs related activities for a variety of real and personal property management areas in support of the United States Secret Service Headquarters and field elements. AOD functions include space and facilities management, personal property and supply management, vehicle fleet management, mail distribution and screening and printing management. AOD acts as the single acquisition agent between the USSS and the General Services Administration (GSA) and the Department of State for the acquisition, construction and renovation of USSS owned or leased real property.

In addition, AOD organizes and coordinates facilities and property management support activities in support of the Secret Service's protective activities and designated National Special Security Events (NSSSEs); manages and coordinates administrative operations and services functions related to the planning, preparation, establishment, and deactivation of permanent and temporary protective sites; plans, develops, and administers policies and procedures for environmental management, energy conservation and other related programs for the USSS and provides building maintenance management and general repairs and limited labor services support to all Headquarters offices.

### Protection, Administration, and Training – Training

**Rowley Training Center:** This program encompasses approximately 270 personnel at the Service's James J. Rowley Training Center (JJRTC), including: instructors, tactical and weapons

systems specialists, curricula design staff, computer and web-based faculty/technicians, executive training advisors, administrative support, and maintenance staff. The Service has a separate appropriation, the Acquisition, Construction, Improvements and Related Expenses account which is used to maintain the facility.

The Service's current Strategic Plan provides the following primary objectives with regard to future mission-driven training protocols:

- Enhance JJRTC to provide an academic environment that promotes in-depth critical thinking and innovative strategies in the areas of physical protection, site event security, threat/risk assessments, protection intelligence/counterterrorism techniques, emergency preparedness, criminal investigations, protection of critical financial infrastructure, and executive/management development.
- Maximize training opportunities by using emerging technologies, such as 3-D modeling, computer-generated simulation training, and distance learning.
- Develop and implement training programs consistent with the Secret Service's core mission for Federal, state, local, and foreign law enforcement partners in the areas of electronic crimes, counterterrorism/protection, cyber/counterfeit investigations, threat/risk assessment, and operational security for National Special Security Events.
- Establish partnerships with academic institutions and professional associations to assess, confirm, and ensure innovative training methodologies.

The JJRTC supports both the protection and criminal investigation missions, the two critical homeland security missions mandated for the Secret Service.

| <b>2007 Actual</b> | <b>4,064</b> | <b>3,918</b> | <b>\$752,689</b> |

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Service is authorized by law to protect:

- 1) the President, the Vice President, (or other individuals next in order of succession to the Office of the President), the President-elect and Vice President-elect;
- 2) the immediate families of the above individuals;
- 3) former Presidents and their spouses for their lifetimes, except when the spouse remarries; (In 1997, legislation was passed limiting Secret Service protection to former Presidents for a period of not more than 10 years from the date the former President leaves office and applies to all former Presidents after President Clinton.)
- 4) children of former presidents until age 16;
- 5) visiting heads-of-state/government and their spouses traveling with them, other distinguished foreign visitors to the United States, and official representatives of the United States performing special missions abroad; and
- 6) major Presidential and Vice Presidential candidates. Protection is also provided for their spouses within 120 days of a general Presidential election.

Certain Secret Service protective methods are generally the same for all individuals protected. Permanent protectees, such as the President and the First Lady, have details of special agents assigned to them, with field agents providing support, as needed, for these details. Temporary protectees, such as candidates and foreign dignitaries, have details of special agents on temporary assignment from Secret Service field offices. The Secret Service does not discuss methods or means in any detail; however, generally speaking, an advance team surveys each site to be visited. From these surveys, the team members determine staffing, equipment requirements, and the location of hospitals and evacuation routes for emergencies. Fire, rescue, and other public service personnel in the community are alerted. A command post is established with full communications facilities. The assistance of the military, Federal, state, county, and local law enforcement organizations is a vital part of the entire security operation.

Before the protectee's arrival, the lead advance agent coordinates the security planning with all law enforcement representatives participating in the visit. Personnel are posted and are alerted to specific problems associated with the visit. Intelligence information is discussed, identification specified, and emergency options outlined. Prior to the arrival of the protectee, checkpoints are established and access to the secured area is limited.

**PPA: Protection of Persons and Facilities**

|                    | Perm         |              |                  |
|--------------------|--------------|--------------|------------------|
|                    | Pos.         | FTE          | Amount           |
| <b>2007 Actual</b> | <b>3,514</b> | <b>3,365</b> | <b>\$651,804</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service secures the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. The Service also provides for the physical safety of visiting heads of state/heads of government, and their spouses, and other distinguished visitors to the United States as directed by the President. In addition, the Service provides external security to foreign diplomatic embassies and missions in the Washington, DC area (and other limited areas, consistent with statute).

In order to protect our nation's leaders, the Secret Service operates to ensure protectees' physical protection and to protect the buildings and grounds where they reside and work. The requested amount addresses the following strategic challenges facing the Service: terrorists' sustained motivation to attack U.S. interests (including its leaders) and the increasing technological sophistication of the threat environment.

**Uniformed Division**

The U.S. Secret Service Uniformed Division began as the White House Police, which was originally created as a separate and distinct organization by Public Law 67-300, approved September 14, 1922. The White House Police came under the direct supervision of the U.S. Secret Service in 1930. The original mandate of the White House Police, incorporated in Title 3 of the U.S. Code, involved duties in connection with the protection of the Executive Mansion and grounds in the District of Columbia; any building in which White House offices are located; and the President and members of his immediate family.

The members of the Uniformed Division assigned to the White House Branch perform many functions that thrust them into the public light. These officers process thousands of staff members, other workers, members of the press and those individuals with appointments into the White House Complex on a daily basis. Officers assigned to this Branch provide protection to the White House Complex through the effective use of fixed posts, foot beats, bicycle patrols and police cruisers. Technicians assigned to the Counter Sniper Unit, Canine Unit and the Emergency Response Team also provide their expertise to our mission on a daily basis in and

around the White House Complex. The Special Operations Section of the Uniformed Division is an additional unit responsible for tours of the White House Mansion and for the coordination of special events such as the Easter Egg Roll, Presidential Receptions, and Inaugural events. The White House Vehicle Inspection Team and the Counter Surveillance Unit also help augment the Uniformed Division's goal of providing a safe and protected environment.

The Uniformed Division provides a safe and secure environment for the President of the United States, his immediate family, the Vice President, their staff members and the myriad other White House employees that work there each day. In addition to these responsibilities, personnel assigned to the White House Branch perform similar functions at the Treasury Building, the New Executive Office Building, the Eisenhower Executive Office Building and other locations which house Presidential Offices. In addition to the White House Branch, other publicly visible components of the Uniformed Division are the Naval Observatory Branch and the Foreign Missions Branch.

**PPA: Protective Intelligence Activities**

|                    | Perm        |            |                 |
|--------------------|-------------|------------|-----------------|

| <b>2007 Actual</b> | <b>476</b>  | <b>503</b> | <b>\$58,432</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Subjects (individuals and groups) and activities that pose threats to protectees and protected events are investigated. The Secret Service analyzes threats, investigates threats, and conducts intelligence advances in order to minimize the risk of harm to protected persons, property, and events. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasingly technological sophistication of the threat environment.

**PPA: National Special Security Events**

|                    | Perm        |            |               |
|--------------------|-------------|------------|---------------|
|                    | <u>Pos.</u> | <u>FTE</u> | <u>Amount</u> |
| <b>2007 Actual</b> |             |            | <b>\$317</b>  |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service plans and implements security designs for designated National Special Security Events (NSSEs). In addition, the Secret Service ensures the physical protection of the President, the public, and other Service protectees who participate in NSSEs.

Security at NSSEs is strategically crucial to homeland security in that NSSEs, by definition, involve persons, institutions, and landmarks that are integral to the governance of the nation, vital to national and/or global economic stability, or symbolically important to American citizens. The requested amount provides funding for the design, planning, and implementation of operational security plans for NSSEs.

**PPA: Presidential Candidate Nominee Protection**

|                    | Perm<br>Pos. | FTE       | Amount          |
|--------------------|--------------|-----------|-----------------|
| <b>2007 Actual</b> | <b>74</b>    | <b>50</b> | <b>\$11,696</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The 2004 Presidential Campaign and the 2005 Presidential Inauguration were the first such protective events conducted in the post-9/11 environment. Campaign protection successfully concluded following the election, with protection being provided at 884 different stops. The inauguration took place with integrated multi-agency security protocols in place that afforded the optimal level of protection for Secret Service protectees, invited guests, and the general public.

With President Bush completing his final term and Vice President Cheney indicating that he will not be a candidate for President in 2008, the Secret Service will face an unprecedented situation relative to candidate/nominee protection. There will not be a prospective presidential candidate as a sitting president or vice president under the Secret Service’s protection and, as a result, a greater number of candidates/nominees will require protection under the statute. During presidential campaigns, the protective workload increases to provide protection for the designated candidates/nominees

Planning for the 2008 Presidential Campaign is ongoing. In FY 2007, equipment required for the protective details was purchased, the Secret Service began to project required staffing levels and candidate/nominee protection began for the 2008 Presidential Campaign.

Secret Service personnel traveled to Washington, DC to receive candidate/nominee protective detail and operations training to mitigate myriad threats; this training occurring at the Service’s Rowley Training Center. The Service will also send personnel to provide instruction at regional training centers for protective detail support training. The Service is also training approximately 2,000 other Homeland Security agents to assist with campaign protection support.

**PPA: White House Mail Screening**

|                    | Perm<br>Pos. | FTE | Amount          |
|--------------------|--------------|-----|-----------------|
| <b>2007 Actual</b> |              |     | <b>\$30,440</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

White House mail screening is a process designed to screen all incoming mail, equipment, supplies and agricultural products destined for the White House Complex, with the goal of identifying lethal threats and containing, mitigating, and investigating vulnerabilities posed by these threats.

**ADMINISTRATION**

**PPA: Headquarters, Management and Administration**

|                    | Perm        |            |                  |
|--------------------|-------------|------------|------------------|
|                    | <u>Pos.</u> | <u>FTE</u> | <u>Amount</u>    |
| <b>2007 Actual</b> | <b>328</b>  | <b>346</b> | <b>\$150,325</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Administration is responsible for:

- (1) tracking, monitoring, executing, and reporting the financial activities of the Secret Service;
- (2) improving the efficiency and productivity of personnel;
- (3) conducting analyses of program objectives and strategies to examine operational and cost factors impacting the continued viability of ongoing activities and the feasibility of proposed initiatives;
- (4) procuring quality goods and services in a timely fashion; and
- (5) administering the design, construction, acquisition, assignment, maintenance, and disposal of Service properties.

**Administrative Operations Division (AOD):**

During the past year, scheduled renovations with the necessary security enhancements were accomplished as a result of lease expirations and forced moves by the Facilities Management Branch. The Property Management Branch completed renovation projects on residences and command posts for new individuals receiving protection as well as projects within the White House Complex.

**Enterprise Financial Systems Division (EFSD):**

The Enterprise Financial Systems Division (EFSD) is responsible for systems development in specific business areas including: core financial accounting and reporting; travel and relocation management; property management; and procurement management. EFSD develops appropriate interfaces between these and other administrative systems, as EFSD supports system users through training, communications, user procedures, and technical support services.

**Management and Organization Division (MNO):**

MNO participated in the Department of Homeland Security (DHS) Strategic Plan revision process, and subsequently revised the Secret Service Strategic Plan (FY 2008 – FY 2012) for release in FY 2007. MNO continued to coordinate the Secret Service’s submission of timely responses to quarterly reporting requirements for the President’s Management Agenda (PMA), and has facilitated the Service’s achievement of scores above the DHS average throughout FY 2007.

**TRAINING**

**PPA: Rowley Training Center**

|                    | Perm<br>Pos. | FTE        | Amount          |
|--------------------|--------------|------------|-----------------|
| <b>2007 Actual</b> | <b>273</b>   | <b>266</b> | <b>\$55,628</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The James J. Rowley Training Center (JJRTC) is responsible for:

- (1) developing, administering, and coordinating training programs for Secret Service employees, and for other federal law enforcement agencies and law enforcement officials from various state and local police departments;
- (2) providing all basic, in-service, and specialized skills training for special agents, Uniformed Division officers, special officers and other professional personnel;
- (3) providing training for the executive, managerial, supervisory, administrative support, cyber/IT solutions, and foreign language needs for all Secret Service components;
- (4) providing specialized operational training for the Service’s tactical elements (counter-assault, counter-sniper, and emergency response teams), which include the core components of the protective methodology;
- (5) evaluating, selecting, and training all Secret Service explosive detection canines/tactical canines;
- (6) administering and coordinating fitness, control tactics, vehicle operation training, emergency medicine, and water safety programs;
- (7) conducting research and testing of munitions, and related equipment technology; and
- (8) administering the acquisition, storage, maintenance, and issuance of firearms, operational weapons and ammunition to all Secret Service personnel.

### PPA Mission Statement

Protection of Persons and Facilities - Secure the physical safety of the President, Vice President, their families, and other individuals as designated by statute, and of facilities under Secret Service protection from all threats. Secure the physical s

In order to protect our nation's leaders, the Secret Service operates to ensure protectees' physical protection and to protect the buildings and grounds where they reside and work. The requested amount addresses the following USSS strategic challenges: terrorists' sustained motivation to attack U.S. interests (including its leaders), and the increasing technological sophistication of the threat environment.

**Summary Justification and Explanation of Changes**

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |

**PPA Mission Statement**

Protective Intelligence Activities - Investigate subjects (individuals and groups) and activities that pose threats to protectees and protected events.

The Secret Service analyzes threats, investigates threats, and conducts intelligence advances in order to minimize the risk of harm to protected persons, property, and events. The requested amount funds these activities in a strategic environment characterized by terrorists' sustained motivation to attack these targets, and by the increasingly technological sophistication of the threat environment.

# BUDGET REQUEST AND SUPPORTING INFORMATION

## UNITED STATES SECRET SERVICE INVESTIGATIONS AND FIELD OPERATIONS

### I. Appropriation Overview

#### A. Mission Statement for Investigations and Field Operations

The United States Secret Service investigates violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation's financial, banking, and telecommunications infrastructure; and provides critical forensic support for associated investigations for the National Center for Missing and Exploited Children (NCMEC).

In order to accomplish its investigative mission, the Service has offices located throughout the United States and in 15 foreign countries.

#### B. Budget Activities

**Domestic Field Operations** - In order to accomplish its investigative responsibilities, the Secret Service maintains a network of 116 field offices nationwide. Agents assigned to these domestic offices are responsible for investigating violations of laws relating to: counterfeiting of obligations and securities of the United States (Currency, Treasury Checks, etc.); to financial crimes that include, but are not limited to, access device fraud, financial institution fraud, identity theft, computer fraud; and to computer-based attacks on our nation's financial, banking, and telecommunications infrastructure.

**International Field Administration and Operations** - The Secret Service maintains a total of 19 foreign field offices and one domicile office in 15 countries. Similar to their domestic counterparts, agents assigned to these offices are responsible for investigating violations of criminal statutes falling under the Secret Service's investigative mission. Because they do not have arrest authority, agents liaise with their foreign law enforcement counterparts in order to accomplish their investigative responsibilities. Additionally, these agents augment any

protective mission falling within their geographic area of responsibility. Relationships established in foreign countries from conducting criminal investigations greatly enhance the Secret Service's ability to provide a safe and secure environment for the people it protects while they travel overseas.

**Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF)** - In response to the emerging trends involving the use of computers and their peripheral devices, the Secret Service established the Electronic Crimes Special Agent Program, or ECSAP. Special Agents involved with the ECSAP are computer investigative specialists, qualified to conduct examinations on many types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, and other electronic media. The ECSAP is the only program in the country with the level of expertise in this area and culture of partnership building with stakeholders across the spectrum of critical infrastructure in the United States. Currently, there are over 400 special agents participating in the ECSAP.

In addition to the ECSAP, the Secret Service has established a domestic network of 24 Electronic Crimes Task Forces (ECTFs). The concept of the ECTF model is truly unique since it brings together not only Federal, state and local law enforcement officials from a specific region, but also prosecutors, as well as individuals from private industry and academia. These task forces provide a productive framework and collaborative crime-fighting environment in which the resources of its participants are combined to effectively and efficiently make a significant impact in preventing and detecting electronic crimes.

**Forensic Support for Missing and Exploited Children** – Funding for missing and exploited children includes a \$6M grant provided to the National Center for Missing Children and \$2.366M for Secret Service forensic and related support of investigations of missing and exploited children.

## II. Summary of FY 2009 Budget Estimates by Program/Project Activity (PPA)

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**United States Secret Service**  
**Investigations and Field Operations**  
**Program Performance Justification**

(Dollars in thousands)

#### INVESTIGATIONS

|                    | Perm<br>Pos. | FTE          | Amount           |
|--------------------|--------------|--------------|------------------|
| <b>2007 Actual</b> | <b>2,035</b> | <b>1,983</b> | <b>\$313,865</b> |

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service is mandated by statute and executive order to carry out criminal investigations. The Secret Service was established as a law enforcement agency in 1865, with an original mandate to investigate the counterfeiting of U.S. currency.

This activity:

- (1) exercises broad investigative jurisdiction over a wide variety of financial crimes;
- (2) has a long history of protecting American consumers and industry from financial fraud as the original guardian of our nation's financial payment systems;
- (3) has primary authority for the investigation of access device fraud, including credit and debit card fraud, and parallel authority with other law enforcement agencies in identity crime cases.
- (4) has experienced an expansion of its investigative mission since the early 1990's to include concurrent jurisdiction with the United States Department of Justice for financial institution fraud; and
- (5) has assumed additional responsibilities as the Internet and use of personal computers became mainstream, and economies of scale made this technology affordable to even the most common criminals.

The combination of the information revolution and the effects of globalization have caused the investigative mission of the Secret Service to change dramatically. As a result, the Secret Service has evolved into an agency that is recognized worldwide for its expertise in investigating all types of financial crimes; and its efforts to detect, investigate and prevent financial crimes are aggressive, innovative and comprehensive.

**PPA: Domestic Field Office Operations**

|                    | Perm<br>Pos. | FTE          | Amount           |
|--------------------|--------------|--------------|------------------|
| <b>2007 Actual</b> | <b>1,633</b> | <b>1,574</b> | <b>\$242,468</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The United States Secret Service investigates violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field resources are focused on achieving the Department of Homeland Security strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context of the spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

**PPA: International Field Administration and Operations**

|                    | Perm<br>Pos. | FTE       | Amount          |
|--------------------|--------------|-----------|-----------------|
| <b>2007 Actual</b> | <b>70</b>    | <b>67</b> | <b>\$22,711</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Secret Service provides a comprehensive, internationally-coordinated response to new threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving DHS' strategic objective of economic security (e.g., combating foreign counterfeiting of U.S. currency). The requested amount funds field offices in 15 countries in a strategic context of: the worldwide spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization (when a foreign country replaces its national currency with the U.S. dollar).

**PPA: Electronic Crimes Special Agent Program/Electronic Crimes Task Forces**

|                    | Perm<br>Pos. | FTE        | Amount          |
|--------------------|--------------|------------|-----------------|
| <b>2007 Actual</b> | <b>312</b>   | <b>322</b> | <b>\$40,535</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Through the Electronic Crimes Special Agent Program (ECSAP), the Service trains special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through Electronic Crimes Task Forces (ECTF), the Service forms partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTF's combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in a strategic environment characterized by a rise in electronic financial transactions and associated criminal activity.

**PPA: Forensic Support and Grants to NCMEC**

|                    | Perm        |            |                |
|--------------------|-------------|------------|----------------|
|                    | <u>Pos.</u> | <u>FTE</u> | <u>Amount</u>  |
| <b>2007 Actual</b> | <b>20</b>   | <b>20</b>  | <b>\$8,151</b> |

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U.S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children. Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds to the National Center for Missing and Exploited Children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

### PPA Mission Statement

Domestic Field Operations - Investigate violations of laws relating to counterfeiting of obligations and securities of the United States; investigate financial crimes that include, but are not limited to, financial institution fraud, identity theft, access device fraud, and money laundering.

Domestic field resources are focused on achieving DHS' strategic objective of economic security. The requested amount funds field offices nationwide in a strategic context of: the spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, and the increasing criminal exploitation of those technologies.

**PPA Mission Statement**

International Field Administration and Operations - Provide a comprehensive, internationally-coordinated response to threats to the integrity of U.S. currency and other transnational crimes.

International field resources are focused on achieving DHS' strategic objective of economic security (e.g., combating foreign counterfeiting of U.S. currency). The requested amount funds field offices in 15 countries in a strategic context of: the worldwide spread of the internet and other consumer-friendly technologies that facilitate electronic commerce, the increasing criminal exploitation of those technologies, and dollarization (when a foreign country replaces its national currency with the U.S. dollar).

**PPA Mission Statement**

Electronic Crimes Special Agent Program (ECSAP) and Electronic Crimes Task Forces (ECTF) - Through the ECSAP, train special agents to detect network intrusions and conduct examinations on all types of electronic evidence, including computers, personal data assistants, telecommunications devices, electronic organizers, scanners, and other electronic equipment. Through the ECTF, form partnerships with private industry, academia, other federal law enforcement, and state and local law enforcement to prevent, detect, mitigate, and aggressively investigate attacks on our nation's financial infrastructures.

The ECSAP and ECTF's combat those who seek to defraud financial institutions, private industry, or individuals through electronic or digital media. The requested amount funds these entities in a strategic environment characterized by a rise in electronic financial transactions and associated criminal activity.

**PPA Mission Statement**

National Center for Missing and Exploited Children - Language contained in the Violent Crime Reduction Trust Fund legislation in 1995 directed the U. S. Secret Service to provide forensic support to the National Center for Missing and Exploited Children (NCMEC). Since that time, forensic support has included polygraph examinations, handwriting examinations, voiceprint comparisons, audio and video enhancements, age progressions/regressions, and fingerprint research and identification.

Requested funding provides state of the art forensics support for investigations involving missing and exploited children and grant funds to the National Center for Missing and Exploited Children. In a strategic context characterized by predators determined to abuse the nation's children, the Secret Service's technologies provide critical support to associated investigations.

# **BUDGET REQUEST AND SUPPORTING INFORMATION**

## **UNITED STATES SECRET SERVICE** **Acquisition, Construction, Improvements, and Related Expenses**

### **I. Appropriation Overview**

#### **A. Mission Statement for Acquisition, Construction, Improvements, and Related Expenses**

The United States Secret Service performs two critical homeland security missions: protection and criminal investigations. The Secret Service protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, foreign missions, and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events. The Secret Service investigates violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes such as access device fraud, financial institution fraud, identity theft, and computer fraud; and to crimes involving computer-based attacks on our nation's financial, banking, and telecommunications infrastructure. In order to accomplish both its protective and investigative missions, the Secret Service has offices located throughout the United States and in 15 foreign countries. The employees of the Secret Service are special agents, uniformed officers, and support personnel.

#### **B. Budget Activities:**

##### **James J. Rowley Training Center (JJRTC)**

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the Service's JJRTC which provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

Some major goals for the James J. Rowley Training Center (JJRTC) during the next two fiscal years include the following: update the comprehensive "Master Plan" for the JJRTC, and incorporate and expand the use of technology (e.g. virtual teleconference, virtual classroom and web-based) to send recurring training to the field offices when traditional instructor-led training is impractical, time sensitive or cost prohibitive.

#### **C. Budget Request Summary:**

- The U.S. Secret Service is requesting \$3,725,000 to maintain the JJRTC located in Beltsville, Maryland.

| Total Change 2008-2009          |              |     |                |

The United States Secret Service requests \$3.725 million for this activity.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The Acquisition, Construction, Improvements, and Related Expenses account is used to maintain the JJRTC. This facility provides the protection and criminal investigation training required to meet the needs of the Service's dual mission.

**IV. Program Justification of Changes**

*Not applicable*

**V. Exhibits and Other Supporting Materials**

**A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
United States Secret Service  
Justification of Proposed Changes in  
Acquisition, Construction, Improvements, and Related Expenses  
Appropriation Language**

For necessary expenses for acquisition, construction, repair, alteration, and improvement of facilities, \$3,725,000 to remain available until expended.

**Explanation of Changes**

\$3,725,000 – No substantive changes proposed.

**Authorization Cites**

The Secret Service is established in 18 U.S.C. 3056 and 3 U.S.C. 202. 18 U.S.C. 1029 and 1030 specifically authorize the Service to investigate offenses under those sections.

### PPA Mission Statement

Acquisition, Construction, Improvements, and Related Expenses Account - Used to maintain the James J. Rowley Training Center, which supports the protection and criminal investigation missions, the two critical homeland security missions covered by the Secret Service.

**Summary Justification and Explanation of Changes**

|                       | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|-----------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Other Services</b> | \$2,803                | \$2,678                 | \$2,678                 | \$0                            |

Other services include contractual services with non-Federal sources. The FY 2009 request includes \$54,000 to cover expected cost increases and (\$54,000) for management efficiencies.

|                                 | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|---------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Supplies &amp; materials</b> | \$45                   | \$38                    | \$38                    | \$0                            |

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2009 request includes \$1,000 to cover expected cost increases and (\$1,000) for management efficiencies.

|                  | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Equipment</b> | \$6                    | \$35                    | \$35                    | \$0                            |

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2009 request includes \$1,000 to cover expected cost increases and (\$1,000) for management efficiencies.

|                              | <b>2007<br/>Actual</b> | <b>2008<br/>Enacted</b> | <b>2009<br/>Request</b> | <b>2008 to 2009<br/>Change</b> |
|------------------------------|------------------------|-------------------------|-------------------------|--------------------------------|
| <b>Land &amp; Structures</b> | \$822                  | \$974                   | \$974                   | \$0                            |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2009 request includes \$19,000 to cover expected cost increases and (\$19,000) for management efficiencies.

# **I. STRATEGIC CONTEXT FOR THE FY 2009-2013 BUDGET**

## **A. Mission and Description of the United States Secret Service**

The United States Secret Service (USSS) performs two critical homeland security missions: protection and criminal investigations. The USSS protects the President and Vice President, their families, visiting heads-of-state/government, and other designated individuals, such as the Secretary of Homeland Security; investigates threats against these protectees; protects the White House, Vice President's Residence, Foreign Missions, and other designated buildings within the Washington, D.C. area; and designs, coordinates, and implements operational security plans for designated National Special Security Events. The USSS investigates violations of laws relating to: counterfeiting of obligations and securities of the United States; financial crimes, such as access device fraud, financial institution fraud, identity theft, and computer fraud; computer-based attacks on our nation's financial, banking, and telecommunications infrastructure; and provides critical forensic support for associated investigations for the National Center for Missing and Exploited Children (NCMEC).

In order to accomplish both its protective and investigative missions, the Secret Service has offices located throughout the United States and in 15 foreign countries. The Secret Service employs special agents, uniformed officers, and support personnel.

## **B. Major Activities and Key Strategic Issues**

In FY 2007, the Secret Service provided incident-free protection for all its protectees while they were traveling, within protected facilities, and at the 62<sup>nd</sup> United Nations General Assembly. The agency created candidate protective details and provided training, supplies and equipment in support of the 2008 Presidential Campaign protective operations. Planning and staffing for the new Former President and Mrs. Bush detail began in FY 2007, as did the planning and construction for the relocation of the Service's Joint Operations Center (JOC).

In FY 2008, the Service will continue to provide incident-free protection to all designated protectees in travel status and within protected facilities. Candidate protective details will provide protection to qualifying presidential candidates/nominees. The Service will provide protection and security operations at National Special Security Events (NSSEs) including major political conventions, and at Presidential campaign debates, and the 63<sup>rd</sup> United Nations General Assembly. The Service will continue relocation efforts for its JOC.

In FY 2009, the Service will continue to provide incident-free protection to all designated protectees in travel status and within protected facilities. Candidate protective details will provide protection to qualifying presidential nominees through the last month of the campaign. The Service will provide protection and security operations at NSSEs, and at Inaugural events. The Service will provide appropriate equipment and staffing for enhanced protection services for White House protectees. In January 2009, the Service will have a detail fully-equipped and operational for the protection of Former President and Mrs. Bush; planning and staffing for the new detail will continue through early FY 2009, so the new detail will be operational following the Inauguration of the new president. Further, the Secret Service plans to study the efficiencies for competing out Uniformed Division range instructors at the James J. Rowley Training Center.

The Service is continually assessing its technological capability to identify and mitigate threats to fixed and temporarily protected sites visited by the President, Vice-President and high-threat protectees. Advances in publicly-available technology require the Service to equip its personnel with the sophisticated tools necessary to address modern threats. In FY 2009, the Service will enhance, upgrade, and replace several systems for existing classified programs that address physical, technological, electronic, chemical, biological, radiological, and air security threats. In addition, the Service will upgrade security around the perimeter of the White House Complex.

In terms of protecting the nation's financial infrastructure, Secret Service Field Operations continue to provide training and equipment to identify and address cyber vulnerabilities before the criminal element is able to exploit them. In FY 2007, Secret Service agents trained in the Electronic Crimes Special Agent Program (ECSAP) conducted numerous federal cyber crime investigations and assisted state and local law enforcement agencies in similar investigations, including computer forensic examinations of their backlogged cases. Also in FY 2007, the collaborative efforts and resources of our Electronic Crimes Task Forces (ECTFs) were invaluable in successfully preventing cyber attacks that otherwise would have resulted in large-scale financial losses to U.S.-based companies, or disruptions of critical infrastructures.

In FY 2008, the training, equipment and resources of ECSAP-trained special agents and ECTFs will continue strengthening cyber investigations to lessen the number of victims impacted by cyber crimes, and will mitigate fraud losses to U.S. businesses and financial institutions.

In FY 2009, in addition to identifying and mitigating electronic crimes, ECTFs will engage in exercises to test the emergency response of entities entrusted to protect and secure critical infrastructure.

Major challenges impacting the Secret Service's ability to maintain a state of increased preparedness and accomplish its mission in the current and predicted threat environments include terrorists' continued motivation to attack U.S. interests (including its leaders and the economy), and the constantly evolving technological sophistication of the threat

environment. The funds requested in this budget will help the Secret Service address these issues while protecting national leaders and the nation's critical financial infrastructure.

### **C. Resources Requested and Performance Impact**

#### **Major Changes within the Base level**

The proposed FY 2009 budget totals \$ 1,407,621,000 for the Salaries and Expenses appropriation and \$3,725,000 for the Acquisition, Construction, Improvements, and Related Expenses appropriation. Funding will be used to maintain current levels of program operations, provide funding for adjustments to the base and pay annualization, hire an additional 35 positions to complete the staffing requirements for the President Bush Post-Presidency detail, and hire 27 positions for enhanced protection for White House protectees. In addition, funding for rental charges for the new White House mail facility, utility and other costs relative to the Joint Operations Center and protective terrorist countermeasures is included. These costs are net of non-recurred funding for the JOC and the 2008 Presidential Campaign.

#### **Increments over current service level**

#### **Adjustments-to-the-Base**

The Secret Service is a labor-intensive operation, and it is vital that each program has all necessary resources to remain fully operational. This funding will cover increasing payroll and other personnel-related costs. This funding will allow program managers to direct an appropriate level of human and financial capital to continue the dual mission of the Secret Service – Protection and Investigations.

The number of protectees receiving varying levels of protection from the Secret Service has significantly increased since September 11, 2001. Furthermore, the methods utilized to attack U.S. economic interests are becoming more sophisticated, and investigative cases are becoming more complicated. Secret Service personnel are performing critical tasks on a daily basis to provide security for all protectees, as well as to work to combat, disrupt and prevent financial and electronic crimes. These activities directly support DHS Goal 3 to Protect Critical Infrastructure, and these adjustments also have a direct impact on Secret Service protection and investigation-related performance measures.

#### **President Bush Post-Presidency Detail**

Because of the post-September 11 threat environment, the President Bush Post-Presidency detail will require a significant amount of resources, and funding requested in this budget will cover the cost of the additional positions hired for this detail.

Despite the current post-September 11 threat environment, it is anticipated that the current President will be active and maintain a high profile after he leaves office. Therefore, significantly more resources will be required to effectively anticipate threats and provide the appropriate level of protection for President Bush after he leaves office, as compared to other Former President details. This initiative will allow for a smooth implementation of protection and transition of personnel without jeopardizing other critical program operations, including investigative programs. Funding this initiative will have a direct impact on Secret Service protective and investigative performance measures, and directly support DHS Goal 3 to Protect Critical Infrastructure

### **Joint Operations Center (JOC) Relocation**

The Secret Service JOC monitors all sensors, alarms, gates, and communications systems in support of the protection of the President and White House Complex (24 hours a day/7 days a week). The adjacent Emergency Operations Center (EOC) is critical to the establishment of unified command and control for all emergency actions required to ensure the security of the President and the White House Complex. Operation of these systems allows the Secret Service to continue to meet the performance target of 100 percent incident-free protection of persons inside the White House Complex. The JOC and EOC are housed in the Eisenhower Executive Office Building (EEOB), which the General Services Administration (GSA) is beginning to structurally harden. This structural hardening and infrastructure modernization at the EEOB requires the relocation of the JOC, EOC, and all supporting systems. The construction will disrupt vital utility and communication lines critical to security operations, rendering the JOC and EOC inoperable both during and following the modernization effort. These systems are integral to achieving a secure environment for Secret Service protectees and facilities 100 percent of the time; anything less than this is unacceptable, and relocating the JOC enables the Secret Service to maintain a secure environment. This initiative supports DHS Goal 3 to Protect Critical Infrastructure by improving our ability to respond to emergency situations. If the initiative is not funded, the Service's ability to meet the program performance target of 100 percent incident-free protection of persons inside the White House Complex will be jeopardized.

### **White House Mail Facility**

Funding this initiative enables the Secret Service to cover rental charges for this facility and acquire the equipment necessary to screen incoming mail effectively. In this time of increased terrorist threats, it is imperative that the Service utilizes state-of-the-art technology to ensure all White House mail is free from harmful toxins. This initiative supports DHS Goal 3 to Protect Critical Infrastructure, and will allow the Secret Service to continue to meet the performance target of 100 percent incident-free protection of persons inside the White House Complex.

## **Protective Terrorist Countermeasures**

### *Countermeasures Support Programs*

This funding will support initiatives that will detail procedures, responsibilities, requirements, and plans that could be utilized in the event of an explosive, chemical, biological, radiological attack at a secured site; identify additional countermeasures that could be deployed to address specific emerging threats; and allow for the acquisition and deployment of advanced electronic countermeasures. These initiatives support DHS Goal 3 to Protect Critical Infrastructure, and have a direct impact on our Long Term Performance Goal of protecting our nation's leaders, foreign dignitaries, and protected facilities.

### *Primary Limousines*

Funding this initiative will greatly enhance the ability of the Secret Service to provide protection to the President and Vice President, by allowing for the expansion, maintenance, and replacement of the existing primary armored vehicle fleet. Because of the level of safety and security these armored vehicles provide, this initiative enhances our ability to meet the Long Term Performance Goal of our Domestic Protectees program to "protect our Nation's leaders and other protectees", as well as support DHS Goal 3 to Protect Critical Infrastructure. Not funding this initiative could have dire consequences as our limousines would not have the latest state-of-the-art technologies to counter a potential attack. This initiative also has a direct impact on the performance measures of the Domestic Protectees program, by enabling the Secret Service to continue meeting its main outcome measure – "Percentage of Instances Protectees Arrive and Depart Safely."

## **Enhance Protection for White House Protectees**

This initiative will make available the necessary resources to provide the required level of protection at the White House. Due to the high-threat environment post September 11, the resources required to provide the necessary protection has increased, and the Secret Service will do all that is necessary to provide incident-free protection 100 percent of the time. The Service would need to reallocate resources from other areas to meet these protection requirements should this initiative not be funded, and the consequences of this reallocation would include missed performance targets in these other mission-critical areas. The resources provided through this initiative directly support DHS Goal 3 to Protect Critical Infrastructure as it will greatly augment the level of protection provided to our protectees, and enable the Service to continue meeting the Long Term Program Goal of its protection programs.

**D. How Secret Service Programs and Performance Goals Align to and Support DHS Goals and Objectives.**

Domestic Protectees program performance goal - Protect our nation's leaders and other protectees.

**Goal 3** – Protect critical infrastructure

**Objective 3.1** – Fixed critical infrastructure and key assets

Foreign Protectees and Foreign Missions program performance goal - Protect visiting world leaders

**Goal 3** – Protect critical infrastructure

**Objective 3.1** – Fixed critical infrastructure and key assets

Protective Intelligence program performance goal - Reduce threats posed by global terrorists and other adversaries.

**Goal 3** – Protect critical infrastructure

**Objective 3.1** – Fixed critical infrastructure and key assets

Financial Investigations program performance goal - Reduce losses to the public attributable to counterfeit currency, other financial crimes, and identity theft crimes that are under the jurisdiction of the Secret Service, which threaten the integrity of our currency and the reliability of financial payment systems worldwide.

**Goal 3** – Protect critical infrastructure

**Objective 3.1** – Fixed critical infrastructure and key assets

Infrastructure Investigations program performance goal - Reduce losses to the public attributable to electronic crimes and crimes under the jurisdiction of the Secret Service that threaten the integrity and reliability of the critical infrastructure of the country.

**Goal 3** – Protect critical infrastructure

**Objective 3.1** – Fixed critical infrastructure and key assets

Campaign Protection program performance goal - Protect our Presidential and Vice Presidential Candidates and Nominees.

**Goal 3** – Protect critical infrastructure

**Objective 3.1** – Fixed critical infrastructure and key assets

## E. Performance Based Budget Highlights by Program

### Performance Budget Highlights by Program

USSS

2009 Congressional

For each major program, the performance goal, alignment to DHS goals and objectives, total dollars and FTE, and main performance measure/s are shown below. For many of the programs, more performance information may be found on the OMB web site [Expectmore.gov](http://Expectmore.gov) (program names may differ slightly from those used in this document).

|  |          |          |         |          |          |          |
|--|----------|----------|---------|----------|----------|----------|
| <b>Program: Campaign Protection</b>  |          |          |         |          |          |          |
| <b>Performance Goal:</b> Protect our Presidential and Vice Presidential Candidates and Nominees. |          |          |         |          |          |          |
| <b>DHS strategic objectives supported and % allocation of activities:</b>                        |          |          |         |          |          |          |

# U. S. Coast Guard

## Operating Expenses

### I. Appropriation Overview

#### **A. Mission Statement for Operating Expenses:**

The Coast Guard requests \$6.213 billion and 48,260 FTE in FY 2009, an increase of \$212.055 million and 1,024 FTE compared to the \$6.001 billion and 47,236 FTE enacted in FY 2008. The Coast Guard's Operating Expenses (OE) budget request seeks funding for the annualization of prior-year, part-year funding, pay cost of living increases, and operating and maintenance funding for prior-year Administration and Congressional initiatives. The OE funding request supports all 11 statutorily-mandated Coast Guard mission-programs. These mission-programs in turn directly support the Coast Guard's role as the nation's principal Federal agency charged with ensuring maritime **safety, security and stewardship** and supporting the Department of Homeland Security (DHS) strategic goals and objectives.

#### **B. Budget Activities:**

Operating Expenses provide direct support to all Coast Guard missions, including: Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

#### **C. Budget Request Summary:**

The Coast Guard requests \$6.213 billion and 48,260 FTE in FY 2009. Excluding emergency funding provided in P.L. 110-161, the total adjustments-to-base are \$235.847 million and 1,073 FTE. The program increases include 469 positions, 237 FTE and \$46.508 million to maintain the Service's current level of performance, enhance marine inspection capacity, command and control and intelligence capabilities, maritime domain awareness and rulemaking functions. In particular, funding supports the mandatory pay increase (3.4% military and 2.9% civilian); non-pay COLA, GSA rent and security charge increases; depot level and emergency maintenance; and the operation, maintenance and crewing of Deepwater assets. Funding also supports costs associated with assuming operational control of the Massachusetts Military Reservation airfield (Coast Guard Air Station Cape Cod) in FY09 as a result of the Base Realignment and Closure Commission (BRAC).

The OE appropriation also seeks funding for the operational and maintenance costs associated with non-Deepwater programs such as Rescue-21 National Distress Response System, the Nationwide Automatic Identification System (NAIS), Response Boat – Medium (RB-M) assets, four new 87-ft Coastal Patrol Boats and Inland Rivertenders' Emergency Subsystem Sustainment. Moreover, it provides additional personnel to address the Coast Guard's backlog of some 100 rulemaking projects.

Efficiencies totaling \$103.165 million are identified to allow for the re-allocation of resources to critical DHS and Coast Guard priorities. These efficiencies include decommissioning of four cutters and six aircraft in accordance with the Deepwater decommissioning plan.

Of the 48,649 positions, 48,260 FTE, and \$6.213 billion requested in this budget, an increase of 1,072 positions, 1,024 FTE and \$212.055 million is reflected in this account.

Base adjustments include:

- Transfer of AC&I funding for leased space for acquisition personnel – \$3.859 million
- Personnel Transfer from Acquisition, Construction & Improvements to OE – \$82.215 million
- Transfer of the LORAN-C program funding to NPPD – (\$34.500 million)
- Annualizations of prior-year funding – \$39.016 million
- Annualizations of FY 2008 Emergency Spending – \$32.108 million
- FY 2009 pay raise and annualization of FY 2008 pay raise for both military and civilian members – \$73.703 million
- Parity with DOD Military Entitlement Initiatives – \$29.366 million
- Operational Adjustment Increases (which include GSA rent and security charges, Depot Level (4X) and Emergency Maintenance, Government services, Mission and Business system licenses, Intra-Government services, Navy Flight Training, Inland Rivertenders' Emergency Subsystem Sustainment) – \$63.216 million
- Operating and Maintenance funds for new assets (to include follow-on costs related to Deepwater assets, Rescue 21, Response Boat-Medium, Nationwide Differential Global Positioning System, Nationwide Automatic Identification System, Defense Messaging System, Aids to Navigation Modernization, Air Station Cape Cod Operations, (4) 87-ft Coastal Patrol Boats, and additional Acquisition personnel and a Polar High Latitude Study) – \$91.861 million

Program change decreases include:

- Termination of one-time costs – (\$36.211 million)
- Annualization of FY 2008 management efficiencies – (\$3.070 million)
- FY 2009 Management efficiencies – (\$68.177 million)
- Decommissioning of two PC-179 Patrol Boats – (\$6.754 million)
- Decommissioning of USCG Cutter ACUSHNET – (\$2.568 million)
- Decommissioning of USCG Cutter BLACKBERRY – (\$214,000)
- Decommissioning of four HC-130H Aircraft – (\$18.534 million)
- Decommissioning of two HU-25 Aircraft – (\$3.848 million)

Program change increases include:

- Situation Unit Watchstanders – \$6.290 million
- Marine Inspection Program – \$20.000 million
- Maritime Awareness Global Network (MAGNet) and Intelligence Integration – \$12.281 million
- Counter-Intelligence (CI) Service Initiative – \$2.000 million
- Cryptologic Service Group and Direct Support – \$3.337 million
- Department of Homeland Security Regulatory Program – \$2.600 million

### III. Current Services Program Description by PPA

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Operating Expenses**  
**Program Performance Justification**  
(Dollars in thousands)

#### PPA I: MILITARY PAY AND ALLOWANCES

|                              | <b>Perm<br/>Pos</b> | <b>FTE<sup>1</sup></b> | <b>Amount</b>    |
|------------------------------|---------------------|------------------------|------------------|
| <b>2007 Actual</b>           | <b>40,144</b>       | <b>40,138</b>          | <b>2,849,317</b> |
| <b>2008 Enacted</b>          | <b>40,963</b>       | <b>41,102</b>          | <b>2,938,835</b> |
| 2009 Adjustments-to-Base     | -53                 | 113                    | 121,128          |
| <b>2009 Current Services</b> | <b>40,910</b>       | <b>41,215</b>          | <b>3,059,963</b> |
| 2009 Program Change          | 360                 | 181                    | 16,874           |
| <b>2009 Request</b>          | <b>41,270</b>       | <b>41,396</b>          | <b>3,076,837</b> |
| Total Change 2008-2009       | 307                 | 294                    | 138,002          |

The above table includes emergency funding of \$17.162 million provided in P.L. 110-161 for this activity. The Coast Guard's FY 2009 request is \$3.076 billion. Excluding emergency funds provided, the increase over FY 2008 enacted is \$155.164 million.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for expenses related to compensation and benefits for active duty military personnel. This category includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These tables are updated annually and provide a detailed calculation for each billet, broken down by rank/rate, location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI), medical costs and permanent change of station (PCS) expenses. Calculations for medical cost estimates are the same for each billet. Calculations for PCS moves and base pay are based upon rank and location of billet. Pay estimates also take into consideration OMB published pay inflation factors for the fiscal year in question.

Significant accomplishments in FY 2007 include:

- Seized and removed 284,698 lbs of cocaine, and 10,385 lbs of marijuana.
- Interdicted 4,839 illegal migrants.
- Responded to 19,925 calls for assistance and saved the lives of 3,938 mariners in distress.
- Conducted a Spill of National Significance (SONS) exercise in the central United States to test national capability to respond to the environmental, economic, and human impacts associated with natural disasters.

---

<sup>1</sup>The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

FY 2008 planned accomplishments include:

- Initiate a national assessment of the National Preparedness for Response Exercise Program (PREP), a robust preparedness exercise program in which oil facilities, tank vessels, freight ships and hazardous materials facilities exercise their associated response plans.
- Begin operating three fully-missionized HC-130J aircraft.
- Terminate the HITRON contract and begin operating the Atlantic Area Aviation Deployment Center.

In FY 2009 an investment in active duty military personnel will ensure the service remains “Semper Paratus” (Always Ready). The service was founded as a military, multi-mission, maritime service and continues to be ready, aware and responsive across the full range of the Coast Guard’s 11 mission-programs. As the Nation’s maritime first responder, the Coast Guard must not only be effective in its daily operations, but must also remain ready for emergencies and contingencies; it must be aware of maritime conditions and activities in order to detect, deter and defeat threats early; and when called it must be responsive with the right capabilities at the right time.

Dedicated Coast Guard personnel, as members of one of the Nation’s five Armed Services, conduct missions that protect the public, the environment and U. S. economic interests – in the Nation’s ports and waterways, along the coast, on international waters and in any maritime region required to support national security. The unique, multi-mission character of the Coast Guard forces Coast Guard personnel to serve as sailors, emergency responders, humanitarians, scholars, regulators, law enforcement personnel, stewards of the environment, diplomats and guardians of the coast – military, multi-mission and maritime. Coast Guard forces are flexible, rapidly deployable and able to respond to crises with a full range of capabilities. Coast Guard forces capitalize upon their multi-mission synergies to prevent maritime incidents, protect the U. S. Maritime Domain, and respond to and recover from incidents that may occur.

Funding requested will support the anticipated FY 2009 pay raise for all military service members (pay inflation rate is calculated at 3.4% for military) and annualize military average monthly end strength (roughly equivalent to FTE) introduced in FY 2008. Additionally, the funding will support military personnel for:

- Improved acquisition management and oversight.
- Improved information sharing and investigative capabilities.
- A counter-intelligence initiative.
- Operation of the CASA HC-144A.
- Operation of four new Coastal Patrol Boats.
- Enhancements to the Rescue 21 National Distress Response System.

PPA II: CIVILIAN PAY AND BENEFITS

|                              | <b>Perm</b>  |              |                |
|------------------------------|--------------|--------------|----------------|
|                              | <b>Pos</b>   | <b>FTE</b>   | <b>Amount</b>  |
| <b>2007 Actual</b>           | <b>6,649</b> | <b>6,222</b> | <b>570,921</b> |
| <b>2008 Enacted</b>          | <b>6,614</b> | <b>6,134</b> | <b>604,421</b> |
| 2009 Adjustments-to-Base     | 656          | 674          | 82,495         |
| <b>2009 Current Services</b> | <b>7,270</b> | <b>6,808</b> | <b>686,916</b> |
| 2009 Program Change          | 109          | 56           | 5,942          |
| <b>2009 Request</b>          | <b>7,379</b> | <b>6,864</b> | <b>692,858</b> |
| Total Change 2008-2009       | 765          | 730          | 88,437         |

The above table includes emergency funding of \$9.618 million provided in P.L. 110-161 for this activity. The Coast Guard's FY 2009 request is \$692.858 million. Excluding emergency funds provided, the increase over FY 2008 enacted is \$98.056 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding for expenses related to compensation and entitlements for federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e.g., Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial operations and "Non-Ceiling" (NC) employees (e.g., cooperative education students, student aids, summer interns, and federal junior fellows). Costs related to compensation are calculated by using the Coast Guard's Standard Personnel Cost (SPC) tables. These annually updated tables provide a detailed calculation for each billet, broken down by pay grade, location – in the United States (INCONUS) or out of the country (OCONUS – which includes AK and HI). Calculations for base pay are based upon position and location of position, and also take into consideration OMB economic assumptions for the fiscal year in question.

Significant accomplishments in FY 2007 include:

- Seized and removed 284,698 lbs of cocaine, and 10,385 lbs of marijuana.
- Interdicted 4,839 illegal migrants.
- Responded to 19,925 calls for assistance and saved the lives of 3938 mariners in distress.
- Conducted a Spill of National Significance (SONS) exercise to test national capability to respond to the environmental, economic, and human impacts associated with a major earthquake.

FY 2008 planned accomplishments include:

- Initiate a national assessment of the National Preparedness for Response Exercise Program (PREP), a robust preparedness exercise program in which oil facilities, tank vessels, freight ships, and hazardous material facilities exercise their associated response plans.
- Begin operating three fully missionized HC-130J aircraft.
- Terminate the HITRON contract and begin operating the Atlantic Area Aviation Deployment Center.

In FY 2009, requested funding will provide dedicated civilian personnel who contribute daily across the full range of the Coast Guard's 11 mission-programs. Civilian personnel stand side-by-side military personnel in fulfilling the roles of this nation's maritime first responder. Civilian personnel help maintain daily mission effectiveness, help prepare for emergencies and contingencies and help to ensure maritime domain awareness. These dedicated personnel support and conduct the missions that protect the public, the environment and U. S. economic interests – in the nation's ports and waterways, along the coast, on international waters and in any maritime region required to support national security.

Funding requested will support the anticipated FY 2009 pay raise for all civilian personnel (pay inflation rate is calculated at 2.9%) and annualize civilian FTE introduced in FY 2008. Additionally, the funding will support civilian personnel for:

- Improved acquisition management and oversight.
- Improved information sharing and investigative capabilities.
- A counter-intelligence initiative.
- Increased rule-making capacity.
- Enhancements to the Rescue 21 National Distress Response System.

**PPA III: TRAINING AND RECRUITING**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |
|------------------------------|---------------------|------------|----------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>184,128</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>188,521</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | 5,215          |
| <b>2009 Current Services</b> | ...                 | ...        | <b>193,736</b> |
| 2009 Program Change          | ...                 | ...        | 2,327          |
| <b>2009 Request</b>          | ...                 | ...        | <b>196,063</b> |
| Total Change 2008-2009       | ...                 | ...        | 7,542          |

The above table includes emergency funding of \$2.917 million provided in P.L. 110-161 for this activity. The Coast Guard's FY 2009 request is \$196.063 million. Excluding emergency funds provided, the increase over FY 2008 enacted is \$10.459 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

The training and recruiting PPA provides funding for the Coast Guard's professional training and education programs, as well as operation and maintenance of the seven major Coast Guard training centers and the Coast Guard Academy/Leadership Development Center.

Significant accomplishments in FY 2007 include:

- Accessing 4,250 recruits through recruit training, graduating 2,805 enlisted apprentices from our "A" schools, and commissioning 449 officers from the Coast Guard Academy, Officer Candidate School and Direct Commission Program.

- Training 1,416 members in advanced maritime law enforcement, training 1,483 members in counter terrorism activities, training 7,976 members in leadership skills, and training 40,834 members in other advanced Coast Guard courses.

FY 2008 planned accomplishments include:

- Accessing 4,200 recruits through recruit training, graduating 3,284 enlisted apprentices from our “A” school, and commissioning 461 officers from the Coast Guard Academy, Officer Candidate School and Direct Commission Program.
- Training 1,844 members in advanced maritime law enforcement, training 1,613 members in counter terrorism activities, training 8,180 members in leadership skills, and training 41,000 members in other advanced Coast Guard courses.

The FY 2009 request provides funding for all Coast Guard recruiting operations, given projected attrition and growth, to ensure sufficient numbers of qualified individuals for the military workforce. Coast Guard recruiting is a national endeavor; as such, recruiters cover broad geographic areas with diverse socio-economic demographics to compete for the best qualified candidates.

Additionally, this request includes funding for tuition, travel and per diem for formal training and education performed as temporary additional duty (TAD) by military service members and civilian personnel. It also ensures the training infrastructure is adequately resourced to provide Coast Guard personnel with the tools and competencies necessary for assigned missions. This training and education is usually conducted by dedicated resident staffs in classrooms, but may also include exportable training, correspondence courses and/or computer-based training, which follow a formal schedule with supporting lesson plans requiring interaction or evaluation of the students or participants.

From entry-level personnel through senior leadership, the Coast Guard focuses its training resources to embed those competencies that will maximize operational capabilities. The FY09 budget year will have an increase in the requirement for training and training aids related to Deepwater platforms. It also includes a \$7.700 million increase to the flight school training program due to the U.S. Navy’s trainer aircraft upgrade and operating overhead expense charges. A portion of legacy platform training will be reduced, but the infrastructure and travel for this legacy training will be required for continuous operation of aging platforms.

PPA IV: OPERATING FUNDS AND UNIT LEVEL MAINTENANCE

| <b>2008 Enacted</b>          | ...                 | ...        | <b>1,164,427</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | (13,364)         |
| <b>2009 Current Services</b> | ...                 | ...        | <b>1,151,063</b> |
| 2009 Program Change          | ...                 | ...        | 18,880           |
| <b>2009 Request</b>          | ...                 | ...        | <b>1,169,943</b> |
| Total Change 2008-2009       | ...                 | ...        | 5,516            |

The above table includes emergency funding of \$29.546 million provided in P.L. 110-161 for this activity. The Coast Guard's FY 2009 request is \$1.169 billion. Excluding emergency funds provided, the increase over FY 2008 enacted is \$35.061 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Headquarters, Atlantic Area or Pacific Area Commanders. These include Maintenance and Logistics Commands (MLCs), Integrated Support Commands (ISCs), High and Medium Endurance Cutters (WHECs/WMECs), Communication Stations, Maritime Safety and Security Teams (MSSTs), and Area Offices as applicable, for supplies, materials and services that allow the Coast Guard to sustain an operations tempo with an immediate response capability for Coast Guard missions. Maintenance of the cutters' hulls, mechanical systems, electrical equipment, and small boats; procurement of supplies and materials utilized for unit "housekeeping" and administration, spare parts, fuel and energy; funding of personnel support programs; and other materials consumed all contribute directly to mission effectiveness.

Significant accomplishments in FY 2007 include:

- Commencement of training and commissioning work-ups for the first National Security Cutter.
- Initiate training and evaluation of the first three of a planned fleet of 36 CASA Maritime Patrol Aircraft (MPA).
- Conduct a Spill of National Significance (SONS) exercise to test national capability to respond to the environmental, economic, and human impacts associated with a major earthquake.

FY 2008 planned accomplishments include:

- Deployable Operations Group (DOG) achieves Full Operational Capability (FOC).
- Initiate a national assessment of the National Preparedness for Response Exercise Program (PREP), a robust preparedness exercise program in which oil facilities, tank vessels, freight ships, and hazardous material facilities exercise their associated response plans.
- Begin operating three fully missionized HC-130J aircraft.
- Complete operational testing of three CASA MPAs.
- Activate Rescue 21 in 12 regions to include: Baltimore, Hampton Roads, Miami, Key West, New Orleans, Galveston/Houston, Corpus Christi, Astoria, North Bend, and Portland.

- Terminate the HITRON contract and begin operating the Atlantic Area Aviation Deployment Center.

The FY 2009 request will support the annualization of new operations introduced in FY 2008 and accounts for non-pay related inflation associated with maintenance and procurement of supplies and consumables. Follow-on funding is also provided for the operation and maintenance of HC-144 CASA aircraft # four, five, six, seven and eight, National Security Cutter (NSC) crew Charlie, (4) 87-ft Coastal Patrol Boats, Response Boat – Mediums and augmented watchstanders for the Rescue 21 National Distress System. These initiatives strongly support the Secretary’s priorities of Protecting our Nation from Dangerous People and Goods, Protecting Critical Infrastructure and Building a Nimble, Effective Emergency Response System.

PPA V: CENTRALLY MANAGED ACCOUNTS

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |
|------------------------------|---------------------|------------|----------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>215,804</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>232,727</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | 27,666         |
| <b>2009 Current Services</b> | ...                 | ...        | <b>260,393</b> |
| 2009 Program Change          | ...                 | ...        | 2,402          |
| <b>2009 Request</b>          | ...                 | ...        | <b>262,795</b> |
| Total Change 2008-2009       | ...                 | ...        | 30,068         |

The above table includes emergency funding of \$2.831 million provided in P.L. 110-161 for this activity. The Coast Guard’s FY 2009 request is \$262.795 million. Excluding emergency funds provided, the increase over FY 2008 enacted is \$32.899 million.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This Project, Program/Activity (PPA) represents centrally managed accounts at Coast Guard and DHS Headquarters, which provide service to the entire Coast Guard. Some of the larger central accounts include: the Federal Telephone System (FTS), Standard Workstation recapitalization, Coast Guard Data Network (CGDN), postal expenses, satellite communications, Government Services Administration (GSA) rent, ammunition replenishment, and the DHS Working Capital Fund.

Significant accomplishments in FY 2007 include:

- The expansion of satellite communications capabilities for underway platforms on the high seas and remote units.
- The implementation of Common Access Card (CAC) and CAC readers were phased in during FY 2007 to meet enhanced information security requirements of all government agencies.
- The modernization of the Coast Guard’s Local Area Network (LAN) to achieve the DHS One-Net project goal.

FY 2008 planned accomplishments include:

- Progress will be made on the movement towards "e-Coast Guard" both for administration and operations, through the implementation of enhanced voice and data communications.
- Sustainment of critical ammunition stores to ensure mission effectiveness, particularly for Coast Guard boarding officer and cutter combat team proficiency.
- Increased access and capabilities associated with operational databases such as the Marine Information for Safety and Law Enforcement (MISLE) and the Abstract of Operations (AOPS) systems.

The FY 2009 request provides funding to support critical staff elements in areas such as facility leases and associated physical security costs, mission and business system licenses, enterprise-class database management technology, postage services and radio frequency usage. In addition, new support infrastructure for the National Maritime Center (NMC) and expanded space for Coast Guard units in Corpus Christi, TX (Air Station and Sector Command Center space), Marine Safety Units (MSU) Chicago and Ketchikan, AK (office spaces), and Sector Anchorage, AK (Sector Command spaces) are requested. The Coast Guard's GSA rent increase for the Transpoint and the Jemal buildings in Washington, D.C., home of Coast Guard Headquarters, is also included.

The Coast Guard's share of the Department of Homeland Security's (DHS) Working Capital Fund (WCF) is also requested. The WCF includes services that are administered Department-wide, and include competitive sourcing, Chief Procurement Officer (CPO) shared reporting, Commodity Council endeavors and Ready Campaign (Ready.gov).

#### PPA VI: DEPOT LEVEL MAINTENANCE

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>  |
|------------------------------|---------------------|------------|----------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>742,150</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>762,416</b> |
| 2009 Adjustments-to-Base     | ...                 | ...        | 52,407         |
| <b>2009 Current Services</b> | ...                 | ...        | <b>814,823</b> |
| 2009 Program Change          | ...                 | ...        | 83             |
| <b>2009 Request</b>          | ...                 | ...        | <b>814,906</b> |
| Total Change 2008-2009       | ...                 | ...        | 52,490         |

The above table includes emergency funding of \$8.226 million provided in P.L. 110-161 for this activity. The Coast Guard's FY 2009 request is \$814.906 million. Excluding emergency funds provided, the increase over FY 2008 enacted is \$60.716 million.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This request provides service-wide funding for the Coast Guard's base level operating expense (OE) funded maintenance for the service's shore facilities, vessels and aircraft. The Coast Guard maintains its aircraft, vessels and shore infrastructure using organic maintenance and repair infrastructure primarily in conjunction with contracted depot-level maintenance activities. A mature project planning and execution program exists to provide routine unit-level and depot-level maintenance. Where expertise or infrastructure does not exist within the Service, the Coast Guard uses contracted resources to provide requisite support.

The Coast Guard's maintenance planning process involves every level of the organization including: (1) field level input provided in casualty, mishap and annual unit engineering reports; (2) engineering/support provider input in the form of regional maintenance data/trend analysis, observations of experienced support/engineering personnel and prioritization of issues/needs; and (3) Coast Guard Headquarters involvement in the collation of CG-wide data/trend analysis, input from the Atlantic and Pacific Area Commanders and their support providers, and development of corrective strategies.

Significant accomplishments in FY 2007 include:

- Program Depot Maintenance completed for: HC-130H (7); HH-60J (8); HH-65C (20); HU-25 (4).
- Executed more than 1,300 projects to support operational mission requirements at shore facilities nationwide, including: Unaccompanied Personnel Housing (UPH) improvements to ensure adequate quality-of-life for our most junior members; and sustainment projects for our most critical operational structures and facilities.
- Completed the following dry-docks: WPB 110 (7); WPB 87 (3); WMEC 270 (3); WLM 175 (1).

FY 2008 planned accomplishments include:

- Planned Program Depot Maintenance for: HC-130H (6); HH-60J (9); HH-65C (22); HU-25 (4).
- In addition to a continued effort to target deferred maintenance requirements, allocate funding to support diverse requirements including: mission-enabling shore facility projects; Aids-to-Navigation systems to support maritime mobility; Unaccompanied Personnel Housing (UPH); and maintaining standards necessary to execute Training Centers' vital missions to sustain service excellence.
- Complete the following dry-docks: WYTL 65 (4); WPB 87 (17); WPB 110 (3); WLR/WLIC (9); WTGB 140 (2); WLM 175 (3); WLB 225 (5); WMEC 210/270 (1); WHEC 378 (3); WAGB 399 (1); and WIX 295 EAGLE.

The FY 2009 planned accomplishments include:

**Aircraft.** Includes service-wide funding to support major maintenance of Coast Guard HC-130H, HH-60J, HH-65C, and HU-25 aircraft not appropriated in the Coast Guard Acquisition, Construction and Improvements (AC&I) appropriation. This category includes: materials, services and supplies necessary for depot-level repair, maintenance, modification and overhaul of aircraft and aircraft equipment, including associated avionics; transportation of aircraft and aeronautical materials and equipment; and procurement and overhaul of aircraft ground handling and support equipment. Scarce funding has historically been directed to the most critical depot maintenance which has resulted in a deferred component repair backlog and decreased aircraft availability as ready-for-issue components are unavailable when needed to repair operational aircraft. Request also includes funding for general expenses related to inventory and engineering design, alteration and modification services in support of Coast Guard aircraft.

This funding request also supports depot-level aircraft repair. Coast Guard rotary wing aircraft are continuously rotated out of operational service to allow for programmed depot maintenance (PDM) at the Coast Guard Aircraft Repair and Supply Center (ARSC) in Elizabeth City, NC.

This funding also provides for contractor support to conduct PDM on the service's HC-130Hs, as ARSC does not have this capacity. All PDM is based upon established service standards. The purpose of the aircraft PDM program is to (1) provide periodic inspection of areas of an aircraft which are not accessible without extensive disassembly, (2) perform heavy maintenance which is beyond the capability of operating units, and (3) incorporate changes and modifications which are too extensive to perform at the operating unit level.

**Vessels.** Includes service-wide funding to support the major maintenance and repair of Coast Guard vessels not appropriated in the Coast Guard Acquisition, Construction and Improvements (AC&I) appropriation. The request will fund casualty repairs (CASREP) that have plagued the aging Coast Guard cutter fleet. The funding will also support the procurement, installation, replacement and support of standard hull, mechanical, electrical and electronic systems. As an example, the request will fund maintenance on the Inland Rivertender fleet engine and drive train components, engine room ventilation, and associated abatement of asbestos, PCBs, lead paint, and other hazardous materials. Request also includes funding for general expenses related to inventory and engineering design, alteration and modification services in support of Coast Guard vessels.

Coast Guard vessels are regularly scheduled for programmed depot maintenance based upon established class maintenance plans (CMP). In addition to ship repair work provided by the Coast Guard Yard in Curtis Bay, MD, the Coast Guard routinely uses ship repair facilities/contractors to complete depot level maintenance via competitive contracts. The Coast Guard manages vessel base OE legacy asset maintenance funding using Standard Support Levels (SSLs) established for each vessel class of asset at the time of asset acquisition and adjusted annually for inflation. Actual expenditures vary from the SSL as the Coast Guard's maintenance managers shift resources to deal with their most immediate fleet maintenance challenges, often using funds from another vessel's SSL or outside sources to ensure availability of the most critical Coast Guard assets.

**Shore Infrastructure.** Includes service-wide funding for depot-level, nonrecurring facility maintenance to ensure the safety and integrity of the shore infrastructure, maximize facility economic life, and avoid large recapitalization expenses. This request includes funding for maintenance, repairs, code compliance, alterations, demolitions and other services provided by the Coast Guard's Civil Engineering program falling under the Coast Guard's AC&I appropriation threshold. This category includes support of: Coast Guard-owned land; buildings (e.g. replacement of roofs and mechanical systems); and structures (e.g. repairs to waterfront, communications and navigation system towers, roads and runways). It also includes: support for fixed Aids to Navigation (AtoN) structures (onshore and offshore); major non-consumable equipment used to support the shore plant (e.g. emergency generators, fuel systems, and pressure vessels). This shore OE funding also supports the Coast Guard's Unaccompanied Personnel Housing (i.e. barracks), family housing, clinics, and morale/well-being and recreational facilities.

**III. Current Services Program Description by PPA**

**Department of Homeland Security  
U. S. Coast Guard  
Operating Expenses  
Program Performance Justification  
(Dollars in thousands)**

**Transfers to and from Other Accounts** **\$51,574**

---

**A. Transfer from AC&I Systems Engineering and Integration to GSA Rent .....\$3,859**

Strategic Goal(s) & Objectives: 5.1

| <b>PPA Breakdown - Transfer from AC&amp;I Systems Engineering and Integration to GSA Rent</b> |                  | <b>Total<br/>(\$000)</b> |
|---|------------------|--------------------------|
| <b>PPA V: Centrally Managed Accounts</b>  |                  |                          |
|   | Central Accounts | 3,859                    |
|   |                  | <b>3,859</b>             |

The transfer of funds from the Systems Engineering and Integration PPA to the OE appropriation is necessary to accommodate the GSA lease payments associated with the Deepwater oversight reorganization. This reorganization is consistent with the revised Deepwater management strategy and Congressional communications to shift management and oversight responsibilities of Deepwater Program from the contractor (Integrated Coast Guard Systems) to the Coast Guard. All Deepwater personnel will be located in the Jemal Riverside Building. Benefits of the reorganization include:

- Provide a mechanism for increased program oversight
- Facilitate more effective CG communication and decision making
- Create synergies with other CG acquisition programs
- Leverage existing CG support infrastructure (IT, building management/security, etc.)
- Minimize disruptions due to travel between SIPO and Jemal/CGHQ

**B. Personnel Transfer from Acquisition, Construction & Improvements .....\$82,215**

Strategic Goal(s) & Objectives: 1.1, 1.4, 2.1, 2.4, 2.5, 3.1, 3.6, 4.1, 4.2, 4.3, 5.2, 6.3, 6.4

|---|-----------------------------|----------------------|
| <b>PPA I: Military Personnel (373 FTP, 344 FTE)</b>   |                             |                      |
|   | Military Pay and Allowances | 34,332               |
|   | Military Health Care        | 2,392                |
|   | Permanent Change of Station | 1,662                |
| <b>PPA II: Civilian Personnel (355 FTP, 308 FTE)</b>  |                             |                      |
|   | Civilian Pay and Allowances | 40,605               |
| <b>PPA III: Training and Recruiting</b>   |                             |                      |
|   | Training and Education      | 960                  |
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b>                                   |                             |                      |
|   | Atlantic Area               | 97                   |
|   | Pacific Area                | 66                   |
|   | 8th District                | 3                    |
|   | Headquarters Directorates   | 1,395                |
|   | Headquarters Units          | 703                  |
|   |                             | <b>82,215</b>        |

The successful and efficient execution of government acquisition programs depends upon careful management of contract administration. This funding transfer will significantly improve the Coast Guard’s ability to successfully manage, oversee and administer Acquisition, Construction and Improvement (AC&I) contracts. The consolidation will allow the Coast Guard to:

- Build institutional acquisition competencies by having the ability to move Operation and Support personnel into acquisitions. This will facilitate the training of more junior military personnel, better preparing them for future positions of higher responsibilities within acquisitions, and will allow the Coast Guard to grow acquisition competencies from within.
- Surge acquisition expertise to and from AC&I projects based on the projects’ appropriated funding levels, pace of execution and timing of key decision points. Under the current authority in the FY08 Consolidated Appropriations (H.R. 2764) when OE funding is transferred to AC&I, it can never be returned to the OE appropriation. Although this transfer authority is beneficial, the one way legislative check valve is too restrictive.
- Streamline human resource and financial management functions, which would provide the increased flexibility to optimally managing acquisition staffing. The transfer would also eliminate the complexity of overseeing the refund process between appropriations.
- Standardizing human resource polices within DHS. The Coast Guard is the only asset-intensive organizational element within DHS that has personnel tied to its acquisition appropriation. Maintaining budget consistency across all DHS is an important factor for building a more integrated and coherent Department human resource strategy.

Currently, all salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation, whereas 97 percent of the Coast Guard’s personnel is funded from the OE appropriation. The consolidation will provide the Coast Guard flexibility to address highest priority needs, while ensuring transparency to the Administration and Congress.

**C. Transfer LORAN-C Program to DHS NPPD .....(\$34,500)**

Strategic Goal(s) & Objectives: 5.1

| <b>PPA Breakdown - Transfer Program Funding to DHS NPPD</b> |  | <b>Total (\$000)</b> |
|---|--|----------------------|
| <b>PPA I: Military Personnel</b>                            |  |                      |
|   | Military Pay and Allowances                            | (17,932)             |
|   | Military Health Care                                   | (2,099)              |
|   | Permanent Change of Station                            | (810)                |

|   | Civilian Pay and Allowances | 0                    |
|   |                             | <b>0</b>             |

This initiative seeks a redirection within DHS of \$34.5 million from the Coast Guard to the National Preparedness and Programs Directorate, who will administer the LORAN program in 2009.

Reallocation includes funding for personnel and operations of all 24 Loran stations, the Loran Support Unit, and the Loran-related costs at the Navigation Center, Training Center Petaluma, Engineering Logistics Center, and Loran Station Administration Control Commands.

DHS is the Executive Agent for the development of national backup capability for critical infrastructure associated with position, navigation and timing. DHS has vested NPPD with the responsibility to develop this capability based on the transformation of LORAN-C system to Enhanced LORAN (eLORAN). Transfer of LORAN budget authority will provide NPPD with financial oversight and responsibility for the system and permit the Department to fund any planned upgrades to the system. In 2009, Coast Guard is expected to continue operation of the system on a reimbursable basis. Until then, Coast Guard will work with NPPD to develop a plan for transformation of LORAN-C to eLORAN.

|   | Civilian Pay and Allowances | 19,086               |
|   |                             | <b>52,901</b>        |

Request funds the FY 2009 military (3.4%) and civilian (2.9%) pay raise.

**3. Military Entitlements (DoD Parity) .....\$29,366**

Strategic Goal(s) & Objectives: 5.1

| <b>PPA Breakdown - Military Entitlements (DoD Parity)</b> |   | <b>Total (\$000)</b> |
|---|---|----------------------|
| <b>PPA I: Military Personnel</b>                          |   |                      |
|   | Military Pay and Allowances (Basic Allowance for Housing) | 13,285               |
|   | Permanent Change of Station                               | 16,081               |
|   |   | <b>29,366</b>        |

In order to maintain current services and ensure parity of military pay and allowances with the Department of Defense, the Coast Guard requests funding for the projected 2009 military Basic Allowance for Housing (BAH) increase, which is scheduled to go into effect on 1 January, 2009.

Funding is requested to cover the projected increase for military Permanent Change of Station move costs related to the implementation of the “Families First” Department of Defense (DOD) Personal Property Program. Families First is an initiative that DOD began implementing in 2005 in order to allow service members and their families a wider selection of moving carriers and to streamline the entire household goods moving process. The increase in options allows service members to move their items in a shorter period of time, which increases their ability to report and deploy sooner, but at a higher cost to the parent service. The projected cost increase associated with implementation of Phase III of the Families First program is primarily driven by the need to pay for full replacement insurance coverage versus the depreciated, or partial, insurance coverage that was formerly provided to service members.

**C. Non-Pay Adjustments**

**1. Non-Pay Inflation.....\$34,079**

Strategic Goal(s) & Objectives: 5.0

| <b>PPA Breakdown - Non-Pay Inflation</b>                  |  | <b>Total (\$000)</b> |
|---|--|----------------------|
| <b>PPA I: Military Personnel</b>                          |  |                      |
|   | Military Health Care                                   | 6,962                |
|   | Permanent Change of Station                            | 2,285                |

|   | Training and Education                                 | 1,743                |
|   | Recruiting and Training Centers                        | 2,027                |
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b> |  |                      |
|   | Headquarters Directorates                              | 1,159                |
| <b>PPA V: Centrally Managed Accounts</b>                  |  |                      |
|   | Central Accounts                                       | 4,655                |
| <b>PPA VI: Depot Level Maintenance</b>                    |  |                      |
|   | Aircraft Maintenance                                   | 5,919                |
|   | Electronics Maintenance                                | 2,388                |
|   | Civil/Ocean Engineering and Shore Facility Maintenance | 3,445                |
|   | Vessel Maintenance                                     | 3,496                |
|   |  | <b>34,079</b>        |

Coast Guard operations rely heavily upon contract support for items such as capital asset maintenance, domestic services, cutter and aircraft deployment logistics, food services and procurement. Price escalation for goods and services during FY 2008 must be accommodated. Funding is requested at the non-pay inflation rate of 2.0% to ensure that maintenance and logistics contracts are adequately funded to maintain essential services and enable the Coast Guard to execute its statutory responsibilities for the American public in FY 2009.

**2. Operational Adjustments**

Strategic Goal(s) & Objectives: 1.1, 3.1, 3.2, 4.1, 5.1

**a) GSA Rent and Security Charges Increase .....\$19,417**

| <b>PPA Breakdown - GSA Rent and Security Charges Increase</b> |                  | <b>Total (\$000)</b> |
|---|------------------|----------------------|
| <b>PPA V: Centrally Managed Accounts</b>                      |                  |                      |
|   | Central Accounts | 19,417               |
|   |                  | <b>19,417</b>        |

This request provides funding for General Services Administration (GSA) leased expenses associated with rental, operating and security costs increasing more rapidly than COLA. Of the \$19.417 million

requested, \$13.300 million is attributed to an increase for Coast Guard Headquarters (Transpoint Building) as authorized by OMB and Congress. Request levels are based on estimates provided by GSA, determined by costs (including associated inflation) resulting from occupancy agreements established with GSA to meet specific shore facility space requirements.

**b) Depot Level (4X) and Emergency Maintenance .....\$29,217**

| <b>PPA Breakdown - Depot Level (4X) and Emergency Maintenance</b> |  | <b>Total (\$000)</b> |

|   | Civil/Ocean Engineering and Shore Facility Maintenance | 5,730                |
|   | Vessel Maintenance                                     | 7,909                |
|   |  | <b>29,217</b>        |

This request seeks funding for urgent extraordinary maintenance requirements including the following: Urgent Crew Safety on Cutters; funds overhauls of habitability, sanitary, electrical, fire/flooding alarm systems and asbestos/lead remediation. Emergency Maintenance; restores required cutter dockside maintenance scope and intervals, restores aircraft repair intervals and funds required spare parts replenishment. Post-Casualty Maintenance; funds unanticipated repairs on legacy cutters and aircraft, unscheduled drydocks/dockside availabilities and fire damage remediation.

As with the Department of Defense, inflation for aviation, ship, electronics and shore facility maintenance exceeding 2.0% non-pay Cost of Living Allowance (COLA) rate is a major cost driver for maintenance activities. Inflation estimates, which vary between each type of resource/facility, are based on standard rates of inflation published by the Department of Labor and Statistics. The observed construction inflation rate, as published in the Engineering News Record, is used for Civil/Ocean Engineering and Shore Facility Maintenance projects. In all cases, inflation is a significant driver of real purchasing power for critical maintenance activities.

**c) Government Services Increase .....\$359**

| <b>PPA Breakdown - Government Services Increase</b> |                  | <b>Total (\$000)</b> |
|---|------------------|----------------------|
| <b>PPA V: Centrally Managed Accounts</b>            |                  |                      |
|   | Central Accounts | 359                  |
|   |                  | <b>359</b>           |

This request will provide funding for the Coast Guard to reimburse the National Telecommunication and Information Administration (NTIA), Office of Spectrum Management, for increased operating expenses incurred for the management of approximately 17,000 radio frequency assignments. The payment of this fee allows the Coast Guard to maintain frequency authority on its assigned frequencies. It will also fund anticipated postal increases. As part of the new postal reforms, the U.S. Postal Service is proposing to increase rates on a more regular basis. The proposal is to effect major increases every other year, with a minor increase in between. The increase in FY 2009 is estimated at 5%.

**d) Mission & Business Systems Licenses .....\$1,244**

| <b>PPA Breakdown - Mission &amp; Business Systems Licenses</b> |                  | <b>Total (\$000)</b> |
|--|------------------|----------------------|
| <b>PPA V: Centrally Managed Accounts</b>                       |                  |                      |
|  | Central Accounts | 1,244                |
|  |                  | <b>1,244</b>         |

This request will fund incremental costs for licenses, maintenance, and support of enterprise class database management technology and related products. These products are the foundation for Coast Guard systems supporting operational and administrative functions.

**e) Intra-Government Services.....\$1,266**

| <b>PPA Breakdown - Intra-Government Services</b>          |                           | <b>Total (\$000)</b> |
|---|---------------------------|----------------------|
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b> |                           |                      |
|   | Headquarters Directorates | 1,266                |
|   |                           | <b>1,266</b>         |

Funding is requested to pay for increased costs of prisoner escort and transportation for Coast Guard prisoners housed at Navy brig, increased IT equipment and hosting charges for the Real Time Automated Personnel Identification System (RAPIDS), increased National Archive and Records Administration (NARA) charges for federal records storage, and increased charges for the Coast Guard’s drug testing program. This request is based on cost projections from the agencies which provide these services to the Coast Guard on a reimbursable basis.

**f) Flight Training Funding Gap.....\$7,713**

| <b>PPA Breakdown - Flight Training Funding Gap</b> |                        | <b>Total (\$000)</b> |
|--|------------------------|----------------------|
| <b>PPA III: Training and Recruiting</b>            |                        |                      |
|  | Training and Education | 7,713                |
|  |                        | <b>7,713</b>         |

The U. S. Coast Guard’s flight training program at NAS Pensacola consists of student training in primary and advanced aircraft. The U. S. Navy training aircraft include the T-34 for primary training and either the T-44 aircraft or the T-57 helicopter for advanced flight training. Costs are based on an hourly rate per aircraft multiplied by the total student hours. In FY 2009, the U. S. Navy will replace the T-34 aircraft with the T-6 aircraft. This replacement aircraft will cost more to operate. This funding is required to offset operating cost increases as well as a new charge of overhead costs by the U. S. Navy for Coast Guard flight training.

**g) Inland Rivertenders' Emergency Subsystem Sustainment.....\$4,000**

Strategic Goal(s) & Objectives: 3.1, 3.2

| <b>PPA Breakdown - Inland Rivertenders' Emergency Subsystem Sustainment</b> |                                 | <b>Total (\$000)</b> |
|---|---------------------------------|----------------------|
| <b>PPA I: Military Personnel (2 FTP, 1 FTE)</b>                             |                                 |                      |
|   | Military Pay and Allowances     | 89                   |
|   | Military Health Care            | 7                    |
|   | Permanent Change of Station     | 13                   |
| <b>PPA II: Civilian Personnel (2 FTP, 1 FTE)</b>                            |                                 |                      |
|   | Civilian Pay and Allowances     | 115                  |
| <b>PPA III: Training and Recruiting</b>                                     |                                 |                      |
|   | Training and Education          | 8                    |
|   | Recruiting and Training Centers | 1                    |
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b>                   |                                 |                      |
|   | Atlantic Area                   | 2                    |
|   | Headquarters Directorates       | 2                    |
|   | Headquarters Units              | 4                    |
| <b>PPA V: Centrally Managed Accounts</b>                                    |                                 |                      |
|   | Central Accounts                | 24                   |
| <b>PPA VI: Depot Level Maintenance</b>                                      |                                 |                      |
|   | Vessel Maintenance              | 3,735                |
|   |                                 | <b>4,000</b>         |

This initiative provides funding to address the deteriorating materiel condition and safety of three different classes of Aids to Navigation (AtoN) cutters, the sole federal presence on the inland waterways in many cases, by increasing their AFC-45 OE maintenance funding. This project, a partial renovation focused on repairing critical subsystems, will serve as a bridging strategy until the requirements for recapitalization are determined. Although originally designed specifically for AtoN work, many of these vessels are a critical federal presence on the inland waterways and now meet important multi-mission needs in the region. These needs include rapid restoration of waterways following disasters and assisting in recovery of critical port operations. While the Coast Guard studies and validates present and future inland waterways needs, maintaining current capabilities is critically important. Results will directly inform future proposals for a multi-mission federal presence platform on the inland waterways and lead to a balanced, integrated, and cost-effective solution for the region. Until that solution is identified, the Coast Guard needs to meet its safety, security, and stewardship requirements on the inland waterways by maintaining current capabilities.

**D. Operating and Maintenance Funds for New Assets**

**1. Shore Facility Follow-On .....\$1,438**

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.1

| <b>PPA Breakdown - Shore Facility Follow-On</b>           |  | <b>Total (\$000)</b> |
|---|--|----------------------|
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b> |  |                      |
|   | Atlantic Area  | 466                  |
|   | Headquarters Directorates                              | 137                  |
| <b>PPA VI: Depot Level Maintenance</b>                    |  |                      |
|   | Civil/Ocean Engineering and Shore Facility Maintenance | 835                  |
|   |  | <b>1,438</b>         |

This request will provide funding for the operation and maintenance of shore facility projects scheduled for completion prior to FY 2010. Funding is required for day-to-day operation costs, routine repairs and housekeeping. Funding also supports major maintenance and repairs (i.e. rebuilding, improvement, rehabilitation, etc.) anticipated throughout the life of the facility. Facilities include:

- Cordova Housing Infrastructure
- Station Washington Duty Berthing and Boat Maintenance Bay
- Air Station Atlantic City National Capital Region Air Defense Facilities
- Aviation Technical Training Center Rescue Swimmer Training Facility

**2. Aids to Navigation (ATON) Modernization Follow-On .....\$95**

Strategic Goal(s) & Objectives: 3.1, 3.2

| <b>PPA Breakdown - Aids to Navigation (ATON) Modernization Follow-On</b> |  | <b>Total (\$000)</b> |
|--|--|----------------------|
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b>                |  |                      |
|  | 5th District   | 47                   |
|  | 9th District   | 14                   |
| <b>PPA V: Centrally Managed Accounts</b>                                 |  |                      |
|  | Central Accounts                                       | 15                   |
| <b>PPA VI: Depot Level Maintenance</b>                                   |  |                      |
|  | Electronics Maintenance                                | 8                    |
|  | Civil/Ocean Engineering and Shore Facility Maintenance | 11                   |
|  |  | <b>95</b>            |

This initiative provides follow-on funding to operate and maintain the Aids to Navigation acquired within the Coast Guard’s FY 2008 Acquisition, Construction and Improvements appropriation. Funding helps reduce the most critical items in the infrastructure project backlog and will lead to concrete improvements in the Maritime Transportation System (MTS).

**3. Air Station Cape Cod (ASCC) Operations Follow-On.....\$3,493**

Strategic Goal(s) & Objectives: 1.1, 3.1, 3.2, 4.1

| <b>PPA Breakdown - Air Station Cape Cod (ASCC) Operations Follow-On</b> |  | <b>Total (\$000)</b> |
|---|--|----------------------|
| <b>PPA I: Military Personnel (3 FTP, 2 FTE)</b>                         |  |                      |
|   | Military Pay and Allowances                            | 91                   |
|   | Military Health Care                                   | 11                   |

|   | Central Accounts                                       | 61                   |
| <b>PPA VI: Depot Level Maintenance</b>                                  |  |                      |
|   | Civil/Ocean Engineering and Shore Facility Maintenance | 849                  |
|   |  | <b>3,493</b>         |

The Massachusetts Air National Guard 102nd Fighter Wing operates the airfield, utilities, and emergency services at the Otis Air National Guard Base in Massachusetts. Coast Guard Air Station Cape Cod (ASCC) operates from this facility and utilizes services provided by the 102nd Fighter Wing. As a result of the BRAC 2005 base realignment, the Massachusetts Air National Guard 102nd Fighter Wing will move to Barnes Massachusetts Air National Guard Base in September 2008 and discontinue operations and services at Otis. Coast Guard economic studies for continuing operations at Otis (renamed the Massachusetts Military Reservation (MMR) after the 102nd Fighter Wing's departure) or moving to an alternate location have determined that remaining at Otis and operating the airfield is the most economically viable option. In practical terms, other tenants of the MMR will share in responsibility. While the Coast Guard will assume responsibility for airfield operations, the State of Massachusetts will operate the emergency services, and the National Guard Bureau will be responsible for utilities. This initiative will ensure ASCC has the resources to continue current operations at a strategically critical location along the U.S. northeast coastline. Additional benefits include the uninterrupted support of 6 tenant Coast Guard commands and 467 Coast Guard housing units. Of the 26 new positions associated with this request, 20 will be classified as Status C (suitable for a streamlined or standard competition) in the Agency's Fair Act Inventory.

**4. Nationwide Differential Global Positioning System Follow-On .....\$544**

Strategic Goal(s) & Objectives: 3.1, 3.2

| <b>PPA Breakdown - Nationwide Differential Global Positioning System Follow-On</b> |                           | <b>Total (\$000)</b> |
|--|---------------------------|----------------------|
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b>                          |                           |                      |
|  | Headquarters Directorates | 544                  |
|  |                           | <b>544</b>           |

This request provides operating and maintenance funding for 12 unmanned Differential GPS transmitting sites which provide highly accurate signals used for positioning and navigation for military, governmental, and civil use. These sites include eight coastal and six inland Military Economic Strategic (MES) ports, including LNG terminals. The Federal Railroad Administration (FRA) is no longer the federal sponsor for NDGPS. Responsibility for NDGPS shifted to the U.S. Department of Transportation's (DOT) Research and Innovative Technology Administration (RITA) on an interim basis. RITA included \$5.000 million for NDGPS in the President's request for FY 2008, but funding support for FY 2009 and beyond is uncertain. RITA is preparing an assessment of the inland component of NDGPS. RITA asserted that if no transportation requirements are identified during the assessment, they intend to terminate support for NDGPS at the end of FY 2008.

**5. Response Boat - Medium (RB-M) Maintenance Follow-On .....\$154**

Strategic Goal(s) & Objectives: 1.1, 3.1, 3.2, 4.1

| <b>PPA Breakdown - Response Boat - Medium (RB-M) Maintenance Follow-On</b> |                                 | <b>Total (\$000)</b> |
|--|---------------------------------|----------------------|
| <b>PPA I: Military Personnel (3 FTP, 2 FTE)</b>                            |                                 |                      |
|  | Military Pay and Allowances     | 85                   |
|  | Military Health Care            | 11                   |
|  | Permanent Change of Station     | 18                   |
| <b>PPA III: Training and Recruiting</b>                                    |                                 |                      |
|  | Training and Education          | 17                   |
|  | Recruiting and Training Centers | 2                    |
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b>                  |                                 |                      |
|  | 1st District                    | 2                    |
|  | 5th District                    | 2                    |
|  | 7th District                    | 2                    |
|  | Headquarters Directorates       | 1                    |
| <b>PPA V: Centrally Managed Accounts</b>                                   |                                 |                      |
|  | Central Accounts                | 14                   |
|  |                                 | <b>154</b>           |

This request provides funding for additional maintenance personnel to support Response Boat – Mediums (RB-M) acquired with funding provided in FY 2008. The RB-M standardizes the Coast Guard's boat forces by replacing the aging 41-foot Utility Boat (UTB) fleet, which has approached its 25-year service life, and all other medium-sized Non-Standard Boats (NSB) at multi-mission stations.

Increased small boat capacity directly supports the Commandant's Ports, Waterways, and Coastal Security Plan and enhances the Coast Guard's Search and Rescue and Law Enforcement missions.

**6. Coastal Patrol Boat Follow-On.....\$9,035**

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.1

| <b>PPA Breakdown - Coastal Patrol Boat Follow-On</b>      |  | <b>Total (\$000)</b> |

|   |  | <b>9,035</b>         |

The addition of four 87 ft CPBs will provide 7,200 annual programmed hours. As multi-mission capable assets, the new CPBs will perform duties including Maritime Law Enforcement (Alien Migrant Interdiction Operations, Counterdrug, and Living Marine Resources Enforcement), Search and Rescue, and Ports, Waterways and Coastal Security (PWCS). The cutters will partially relieve the burden on existing patrol boats pending the arrival of the FRC (B) class of vessels. The 7,200 operational hours gained would be targeted to District 7 so as to have the most direct mitigating impact on the operational hour gap experienced in southern Florida.

**7. Rescue 21 Follow-On .....\$14,666**

Strategic Goal(s) & Objectives: 3.2, 4.1

| <b>PPA Breakdown - Rescue 21 Follow-On</b>                |                                 | <b>Total (\$000)</b> |

|   |                                 | <b>14,666</b>        |

This request provides equipment operation and maintenance, circuit connectivity, property (leases) and power, training, and technology upgrade funding for the National Distress System Modernization Project (Rescue 21). This request also includes funding for one additional watch section (five persons) at 15 Sector Command Centers (SCCs) receiving the most rescue traffic, and supports Phase One of a rollout plan to augment SCCs with the highest workload.

Rescue 21 is the Coast Guard's primary system to perform the functional tasks of command, control and communications (C3) in the inland and coastal zones for Coast Guard operations involving search and rescue and homeland security activities. Rescue 21 will meet safety requirements for growing marine traffic and the International Convention for the Safety of Life at Sea (SOLAS) treaty.

This new C3 system is more robust, reliable, and capable than the legacy system, allowing watchstanders greater access to a wider array of actionable operational and planning data. However, this

increased capability has greatly increased the watchstanders' workload. Rather than monitoring 1-2 circuits per tower, watchstanders now monitor 5 circuits per tower with greater sensitivity/receptions than the legacy National Disaster System (NDS). The additional watchstanders included in this request are needed to fully support and utilize the increased capability Rescue 21 provides.

This funding request aligns with the multi-year build out of the Rescue 21 acquisition project. By the end of FY 2008, 20 regions (Sectors or Air Stations) are planned to be built and operational, requiring OE funding and watch augmentation in FY 2009.

**8. Nationwide Automatic Identification System (NAIS) Follow-On .....\$10,902**

Strategic Goal(s) & Objectives: 1.1, 3.1, 3.2

| <b>PPA Breakdown - Nationwide Automatic Identification System (NAIS) Follow-On</b> |                                 | <b>Total (\$000)</b> |

|  | Electronics Maintenance         | 3,246                |
|  |                                 | <b>10,902</b>        |

This request provides network operating and maintenance service funding for the Nationwide Automatic Information System (NAIS). NAIS Increment 1 will be operating in receive-only mode in 55 critical ports and nine coastal areas. AIS data will be validated, stored and transferred from Sector Command Centers to a central data processing center where it will feed the maritime Common Operational Picture, as well as Coast Guard and intelligence community partners in support of the National Strategy for Maritime Security and its eight supporting plans.

**9. Defense Messaging System Follow-On.....\$1,463**

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.1

| <b>PPA Breakdown - Defense Messaging System Follow-On</b> |                           | <b>Total (\$000)</b> |
|---|---------------------------|----------------------|
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b> |                           |                      |
|   | Headquarters Directorates | 263                  |
|   | Headquarters Units        | 880                  |
| <b>PPA V: Centrally Managed Accounts</b>                  |                           |                      |
|   | Central Accounts          | 138                  |
| <b>PPA VI: Depot Level Maintenance</b>                    |                           |                      |
|   | Electronics Maintenance   | 182                  |
|   |                           | <b>1,463</b>         |

This request provides funding to support web-based Defense Messaging System (DMS) to all 30,000 Coast Guard military messaging users, tactical DMS to over 30 cutters and 24x7 Local Control Center (LCC) operations. In addition, it funds DMS component hardware/software and additional circuit costs and hardware/software upgrades required at the LCC to support DMS users both shore-side and afloat. The Coast Guard has begun implementation of DMS in order to remain interoperable with DOD and other government agencies and Allied military forces for secure record messaging. DMS is a DOD mandated program that will replace the antiquated Automated Digital Network (AUTODIN) record message system.

**10. Counter-Terrorism (CT) Training Infrastructure - Shoot House Follow-On .....\$721**

Strategic Goal(s) & Objectives: 1.1, 2.1, 2.2, 3.1, 3.2

| <b>PPA Breakdown - Counter-Terrorism (CT) Training Infrastructure - Shoot House Follow-On</b> |                                 | <b>Total (\$000)</b> |
|---|---------------------------------|----------------------|
| <b>PPA III: Training and Recruiting</b>   |                                 |                      |
|   | Recruiting and Training Centers | 676                  |
| <b>PPA V: Centrally Managed Accounts</b>  |                                 |                      |
|   | Central Accounts                | 45                   |
|   |                                 | <b>721</b>           |

This request provides the operational funding for the Counter-Terrorism Shoot house funded in FY 2008 to train the Coast Guard’s Deployable Forces. Specifically it will meet the training requirements for the Maritime Security Response Team (MSRT), the twelve Maritime Security and Safety Teams (MSST) and twenty Law Enforcement Detachments (LEDET). Without this funding, approximately 500 Coast Guard operators from the MSRT, MSSTs and LEDETs will be unable to train in counter-terrorism close quarter combat (CQC) live fire exercises as frequently as required. This request directly supports DHS strategic goals of protecting our Nation from dangerous people, dangerous goods and protecting critical infrastructure by training and equipping personnel with the necessary skills to secure our borders against terrorists, protect the public and marine environment from acts of terrorism and reduce the loss of life and property by strengthening nationwide response readiness.

**11. Surface and Air Asset Follow-On.....\$40,152**

Strategic Goal(s) & Objectives: 1.1, 2.1, 2.2, 3.1, 3.2, 4.1

| <b>PPA Breakdown - Surface and Air Asset Follow-On</b>    |                                 | <b>Total (\$000)</b> |
|---|---------------------------------|----------------------|
| <b>PPA I: Military Personnel (188 FTP, 87 FTE)</b>        |                                 |                      |
|   | Military Pay and Allowances     | 5,751                |
|   | Military Health Care            | 635                  |
|   | Permanent Change of Station     | 1,287                |
| <b>PPA II: Civilian Personnel (11 FTP, 6 FTE)</b>         |                                 |                      |

| <b>PPA V: Centrally Managed Accounts</b>                  |                                 |                      |
|   | Central Accounts                | 3,181                |
| <b>PPA VI: Depot Level Maintenance</b>                    |                                 |                      |
|   | Aircraft Maintenance            | 8,803                |
|   |                                 | <b>40,152</b>        |

**CASA HC-144A Aircraft Operations and Crew Follow-On - \$24,023:** In accordance with the Deepwater Implementation Plan, the total number of CASA HC-144A aircraft in the U. S. Coast Guard’s inventory will increase from 0 to 36 between FY 2008 and FY 2022. This initiative will provide funding for personnel, operations and maintenance for aircraft #4 through #7. The operational impact associated with the commissioning of these four HC-144A aircraft will be the addition of 4,800 flight hours per year (1,200 flight hours per aircraft). This flight hour increase will mitigate the decommissioning of HC-130H and HU-25 aircraft from the U. S. Coast Guard’s inventory in FY 2009. In addition, this proposal will fund the operation of Commercial Satellite (COMSAT) Communications equipment for CASA HC-144A aircraft #1 through #7, providing full COMSAT operational capability and global coverage of high speed data and voice connectivity.

**Armed Helicopter Follow-On - \$767:** This proposal provides recurring funds to recapitalize deployable Armed Helicopter AUF Kit “A” equipment. Additionally, increased funding is required to support the two additional helicopters the Area Deployment Center operates (i.e. 10) over the eight airframes operated by HITRON.

**NSC Crew Rotation Concept (CRC) and General Defense Operation (GDO) Crew - \$5,586:** This funding and personnel establish phase III of the oversight and support personnel to implement the CRC concept on the NSC fleet in Alameda. Funding of this request will allow the Coast Guard to implement

the Crew Rotation Concept (CRC) on the first two NSCs by establishing essential maintenance personnel to assist the crew by providing shore side maintenance support that will allow each hull to deploy for 230 DAFHP vice 185 DAFHP despite reduced import maintenance periods. In addition this request provides General Defense Operations (GDO) personnel to supplement the crew of a NSC while deployed out of hemisphere.

The request provides the necessary funding for a training system capable of producing highly competent NSC crews. The funding will provide the instructors, shore side maintenance support and training aids necessary to meet performance-based training needs and ensure the readiness of Deepwater crews. The purchase of the training aids could save the Coast Guard over \$4.000 million during the NSC life cycle by removing the need to procure more expensive non-Coast Guard training.

**FRC Patrol Boat Crew - \$1,181:** Provides personnel to operate and maintain the first Fast Response Cutter (FRC-B) scheduled for delivery in 2010. Advance arrival of the crew is critical to ensure appropriate training is conducted prior to delivery.

**Deepwater C4ISR Follow-On - \$7,146:** This request provides personnel and operating expenses to support C4ISR hardware, software, and firmware for equipment acquired or upgraded through Deepwater acquisition. These assets include cutters, aircraft, Air Stations, Communications Area Master Stations, and Operations Centers. Support includes logistics infrastructure, Logistics Information Management System (LIMS) software licenses and upgrades, and contractor technical representatives. The personnel include five Operations Center and one Intelligence Coordination Center Coast Guard Civilian (GS) support billets as well as training and travel funds for C4ISR system support.

**FRC Primary Crew Assembly Facility (PCAF) (Phase II) - \$1,449:** Provides personnel and funding to coordinate the training and arrival of the personnel assigned to crew the FRC Bs, the new patrol boat scheduled for delivery in 2010.

**12. Coast Guard Acquisitions Directorate Personnel Increase .....\$8,998**

Strategic Goal(s) & Objectives: 5.0

This request provides funding for personnel to perform the system integrator role for the Integrated Deepwater Program and to execute the traditional acquisition projects. The Coast Guard is currently consolidating the Integrated Deepwater System (IDS), the existing Acquisition Directorate (G-A), the Head of Contracting Activity (HCA), and the procurement policy staff into a combined Acquisition Directorate (CG-9). The Coast Guard is committed to addressing the staffing and training needs of Deepwater as we move forward in our role as Lead System Integrator for the IDS program. In support of this initiative the Coast Guard has identified requirements for new positions to address immediate and critical acquisition project management needs. These 65 positions require a variety of skill sets, including program management, and contracting professionals, to be used in direct support of reforming major system acquisition management and strengthening governmental oversight of the IDS program. The additional personnel will enable the Coast Guard to reduce potential cost/schedule overruns and to mitigate technical risks associated with major system acquisitions by providing:

- Increased oversight of contractor performance,
- Increased government leadership and administration of integrated project teams, and
- More timely and thorough review of contractor deliverables for technical sufficiency and contract compliance.
- Coordination and liaison for external (Congressional/OMB/DHS) inquiries and reports.

**13. POLAR High Latitude Study .....\$200**

Strategic Goal(s) & Objectives: 3.1, 3.2, 4.2

| <b>PPA Breakdown - POLAR High Latitude Study</b>          |                           | <b>Total (\$000)</b> |
|---|---------------------------|----------------------|
| <b>PPA IV: Operating Funds and Unit Level Maintenance</b> |                           |                      |
|   | Headquarters Directorates | 200                  |
|   |                           | <b>200</b>           |

The purpose of this study is to conduct an analysis of national mission needs in the high latitude regions to inform the national polar policy debate. The study will examine how the mission needs pertain to national maritime safety and security and the subsequent role of the Coast Guard.

**E. Base Re-Allocations (Non-Add)**

**1. Military FTP and FTE Transfer to Civilian.....\$0**

| <b>PPA Breakdown - Military FTP and FTE Transfer to Civilian</b> |                             | <b>Total (\$000)</b> |
|--|-----------------------------|----------------------|
| <b>PPA I: Military Personnel (-213 FTP, -213 FTE)</b>            |                             |                      |
|  | Military Pay and Allowances | 0                    |
| <b>PPA II: Civilian Personnel (213 FTP, 213 FTE)</b>             |                             |                      |
|  | Civilian Pay and Allowances | 0                    |
|  |                             | <b>0</b>             |

Request the transfer of 213 military FTP/FTE to civilian FTP/FTE (206 OE and 7 AC&I). This request is based upon the conversion of military positions to civilian positions. These conversions are in accordance with GAO guidance to change military positions funded in PPA I (Military Pay and Allowances) with inherently civilian job functions to civilian positions funded in PPA II (Civilian Pay and Allowances).

The funding associated with these conversions was transferred from PPA I to PPA II in P.L. 109-295 (the Department of Homeland Security Appropriations Act of 2007); however the FTP/FTE was not transferred. Approval of this request will properly align FTP/FTE with previous position conversions and the FY07 funding transfer.

**2. PPA Funding Technical Transfers (\$15.691 million base re-allocation) .....[\$15,691]**

| <b>PPA Breakdown - PPA Funding Technical Transfers (\$15.691 million base re-allocation)</b> |                                 | <b>Total (\$000)</b> |

|  | Vessel Maintenance              | 101                  |
|  |                                 | <b>0</b>             |

Request recurring technical base adjustments to move funding to the appropriate PPA for compliance with Coast Guard financial policy. All requested adjustments retain the original intent and purpose of the funding appropriated; however, the PPA to properly execute these items is different than originally appropriated. Requested adjustments include moving funding from the Unit Level Maintenance PPA (PPA 4) to the Depot Level Maintenance PPA (PPA 6) in order for the Coast Guard to centralize a portion its maintenance program. This will reduce the workload of field unit personnel and facilitate service-wide standardization.

Request also includes transferring funding for the maintenance costs of the Coast Guard Academy’s shipboard simulator and associated IT costs from PPA 4 to the Training and Recruiting PPA (PPA 3), transferring funds from PPA 4 to the Centrally Managed Accounts PPA (PPA 5) to fund service-wide contracts and transferring funding from PPA 3 to the Military Pay and Allowances PPA (PPA 1) to fund Coast Guard galley contracts. All of the requested transfers are consistent with Coast Guard policy, the intent/purpose of the appropriated funding and will better allow the Coast Guard to execute its budget authority.

|   |  | <b>(68,177)</b>      |

Fiscal liability for Coast Guard contracted dining facilities was shifted from the Training and Recruiting PPA (PPA III) to the Military Pay and Allowance PPA (PPA I) to better align with internal Coast Guard policy and the purpose/intent of the appropriation. As a result of moving the obligation out of PPA III, a \$10 million surplus has been identified and is available for a reduction as a management efficiency.

In order to fund annualization costs associated with FY08 emergency port and maritime security enhancements, as well as a portion of the FY09 pay increase, the Coast Guard will leverage operational

efficiencies across Headquarters Units', Areas', Districts' and Sectors' operating and maintenance accounts (AFC-30).

USCGC ACUSHNET will be decommissioned as part of the Deepwater Implementation Plan. Commissioned 05 Feb 1944, ACUSHNET is the oldest and least capable major cutter. It has limited operational capabilities including a lack of speed, a flight deck and modern equipment. ACUSHNET is also well past its useful service life.

USCGC BLACKBERRY will be decommissioned and replaced by another WLI class cutter from Coast Guard District 13, the USCGC BAYBERRY. A portion of the savings from the BLACKBERRY decommissioning will be reinvested into three permanently reprogrammed billets to support the AtoN mission in District 13. The success of District 13 being able to absorb BAYBERRY's AtoN responsibilities is dependent upon increasing personnel at ANT Puget Sound. Without the added personnel the unit would be unable to cover BAYBERRY's assigned area of responsibility. Commissioned in 1946, BLACKBERRY, in its current state, is limited in capability and past its useful service life, whereas BAYBERRY is newer and has significant operational advantages. Commissioned in 1954, BAYBERRY has a more advanced engineering plant and provides an improvement in ship handling and safety over BLACKBERRY.

**5. Decommission Two (2) HU-25 Aircraft ..... (\$3,848)**

In accordance with the Deepwater Implementation Plan, the total number of HU-25 aircraft in the U.S. Coast Guard's inventory will decrease from 20 to 0 between FY 2009 and FY 2014. This initiative is for decommissioning of aircraft #1 and #2. The operational impact associated with decommissioning two HU-25 aircraft will be the loss of 1,600 flight hours per year. This flight hour deficit will be mitigated with the introduction of CASA HC-144A aircraft in the Coast Guard's inventory.

**6. Decommission Four (4) HC-130H Aircraft ..... (\$18,534)**

|   |                                 | <b>(18,534)</b>      |

In accordance with the Deepwater Implementation Plan, the total number of HC-130H aircraft in the U.S. Coast Guard's inventory will decrease from 27 to 16 between FY 2009 and FY 2016. This initiative is for decommissioning of aircraft #1 through #4. The operational impact associated with decommissioning three HC-130H operational and one support aircraft will be the loss of 2,400 flight hours per year. This flight hour deficit will be mitigated with the introduction of five operationally missionized HC-130J aircraft in FY 2008.

The Coast Guard and Navy entered into a four year Inter-service Transfer agreement for five Cyclone Class Patrol Coastal (PC) boats on August 11th, 2004. The five PCs provide the Coast Guard with an additional 12,500 patrol boat operating hours annually, with primary emphasis on Counter Drug Law Enforcement, Migrant Interdiction Operations and Ports, Waterways, and Coastal Security (PWCS). The current agreement runs through the end of FY 2008. An Addendum to the original agreement keeps three of the five PCs under Coast Guard operational control and returns two PCs back to the Navy at the end of FY 2008. USCGCs MONSOON and TEMPEST will be returned to the Navy. The crew billets and associated operating and maintenance funds, along with the associated Pacific Area maintenance support billets, are being eliminated.

### Description of Item

The requested funding supports the first phase of a multi-year initiative to provide additional watchstanders to meet increased operational demands and to increase situational awareness and information-sharing in all Coast Guard command centers. This initiative will help to properly staff Sectors, Districts, Areas, and Headquarters command centers by increasing staffing by approximately one additional 24-hour watch position per command center. The Situation Unit Watchstander enables the Command Centers to sustain a higher operational tempo and meet the increasing demand for data and information in support of a robust common operational picture and integrated interagency tactical operations at the local, tribal, state, regional, and national levels. This initiative also supports development of a coordinated architecture for the Coast Guard's command and control systems and common operating picture that collects, integrates and analyzes information concerning vessels operating on or bound for U.S. waters.

### Justification

This initiative supports NSPD-41/HSPD-13, the National Strategy for Maritime Security, the Plan to Achieve Maritime Domain Awareness, the Maritime Transportation Security Act (MTSA) of 2002 and the Safety and Accountability of Every (SAFE) Port Act of 2006 by greatly increasing the information collection, monitoring and sharing capability and capacity at Sector, District, Area and Headquarters Command Centers. The additional watchstanders will allow the Coast Guard to more fully exploit the increased capability provided by the integrated sensors, port and waterway monitoring capacity and information sharing provided by the Command 21 project and the Common Operating Picture (COP). The additional watchstanders will also support interagency operations center capability at our Sector command centers.

### Impact of Performance

The requested funding for Situation Unit Watchstanders supports the national goals and objectives of achieving effective control of our borders, ensuring the protection of all transportation modes and ensuring all levels of government can respond to catastrophic events (1.1, 3.2 and 4.1 respectively). In addition to leveraging the technology and increased capability provided by the Command 21 project, the Situation Unit Watchstanders will maintain a constant, vigilant watch over all Coast Guard missions in command centers and support interagency operations centers to ensure the Coast Guard is properly positioned to monitor and detect emerging, all-hazards threats and is ready to coordinate with port partners and other national-level resources to provide a rapid, targeted response. The additional watchstanders will not only increase the Coast Guard's capability to monitor, analyze, collect, integrate and share the increased maritime domain awareness information provided through the COP, but they will also provide critically needed augmentation to high operating tempo command centers; improving operational readiness, workload management and quality of life for Coast Guard members.

Failure to adequately fund Situational Unit Watchstanders limits the Coast Guard’s ability to fully utilize the capabilities provided by the Command 21 project. It also limits our ability to effectively and efficiently coordinate with our port partners in response to all-hazards emergencies and contingency operations.

**B. Marine Inspection Program .....\$20,000**

Strategic Goal(s) & Objectives: 1.1, 3.1, 3.2, 4.2

| <b>PPA Breakdown - Marine Inspection Program</b>          |                                 | <b>Total (\$000)</b> |
|---|---------------------------------|----------------------|
| <b>PPA I: Military Personnel (207 FTP, 104 FTE)</b>       |                                 |                      |

### Description of Item

This initiative will provide the necessary resources to expand the Coast Guard marine inspection program to meet growing demand for new safety and environmental protection standards and initiate new inspections on approximately 5,200 United States towing vessels as mandated by the FY04 Coast Guard Authorization Act.

### Justification

Marine inspectors will be utilized for inspection of the United States fleet, development and execution of safety and security standards (ballast water management, engine combustion standards, alternate drydocking capabilities, high speed ferries, Alternate Compliance Program oversight, Voluntary Model Audit Scheme, etc.), as well as the requirement for the Coast Guard to inspect United States-flagged towing vessels. Specifically, Section 415 of the Coast Guard's Authorization Act of FY04 amended 46 USC 3301 to require Coast Guard inspection of United States towing vessels.

### Impact of Performance

Additional full-time positions will be used to meet anticipated growth in maritime commerce and significant expansion of the regulated fleet. Inspection and investigation work will increase as a result of additional Liquefied Natural Gas (LNG) ships and facilities, towing vessel examinations, non-tank vessel response plan reviews, ballast water management oversight, and regulatory development. Approximately 5,200 United States towing vessels will require inspection as a result of new requirements. Personnel with engineering technical knowledge will conduct plan review of non-tank vessels. Personnel will also provide policy guidance and technical support to the field regarding non-tank vessels.

**C. MAGNet 2.0 - Intel Integration .....\$12,281**

Strategic Goal(s) & Objectives: 1.1, 1.2, 1.3, 2.1, 2.2, 3.1, 3.2, 5.0

Description of Item

The \$12.281 million requested for Maritime Awareness Global Network (MAGNet) 2.0 provides the information technology intelligence capability that serves as a data repository, fusion platform and enterprise sharing device to consolidate information from 20 separate national level sources and provide timely intelligence and maritime related information to operators, analysts and operational commanders as well as interagency and port partners. MAGNET provides intelligence information to decision makers to make informed tactical and operational decisions to protect America’s maritime domain. The Global Maritime Intelligence and Integration (GMII) initiative provides the Coast Guard’s Intelligence Coordination Center the personnel to meet the analytical, collection, IT and management requirements associated with receiving increased intelligence information.

Justification

MAGNET is vital because it has proven to be the most successful collaborative method for federal agencies to share data; integrated into one seamless user platform. The MAGNET and GMII initiatives arise out of the National Strategy for Maritime Security, National Security Presidential Directive 41, and

Homeland Security Presidential Directive 13. These directives instruct the following regarding Global Maritime Intelligence Integration: “...to use existing intelligence capabilities to integrate all available intelligence on a global basis regarding the location, identity, and operational capabilities and intentions of potential threats to U. S. interests in the Maritime Domain.”

The Coast Guard Intelligence Coordination Center (ICC) is co-located with the Office of Naval Intelligence (ONI) and comprises the National Maritime Intelligence Center (NMIC). ICC and ONI comprise the “core element” of the Global Maritime Intelligence Integration Community of Interest. Global Maritime Intelligence Integration (GMII) is the President’s directive to integrate all available intelligence “...of potential threat to U.S. interests in the Maritime Domain”. Although ICC is a “core element” of GMII plan, ICC lacks the capacity required to implement the plan. This funding will enable the ICC to integrate information and intelligence in the maritime domain obtained from DOD, DOJ, DHS, DOE, NGA, US domestic law enforcement agencies, foreign Allies and Coalition partners.

Failure to fund this request will require the Coast Guard to delay the initial phase to integrate the capabilities of the maritime intelligence community of interest. This delay will allow known intelligence gaps, signified by NSPD 41/HSPD 13, to continue, resulting in greater risk in the maritime environment.

### **Impact of Performance**

The maritime intelligence community of interest includes DOD, DOJ, DHS, DOE, NGA, U. S. domestic law enforcement agencies, and foreign Allies and Coalition partners. GMII & MAGNET integrate the information and intelligence obtained from the community and improves the access to intelligence by deploying a proven robust intelligence sharing architecture. This connectivity increase will have a corresponding positive impact on DHS priorities to:

- Continue to protect our nation from dangerous people;
- Continue to protect our nation from dangerous goods;
- Protect critical infrastructure;
- Strengthen and unify DHS operations and management.

**D. Counter-Intelligence (CI) Service Initiative .....\$2,000**

Description of Item

The \$2.000 million requested for this initiative provides personnel for the Coast Guard’s Counter-intelligence Service (CGCIS) to bring it to a minimum staffing level necessary to carry out counter-intelligence activities. A functional counter-intelligence service will preserve the operational integrity of the Coast Guard by shielding its operations, personnel, systems, facilities, and information from the intelligence activities of foreign powers, terrorist groups and criminal organizations. CGCIS will perform this role through counter-intelligence investigations, operations, collection, analysis and production. CGCIS will also provide support to anti-terrorism/force protection; research and technology protection; and infrastructure protection/information operations.

Justification

Each of the major challenges confronting the Coast Guard's role in our nation’s security – defeating global terrorism, countering weapons of mass destruction, ensuring the security of the homeland, transforming Coast Guard defense capabilities, fostering cooperation with foreign navies and coast guards, and promoting global economic growth - has an embedded counter-intelligence imperative. Specifically, terrorists, foreign adversaries and economic competitors engage in a wide range of

intelligence activities in order to advance their interests and/or defeat U. S. objectives. Counter-intelligence is a prime contributor to overall maritime domain awareness and countering the threats described in the *National Strategy for Maritime Security*. The pre-operational planning/surveillance activities leading to a terrorist attack (e.g. small boat Vessel-Borne Improvised Explosive Device or transfer of a Weapon of Mass Destruction) can be countered by the same skill set used by counter-intelligence specialists to identify foreign collection activities by the host of adversaries we face.

The new personnel proposed in this initiative are immediate impact positions instituting counter-intelligence in locations and operations that have not been served or are currently underserved. Failure to fund this request increases Coast Guard and DHS vulnerability to hostile intelligence and terrorist threats.

**Impact of Performance**

This request supports DHS and Coast Guard goals by protecting and preserving the Coast Guard’s operational integrity and in turn maximizing risk-reduction return on investment. Through reducing the threat and impact from hostile intelligence and terrorist threats, this initiative directly supports the DHS goals and objectives to:

- Continue to protect our nation from dangerous people;
- Continue to protect our nation from dangerous goods;
- Protect critical infrastructure;
- Strengthen and unify DHS operations and management.

**E. Cryptologic Service Group and Direct Support.....\$3,337**

### Description of Item

This request for \$3.337 million establishes three, seven-person Coast Guard Cryptologic Service Groups and five, five-person Direct Support Teams for deployment on legacy cutters. It also provides organic Signals Intelligence (SIGINT) to support Coast Guard operational forces. Cryptologic capabilities greatly contribute to the number of successful security and intelligence related missions at-sea, including security and law enforcement interceptions, Homeland Security vessel boardings, and drug and migrant interdictions. Currently, DOD provides personnel to support the Coast Guard's SIGINT needs; however, those positions are scheduled to terminate in FY 2009.

### Justification

This proposal directly supports the President's National Maritime Security Strategy (NSPD 41/HSPD 13), in particular the supporting plan for Global Maritime Intelligence Integration (GMII) which calls for integrating all available intelligence regarding potential threats to U. S. interests in the maritime domain. The Coast Guard Cryptologic Services Groups and Direct Support Teams are a Tactical Cryptologic Element (TCE) that is a critical capability for Maritime Domain Awareness (MDA) as it will support vessel tracking, provide input to the common operational picture, aid in port and coastal surveillance and promote interagency information sharing. Additionally, TCE is a cornerstone of the GMII effort; as it will support fusion efforts and significantly increase the Department's and Coast Guard's organic collection capabilities.

If this request is not funded, the Coast Guard will lose critical cryptologic capability and access to the National Cryptology System at a time when the role of Signals Intelligence (SIGINT) is becoming increasingly important to the success of securing the nation's maritime borders. The net result may be significantly fewer successful security and law enforcement interceptions, Homeland Security boardings, and drug and migrant interdictions.

### Impact of Performance

SIGINT capability reduces our nation's maritime vulnerabilities by enhancing the Department's and Coast Guard's capabilities to detect threats before reaching our ports and shores. Maintaining our SIGINT capability is critical to our maritime security since it enhances situational awareness for operational commanders, effectively pushing the nation's maritime borders out and in turn reducing our vulnerabilities. Investment in the TCE will directly support information sharing among DHS agencies and port partners by enhancing DHS goals and objectives to:

- Continue to protect our nation from dangerous people;
- Continue to protect our nation from dangerous goods;
- Protect critical infrastructure;
- Strengthen and unify DHS operations and management.

**F. Department of Homeland Security Regulatory Program.....\$2,600**

Strategic Goal(s) & Objectives: 5.0

Description of Item

This request includes resource enhancements for both the Coast Guard Office of Standards Evaluation and Development (CG-5231) and the Office of Regulations and Administrative Law (CG-0943). The requested funding will provide for contracted technical writers and regulatory and environmental analyses required to complete rulemakings in an efficient manner.

Justification

This initiative supports the resource enhancements necessary to meet the growing demands for rulemaking development. Rulemaking development is achieved through the use of multi-disciplinary teams consisting of regulatory development managers, project counsels, economists, NEPA specialists and technical writers. This request will complement existing resources to allow balanced skill-sets within teams, specifically providing for on-site, contract technical writers. Funds will also be used for contracted study support for regulatory and environmental analyses.

Impact of Performance

The Coast Guard lacks the necessary resources to address the rulemaking requirements of current and new legislative requirements. There are currently between 95 and 100 rulemaking projects outstanding at any given time with a net increase of six new projects per year. Without these resources, the regulatory backlog will continue to grow; thereby failing public, Congressional and industry expectations for a responsible regulatory regime.

## V. Exhibits and Other Supporting Materials

### A. Justification of Proposed Legislative Language

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Justification of Proposed Changes in Operating Expenses**  
**Appropriation Language**

For necessary expenses for the operation and maintenance of the U.S. Coast Guard, not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; minor shore construction projects not exceeding \$1,000,000 in total cost at any location; payments pursuant to section 156 of Public Law 97-377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; [5,891,347] **\$6,213,402,000** of which \$340,000,000 shall be for defense-related activities; of which [24,255,000] **\$24,500,000** shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990; (33 U.S.C. 2712(a)(5)); and of which not to exceed \$20,000 shall be for official reception and representation expenses: *Provided*, That none of the funds made available by this Act shall be for expenses incurred for recreational vessels under section 12114 of title 46, United States Code, except to the extent fees are collected from yacht owners and credited to this appropriation: (*Department of Homeland Security Appropriations Act, 2008.*)

#### **Explanation of Changes:**

No substantive changes proposed.

\*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

\*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

\*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

NOTE 1: The Coast Guard is aware that there are inaccuracies in the PPA Budget Justification displays which are being addressed by the Financial Management Transformation Team (FMTTF).

## PPA Mission Statement

This PPA requests funding for expenses related to compensation for active duty military personnel. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses associated with compensating military personnel. Requester funding will compensate our 40,929 Full-Time Military personnel as they serve as the Nation's First Responder across all of the Coast Guard's 11 missions.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 2,250,357   | \$ 2,430,164    | \$ 2,543,996    | \$ 113,832             |

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by active duty military personnel. The FY 2009 request includes funding for the proposed pay raise (currently predicted at 3.4%), medical benefits, other mandatory personnel entitlements and program increases. Personnel increases are accounted for through the annualization of FTE introduced in FY 2008, as well as personnel for acquisition management and oversight, marine inspections, counter-intelligence, Rescue 21 and situation unit watchstanding, operation of the CASA HC-144A aircraft, four Coastal Patrol Boats and the first two National Security Cutters.

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 106,083     | \$ 109,102      | \$ 110,503      | \$ 1,401               |

Requested funds cover the travel costs of Coast Guard military service members, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2009 request reflects increases from inflation and an increase in the number of personnel required to support marine inspections, situation unit watchstanding, the first two National Security Cutters, Rescue 21 and the CASA HC-144A aircraft.

#### Transportation of things

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 5,030       | \$ 26,114       | \$ 44,302       | \$ 18,188              |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2009 request includes personnel for acquisition management and oversight, marines inspections, counter-intelligence, Rescue 21 and situation unit watchstanding, operation of the CASA HC-144A aircraft, four Coastal Patrol Boats and the first two National Security Cutters.

**Other rent**

| \$ | 14,969         | \$ | 1,591           | \$ | 1,591           | \$ | -                      |  |

The FY 2009 request has no change.

**Purchases of goods & svcs. from gov't accounts**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |  |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|--|
| \$ | 30,008         | \$ | -               | \$ | -               | \$ | -                      |  |

The FY 2009 request has no change.

**Operation & maintenance of facilities**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |  |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|--|
| \$ | -              | \$ | 11              | \$ | 11              | \$ | -                      |  |

The FY 2009 request has no change.

**Medical care**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |  |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|--|
| \$ | 216,584        | \$ | 295,520         | \$ | 299,183         | \$ | 3,663                  |  |

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. Specifically, funding supports medical care costs for military service members. The FY 2009 request includes an adjustment for medical cost increases due to inflation and the increase in FTE.

**Operation and maintenance of equipment**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |

NOTE 1: The Coast Guard is aware that there are inaccuracies in the PPA Budget Justification displays which are being addressed by the Financial Management Transformation Team (FMTTF).

## PPA Mission Statement

This PPA requests funding for expenses related to compensation and entitlements for federal civilian employees. The workforce is composed of General Schedule (GS) personnel, Administrative Law Judges (AL), Senior Executive Service (SES) personnel, personnel whose salaries are Administratively Determined (AD) (e. g. Coast Guard Academy civilian faculty members), Wage Grade (WG) positions employed in industrial positions, and "Non-Ceiling" (NC) employees (e. g. cooperative education students, student aids, summer interns and federal junior fellows) and civilian employees not otherwise covered by other PPAs.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 556,663     | \$ 601,153      | \$ 689,280      | \$ 88,127              |

Salaries and benefits funds provide for compensation directly related to duties performed for the Coast Guard by Federal civilian employees. The FY 2009 request includes funding for the proposed pay raise (currently predicted at 2.9%), medical benefits, other mandatory personnel entitlements. This is the result of additional personnel for acquisitions management and oversight, marine inspections, counter-intelligence, Rescue 21 and situation unit watchstanders

#### Travel

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 197         | \$ 308          | \$ 339          | \$ 31                  |

Requested funds cover the travel costs of Coast Guard civilian employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2009 request reflects an increase from inflation, as well as an increase in the number of personnel for acquisition management and oversight, marine inspections, counter-intelligence, Rescue 21 and situation unit watchstanders.

#### Transportation of things

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 1,760       | \$ 2,960        | \$ 3,239        | \$ 279                 |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of civilian personnel's household goods in conjunction with the acceptance of a new position. The FY 2009 increase is the result of additional personnel for acquisition management and oversight, marine inspections, counter-intelligence, Rescue 21 and situation unit watchstanders.

NOTE 1: The Coast Guard is aware that there are inaccuracies in the PPA Budget Justification displays which are being addressed by the Financial Management Transformation Team (FMTTF).

## PPA Mission Statement

Requests funding for the Coast Guard's professional training and education programs, and operation and maintenance of the six Coast Guard Training Centers and the Coast Guard Academy. Provides funding for tuition, travel and per diem for formal training and education performed as Temporary Assigned Duty (TAD) for military and civilian personnel. "Formal training and education" is defined as structured, curriculum-based instruction and applied exercises for the attainment and retention of skills and knowledge required to accomplish specific job tasks. Requested funding will ensure a level of capabilities and competencies commensurate with the response posture the Coast Guard has displayed in recent years, such as operational response to Hurricane Katrina, Operation Iraqi Freedom, 9/11 terrorist attacks and other events requiring a rapid response capability.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 83          | \$ 127          | \$ 127          | \$ -                   |

The FY 2009 request has no change.

#### Travel

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 38,117      | \$ 34,621       | \$ 35,899       | \$ 1,278               |

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Increases in travel in FY 2009 are derived from additional training requirements resulting from additional personnel for HC-144A operations, situational unit watchstanders, marine inspectors and Rescue 21 watchstanding augmentation.

#### Transportation of things

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 785         | \$ 970          | \$ 970          | \$ -                   |

The FY 2009 request has no change.

#### Other rent

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 5,169       | \$ 5,496        | \$ 5,496        | \$ -                   |

The FY 2009 request has no change.

**Communication, utilities, and misc charges**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 8,904  | \$ | 10,401  | \$ | 10,401  | \$ | -            |

The FY 2009 request has no change.

**Printing and reproduction**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 327    | \$ | 448     | \$ | 448     | \$ | -            |

The FY 2009 request has no change.

**Advisory and assistance services**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 25     | \$ | 1,551   | \$ | 3,162   | \$ | 1,611        |

Advisory and assistance services include services acquired by contract from non-federal sources (e.g. private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2009 increase is primarily the result of additional personnel for situation unit watchstanding, rule-making development, Rescue 21, marine inspections and nationwide automated identification system follow-on.

**Other services**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 58,065 | \$ | 85,912  | \$ | 85,899  | \$ | (13)         |

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2009 decrease is the result of the LORAN transfer, termination of one time costs and technical adjustments.

**Purchases of goods & svcs. from gov't accounts**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 8,711          | \$ | 2,461           | \$ | 9,304           | \$ | 6,843                  |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2009 increase is due to a rise in flight training costs stemming from U.S. Navy upgrades of the training aircraft fleet, Rescue 21 watchstanding augmentation and additional command center watchstanders.

**Operation & maintenance of facilities**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 3,398          | \$ | 14,594          | \$ | 4,782           | \$ | (9,812)                |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY09 decrease is the result management efficiencies to pay for FY08 annualizations costs and a portions of the FY09 pay raise.

**Research and development**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 484            | \$ | -               | \$ | -               | \$ | -                      |

The FY 2009 request has no change.

**Medical care**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 35,498         | \$ | 19              | \$ | 19              | \$ | -                      |

The FY 2009 request has no change.

**Operation and maintenance of equipment**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 130            | \$ | 2,188           | \$ | 2,919           | \$ | 731                    |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats, and aircraft) and supporting systems. The FY 2009 request reflects funding increases to support the follow on costs for the counter-terrorism (CT) shoot-house training infrastructure and Gulf Coast primary crew assembly facility (PCAF) Phase II crew.

**Subsistence and support of persons**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 1,711       | \$ 925          | \$ 924          | \$ (1)                 |

The FY 2009 request a minor decrease for subsistence and support of persons.

**Supplies and materials**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 21,320      | \$ 23,911       | \$ 24,329       | \$ 418                 |

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The 2009 request reflects funding increases to support new marine inspections, Rescue 21 and the CASA HC-144A aircraft.

**Equipment**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 1,397       | \$ 4,860        | \$ 11,347       | \$ 6,487               |

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2009 request includes training requirements related to the commissioning of the CASA HC-144A aircraft, surface Deepwater assets and technical adjustments.

**Land and structures**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 4           | \$ 37           | \$ 37           | \$ -                   |

The FY 2009 request has no change.

## H. PPA Budget Justifications

NOTE 1: The Coast Guard is aware that there are inaccuracies in the PPA Budget Justification displays which are being addressed by the Financial Management Transformation Team (FMTTF).

## PPA Mission Statement

Requests funding to units, facilities and activities that are under the direct operational and administrative control of the Coast Guard's Atlantic Area and Pacific Area Commanders. These include Maintenance and Logistics Commands (MLCs), Integrated Support Commands (ISCs), High Endurance Cutters (WHECs), Medium Endurance Cutters (WMECs), Polar Icebreakers, Communications Stations, Sector Commands, Stations, Marine Safety and Security Teams (MSSTs) and Area offices as applicable. Request includes funding to sustain normal operating costs that include energy, parts and supplies for routine maintenance of operational assets and shore facilities and administrative supplies.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 11,235      | \$ | 5,655           | \$ | 5,655           | \$ | -                      |

The FY 2009 request has no change.

#### Travel

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 159,660     | \$ | 95,492          | \$ | 95,267          | \$ | (225)                  |

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Decrease in travel is the result of the termination of one-time costs and the transfer of Loran to DHS.

#### Transportation of things

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 28,662      | \$ | 16,552          | \$ | 16,614          | \$ | 62                     |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Funding primarily supports the shipment of military member's household goods in conjunction with Permanent Change of Station (PCS) moves. The FY 2009 request reflects an increase in funding due to the decommissioning of the Coast Guard Cutter ACUSHNET, two PC-179s and Nationwide Automatic Identification System (NAIS).

#### GSA rent

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 37          | \$ | 4,040           | \$ | 4,129           | \$ | 89                     |

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2009 request increase is the result of the annualization of FY08 part-year funding and leased facilities to support additional the FRC-B crew.

**Other rent**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 13,560 | \$ | 4,299   | \$ | 4,711   | \$ | 412          |

Other rent includes all payments to a non-federal source for rental space, land and structures. Funding supports lease renewals for facilities (e.g. office space, waterfront/mooring facilities, equipment storage and maintenance facilities, etc.). The increase funding request in FY 2009 is a result of the leased space and structural requirements for the Nationwide Automatic Identification System (NAIS).

**Communication, utilities, and misc charges**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 97,896 | \$ | 210,524 | \$ | 206,869 | \$ | (3,655)      |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. The decrease is primarily the result of the HC-130H decommissioning, the transfer of Loran to DHS and technical adjustments.

**Printing and reproduction**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 5,443  | \$ | 4,049   | \$ | 4,049   | \$ | -            |

The FY 2009 request has no change.

**Advisory and assistance services**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 58,192 | \$ | 68,494  | \$ | 67,334  | \$ | (1,160)      |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The decrease is the result of the transfer of Loran to DHS.

**Other services**

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 271,398     | \$ | 207,097         | \$ | 210,087         | \$ | 2,990                  |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2009 request reflects an increase due to rulemaking development, GMII and MAGNet, the costs associated with the annualization of surface and air asset follow-on, the addition of situation unit watchstanders and marine inspectors.

**Purchases of goods & svcs. from gov't accounts**

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 60,707      | \$ | 25,517          | \$ | 27,925          | \$ | 2,408                  |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements. The FY 2009 request increase is a result of intra-government service costs, military permanent change of station cost increases, and the implementation of the Defense Messaging System (DMS) to all 30,000 military messaging users and tactical DMS to 30 cutters.

**Operation & maintenance of facilities**

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ 45,806      | \$ | 57,195          | \$ | 37,355          | \$ | (19,840)               |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2009 decrease is the result of management efficiencies to pay for FY08 annualization costs and a portion of the FY09 pay raise.

**Research and development**

|  | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|--|----------------|----|-----------------|----|-----------------|----|------------------------|
|  | \$ -           | \$ | 116             | \$ | 116             | \$ | -                      |

The FY 2009 request has no change.

**Medical care**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ -           | \$ 713          | \$ 713          | \$ -                   |

The FY 2009 request has no change.

**Operation and maintenance of equipment**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 43,561      | \$ 69,081       | \$ 91,284       | \$ 22,203              |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats, and aircraft) and supporting systems. The FY 2009 increase includes a request for follow-on costs for Rescue 21, the CASA HC-144A, C4ISR, GMII and MAGNet, as well as support to airfield operations at the Massachusetts Military Reservation as a result of BRAC.

**Subsistence and support of persons**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ -           | \$ 1,132        | \$ 1,305        | \$ 173                 |

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. Specifically, funding supports berthing and subsistence of Coast Guard personnel in support of temporary assigned duty (TAD). The FY 2009 increase is to support person in support to airfield operations at the Massachusetts Military Reservation as a result of BRAC.

**Supplies and materials**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 368,967     | \$ 327,701      | \$ 330,405      | \$ 2,704               |

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2009 increase reflects a funding request for the CASA HC-144A aircraft and four new 87-ft Coastal Patrol Boats.

**Equipment**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 34,122 | \$ | 63,908  | \$ | 61,902  | \$ | (2,006)      |

This object class covers the purchase of capitalized and non-capitalized assets. The decrease is the result of the termination of one-time costs.

**Land and structures**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 446    | \$ | 985     | \$ | 2,346   | \$ | 1,361        |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2009 increase is the result of increases to the marine inspections program and Rescue 21 follow-on.

**Insurance claims and indemnity**

|    | 2007   |    | 2008    |    | 2009    |    | 2008 to 2009 |
|----|--------|----|---------|----|---------|----|--------------|
|    | Actual |    | Enacted |    | Request |    | Change       |
| \$ | 1,318  | \$ | 1,877   | \$ | 1,877   | \$ | -            |

The FY 2009 request has no change.

NOTE 1: The Coast Guard is aware that there are inaccuracies in the PPA Budget Justification displays which are being addressed by the Financial Management Transformation Team (FMTTF).

## PPA Mission Statement

This request provides funding for accounts centrally managed at Coast Guard Headquarters such as: Federal Telephone System (FTS) accounts, Standard Workstation recapitalization, ammunition replenishment, recapitalization of buoys, GSA Rent, postal expenses and Mass Transit benefits. Request ensures critical support elements are provided to the workforce, allowing them to execute their roles in supporting Coast Guard operations. Lease of adequate office space, effective communications (computers, phones, etc) and operational gear (ammunition) are all part of those critical support requirements.

### Summary Justification and Explanation of Changes

#### Travel

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 518            | \$ | 426             | \$ | 426             | \$ | -                      |

The FY 2009 request has no change.

#### Transportation of things

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 373            | \$ | 797             | \$ | 797             | \$ | -                      |

The FY 2009 request has no change.

#### GSA rent

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 60,608         | \$ | 70,247          | \$ | 93,523          | \$ | 23,276                 |

GSA Rent includes all payments to the General Services Administration (GSA) for rental of space and rent related services. The majority of FY 2009 increases are a result of changes in GSA rental costs and additional space requirements. Coast Guard Headquarters (Transpoint building) rent increased 50% in FY 2008. Additional space requirements for the National Strike Force Coordination Center and Coast Guard Headquarters (Jemal) building also contributed to this increase.

#### Communication, utilities, and misc charges

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 59,137         | \$ | 52,979          | \$ | 57,693          | \$ | 4,714                  |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters, and aircraft, utility costs including shore facility utilities and cutter, boat and aircraft fuel requirements, and postal costs. Increases in FY 2009 are due to non-pay inflation and the new operation of commercial satellite (COMSAT) communications equipment for CASA HC-144A aircraft #1 through #7, providing full COMSAT operational capability and global coverage of high speed data and voice connectivity.

**Printing and reproduction**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | -              | \$ | 30              | \$ | 30              | \$ | -                      |

The FY 2009 request has no change.

**Advisory and assistance services**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 923            | \$ | 5,821           | \$ | 2,221           | \$ | (3,600)                |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. The FY 2009 request is reduced due to the termination of one-time FY 2008 costs.

**Other services**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 63,395         | \$ | 43,158          | \$ | 43,354          | \$ | 196                    |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2009 increase includes the transition cost of developing coordinated architecture for Situation Unit watchstander command & control systems, including migration to the Net Enabled Command Capability (NECC) DOD initiative which will be incorporated into DHS.

**Purchases of goods & svcs. from gov't accounts**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 221            | \$ | 2,273           | \$ | 2,723           | \$ | 450                    |

Purchases from Government Accounts include costs for purchases from other Federal government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g. MIPR). The FY 2009 request provides funding for the Coast Guard to reimburse the National Telecommunications and Information Administration (NTIA), Office of Spectrum Management, for increased operating expenses for the management of approximately 17,000 radio frequency assignments.

**Operation & maintenance of facilities**

|  | 2007<br>Actual |     | 2008<br>Enacted |   | 2009<br>Request |   | 2008 to 2009<br>Change |
|--|----------------|-----|-----------------|---|-----------------|---|------------------------|
|  | \$             | 128 | \$              | 8 | \$              | 8 | \$ -                   |

The FY 2009 request has no change.

**Operation and maintenance of equipment**

|  | 2007<br>Actual |       | 2008<br>Enacted |       | 2009<br>Request |       | 2008 to 2009<br>Change |
|--|----------------|-------|-----------------|-------|-----------------|-------|------------------------|
|  | \$             | 3,616 | \$              | 3,036 | \$              | 5,036 | \$ 2,000               |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats, and aircraft) and supporting systems. The FY 2009 request includes the annualization of FY 2008 funding and equipment costs associated with additional marine inspectors.

**Subsistence and support of persons**

|  | 2007<br>Actual |   | 2008<br>Enacted |       | 2009<br>Request |       | 2008 to 2009<br>Change |
|--|----------------|---|-----------------|-------|-----------------|-------|------------------------|
|  | \$             | - | \$              | 1,216 | \$              | 1,216 | \$ -                   |

The FY 2009 request has no change.

**Supplies and materials**

|  | 2007<br>Actual |       | 2008<br>Enacted |        | 2009<br>Request |        | 2008 to 2009<br>Change |
|--|----------------|-------|-----------------|--------|-----------------|--------|------------------------|
|  | \$             | 7,922 | \$              | 25,499 | \$              | 27,086 | \$ 1,587               |

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats, aircraft, and supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2009 includes annualization of FY 2008 funding for prior year initiatives and supplies and materials for Situation Unit watchstanders at Sector Command Centers.

**Equipment**

|  | 2007<br>Actual |        | 2008<br>Enacted |        | 2009<br>Request |        | 2008 to 2009<br>Change |
|--|----------------|--------|-----------------|--------|-----------------|--------|------------------------|
|  | \$             | 18,960 | \$              | 26,752 | \$              | 28,197 | \$ 1,445               |

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for cadets at the Coast Guard Academy and survival suits for rescue swimmers deployed to the frigid waters of Alaska. The FY 2009 increase includes the procurement of work stations, servers and associated hardware and systems licenses for Sector Situation Unit Watchstanders, as well as funding for enterprise class database management products.

**Land and structures**

|  | 2007<br>Actual |   | 2008<br>Enacted |   | 2009<br>Request |   | 2008 to 2009<br>Change |   |
|--|----------------|---|-----------------|---|-----------------|---|------------------------|---|
|  | \$             | 3 | \$              | 2 | \$              | 2 | \$                     | - |

The FY 2009 request has no change.

**Insurance claims and indemnity**

|  | 2007<br>Actual |   | 2008<br>Enacted |     | 2009<br>Request |     | 2008 to 2009<br>Change |   |

NOTE 1: The Coast Guard is aware that there are inaccuracies in the PPA Budget Justification displays which are being addressed by the Financial Management Transformation Team (FMTTF).

## PPA Mission Statement

Request provides service-wide funding to support the major maintenance and repair of Coast Guard aircraft not appropriated in the Coast Guard Acquisition, Construction & Improvements (AC&I) appropriation. This includes materials, services and supplies necessary for depot-level repair of buildings, structures, ground, towers, runways, aids to navigation, aircraft and aircraft equipment.

### Summary Justification and Explanation of Changes

#### Salaries and Benefits

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 215         | \$ -            | \$ -            | \$ -                   |

The FY 2009 request has no change.

#### Travel

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 16,029      | \$ 7,358        | \$ 7,402        | \$ 44                  |

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. The FY 2009 increase is a result of travel associated with the Defense Messaging System (DMS) initiative. This initiative will bring web-based DMS to all 30,000 Coast Guard military messaging users and tactical DMS to over 30 cutters.

#### Transportation of things

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 3,347       | \$ 3,056        | \$ 3,056        | \$ -                   |

The FY 2009 request has no change.

#### Other rent

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 269         | \$ 1,207        | \$ 4,573        | \$ 3,366               |

The FY 2009 increase includes rental costs associated with AIS follow-on and the decommissioning of four HC-130H aircraft.

#### Communication, utilities, and misc charges

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 4,370       | \$ 10,033       | \$ 17,233       | \$ 7,200               |

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. Specifically, funding includes data connectivity costs for Coast Guard shore facilities, cutters and aircraft, utility costs, postal costs and cutter, boat and aircraft fuel requirements. The FY 2009 increase includes a technical adjustment and the annualization of FY 2008 costs.

**Printing and reproduction**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 69             | \$ | 108             | \$ | 108             | \$ | -                      |

The FY 2009 request has no change.

**Advisory and assistance services**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 53,158         | \$ | 31,170          | \$ | 31,209          | \$ | 39                     |

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Specifically, funding supports contracted training and services to repair/maintain Coast Guard operational assets and facilities. FY 2009 increase is a result of the annualization of FY 2008 costs.

**Other services**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 71,443         | \$ | 45,998          | \$ | 43,893          | \$ | (2,105)                |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Specifically, funding supports contracted consultant services such as training manuals, architectural and engineering services, independent/third-party analysis of Coast Guard programs in support of the President's Management Agenda and Program Assessment Rating Tool and other initiatives focused on improving performance of Coast Guard missions. The FY 2009 reduction is a result of the LORAN-C transfer to DHS.

**Purchases of goods & svcs. from gov't accounts**

|    | 2007<br>Actual |    | 2008<br>Enacted |    | 2009<br>Request |    | 2008 to 2009<br>Change |
|----|----------------|----|-----------------|----|-----------------|----|------------------------|
| \$ | 3,692          | \$ | 736             | \$ | -               | \$ | (736)                  |

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies including interagency service requirements (e.g. MIPR). The reduction in FY 2009 is from the termination of one time FY 2008 costs.

### Operation & maintenance of facilities

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 115,168     | \$ 208,937      | \$ 218,981      | \$ 10,044              |

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Specifically, funds support contracted janitorial, landscaping, security, and environmental services (e.g. hazardous materials disposal) associated with the operation of Coast Guard facilities. The FY 2009 increase is due to funding for inflation exceeding non-pay COLA, calculated using industry standards, non-pay inflation and the annualization of part-year funding from FY 2008.

### Research and development

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ -           | \$ 2,550        | \$ 2,550        | \$ -                   |

The FY 2009 request has no change.

### Operation and maintenance of equipment

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 315,548     | \$ 331,297      | \$ 363,158      | \$ 31,861              |

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. Specifically, funding supports contracted specialized maintenance and minor repair of Coast Guard operational assets (e.g. cutters, boats and aircraft) and supporting systems. The FY 2009 increase includes inflation exceeding non-pay COLA for cutter and aircraft maintenance, non-pay inflation and the annualization of part-year funding from FY 2008.

### Subsistence and support of persons

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 99          | \$ 4            | \$ 4            | \$ -                   |

The FY 2009 request has no change.

### Supplies and materials

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 to 2009<br>Change |
|----------------|-----------------|-----------------|------------------------|
| \$ 75,904      | \$ 27,179       | \$ 22,348       | \$ (4,831)             |

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Specifically, funding supports procurement of consumable supplies aboard Coast Guard operational and shore support units including tools, spare part inventories for cutters, boats and aircraft, supporting computer and communication systems, fuel required to conduct Coast Guard operations, janitorial materials, subsistence and administrative supplies. The FY 2009 reduction is primarily a result of supply savings gained through the decommissioning of four HC-130J aircraft.

**Equipment**

|  | <b>2007</b>   |    | <b>2008</b>    |    | <b>2009</b>    |    | <b>2008 to 2009</b> |
|--|---------------|----|----------------|----|----------------|----|---------------------|
|  | <b>Actual</b> |    | <b>Enacted</b> |    | <b>Request</b> |    | <b>Change</b>       |
|  | \$ 55,214     | \$ | 91,085         | \$ | 97,943         | \$ | 6,858               |

This object class covers the purchase of capitalized and non-capitalized assets. For example, this object class enables the Coast Guard to purchase furniture for the cadets at the Coast Guard Academy and survival suits for the rescue swimmers deployed to the frigid waters of Alaska. The FY 2009 request includes the procurement of equipment for four new CASA HC-144A aircraft. Also included are annualizations of part-year FY 2008 funding.

**Land and structures**

|  | <b>2007</b>   |    | <b>2008</b>    |    | <b>2009</b>    |    | <b>2008 to 2009</b> |
|--|---------------|----|----------------|----|----------------|----|---------------------|
|  | <b>Actual</b> |    | <b>Enacted</b> |    | <b>Request</b> |    | <b>Change</b>       |
|  | \$ 27,625     | \$ | 1,698          | \$ | 2,448          | \$ | 750                 |

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. Specifically, the FY 2009 request includes additional funding for the Coast Guard's assumption of responsibility for airfield operations at Air Station Cape Cod (Otis Air National Guard Base) as a result of the departure of the Massachusetts Air National Guard 102nd Fighter Wing.

**U. S. Coast Guard**  
**Environmental Compliance and Restoration**

**I. Appropriation Overview**

**A. Mission Statement for Environmental Compliance and Restoration:**

The Coast Guard requests \$12.315 million and 24 FTE in FY 2009, a decrease of \$685,000 over the FY 2008 enacted level. Environmental Compliance and Restoration (EC&R) provides for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination and environmental damage. The EC&R funding request supports all 11 statutorily mandated Coast Guard mission-programs. These mission-programs, in turn, directly support the Coast Guard's role as the principal Federal agency charged with ensuring maritime safety, security and stewardship.

EC&R funding ensures the Coast Guard maintains its leadership role in environmental stewardship with its partners. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties or shutdown of operational assets by environmental regulators. Moreover, Coast Guard EC&R funding supports site investigation and remediation activities at older shore facilities slated for property divestiture or transfer. This predominantly involves divestiture of lighthouses under authority of the National Historic Lighthouse Preservation Act.

**B. Budget Activities:**

Environmental Compliance and Restoration activities support conventional missions including Marine Environmental Protection (MEP).

**C. Budget Request Summary:**

The Coast Guard requests 25 positions, 24 FTE, and \$12.315 million (\$9.105 million in project funding, \$3.210 million in personnel funding) in FY 2009 to provide for environmental remediation and restoration of Coast Guard facilities, including Kodiak, AK; Elizabeth City, NC; and Baltimore, MD. The total adjustment to the base is \$685,000.

| <b>2009 Request</b>          | <b>25</b>           | <b>24</b>  | <b>12,315</b> |
| Total Change 2008-2009       | ...                 | ...        | -685          |

The Coast Guard requests \$12.315 million for this activity. This is a decrease of \$685,000 over FY 2008 enacted.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

FY 2007 accomplishments include:

- Meet all legally mandated cleanup/remediation efforts in Kodiak, Alaska; Elizabeth City, North Carolina; and Baltimore, Maryland.
- Fund 93 projects ranging from site remediation on firing ranges to addressing lead, oil and other contaminants at lighthouses, stations and bases.

FY 2008 planned accomplishments include:

- Environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, as well as engineering fixes on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination or preclude environmental damage from developing.
- Commence 78 projects that includes site investigation and remediation activities at older shore facilities slated for property divestiture or transfer actions; primarily divestiture of lighthouses in support of the National Historic Lighthouse Preservation Act.

FY 2009 planned accomplishments include:

- Fund Environmental Compliance and Restoration costs incurred as a result of decommissioning (1) 213' WMEC (ACUSHNET) and (1) 65' WLI (BLACKBERRY). Costs are calculated for disposal through transfer to MARAD reefing (i.e., sinking at sea), or ship-breaking (i.e., scrapping) which require the vessels to be thoroughly cleaned of all materials that could be released into the natural environment.

#### **IV. Program Justification of Changes**

**Not Applicable**

## **V. Exhibits and Other Supporting Materials**

### **A. Justification of Proposed Legislative Language**

**Department of Homeland Security  
U. S. Coast Guard  
Justification of Proposed Changes in Environmental Compliance and Restoration  
Appropriation Language**

For necessary expenses to carry out the Coast Guard's environmental compliance and restoration functions under Chapter 19 of Title 14, United States Code, [\$13,000,000] **\$12,315,000**, to remain available until expended. (*Department of Homeland Security Appropriations Act, 2008*).

#### **Explanation of Changes:**

No substantive changes proposed.

\*The Coast Guard manages the military workforce by end strength, not FTE. The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular paygrade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

### PPA Mission Statement

Environmental Compliance and Restoration (EC&R) will provide for (1) environmental cleanup and restoration of current and formerly contaminated Coast Guard facilities, and (2) engineering fixes on Coast Guard assets for the purpose of complying with environmental laws to prevent contamination or preclude environmental damage from developing. Failure to meet restoration or compliance responsibilities could subject the Coast Guard to fines, penalties, or shutdown of operational assets by environmental regulators. In addition, Coast Guard EC&R funding supports site investigation and remediation activities at older shore facilities slated for property divestiture or transfer actions; this primarily includes divestiture of lighthouses in support of the National Historic Lighthouse Preservation Act.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 2,563       | \$ 2,718        | \$ 2,955        | \$ 237                |

Salaries and Benefits include costs for 24 FTE. The FY 2009 request includes an increase to account for inflation and planned internal personnel reprogramming issues.

### Travel

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 83          | \$ 99           | \$ 90           | \$ (9)                |

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Change is due to increase in environmental remediation expenses.

### Other services

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 8,286       | \$ 9,911        | \$ 9,022        | \$ (889)              |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Change is due to increase in environmental remediation expenses. This includes the FY06 Hurricane Supplemental.

### Purchases of goods & svcs. from gov't accounts

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 94          | \$ 112          | \$ 102          | \$ (10)               |

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from other government agencies. Change is due to increase in environmental remediation expenses.

**U. S. Coast Guard**  
**Reserve Training**

**I. Appropriation Overview**

**A. Mission Statement for Reserve Training:**

The Coast Guard requests \$130.501 million and 536 FTE in FY 2009, an increase of \$3.618 million over the FY 2008 enacted \$126.883 million. As the principal federal agency charged with maritime safety, security and stewardship, the Coast Guard protects vital economic and security interests of the United States from internal and external threats. Reserve Training is critical to allowing the Coast Guard to reach these goals through engagement in all 11 Coast Guard mission-programs. For example, Reserve Training provides trained units and qualified personnel for service in times of war or national emergency. In addition, the Coast Guard Reserve may be called upon to provide units and personnel to augment active Coast Guard forces during times of crisis.

**B. Budget Activities:**

Reserve forces contribute to all Coast Guard missions, including Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

**C. Budget Request Summary:**

The Coast Guard requests 536 positions, 536 FTE, and \$130.501 million in FY 2009. This request provides necessary resources for the training, operation and administration of the Coast Guard Reserve Program while ensuring Reserve Component response readiness. The total adjustment to base is \$3.618 million.

| Total Change 2008-2009       | ...                 | ...        | 3,439          |

The Coast Guard requests \$101.240 million for this activity. This is an increase of \$3.439 million over FY 2008 enacted.

#### **CURRENT SERVICES PROGRAM DESCRIPTION:**

This request for Pay, Benefits and Allowances funds costs associated with salaries, benefits and other compensation for both full-time staffs supporting members of the Coast Guard's Selected Reserve, as well as for reservists who participate in training activities. The Coast Guard Reserve is the Coast Guard's surge-capacity military workforce and provides a cost-effective method of augmenting response to major contingencies, such as natural and man-made disasters, maritime homeland security, national security and other events.

The Coast Guard Reserve is a cornerstone of service readiness and pivotal to the success of daily mission execution. The Coast Guard Reserve was an invaluable contributor to the national responses to Hurricanes Katrina and Rita, and continues to support the Global War on Terror with deployed service to Operation Enduring Freedom and Operation Iraqi Freedom. Our Reservists provide an outstanding return on investment by providing a valuable augmentation of the active duty workforce through Inactive Duty Training and Active Duty Training periods.

Our request for funding supports 536 FTE representing both military and civilian members who manage all recruiting, formal training, personnel and resource/program oversight. No additional FTE are requested.

Significant accomplishments in FY 2007 include:

- Mobilized over 500 reservists who served on active duty under involuntary and voluntary Active Duty Special Work ADSW orders in support of contingency

operations. They performed functions such as seaport security, standing watches in command centers, law enforcement operations, anti-terrorism/force protection missions, inspections of commercial vessels, domestic military out load MOL security, and others.

- Activated over 260 reservists under voluntary ADSW in support of non-contingency operations within numerous mission areas throughout the Coast Guard.

FY 2008 planned accomplishments include:

- Serve an integral role during supplemental-funded contingency operations for the Global War on Terrorism, Operation Iraqi Freedom and Operation Enduring Freedom. These reservists will serve in the United States and overseas.

FY 2009 projected accomplishments include:

- Continue to serve an integral role during supplemental funded contingency operations for the Global War on Terrorism, Operation Iraqi Freedom and Operation Enduring Freedom.

**PPA II: OPERATIONS, MAINTENANCE AND ADMINISTRATION**

| Total Change 2008-2009       | ...                 | ...        | 179           |

The Coast Guard requests \$29.261 million for this activity. This is an increase of \$179,000 over FY 2008 enacted.

**CURRENT SERVICES PROGRAM DESCRIPTION:**

This request for Operations, Maintenance and Administration funds the costs of services and facilities to train reservists, administer the Reserve program and portion of organizational costs shared by the Reserve Training appropriation operation and maintenance. For example, reservists attend many of the same classroom based training sessions as members of the active component, and the Reserve Training appropriation provides funding for the reservists for overhead and course-specific. Similar Reserve Training cost sharing applies in other arenas, as well.

By providing funding for enterprise-wide services used by reservists, the Reserve Training appropriation ensures equipment and facilities necessary to attract and maintain

a high-caliber reserve force without eroding the resource base necessary to perform these same tasks for the active duty military workforce. While they are not full time employees, Coast Guard reservists are boarding officers, small boat coxswains, contingency planners and marine inspectors. The Coast Guard Reserve is an extraordinary force multiplier upon which our nation can confidently rely in times of exceptional need, embodying the very essence of the Coast Guard's motto: Semper Paratus (Always Ready).

Significant accomplishments in FY 2007 include:

- Served an integral role during supplemental funded contingency operations for the Global War on Terrorism, Operation Iraqi Freedom and Operation Enduring Freedom continue.
- Evaluated and developed the organizational structure and business practices to optimally deliver training, readiness and operational support.

FY 2008 planned accomplishments include:

- Maintain readiness and hone their mobilization skills through class room training, mobilization exercises and on-the-job training alongside their active duty counterparts during routine and emergency operations. Over 85 percent of our 8,100 member Selected Reserve Force are assigned to operational Coast Guard shore units.
- Mobilize, train and maintain skills required to support defense operations throughout the world. The remaining 15 percent of our 8,100 member Selected Reserve Force are assigned to deployable PSU, Naval Coastal Warfare Squadrons and Naval Coastal Warfare groups.
- Implement organizational structure and business practices to optimally deliver training, readiness and operational support.

FY 2009 projected accomplishments include:

- Continue to maintain readiness and hone mobilization skills through training and exercises during routine and emergency operations.
- Continue to mobilize, train and maintain skills required to support defense operations throughout the world.
- Continue to optimize the delivery of training, readiness and operational support.

\*The Coast Guard manages the military workforce by end strength, not Full Time Equivalent (FTE). The military FTE represented in these numbers are monthly end strengths averaged over the year.

\*\*The military pay and allowances averages include the costs associated with all pay and allowances paid to a particular pay grade, including: Basic Pay, Basic Allowance for Housing, Basic Allowance for Subsistence, Federal Insurance Contributions, Incentive/Special Pays, Clothing Allowances, Cost-of-Living Allowances and Selective Re-enlistment Bonus payments. The term "Officer" includes Chief Warrant Officers, Cadets and Officer Candidates.

### PPA Mission Statement

This PPA request funds expenses for compensation of active duty military service members and civilian personnel who support the Reserve Training program. This category also includes pay, allowances, employer's share of FICA, Social Security credits and other expenses. Requested funding will compensate our 536 full-time personnel.

## Summary Justification and Explanation of Changes

### Salaries and Benefits

| 2007      | 2008      | 2009       | 2008 - 2009 |
|-----------|-----------|------------|-------------|
| Actual    | Enacted   | Request    | Change      |
| \$ 94,980 | \$ 97,801 | \$ 101,240 | \$ 3,439    |

Salaries and Benefits provides compensation directly related to Coast Guard active duty military and civilian personnel duties. This includes costs for 536 FTE. The increase in the FY09 request is due to the proposed pay raise (2.9% civ and 3.4% mil).

## Summary Justification and Explanation of Changes

### Travel

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 5,080       | \$ 5,843        | \$ 5,880        | \$ 37                 |

Travel funds cover the travel costs of Coast Guard employees, while in an authorized travel status, either directly or by reimbursing the traveler. Increase in FY09 is due to increased travel related expenses.

| \$ 39          | \$ 45           | \$ 45           | -                     |

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The 2009 request has not change.

### Printing and reproduction

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 207         | \$ 238          | \$ 239          | \$ 1                  |

Printing includes all costs for printing and reproduction obtained from the private sector or other Federal entities. Funding includes charges associated with publication of Coast Guard training manuals, operational instructions, reports and other Coast Guard directives.

### Other services

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 20,005      | \$ 10,895       | \$ 10,962       | \$ 67                 |

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. Increase in FY09 is a result of of increased costs to coordinate new and enhanced Reserve Training program activities.

**Medical care**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ -           | \$ 5,500        | \$ 5,534        | \$ 34                 |

Payments to contractors for medical care include Medicare contractors, private hospitals, nursing homes, and carriers by the Employees and retired employee's health benefits and Tricare. Increase in FY09 is a result of increased costs of medical care.

**Supplies and materials**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 187         | \$ 6,540        | \$ 6,580        | \$ 40                 |

Supplies and materials are primarily defined as commodities that are ordinarily consumed or expended within one year after they are put into use. Increase in FY09 is due to an increase in the amount of consumables to conduct general Reserve administration.

**Equipment**

| 2007<br>Actual | 2008<br>Enacted | 2009<br>Request | 2008 - 2009<br>Change |
|----------------|-----------------|-----------------|-----------------------|
| \$ 18          | \$ 21           | \$ 21           | -                     |

Include capitalized (depreciated) assest and non-capitalized assests. The FY 2009 request has no change.

# U. S. Coast Guard

## Acquisition, Construction and Improvements

### I. Appropriation Overview

#### **A. Mission Statement for Acquisition, Construction and Improvements:**

The Coast Guard requests \$1.205 billion in FY 2009, an increase of \$212.484 million above the \$992.634 million enacted level in FY 2008. The Acquisition, Construction and Improvements (AC&I) appropriation finances the acquisition of new capital assets, construction of new facilities and physical improvements to existing facilities and assets. The appropriation covers Coast Guard-owned and operated vessels, shore facilities and other equipment, such as computer and other systems.

The AC&I funding request supports all statutorily-mandated Coast Guard mission-programs. These mission-programs in turn directly support the Coast Guard's role as the nation's principal Federal agency responsible for maritime **safety, security, and stewardship**.

#### **B. Budget Activities:**

This funding supports all Coast Guard missions, including Search and Rescue (SAR); Marine Safety; Aids to Navigation (AtoN); Ice Operations; Marine Environmental Protection (MEP); Living Marine Resources (LMR); Drug Interdiction; Migrant Interdiction; Other Law Enforcement; Ports, Waterways and Coastal Security (PWCS); and Defense Readiness.

#### **C. Budget Request Summary:**

The Coast Guard requests \$1.205 billion in FY 2009 to support the following projects. Excluding emergency funding provided in P.L. 110-161, the program increases are \$261.909 million. The total adjustments-to-base reflects a decrease of \$86.074 million that includes a \$3.859 million transfer to the Operating Expenses appropriation to accommodate the GSA lease payments associated with the Coast Guard's acquisition personnel consolidation and Deepwater oversight reorganization:

- Response Boat-Medium - \$64.000 million
- Inland Rivertender - Survey and Design - \$5.000 million
- Deepwater - \$990.444 million
- Nationwide Automatic Identification System - \$14.600 million,
- Rescue 21 - \$73.000 million
- High Frequency recapitalization - \$2.500 million
- Command 21 (Port C4ISR) - \$1.000 million
- Defense Messaging System - \$4.074 million
- Shore facilities and aids to navigation - \$50.000 million
- AC&I personnel related support - \$500 thousand

Note: Requesting the Acquisition, Construction and Improvement (AC&I) personnel account be transferred to the Operating Expenses (OE) appropriation (\$82.215 million transfer) in FY09. The successful and efficient execution of government acquisition programs depends upon careful management of contract administration. This funding transfer will significantly improve the Coast Guard's ability to successfully manage, oversee and administer Acquisition, Construction and Improvement (AC&I) contracts. The consolidation will allow the Coast Guard to build institutional competencies, surge acquisition expertise, streamline human resource and financial management functions and standardize human resource policies within DHS.

| <b>Net, Enacted Appropriations &amp; Budget Estimates</b>    | <b>619</b>     | <b>\$ 1,533,895</b> | <b>652</b>                            | <b>\$ 987,819</b>   | <b>-</b>        | <b>\$ 1,205,118</b> | <b>(652)</b>                             | <b>\$ 217,299</b> | <b>-</b>        | <b>\$ 303,373</b> | <b>(652)</b>        | <b>\$ (86,074)</b> |

Note: Requesting the Acquisition, Construction and Improvement (AC&I) personnel account be transferred to the Operating Expenses (OE) appropriation (\$82.215 million transfer) in FY09. The successful and efficient execution of government acquisition programs depends upon careful management of contract administration. This funding transfer will significantly improve the Coast Guard's ability to successfully manage, oversee and administer Acquisition, Construction and Improvement (AC&I) contracts. The consolidation will allow the Coast Guard to build institutional competencies, surge acquisition expertise, streamline human resource and financial management functions and standardize human resource policies within DHS.

### III. Current Services Program Description by PPA

#### PPA I: VESSELS AND CRITICAL INFRASTRUCTURE PROJECTS

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>\$62,885</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>45,000</b>   |
| 2009 Adjustments-to-Base     | ...                 | ...        | ...             |
| <b>2009 Current Services</b> | ...                 | ...        | <b>45,000</b>   |
| 2009 Program Change          | ...                 | ...        | 24,000          |
| <b>2009 Request</b>          | ...                 | ...        | <b>69,000</b>   |
| Total Change 2008-2009       | ...                 | ...        | 24,000          |

The above table includes emergency funding of \$35.800 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$69.000 million. Excluding Emergency funds provided, the increase over FY 2008 enacted is \$59.800 million.

#### **PROGRAM DESCRIPTION:**

##### **Primary operational resource supported: Surface assets, Command and Control**

Funding supports the initial acquisition, development or construction of any vessel costing more than \$1.000 million each, or \$8.000 million per project or cutter class/boat class. It also represents the improvement, renovation, upgrade, replacement or alteration of any vessel exceeding \$1.000 million per vessel or \$8.000 million per project or cutter class/boat class, or costing more than \$10.000 million regardless of the cost per vessel. Our primary projects for this funding in FY 2009 are the Response Boat-Medium (RB-M) project and Inland River - Survey and Design.

##### **Response Boat-Medium (RB-M)**

##### **Significant accomplishments in FY 2007 include:**

- Ordered six RB-Ms (hulls #7-12)
- Completed detailed design
- Began construction on the first RB-Ms with delivery scheduled in Q2 FY 2008

##### **FY 2008 planned accomplishments include:**

- Ordering 18 RB-Ms (hulls #13-30)
- Delivery and support for the first four RB-Ms (ordered Q4 FY 2006 with prior funding)
- Commencement of Operational Test and Evaluation (OT&E) on the first four RB-Ms

**FY 2009 planned accomplishments include:**

- Order 14 RB-Ms (hulls #31-44). Hulls #31-36 represent the final 6 LRIP hulls, and hulls #37-44 represent the first 8 production hulls.
- Delivery and support for an additional ten RB-Ms ordered with prior funding
- Complete Operational Test and Evaluation (OT&E) with the first six boats with prior funding

**Inland River - Survey and Design**

In FY 2009, funding will support future year cutter and boat renovation and acquisition programs focusing on the sustainment and/or replacement of the current Inland Rivertender fleet.

**PPA II: INTEGRATED DEEPWATER SYSTEMS**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>      |
|------------------------------|---------------------|------------|--------------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>\$1,259,418</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>783,266</b>     |
| 2009 Adjustments-to-Base     | ...                 | ...        | -3,859             |
| <b>2009 Current Services</b> | ...                 | ...        | <b>779,407</b>     |
| 2009 Program Change          | ...                 | ...        | 211,037            |
| <b>2009 Request</b>          | ...                 | ...        | <b>990,444</b>     |
| Total Change 2008-2009       | ...                 | ...        | 207,178            |

The Coast Guard requests \$990.444 million for this activity. This is an increase of \$207.178 million above FY 2008 enacted.

**PROGRAM DESCRIPTION:**

**Primary operational resource supported: All**

To continue to address America's 21st century maritime threats and challenges, the Coast Guard initiated the Integrated Deepwater System (IDS) program, the largest and most innovative acquisition in Coast Guard history. At full implementation, IDS will be comprised of new cutters and their associated small boats, upgraded legacy cutters, a new fixed-wing manned aircraft fleet, an upgraded helicopters, and both cutter-based and land-based unmanned air vehicles. All of these highly capable assets will be linked with state-of-the-art Command, Control, Communications and Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) systems, and will be supported by an integrated logistics regime. Given its importance, depth and complexity, IDS is comprised of three separate sub-categories:

- Aircraft
- Surface
- Other

## **Significant accomplishments in FY 2007 include:**

### **AIRCRAFT**

- Maritime Patrol Aircraft (MPA)
  - First three aircraft completed production and delivered
  - Preliminary production test flights for first MPA complete
  - Pilot and technician training in progress
  - Placed aircraft #4-8 on contract
- C130-J Missionization
  - First aircraft inducted in Lockheed Greenville in December 2006 for on-aircraft integration
  - Second aircraft inducted in July 2007
- HH-65 Engine Conversion
  - To date, 93 HH-65B aircraft re-engined and designated HH-65C

### **SURFACE**

- NSC #1 (USCGC BERTHOLF) more than 90% complete at close of FY07
  - Resolved Consolidated Contracting Action (CCA) to close out all disputed costs for the NSCs #1-#3.
  - Placed NSC #3 on contract.
- NSC #2 (USCGC WAESCHE) more than 32% complete at close of FY07
- Fast Response Cutter (FRC-A) Business Case Analysis for the composite hull completed.
- FRC-A Business Case Analysis led to decision to proceed with a full and open competition for the FRC-B “parent craft” in May of 2007 with award expected in FY 2008.

### **OTHER**

- C4ISR
  - Increment 1 core capabilities demonstration done in October 2006
  - Hardware and software installations complete in November 2006
  - Shipboard Medium Frequency (MF) Digital Selective Calling prototypes installed by end of calendar year (CY) 2006
- Facilities
  - Aviation Training Center (ATC) Mobile, MPA hangar construction – completed mid December 2006
  - Communications Area Master Station Atlantic (CAMSLANT), new receiver/operations building addition – completed in March 2007
  - Training Center (TRACEN) Petaluma, Renovation of Building 500 & installation of NSC C4ISR training suite – completed in January 2007
    - NSC Off-Cycle Crew Support (OCCS) building initial design commenced FY 2007
- Award Term
  - Award Term RFP released 1 December 2006; Award Term 1 contract signed June 2007
    - Includes options for program management, systems engineering & integration, and studies & analysis. Additional DTO requirements for incremental release for proposal: MPA, C4ISR Integrated Logistics Systems (ILS) design and management, C4ISR core software and systems engineering, C4ISR Maritime Decision Awareness Center (MDAC)

operations and support, C4ISR sustainment, and Logistics Information Management System (LIMS)

- Non-Contract Government Incurred (NCGI) Accomplishments
  - AIR
    - HC-130H – APS-137 (surface search) radar replacement completed Developmental Testing and Evaluation (DT&E) July 2007
    - HH-60J Conversion – HH-60T Avionics upgrade prototype (CG 6027) successfully completed Electro-Magnetic Interference (EMI) and DT&E at NAVAIR, Patuxent River, MD, ensuring compliance with sponsor’s requirements. Selected Electro-Optic/Infrared (EO/IR) system vendor.

**FY 2008 planned accomplishments include:**

**AIRCRAFT**

- HC-130H - hold full and open competition for avionics upgrade project.
- HC-130H - APS-137 replacement project will install 10 of 16 units on operational aircraft
- Maritime Patrol Aircraft (MPA) – funds production of MPA numbers nine through twelve as well as missionization and logistics to outfit these aircraft for “mission ready” status
- HH-65 – provide a service-life extension to refurbish the airframe, tail drive shaft and fenestron anti-torque device; strengthen the landing gear; add new radar and new C4ISR suite; and install an integrated cockpit

**SURFACE**

- Contract will be awarded for FRC-B
- Begin construction of NSC #3
- Purchase Long Lead Time Material (LLTM) for NSC #4
- Complete the funding for NSC #3-#4 Government Furnished Equipment (GFE), certifications and logistics

**OTHER**

- Logistics Shore
  - Install LIMS at facilities where LIMS use is required, including Naval Engineering Support Unit (NESU) Boston, NESU Honolulu, Engineering Support Unit (ESU) Honolulu, ATC Mobile, Coast Guard Air Station (CGAS) Savannah, CGAS New Orleans, CGAS Miami, CGAS Cape Cod, CGAS, Borinquen, CGAS Barbers Point and CGAS Elizabeth City
- Facilities
  - Construct the OCCS building to support the new NSCs in Alameda, CA and the FRC office/storage building in Miami, FL

**FY 2009 planned accomplishments include:**

**AIRCRAFT**

- MPA – funds production of MPA #13 and #14 as well as missionization and logistics to outfit these aircraft for “mission ready” status

- HH-65 – continue a service-life extension to refurbish the airframe, wiring and components; adds new radar and new C4ISR suite; and install an integrated cockpit
- HH-60 – continue a service-life extension to refurbish the airframe, wiring, and components; add new radar and new C4ISR suite; and install an integrated cockpit
- HC-130H will fly first avionics upgrade prototype aircraft.

#### **SURFACE**

- Award production for NSC #4
- Continuing progress on Mission Effectiveness Project (MEP) for WMEC’s and WPB’s

#### **OTHER**

- Logistics Shore
  - Continuing installation of LIMS systems at facilities where LIMS use is required, including NESU Boston, NESU Honolulu, ESU Honolulu, Aviation Technical Training Center (ATTC) Mobile, Coast Guard Air Station (CGAS) Savannah, CGAS New Orleans, CGAS Miami, CGAS Cape Cod, CGAS, Borinquen, CGAS Barbers Point and CGAS Elizabeth City
  - Phase II construction of the Off-Cycle Crew Support (OCCS) building to support NSCs in Alameda, CA; facility upgrades at the first three FRC-B homeports; facility upgrades at the second NSC homeport; environmental assessments of Deepwater homeports and aviation sites; as well as detailed engineering evaluations of Deepwater sites.

#### **PPA III: OTHER EQUIPMENT**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|
| <b>2007 Actual</b>           | ...                 | ...        | <b>\$99,911</b> |
| <b>2008 Enacted</b>          | ...                 | ...        | <b>173,100</b>  |
| 2009 Adjustments-to-Base     | ...                 | ...        | ...             |
| <b>2009 Current Services</b> | ...                 | ...        | <b>173,100</b>  |
| 2009 Program Change          | ...                 | ...        | -77,926         |
| <b>2009 Request</b>          | ...                 | ...        | <b>95,174</b>   |
| Total Change 2008-2009       | ...                 | ...        | -77,926         |

The above table includes emergency funding of \$60.000 million provided in P.L. 110-161 for this activity. The FY 2009 Budget Request is \$95.174 million. Excluding Emergency funds provided, the decrease below FY 2008 enacted is \$17.926 million.

#### **PROGRAM DESCRIPTION:**

##### **Primary operational resource supported: Command, Control, Communications, Computers and Information Technology**

Funding procures hardware and software, including the initial acquisition, development or construction of any system, software or equipment costing over \$1 million per usable segment or item, or \$10 million total project cost. It also includes the improvement, renovation, upgrade,

replacement or alteration of equipment or hardware that exceeds \$1 million per usable segment or item, or \$10 million total project cost, regardless of the cost per site.

### **Nationwide Automatic Identification System (NAIS)**

#### **Significant accomplishments in FY 2007 include:**

- Complete NAIS Increment 1, providing an AIS receive-only capability for tracking AIS equipped vessels in 55 critical ports and nine coastal areas and provide the track data to the USCG Maritime Common Operational Picture (COP) for use by all field and unit commanders
- Complete an equipment integration study to test the feasibility of using the R21 radio-frequency subsystem transmit and receive gateways to reduce the overall cost for additional towers, enclosures and antennas.

#### **FY 2008 planned accomplishments include:**

- Release the first NAIS Increment 2 Request for Proposal (RFP) for delivery of the receive and transmit AIS system design and Initial Operating Capability (IOC). Receive and transmit AIS is a crucial component of the National Strategy for Maritime Security and National Plan to Achieve Maritime Domain Awareness.
- Gather lessons learned from NAIS receive and transmit system design and IOC delivery to develop the second Increment 2 RFP for nationwide deployment.
- Provide additionally-required network services, a subset of all data processing requirements (including, at a minimum, verification of AIS data and consolidation of AIS position reports received from multiple AIS stations in a sector) and integration with end users' systems.
- Will allow each SCC to effectively transmit all standard AIS messages and will provide data to separate systems and organizations, which will include the maritime COP and the Intelligence Community via the Common Intelligence Picture and supporting systems [e.g., Maritime Awareness Global NETwork (MAGNET)].
- Launch a concept validation satellite with an AIS receiver to validate the capability to track AIS equipped vessels from space for the NAIS project's Increment 3 – Long-range AIS Receive

#### **In FY 2009, funds requested will:**

- Achieve Increment 2 Initial Operating Capability (IOC) which is defined as receive coverage within 50 nautical miles and transmit coverage within 24 nautical miles of the baseline (baseline is approximately equal to the coastline) and navigable inland waterways in at least two adjacent Coast Guard Sectors in one Coast Guard Area and one additional Coast Guard Sector in another Coast Guard Area.
- Provide additional-required network services, a subset of all data processing requirements (including, at a minimum, verification of AIS data and consolidation of AIS position reports received from multiple AIS stations in a sector) and integration with end users' systems.
- Continue operation and maintenance of Increment 1 capability in the 55 critical ports and nine coastal areas (not replaced by Increment 2 IOC capability).
- Continue implementation of Increment 3 to achieve Initial Operating Capability (IOC) for extended AIS receive capability of AIS messages out to 2000 nautical miles from the coast.

## **Rescue 21**

### **Significant accomplishments in FY 2007 include:**

- Acceptance of the remaining two LRIP regions, Sectors Seattle (WA) and Port Angeles (WA), occurred on December 18, 2006 resulting in an additional 500 nautical miles of coastline coverage
- Acceptance of Phase I of Sector New Orleans including the Rescue 21 tower in Venice (LA), the Sector Command Center and Station New Orleans (Q2 FY07)
- Conducted Integrated Baseline Review (IBR) on contracted deployment activities for the first 11 full-rate-production (FRP) regions 18 - 19 December 2006. Regions include Long Island Sound (NY), New York (NY), Key West (FL), Miami (FL), Jacksonville (FL), New Orleans (LA - Phase II), Galveston (TX), Corpus Christi (TX), Portland (OR), Astoria (OR), and North Bend (OR)
- Continued infrastructure preparation in the first 11 FRP regions. These regions are scheduled to be in operation and accepted by the Coast Guard by the end of CY 2008
- Acceptance of the first FRP region with Sector Long Island, (NY/CT) in Q4 FY 2007, and one a month thereafter.

### **FY 2008 planned accomplishments include:**

At the end of FY 2008, the following additional FRP regions are scheduled to be operational:

- Sector New York, NY
- Sector Delaware Bay
- Sector Hampton Roads, VA
- Sector Baltimore, MD
- Sector Key West, FL
- Sector Miami, FL
- Sector Jacksonville, FL
- Sector Portland, OR
- Group/Air Station Astoria, OR
- Group/Air Station North Bend, OR

### **Funds requested in FY 2009 will specifically accomplish the following work:**

*Rescue 21 Ground Subsystem (GSS) Deployment (partial) – Full Rate Production (FRP) Group III*

- Great Lakes and Outside Continental U.S. Islands
  - Sector Lake Michigan; Sector Sault Ste Marie, MI; Sector Detroit, MI; Sector Buffalo, NY
  - Sector Hawaii, Sector Guam, Sector San Juan, Puerto Rico

### **At the end of FY 2009, the following additional Sectors are scheduled to be operational:**

- Full Rate Production (FRP) Sectors
  - Sector Galveston, TX
  - Sector New Orleans, LA (Phase II)
  - Sector Charleston, SC
  - Sector North Carolina (Fort Macon and Cape Hatteras)
  - Sector Boston, MA
  - Sector San Diego, CA
  - Sector Humboldt Bay, CA

## **High Frequency (HF) Recapitalization**

### **Significant accomplishments in FY 2007 include:**

- Purchase and Replace 10 HF transmitters

### **FY 2008 planned accomplishments include:**

- Purchase and install 12 HF transmitters (\$200K per transmitter).

### **FY 2009 planned accomplishments include:**

- Purchase and install 12 additional HF transmitters (\$200K per transmitter).

## **Defense Messaging System (DMS)**

### **FY 2008 planned accomplishments include:**

- Implement DMS on 378' High Endurance Cutters, half the 270' Medium Endurance Cutters, TRACEN Petaluma, and at the Space and Warfare (SPAWAR) Lab in Charleston;
- Service and maintain DMS equipment onboard Coast Guard cutters by SPAWAR, eliminating follow-on costs associated with the FY 2008 request.

### **FY 2009 planned accomplishments include:**

- Implement DMS on the rest of the 270' Medium Endurance Cutters, 210' Medium Endurance Cutters and the Polar Class Ice Breakers and fully complete the project.

## **Command 21 (Port C4ISR Enhancements)**

### **FY 2008 planned accomplishments include:**

- Begin survey and Design work at high priority ports
- Develop requirements for WatchKeeper Software.

### **FY 2009 planned accomplishments include:**

- Develop WatchKeeper Software
- Continue survey and Design work at high priority ports

## PPA IV: AIRCRAFT

| Total Change 2008-2009       | ...         | ... | 9,003           |

The Coast Guard requests \$50.000 million for this activity. This is an increase of \$ 9.003 million over FY 2008 enacted.

### PROGRAM DESCRIPTION:

#### **Primary operational resource supported: Shore units and Aids-to-Navigation (ATON)**

The AC&I shore facilities and ATON capital investment program provides funding for the acquisition, construction, rebuilding, and improvement of the Coast Guard's shore facilities, ATON, and related equipment.

### Significant accomplishments in FY 2007 include:

- Shore Facilities projects: Chase Hall Barracks Phase I completion; Sector Long Island Sound's multi-purpose building completion; Station Neah Bay breakwater; rebuilding Station and waterfront at Base Galveston Phase I; Integrated Sector Command (ISC) Seattle and Sector Puget Sound's shore operations building and command center Phase II; Station

Fire Island, NY waterfront rehabilitation; Cordova, AK housing recapitalization; ISC Honolulu's Small Arms Firing Range.

- Aids to Navigation work at the following sites: Bay-town-Houston Ship Channel, TX; Beverly Range, PA; Sharps Island Light, MD; Key West, FL; St Andrew Bay, FL; Portland Canal, AK

**FY 2008 planned accomplishments include:**

- Construct duty berthing and boat maintenance bay at Station Washington
- Rebuild multi-purpose facility and waterfront at Base Galveston Phase II.
- Build a Rescue Swimmer Training Facility at Aviation Technical Training Center (ATTC) Elizabeth City, NC.
- Construct a consolidated Station Marquette, MI facility.
- Construct eight additional housing units at Cordova, AK
- Begin facility renovations at Sector Buffalo
- Aids to Navigation work at the following sites: Delaware Bay and River, DE; Sharps Island Light, MD; Edgewater, PA; Lake St. Clair, MI.

**FY 2009 planned accomplishments include:**

- Complete initial survey and design for seven facilities/purposes.
- Commence Phase III of the Cordova, Alaska housing project which will complete 6 duplex units (12 housing units).
- Commence the recapitalization of Chase Hall's North Annex A.
- Commence the renovation of the run way lighting at Air Station Cape Cod (Massachusetts Military Reservation).
- Commence construction of the addition to the TISCOM Telecommunications Systems Directorate (TSD) building.
- Purchase housing for Station Montauk, NY.
- Commence construction of a 23,000 GSF consolidated Station, Aids to Navigation Team (ANT) and Coastal Patrol Boat (CPB) facilities for Station Cape May.

**PPA VI: PERSONNEL AND RELATED SUPPORT**

|                              | <b>Perm<br/>Pos</b> | <b>FTE</b> | <b>Amount</b>   |
|------------------------------|---------------------|------------|-----------------|

The Coast Guard requests \$500 thousand for this activity. This is a decrease of \$82.220 million below FY 2008 enacted.

## **PROGRAM DESCRIPTION:**

### **Primary operational resource supported: All**

Beginning in FY 2009, the AC&I personnel account is expected to be transferred to the Operating Expenses (OE) appropriation (\$82.215 million transfer). The successful and efficient execution of government acquisition programs depends upon careful management of contract administration. This funding transfer will significantly improve the Coast Guard's ability to successfully manage, oversee and administer AC&I contracts. The consolidation will allow the Coast Guard to build institutional competencies, surge acquisition expertise, streamline human resource and financial management functions and standardize human resource policies within DHS.

The \$500 thousand requested covers the costs associated with project overhead activities for major acquisition projects. The primary initiatives include contract support for financial management services, contracting support services, training and workforce certification. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.

**Department of Homeland Security**  
**U. S. Coast Guard**  
**Justification of Proposed Changes in Acquisition, Construction, and Improvements**  
**Appropriation Language**

[including rescission of funds]

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law; [\$1,125,083,000]**\$1,205,118,000**, of which \$20,000,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which [\$45,000,000]**\$69,000,000** shall be available until September 30, [2012]**2013**, to acquire, repair, renovate, or improve vessels, small boats, and related equipment; of which [\$173,100,000]**\$95,174,000** shall be available until September 30, [2010]2011, for other equipment; of which [\$40,997,000]**\$50,000,000** shall be available until September 30, [2010]**2011**, for shore facilities and aids to navigation facilities; of which [\$82,720,000]**\$500,000** shall be available for personnel [compensation and benefits and ]related costs; and of which [\$783,266,000]**\$990,444,000** shall be available until September 30, [2012]**2013**, for the Integrated Deepwater Systems program]: *Provided*, That of the funds made available for the Integrated Deepwater Systems program, \$327,416,000 is for aircraft and \$243,400,000 is for surface ships: *Provided further*, That of the amount provided in the preceding proviso for aircraft, \$70,000,000 may not be obligated for the Maritime Patrol Aircraft until the Commandant of the Coast Guard certifies that the mission system pallet Developmental Test and Evaluation of the HC-144A CASA Maritime Patrol Aircraft is complete: *Provided further*, That no funds shall be available for procurements related to the acquisition of additional major assets as part of the Integrated Deepwater Systems program not already under contract until an alternatives analysis has been completed by an independent qualified third party: *Provided further*, That \$300,000,000 of the funds provided for the Integrated Deepwater Systems program may not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure directly from the Coast Guard that\_]

[(1) defines activities, milestones, yearly costs, and lifecycle costs for each procurement of a major asset, including an independent cost estimate for each;]

[(2) identifies lifecycle staffing and training needs of Coast Guard project managers and of procurement and contract staff;]

[(3) identifies competition to be conducted in each procurement;]

[(4) describes procurement plans that do not rely on a single industry entity or contract;]

[(5) includes a certification by the Chief Human Capital Officer of the Department that current human capital capabilities are sufficient to execute the plans discussed in the report;]

[(6) contains very limited indefinite delivery/indefinite quantity contracts and explains the need for any indefinite delivery/indefinite quantity contracts;]

[(7) identifies individual project balances by fiscal year, including planned carryover into fiscal year 2009 by project;]

[(8) identifies operational gaps by asset and explains how funds provided in this Act address the shortfalls between current operational capabilities and requirements;]

[(9) includes a listing of all open Government Accountability Office and Office of Inspector General recommendations related to the program and the status of Coast Guard actions to address the recommendations, including milestones for fully addressing them;]

[(10) includes a certification by the Chief Procurement Officer of the Department that the program has been reviewed and approved in accordance with the investment management process of the Department, and that the process fulfills all capital planning and investment control requirements and reviews established by the Office of Management and Budget, including Circular A-11, part 7;]

[(11) identifies use of the Defense Contract Auditing Agency;]

[(12) includes a certification by the head of contracting activity for the Coast Guard and the Chief Procurement Officer of the Department that the plans for the program comply with the Federal acquisition rules, requirements, guidelines, and practices, and a description of the actions being taken to address areas of non-compliance, the risks associated with them along with plans for addressing these risks, and the status of their implementation;]

[(13) identifies the use of independent validation and verification; and]

[(14) is reviewed by the Government Accountability Office:]

*Provided further*, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives, in conjunction with the President's fiscal year 2009 budget, a review of the Revised Deepwater Implementation Plan that identifies any changes to the plan for the fiscal year; an annual performance comparison of Deepwater assets to pre-Deepwater legacy assets; a status report of legacy assets; a detailed explanation of how the costs of legacy assets are being accounted for within the Deepwater program; and the earned value management system gold card data for each Deepwater asset:

*Provided further*, That the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives a comprehensive review of the Revised Deepwater Implementation Plan every five years, beginning in fiscal year 2011, that includes a complete projection of the acquisition costs and schedule for the duration of the plan through fiscal year 2027: *Provided further*, That the Secretary shall annually submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted under section 1105(a) of title 31, United States Code, a future-years capital investment plan for the Coast Guard that identifies for each capital budget line item\_]

[(1) the proposed appropriation included in that budget;]

[(2) the total estimated cost of completion;]

[(3) projected funding levels for each fiscal year for the next five fiscal years or until project completion, whichever is earlier;]

[(4) an estimated completion date at the projected funding levels; and]

[(5) changes, if any, in the total estimated cost of completion or estimated completion date from previous future-years capital investment plans submitted to the Committees on Appropriations of the Senate and the House of Representatives:]

*Provided further*, That the Secretary shall ensure that amounts specified in the future-years capital investment plan are consistent to the maximum extent practicable with proposed appropriations necessary to support the programs, projects, and activities of the Coast Guard in

the President's budget as submitted under section 1105(a) of title 31, United States Code, for that fiscal year: Provided further, That any inconsistencies between the capital investment plan and proposed appropriations shall be identified and justified: *Provided further*, That of amounts made available under this heading in Public Laws 108-334 and 109-90 for the Offshore Patrol Cutter, \$98,627,476 are rescinded: *Provided further*, That of amounts made available under this heading in Public Law 108-334 for VTOL unmanned aerial vehicles (VUAV), \$162,850 are rescinded: *Provided further*, That of amounts made available under this heading in Public Law 109-90 for unmanned air vehicles (UAVs), \$32,942,138 are rescinded: Provided further, That of amounts made available under this heading in Public Law 109-295 for VTOL unmanned aerial vehicles (UAVs), \$716,536 are rescinded: *Provided further*, That of the amount provided under this heading, \$95,800,000 is designated as described in section 5 (in the matter preceding division A of this consolidated Act)]. (*Department of Homeland Security Appropriations Act, 2008.*)

### **Explanation of Changes:**

The successful and efficient execution of government acquisition programs depends upon careful management of contract administration. This funding transfer will significantly improve the Coast Guard's ability to successfully manage, oversee and administer Acquisition, Construction and Improvement (AC&I) contracts. The consolidation will allow the Coast Guard to:

- Build institutional acquisition competencies by having the ability to move Operation and Support personnel into acquisitions. This will facilitate the training of more junior military personnel, better preparing them for future positions of higher responsibilities within acquisitions, and will allow the Coast Guard to grow acquisition competencies from within.
- Surge acquisition expertise to and from AC&I projects based on the projects' appropriated funding levels, pace of execution and timing of key decision points. Under the current authority in the FY08 Consolidated Appropriations (H.R. 2764) when OE funding is transferred to AC&I, it can never be returned to the OE appropriation. Although this transfer authority is beneficial, the one way legislative check valve is too restrictive.
- Streamline human resource and financial management functions, which would provide the increased flexibility to optimally managing acquisition staffing. The transfer would also eliminate the complexity of overseeing the refund process between appropriations.
- Standardize human resource polices within DHS. The Coast Guard is the only asset-intensive organizational element within DHS that has personnel tied to its acquisition appropriation. Maintaining budget consistency across all DHS is an important factor for building a more integrated and coherent Department human resource strategy.

Currently, all salaries, benefits, and support for the military and civilian personnel who administer AC&I contracts are funded by the AC&I appropriation, whereas 97 percent of the Coast Guard's personnel is funded from the OE appropriation. The consolidation will provide the Coast Guard flexibility to address highest priority needs, while ensuring transparency to the Administration and Congress.

The \$500 thousand requested covers the costs associated with project overhead activities for major acquisition projects. The primary initiatives include contract support for financial management services, contracting support services, training and workforce certification. The funding allows the Coast Guard to maintain an effective acquisition process by providing AC&I resources that are not project-specific. Resources are needed to maintain core competencies and capabilities necessary to execute assigned workload while meeting various requirements established in the Chief Financial Officer Act, Clinger-Cohen Act, DHS certification level requirements and OMB Circular A-76.

**U. S. Coast Guard Justification**  
**Acquisition, Construction & Improvements**  
**FY 2009 Congressional Budget Submission**  
(Dollars in Thousands)

**Inland River Survey and Design**

**\$5,000**

**Project Description, Justification and Scope**

This request funds the planning, requirements development, and cost estimating efforts supporting inland river capability, including sustainment and/or replacement projects. Two projects — Inland Rivertender Emergency Sustainment (IRES) and the Heartland Waterway Vessel (HWV) — will benefit from the Inland River – Survey and Design project. IRES is intended to maintain, and HWV to eventually replace, the capability to effectively execute aids to navigation (ATON) and possibly other statutory Coast Guard missions (i.e. SAR, LE, domestic icebreaking, and pollution response) throughout the Western Rivers and other inland/intracoastal navigable waterways. These missions are currently performed by seven different classes of ships totaling 36 different platforms—18 River Buoy Tenders (WLRs), 13 Inland Construction Tenders (WLICs) and five Inland Buoy Tenders (WLIs). These legacy cutters are sometimes the only Federal presence on the “Heartland Waterways” of the United States. All but two of these vessels are well past the end of their service lives and can no longer be maintained in a cost-effective manner.

Diverse mission requirements call for complex designs and performance capabilities, and because comprehensive in-house engineering expertise would require a considerably larger staff and costly facilities, much of the naval engineering survey and design work is accomplished externally. These efforts include developing and refining requirements through feasibility studies and prototypes to verify the efficacy and practicability of various combinations of vessel performance and payload requirements, with the ultimate goal of determining an optimum set of requirements leading to a balanced, integrated and cost effective solution to optimize Coast Guard operational performance. This is followed by a more detailed solution with trade-off analysis to identify critical parameters and permit a more accurate review of potential acquisition costs and risks.

The significant variance in the legacy asset classes, built over several decades, offers little opportunity for economies of scale and risk pooling, further contributing to increasing operating and maintenance costs, and involves a number of environmental, habitability and crew safety issues that are not acceptable. Despite increased maintenance spending on the WLRs, WLICs, and WLIs, annual aid availability rates have steadily decreased from 98.9 percent in 1998 to 97.0 percent in 2006. Consistent with the International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA), the Coast Guard targets a 99.7 percent aid availability rate. Further, the incidents of collisions, allisions and groundings along the Western Rivers have significantly increased over the past 4 years. If this ATON capability is not replaced, maintenance costs will continue to increase, diverting limited operating and maintenance funds from other mission critical areas, and operational performance will continue a downward trend, potentially increasing the risk of a catastrophic maritime accident.

IRES will address major safety, maintenance and operational availability issues associated with platforms past or near the end of their service lives. IRES is a bridging strategy to maintain legacy platforms until the HWV project can acquire a new, multi-mission, homeland security-capable vessel. This approach to capability sustainment and replacement is the same as the relationship between the WPB MEP sustainment and the Fast Response Cutter that is its replacement. Historically, vessel acquisition projects take an average of 6-8 years to deliver the lead vessel once initial Acquisition Construction and Improvement (AC&I) funding is received. This timeline accounts for the time

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Inland River Survey and Design**

**\$5,000**

required to develop plans and documents required by the Coast Guard's Major Systems Acquisition Manual (MSAM), develop a comprehensive request for proposal, receive offeror development of proposals and evaluate them, award a contract, review engineering design, and produce the first vessel. Given the acquisition timeline, this request takes an aggressive approach towards recapitalization while enabling emergency sustainment as necessary to continue ATON and other emergency preparedness/response operations.

**Significant Changes**

This is the first request for this project.

Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Response Boat - Medium (RB-M)**

**\$64,000**

**Project Description, Justification and Scope**

This funding supports all logistics development and places up to 14 boats on order. It also continues to support progression towards full rate production (i.e. 30 boats per year) by FY 2010.

The Response Boat - Medium (RB-M) project will procure 180 new small boats to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with assets more capable of meeting all of the Coast Guard's multi-mission operational requirements, including Search and Rescue; Marine Safety; Marine Environmental Protection; Living Marine Resources; Ports, Waterways, and Coastal Security; and Defense Readiness.

The Response Boat - Medium (RB-M) project will procure 180 new small boats to replace the aging 41-foot Utility Boats (UTB) (and other large non-standard boats) with assets more capable of meeting all of the Coast Guard's multi-mission operational requirements, including Search and Rescue; Marine Safety; Marine Environmental Protection; Living Marine Resources; Ports, Waterways, and Coastal Security; and Defense Readiness.

The legacy 41' UTB, built by the Coast Guard from 1973 to 1980, is a key asset for multi-mission, station-based Coast Guard operations within coastal zones. The 41' UTB entered service in 1973, replacing the 40' UTB that began service in 1951. Although designed specifically for Search and Rescue (SAR) missions, the 41' UTBs have been employed as multi-mission assets. Now at the end of their service lives, the 41' UTBs are experiencing rising maintenance costs and declining readiness levels resulting in loss of mission performance and effectiveness.

Coast Guard missions have changed markedly since the 41' UTB was built, especially since the tragic events of September 11, 2001. The RB-M offers a number of opportunities for improvements over the existing fleet of 41' UTBs and other non-standard boats in performance, crew efficiency and operational availability. Several program requirements and extensive field commander input indicates a need for an RB-M that is substantially faster than the 41' UTB (40+ knots vs. 26 knots) to support new homeland security operations. Such capability will also improve mission effectiveness for Search and Rescue, Undocumented Migrant Interdiction, Illegal Drug Interdiction, Other Law Enforcement, Ports, Waterways, and Coastal Security (PWCS) and Defense Readiness missions.

Integrated navigation and sensing systems, compliant with modern international radio-telephone standards provide the RB-M better search capability that further improves mission effectiveness. Interoperability of the RB-M with Rescue 21 equipment greatly enhances overall command and control as well as crew safety in coastal zones. Moreover, crew efficiency will be improved in a number of areas relating to human factors and engineering. For example,

- Secure seating for every crewmember in an environmentally controlled cabin enables greater mission endurance with less crew fatigue.
- Self-fendering allows more efficient boarding and towing operations.
- Emphasis placed on survivor recovery significantly improves crew effectiveness.
- Reduced maintenance requirements improve operational availability.

**Response Boat - Medium (RB-M)**

**\$64,000**

Methods to achieve the above include emphasizing the ability to maintain and replace RB-M components quickly and providing improved depot level maintenance support. Further efficiencies are gained by providing maintenance relief vessels to substitute for station boats during major maintenance and casualty repairs. The RB-M is also being built to dimensions that will allow for commercial overland transportation to support deployed surge operations, and technical data will be formatted to support the ongoing organizational logistics transformation.

The RB-M Acquisition Strategy is two phased: Phase I - full and open competitive Request For Proposal (RFP), selected three contractors to build test boats, followed by developmental testing and evaluation to validate RB-M requirements. Phase II - competitive RFP limited to the three Phase I contractors for production and logistics support for approximately 180 boats that meet the Coast Guard's multi-mission requirements.

The RFP for the test boats was released August 9, 2002 and contracts for three test boats were awarded on May 2, 2003. The test boats were delivered October 29, 2003. The Coast Guard conducted extensive in-water developmental testing and evaluation after accepting the Phase I test boats. Personnel from Coast Guard multi-mission stations who operate and maintain small boats on a daily basis participated in the in-water testing. The Naval Surface Warfare Center Carderock Division – Combatant Craft Department – conducted the technical analysis of the data gathered from the acceptance, performance, mission effectiveness and supportability testing. The evaluation results were used to validate government requirements and verify industry's ability to meet those requirements using non-developmental state of the market technology at a reasonable price. Select portions of the Phase I test results were also furnished to the Phase I contractors for additional research and development, and for use in developing their Phase II proposals.

**KEY EVENTS**

**Significant accomplishments in FY 2007 include:**

- Ordered six RB-Ms (hulls #7-12)
- Completion of detailed design
- Construction on the first RB-Ms with delivery scheduled to begin in Q2 FY 2008

**FY 2008 planned accomplishments include:**

- Ordered 18 RB-Ms (hulls #13-30)
- Delivery and support for the first four RB-Ms that were ordered Q4 FY 2006 with prior funding
- Commencement of Operational Test and Evaluation (OT&E) on the first four RB-Ms

**FY 2009 planned accomplishments include:**

- Order 14 RB-Ms (hulls #31-44). Hulls #31-36 represent the final 6 LRIP hulls, and hulls #37-44 represent the first 8 production hulls.
- Delivery of an additional 10 RB-Ms ordered with prior funding and support for a total of 14 delivered RB-Ms.
- Complete Operational Test and Evaluation (OT&E) with the first six boats ordered with prior funding.
- Fully fund logistics element development and fielding deferred from prior years.

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Response Boat - Medium (RB-M)**

**\$64,000**

**CONTRACTOR**

The Response Boat – Medium (RB-M) Project awarded the production contract to Marinette Marine Corporation (MMC) of Marinette, WI for the second procurement phase on June 21, 2006, for the design, construction, outfit and delivery of the RB-M system.

**Significant Changes**

In April 2007, both unsuccessful contractors withdrew their appeals with the Court of Federal Claims closing the post-award appeal. The Project Resident Office (PRO) established September 2006 in Seattle, WA relocated July 2007 to the contractor’s newly dedicated RB-M production facility in Kent, WA. On June 28, 2007 a keel laying ceremony signified the start of construction on the first boat to be delivered March 2008 to Little Creek, Virginia, which will begin Operational Testing and Evaluation (OT&E). The first six RB-Ms will be the primary boats used for OT&E. Because OT&E includes an operational effectiveness evaluation to look at operational suitability, human factors, maintenance and repair, support logistics, and training, the six Coast Guard units receiving the initial RB-Ms were selected to provide a wide representation of the variety of missions, weather conditions, and logistics support concerns that RB-Ms will face once delivered. Moreover, these select stations provide opportunities to conduct unique testing scenarios not available at all Coast Guard units. The first six selected Stations are: Little Creek, VA; Cape Disappointment, WA; Key West, FL; Milwaukee, WI; New York, NY; and Port Aransas, TX.

**Method of Performance**

The RB-M Project Management Team is committed to using an Earned Value Management System (EVMS) that meets ANSI/EIA Standard 748. During the Capability Development and Demonstration Phase of the acquisition process an earned value management framework was implemented for effective project management and controls. The RB-M Project is leveraging the lessons learned from other agency acquisition programs and using those insights in managing the cost, schedule, and technical performance during the project life cycle. The RB-M Project has hired Booz Allen Hamilton to provide earned value consulting expertise. Working with Booz Allen Hamilton, the RB-M Project has implemented ANSI 748-A compliant earned value requirements incorporating earned value deliverables such as Cost Performance Reports and Integrated Master Schedule(s).

The Project has also required Integrated Baseline Reviews (IBR). The first IBR was held jointly with the contractor in November 2006 to provide a mutual understanding of risks inherent in contractors' performance plans and underlying management control systems. The IBR and EVMS are essential elements of the RB-M Project's risk management approach. The IBR has addressed the integrated master schedule (IMS), integrated master plan (IMP), and include discussions with contractor control account managers (CAM) to ensure alignment between the contractor and the Government.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

Programmatic Environmental Assessment (PEA) conducted.

Finding of No Significant Impact (FONSI), 18 March 2003.

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Maritime Patrol Aircraft (MPA)**

**\$86,600**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request funds two Maritime Patrol Aircraft (MPA) CASA CN-235 300Ms, #13 and #14, and the missionization required to outfit these aircraft to fully execute assigned Coast Guard missions. These funds will address the Coast Guard's MPA flight hour gap by providing 2,400 additional MPA hours every year.

**CAPABILITY ACQUIRED/MAINTAINED:**

The CASA CN-235 300M will be equipped with communication, navigation and surveillance systems allowing the aircraft to operate worldwide within the range of its performance parameters, in civilian and military airspace, in support of its Congressionally-mandated missions.

Purchased in compliance with the Buy American Act, the CASA CN-235 300M is the perfect complement for the Coast Guard fleet of long-range, heavy-lift HC-130 aircraft. Its high-efficiency turbo prop design allows extended surveillance and quick response capability. The sophisticated surface search radar can detect targets of interest from over 100 miles away. Once closer to the target of interest, the Infrared/Electro-Optical (IR/EO) sensor can further classify and identify it in virtually all weather conditions, allowing the Coast Guard to quickly locate high interest vessels and mariners in distress.

The state-of-the-art cockpit design provides pilots with superior situational awareness, reduced workload and increased safety, allowing them to better concentrate on the mission. Human factors engineering is also evident in the mission system pallet that controls the tactical workstation. Systems operators can collect, compile, and transfer vital information in real time to operational commanders on ship or on shore hundreds of miles from the aircraft. Satellite radios provide for clear and uninterrupted voice and data exchange, and advanced electronic support measures that can automatically detect friendly/unknown vessels and their 'fingerprints' add another layer of defense to the homeland security mission.

The CASA CN-235 300M also provides great mission flexibility. The hydraulically-operated rear ramp allows for easy roll-on/roll-off provisions. This quick-change feature allows ground crews to re-configure the aircraft from maritime patrol to medical evacuation to passenger/freight transport. Its medium size and high-lift wing design allow take-off and landing on short, unpaved landing areas, further enhancing the Coast Guard's abilities to aid first responders in all types of national, state and local emergencies.

**Maritime Patrol Aircraft (MPA)**

**\$86,600**

**PERFORMANCE:**

The CASA CN 235-300M is a transport and surveillance, fixed-wing aircraft that will be used to perform Search and Rescue (SAR) missions, enforce laws and treaties, including illegal drug interdiction, marine environmental protection, military readiness, homeland security and International Ice Patrol missions, as well as cargo and personnel transport. It can perform aerial delivery of SAR equipment, such as rafts, pumps, and flares, and can be used as an On-Scene Commander platform. As the medium-range maritime patrol aircraft, the CASA delivers maritime domain awareness essential to achieving mission success in the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The CASA will be outfitted with a capable C4ISR suite that includes a multi-mode surface and air search radar (MMR), Electro Optical (EO) device, and an Infrared (IR) sensor to find and observe a wide range of targets. The aircraft will have a line-of-bearing indicator and distress call monitoring on various distress frequencies. It will also be equipped with search windows and the crew will be outfitted with night vision devices to further enhance their ability to detect, classify, and identify targets. With a rear cargo loading ramp that can be opened in-flight, the CASA is capable of aerial delivery of equipment (i.e. life rafts, communications kits, and de-watering pumps) and personnel. With an endurance of 10.7 hours, the CASA can also serve as an On-Scene Commander platform, guiding and assisting rotary wing assets.

- Marine Safety - International Ice Patrol (IIP): Although the CASA does not have the extended range of the C-130 aircraft, it can remain airborne for over 10 hours, and, utilizing the same sensors described above, will be able to detect and relay the location of icebergs in support of the IIP mission.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, will be employed to provide surveillance, detection, classification and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, and INMARSAT, the CASA will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and Common Operating Picture (COP) through a networked Command and Control (C2) system that provides for data sharing via INMARSAT.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be utilized to support the DRUG mission. Through effective use of the CTP/COP, the CASA will be able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – The use of all sensors and communications equipment will be utilized for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased maritime domain awareness.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – In conjunction with visual surveillance, the CASA C4ISR suite will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered

**Maritime Patrol Aircraft (MPA)**

**\$86,600**

water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

- MEP – Lightering Zone Enforcement (LZE) – Similarly, LZE is not a primary mission for the CASA, but it is capable of monitoring Lightering Zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The CASA will employ all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR. In addition to the sensors and communications capabilities already described, the CASA will also be equipped with an Automatic Identification System (AIS) to monitor surface vessels. The AIS information collected will include the ship’s name, position, course, and speed. The use of AIS will make the job of vessel identification more efficient, permitting the CASA to remain at altitude instead of having to make a low pass to visually identify a vessel.

**NATIONAL DEFENSE:**

- Defense Readiness - The CASA plays a minimal role in national defense missions but can provide support through surveillance and transport roles to the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

**OTHER:**

- Non-IDS Aviation Demand (NDAD) – The CASA supports NDAD primarily in a logistics transport role.

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009:**

| ITEM                                    | QUANTITY | TOTAL (\$K) |
|---|----------|-------------|
| MPA Production and Missionization (Two) | Lot      | \$86,600    |
|   | Total    | \$86,600    |

**FUNDING HISTORY**

|   | FY    | TOTAL (\$K) |
|---|-------|-------------|
| Conceptual Development/Design                                 | 2002  | \$12,538    |
| Design, Long Lead Material, Construct/Missionize MPA #1 & #2  | 2003  | \$141,443   |
| Construct MPA #3 (not missionized)                            | 2004  | \$24,853    |
| Funds missionization and partial logistics for MPA #3         | 2005  | \$5,250     |
| Construct MPA # 4 and #5                                      | 2006  | \$67,320    |
| Construct MPA # 6, 7, 8; missionize MPA # 5 – 8; No logistics | 2007  | \$148,116   |
| Construct MPA # 9 –12; missionize MPA # 9 –12                 | 2008  | \$170,016   |
|   | Total | \$569,536   |

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**Maritime Patrol Aircraft (MPA)**

**\$86,600**

Funding history is the available funding for this item based on past appropriations, rescissions, and other changes.

**CONTRACTOR:**

Integrated Coast Guard System (ICGS), Washington, DC

Type of Contract: Indefinite Delivery, Indefinite Quantity with award terms

Contract options: 5-year base completed June 2007 with 43-month subsequent award term period through January 2011

**SUBCONTRACTORS:**

Airframe: EADS CASA CN-235 300M (Madrid, Spain)

Avionics: Rockwell Collins (Cedar Rapids, IA)

Power Plant: General Electric CT7-9C3 engine (Lynn, MA)

Propulsion: Hamilton Sundstrand 14RF-37 (Windsor Locks, CT)

Sensors: Telephonics APS-143V3 Multi-Mode RADAR (Farmingdale, NY)

FLIR Systems Star Sapphire III (Portland, OR)

EDO ALR-95 (Morgan Hill, CA)

Mission System: Lockheed Martin (Egan, MN)

Communications: Wulfsberg RT50000 (Prescott, AZ)

Miscellaneous: CG Maritime Patrol Aircraft Conversion, ARSC (Elizabeth City, NC)

Mission System Integration: ARINC (Annapolis, MD)

Mission System Operator

Training and Maintenance: ProSoft (Phoenix, AZ)

**KEY EVENT:**

|  | FY   |
|--|------|

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**Maritime Patrol Aircraft (MPA)**

**\$86,600**

reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**HH-60 Conversion Projects**

**\$52,700**

**Project Description, Justification and Scope**

**DESCRIPTION:**

1) HH-60T Avionics Upgrade — Funds replacement/modernization of obsolete HH-60J avionics suite, aircraft electrical wiring, and connectors to resolve and prevent discrepancies. Upgrades are to include five new Multi Functional Display (MFD) screens that increase pilots' situational awareness, digital radar, Traffic Collision Avoidance System (TCAS), traditional display of primary flight instruments on the Pilot's Flight Display (PFD), radar altimeter and verbal low altitude to enhance safety during night hovering, and improved Search and Rescue (SAR) software (hoist camera images).

2) HH-60J Service Life Extension Project (SLEP) (Re-Wire) — Required when each aircraft is inducted into the Programmed Depot Maintenance (PDM) cycle. It will replace legacy electrical wiring/connectors not addressed by the avionics upgrade in order to maintain structural and electrical integrity (remove Navy weapons systems wiring).

3) HH-60J Radar/ Electro Optical/Infra-Red (EO/IR) sensor – Funds replacement of the HH-60J RDR-1300 monochrome weather-search radar with a Multimode Radar (MMR) and an enhanced EO/IR sensor common to Deepwater helicopter platforms. These systems will allow for common operational picture/maritime domain awareness data exchange capabilities.

4.) HH-60J Engine Sustainment – Funds a targeted standardized configuration of Auxiliary Power Units (APUs) and Hydro-Mechanical Units and will address obsolescence/support issues associated with the Digital Electronic Control Unit in order to achieve an increase to the mean time between engine failures. Project phase also initiates a performance-based logistics support system and recapitalization of high-time engines that are beyond their economic overhaul limit.

**CAPABILITY ACQUIRED/MAINTAINED:**

The Sikorsky HH-60J Jayhawk is the Coast Guard's medium-range recovery helicopter. Two T700-GE-401C engines, each rated at around 1600 shaft horsepower, provide adequate power for a gross takeoff weight of 22,000 pounds. The HH-60J is very well-suited for operations in challenging weather conditions. A flight management and navigation system provides the aircrews with Global Positioning System (GPS) navigation and some auto-pilot capabilities. All-weather operation is rounded out with a weather radar and an effective anti-ice system that allows cold weather operation in the Northeast U.S. and Alaska. The aircraft is also equipped with night-vision compatible displays that allow aircrews to complete missions in almost zero-light conditions.

The HH-60J is larger and more powerful than the Coast Guard's HH-65 helicopter. Because of the extended-capacity fuel tanks, the HH-60J is often called upon for SAR missions far offshore. It is capable of flying up to 300 miles offshore, staying on scene for approximately 45 minutes, picking up

**HH-60 Conversion Projects**

**\$52,700**

six or more survivors, and then returning to shore with adequate fuel to divert to another landing area if required. All weather flight capabilities are provided by a basic flight-management system.

A complete replacement of the HH-60J avionics system is currently underway at the Coast Guard Aircraft Repair and Supply Center (AR&SC), Elizabeth City, NC. Taking advantage of the U.S. Army and U.S. Navy Common Avionics Architecture System (CAAS) cockpit, the HH-60J will receive the same capabilities as U.S. Special Forces and presidential HH-60 aircraft. The CAAS cockpit will integrate state-of-the-market technology, upgrading flight-management, navigation, and automatic-pilot features. It will also increase operational availability and reduce maintenance and supply costs. Another project involves installation of an upgraded multi-mode radar and EO/IR sensors that will provide the HH-60J with a common command, control and surveillance system to integrate with the Coast Guard's Common Operating Picture (COP).

The HH-60J has provided support for national special security events. The Coast Guard has begun a project to install Airborne Use of Force (AUF) on its HH-60 helicopters. The Deepwater program will provide the funding and management to configure the entire HH-60 fleet to support armed use of force missions. Because of its power and size, the HH-60J is the ideal aircraft to provide law enforcement personnel with a platform from which they can rapidly deploy to potentially hostile vessels by rappelling down ropes from the helicopter.

**PERFORMANCE:**

Once converted, there will be 42 HH-60Js located within the continental United States and Alaska providing support to the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The HH-60J will be outfitted with a capable C4ISR suite that includes a multi-mode surface and air search radar (MMR), and EO/IR sensor to find and observe a wide range of targets. The aircraft will have a line-of-bearing indicator and distress call monitoring on various distress frequencies. It will also be equipped with Global Positioning System (GPS) and the crew will be outfitted with night vision devices to further enhance the crew's ability to detect, classify, and identify targets.

- Marine Safety – International Ice Patrol (IIP) – Although the HH-60J does not have the extended range of a fixed-wing aircraft, utilizing the same sensors described above, it will be able to detect and relay the location of icebergs while based on a cutter in support of the important International Ice Patrol mission.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, will be employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, the HH-60J will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and COP through a networked Command and Control (C2) system that provides data sharing capability.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented MIO will also be used to support the DRUG mission. Through effective use of

**HH-60 Conversion Projects**

**\$52,700**

the CTP/COP, the HH-60J will be able to direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – All sensors and communications equipment will be used for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased maritime domain awareness.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – Visual surveillance and the C4ISR suite on the HH-60J will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.

- MEP – Lightering Zone Enforcement (LZE) – The HH-60J is capable of monitoring lightering zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The HH-60J will employ all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

**NATIONAL DEFENSE:**

- Defense Readiness – The HH-60J plays a minimal role in national defense missions but can provide support through surveillance and transport roles to the following areas:
  - Port Operations, Security, and Defense (POSD)
  - General Defense Operations (GDO)
  - Peacetime Military Engagement (PME)
  - Maritime Intercept Operations (MIO)
  - Environmental Defense Operations (EDO)

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009:**

| ITEM   | QUANTITY | TOTAL (\$K) |
|--|----------|-------------|
| HH-60 Avionics Upgrade                       | 8        | \$27,119    |
| HH-60 SLEP                                   | 8        | \$2,900     |
| HH-60 Radar/Electro Optical/Infra-Red sensor | 8        | \$18,900    |
| HH-60 Engine Containment                     | 8        | \$3,781     |
|  | Total    | \$52,700    |

| FUNDING HISTORY         | FY   | TOTAL (\$K) |
|-------------------------|------|-------------|
| HH-60T Avionics Upgrade | 2002 | \$35        |
| HH-60T Avionics Upgrade | 2003 | \$5,800     |
| HH-60J SLEP (Re-Wire)   | 2003 | \$2,000     |
| HH-60J Radar/FLIR       | 2003 | \$600       |

**Method of Performance**

The method of performance metrics have changed significantly due to the shift of the Lead System Integrator (LSI) responsibility from the IDS Prime Contractor to the U.S. Coast Guard. The USCG will now manage all H60 MRR system integration issues internally. An Earned Value Management System (EVMS) is currently being developed for use at AR&SC. As outlined in the MRR and Avionics Program Management Plans, and until such time an EVMS is established at AR&SC, the Project Manager will use a mixture of monthly financial and project status reports, as well as weekly conference calls and project management staff meetings to measure project performance.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**HH-65 Conversion Projects**

**\$64,500**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request continues to fund Phase II (Obsolete Component Modernization) and Phase III (Automatic Flight Control System and cockpit modernization, IDS Capability Enhancements) of the conversion of the current fleet of HH-65s to the Multi-Mission

Cutter Helicopter (MCH). The modernization work includes a service life extension where obsolete components are replaced with modernized and more capable sub-systems, including a new integrated cockpit and C4ISR suite.

**CAPABILITY ACQUIRED/MAINTAINED:**

The Eurocopter HH-65 Dolphin is the Coast Guard's short-range recovery helicopter. Under Phase I of the HH65 Conversion, the fleet HH65 "B" models were re-engined and designated HH-65C. Under the Airborne Use of Force (AUF) project, the HH65C received upgrades to the communications sub-systems to provide interoperability with other Homeland Security agencies and local response agencies. Additionally, the aircraft were configured and pre-wired to allow for the installation and removal of special AUF mission equipment (weapons, armor, EO/IR, HUD). The AUF modified aircraft are designated as MH65C.

Phase II of the conversion builds upon the MH65C configuration to modernize many of the aging and obsolete sub-systems and components, including the Omni-Directional Air Data System (OADS) and aircraft gyros that began with NRE efforts in FY 2007. Phase III of the conversion consists of a modernized all-glass Common Avionics Architecture System (CAAS) cockpit that capitalizes on commonality with the HH60T cockpit upgrade, modernizes the aging Automatic Flight Control System (AFCS), and adds enhanced IDS capabilities, such as Common Operating Picture (COP) interface and sensor integration.

The HH-65 is primarily constructed of composite structures that provide reduced weight, increased strength and better resistance to corrosion. One of the most recognizable features of the HH-65 is its unique shrouded tail rotor, called a Fenestron. The HH-65 incorporates a sophisticated flight-management system that allows all-weather operation, precise navigation, and automatic-pilot features. If desired, the pilot can select a function that will mark a position in open water, calculate the best flight profile, and automatically fly the helicopter to a 50-foot hover right over the desired position. This is an essential and critical safety feature at night and in inclement weather. Phase III of the conversion efforts modernizes the aging AFCS with a new digital system that enhances this capability and adds to crew safety.

During FY 2008, the Coast Guard's Integrated Deepwater System will have replaced the engines on all the HH65s executed under Phase I of the conversion project. The new Turbomeca 2C2 engine system

**HH-65 Conversion Projects**

**\$64,500**

provides aircrews with a 40% increase in engine power, while eliminating safety and reliability issues associated with the existing engines. Concurrently, the Airborne Use of Force (AUF) package is being deployed that converts the HH65C into the MH65C. This package includes an automatic weapon, and aircrew protection and communications systems that are compatible with local, state, and federal law enforcement and other first responders. Phase II and Phase III of the conversion are also concurrent projects and build upon the MH65C upgrades to modernize aging obsolete sub-systems and components and provide enhanced operational capabilities, including COP interface and sensor integration.

When these projects are completed, the upgraded HH-65 will be referred to as the Multi-Mission Cutter Helicopter or MCH. It will be a much more capable asset with increased aircraft performance, state-of-the-market avionics and surveillance equipment, and provisions for weapons.

**PERFORMANCE:**

The MCH will be primarily based at shore units located on each coastline, including the Great Lakes region, Alaska, Hawaii, and Puerto Rico. Due to its size and weight, the HH-65 will easily integrate with the National Security Cutter (NSC) and Offshore Patrol Cutter (OPC), enhancing the operational capabilities of these assets in support of the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue – The MCH will be outfitted with a capable C4ISR suite that includes a multi-mode radar (MMR) and Electro Optical Infrared (EO/IR) sensor to find and observe a wide range of targets. The aircraft will have a DF-430 UHF/VHF/FM Radio Direction Finder, Distress Call Monitoring on various distress frequencies, and a Global Positioning System (GPS). The crew will be outfitted with night vision devices to further enhance the crew's ability to detect, classify, and identify targets.

- Marine Safety - International Ice Patrol (IIP): Although the MCH does not have the extended range of a fixed-wing aircraft, it can use the same sensors described above to detect and relay the location of icebergs while deployed aboard a NSC or OPC in support of the important International Ice Patrol mission.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the Search and Rescue mission above, will be employed to provide surveillance, detection, classification and identification in the Undocumented MIO mission. With multiple communications, including UHF, VHF, HF, and MILSATCOM, the MCH will be able to share important information with other operational units and command centers. This information will contribute to a Common Tactical Picture (CTP) and Common Operating Picture (COP) through a networked Command and Control (C2) system that provides for data sharing.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support Undocumented MIO will also be used to support the DRUG mission. Through effective use of the CTP/COP, the MCH will be able to intercept as well as direct Coast Guard surface assets to intercept and prosecute suspect vessels.

**HH-65 Conversion Projects**

**\$64,500**

- Other Law Enforcement (OLE) – All sensors and communications equipment will be used for the OLE mission. Sharing information and data through the use of the C2 system and the CTP/COP will result in increased Maritime Domain Awareness.

PROTECTION OF NATURAL RESOURCES:

- Marine Environmental Protection (MEP) – Visual surveillance and the C4ISR suite on the MCH will be employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.

- Living Marine Resources Enforcement (LMR) – The MCH will employ all sensors (MMR, EO/IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

- MEP - Lightering Zone Enforcement (LZE): The MCH is capable of monitoring Lightering Zones for oil and other hazardous chemical discharges.

NATIONAL DEFENSE

- Defense Readiness – The MCH plays a minimal role in National Defense Missions but can provide support through surveillance and transport roles in the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009:

| ITEM                      | QUANTITY | TOTAL (\$K) |
|---------------------------|----------|-------------|
| HH-65 MCH Phase II        |          |             |
| MCH Phase II Production   | 22       | \$18,850    |
| HH-65 MCH Phase III       |          |             |
| Non-Recurring Engineering | 1        | \$1,600     |
| MCH Phase III Production  | 20       | \$44,050    |
|                           | Total    | \$64,500    |

FUNDING HISTORY

|   | FY   | TOTAL (\$K) |
|---|------|-------------|
| HH-65 Re-Engine                                       | 2002 | \$17,378    |
| HH-65 Re-Engine                                       | 2003 | \$8,490     |
| HH-65 Re-Engine                                       | 2004 | \$57,301    |
| HH-65 Re-Engine                                       | 2005 | \$139,000   |
| HH-65 Re-Engine                                       | 2006 | \$131,769   |
| HH-65 Re-Engine Completion & HH-65 MCH Phase II Start | 2007 | \$32,373    |
| MCH Phase II and MCH Phase III Start                  | 2008 | \$50,800    |

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**HH-65 Conversion Projects**

**\$64,500**

Total

\$437,111

Funding history is the funding available for this item based on past appropriations, rescissions, and other changes.

**CONTRACTOR:**

Aircraft Conversion / Integration: USCG Aircraft Repair & Supply Center (ARSC), Elizabeth City, NC

Type of Contract: Non-Contract Government Incurred (NCGI)

**SUBCONTRACTORS:**

Aircraft Components: American Eurocopter, Grand Prairie, TX  
Honeywell International, Clearwater, FL  
Avionics: Rockwell Collins, Cedar Rapids, IA  
Power Plant: Turbomeca, Grand Prairie, TX

| KEY EVENT                                 | FY   |
|---|------|
| MCH Re-engining complete (Phase I)        | 2007 |
| MCH Initiation of Phase II of Conversion  | 2007 |
| MCH Initiation of Phase III of Conversion | 2008 |
| MCH Completion of Phase II of Conversion  | 2014 |
| MCH Completion of Phase III of Conversion | 2015 |

**Significant Changes**

This budget request has been updated to more accurately align with the project execution plan for the MCH conversion. The FY 2007 and FY 2008 budget requests defined Phase II as structural modifications to include landing gear, tail rotor, sliding door, radar replacement, and fuel cell modification. MCH Phase III consisted of cockpit upgrades and enhanced IDS Capabilities. In order to address the more pressing obsolescence issues that required immediate attention and provide a sustainable aircraft platform to be converted into the MCH, the upgrades to be performed during Phase II and Phase III were reprioritized. The remainder of the upgrades planned under this conversion effort was simply reorganized within Phase II and Phase III in the most cost and schedule effective manner.

The prime contractor is no longer ICGS.

Prior year funding for FY 2002-03 was added for comprehensive history; however, the project was not part of the Deepwater program at the time.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**HC-130H Conversion Sustainment Projects**

**\$24,500**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request funds the following projects:

- 1) HC-130H Avionics Modernization
- 2) Center Wing Box (CWB) replacement
- 3) HC-130H Surface Search Radar

The Lockheed HC-130H is the Coast Guard's long-range surveillance aircraft. This four-engine, turbo-prop aircraft is used extensively throughout the United States, the Pacific, and the Caribbean in support of search and rescue, homeland security, law enforcement, pollution prevention, logistics, personnel transport and ice patrol missions.

FY 2009 funding will continue the development of the new digital cockpit, with multi-function displays that would provide aircrews with increased situational awareness and reduced cockpit workload. Additionally, funding will provide one replacement center wing box, which is critical for extending service life.

**CAPABILITY ACQUIRED/MAINTAINED:**

The HC-130H is powered by four Allison T56-A15 engines driving Hamilton Standard four-bladed propellers. When all fuel tanks are filled, the aircraft is capable of extended range (>2600 miles in low-altitude flight). With reduced fuel loads, the aircraft can carry a 40,000 pound payload. A large cargo compartment area, easily accessed through a large rear ramp, can accommodate a wide range of cargo. The aircraft's high-lift capability allows takeoff and landings from short, unimproved runways.

To keep the HC-130H fleet in service, upgrades to the avionics, sensors and fuselage are required. The Integrated Deepwater System is funding a program to replace the APS-137 surface search radar. This effective but troublesome radar has suffered from degraded reliability for several years. A prototype effort to replace the APS-137 with a Selex System is underway. The Selex System retains the same capabilities for surface search, yet offers an impressive reliability factor. The avionics suite on the HC-130H has been in service since the aircraft were delivered in the early 1980s. A digital cockpit with multi-function displays and reliable engine and propeller indicators will provide aircrews with increased situational awareness and reduced cockpit workload, benefits critical for long range operations.

**PERFORMANCE:**

With its flight-management and sensor systems, the HC-130H is a very capable maritime patrol aircraft, equipped with a powerful surface search radar that can detect surface targets from over 50 miles away. Once closer to a target, the sensor operator uses the Forward-Looking Infrared Radar (FLIR) and Electro Optical (EO) sensor to classify and identify the target, even in night or low-light conditions. A flight-management system that includes an automatic-pilot and precise Global Positioning System (GPS)

**HC-130H Conversion Sustainment Projects**

**\$24,500**

navigation equipment allows the pilot to concentrate on the details of the mission while being ensured of pinpoint accuracy of position and the position of the target vessels. Large scanner windows on either side of the cargo compartment provide aerial observers with a bird's eye view of the search areas during visual conditions. The HC-130H supports the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The HC-130H has a C4ISR suite that includes a multi-mode surface and air search radar (MMR), EO device, and Infrared (IR) sensor to find and observe a wide range of targets. The aircraft has a line-of-bearing indicator and distress call monitoring on various distress frequencies. It is also equipped with search windows and the crew has night vision devices to further enhance their ability to detect, classify, and identify targets.

- Marine Safety – International Ice Patrol (IIP) – A side-looking radar installed on the aircraft maps the location and movement of ice flows and icebergs. This information is calculated and transmitted to commercial vessels to increase maritime safety during the winter and spring months in the North Atlantic regions.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, is employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. With multiple communications, including UHF/VHF, HF, the HC-130H can share important information with other operational units and command centers.

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that support undocumented MIO are also utilized to support the DRUG mission. With its interoperable communications suite, the HC-130H can direct Coast Guard surface assets to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – All sensors and communications equipment are used for the OLE mission.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – Visual surveillance and the side-looking radar on the HC-130H are employed to monitor and map oil-covered water surfaces. The MMR can detect differences in backscatter between water and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water.

- MEP – Lightering Zone Enforcement (LZE) – The HC-130H is capable of monitoring lightering zones for oil and other hazardous chemical discharges.

- Living Marine Resources Enforcement (LMR) – The HC-130H employs all sensors (MMR, EO, and IR) to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**HC-130H Conversion Sustainment Projects**

**\$24,500**

NATIONAL DEFENSE:

• Defense Readiness – The HC-130H typically plays a minimal role in national defense missions but can provide support through surveillance and transport roles for the following areas:

- Port Operations, Security, and Defense (POSD)
- General Defense Operations (GDO)
- Peacetime Military Engagement (PME)
- Maritime Intercept Operations (MIO)
- Environmental Defense Operations (EDO)

COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009:

| ITEM                           | QUANTITY | TOTAL (\$K) |
|--------------------------------|----------|-------------|
| HC-130H Avionics Modernization | 9 kits   | \$9,000     |
| HC-130H Surface Search Radar   | 2        | \$5,500     |
| HC-130H Center Wing Box (CWB)  | 1        | \$10,000    |
|                                | Total    | \$24,500    |

FUNDING HISTORY

|  | FY    | TOTAL    |
|--|-------|----------|
| HC-130H Surface Search Radar                 | 2005  | \$9,000  |
| HC-130H Surface Search Radar                 | 2006  | \$4,950  |
| HC-130H Avionics                             | 2006  | \$5,940  |
| HC-130H Avionics Modernization Program (AMP) | 2007  | \$24,700 |
| HC-130H Surface Search Radar                 | 2007  | \$24,255 |
| HC-130H AMP and Surface Search Radar         | 2008  | \$18,900 |
|  | Total | \$87,745 |

Funding history is the available funding for this item based on past appropriations, rescissions and other changes.

CONTRACTOR:

Aircraft Repair & Supply Center (AR&SC), Elizabeth City, NC

Type of Contract: Government Work Order

SUBCONTRACTORS:

|                |   |
|----------------|---|
| Aircraft       | Lockheed Martin Aero, Marietta, GA      |

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Unmanned Aircraft System (UAS)** **\$3,000**

**Project Description, Justification and Scope**

This request funds the critical pre-acquisition activities for a Coast Guard Unmanned Aircraft System (UAS) to support cutter-based and land-based UAS operational feasibility analysis and testing, as well as UAS airspace safety, data management, and modeling/simulation studies based on existing technology.

The Coast Guard has a requirement to engage in maritime surveillance capabilities. Unmanned aircraft systems present an opportunity to make a substantial contribution to this vitally needed capability. The technology for these systems is rapidly evolving and various approaches are being developed for both shipboard and shore-based solutions. The Deepwater Implementation Plan included procurement of 45 Bell Eagle Eye cutter-based Vertical Unmanned Air Vehicles (VUAV) and associated control stations. The FY 2008 President's Budget requested no funding for VUAV. Instead, the Coast Guard was to conduct a study for an alternative approach to meet the Deepwater mission requirements for maritime surveillance.

During the fall of 2006, the USCG initiated this multi-phase VUAV alternatives analysis. Phase 1, completed in February 2007, recommended against proceeding with the Deepwater VUAV effort due to developmental and cost concerns, unless there were independently verifiable, significant technological achievements in either the Eagle Eye or Fire Scout (US Navy) VUAV projects. Phase 2, completed in August 2007, concluded that small, tactical, cutter-based UASs and long- endurance, land-based UASs might fulfill most of the maritime surveillance performance gap if a maritime VUAV were not available.

The pre-acquisition work will be conducted in accordance with the USCG Major Systems Acquisition Manual process and in collaboration with DoD and appropriate DHS organizations to meet common requirements. FY09 funding includes:

- Supporting USCG missions with UASs,
- Conducting safety-based statistical analysis,
- Addressing FAA/ICAO maritime operational requirements for UASs,
- Analyzing air vehicle command and control and related data management approaches, and
- Analyzing data between on-scene assets, the Coast Guard's common operating picture, and other required linkages.

The anticipated outcome is to determine how a UAS project will best enhance maritime surveillance capabilities, contribute to closing the Maritime Domain Awareness gap and identify costs and risks.

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009:**

| ITEM  | TOTAL (\$K) |
|---|-------------|
| UAS Pre-Acquisition Activities/Alternatives Study | \$3,000     |
| Total   | \$3,000     |

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Unmanned Aircraft System (UAS)** **\$3,000**

| FUNDING HISTORY                                | FY   | TOTAL (\$K) |
|--|------|-------------|
| VUAV Concept Development, Design               | 2002 | \$15,098    |
| Detailed Design & Long Lead Material           | 2004 | \$49,705    |
| System Component Production & Sub-Assembly     | 2005 | \$42,837    |
| Materials for VUAV #1 & #2 and Control Station | 2006 | \$6,658     |
| Complete Prototype Materials                   | 2007 | \$4,233     |
| Total  |      | \$118,531   |

Funding history is the funding available for this item based on past appropriations, rescissions, and other changes.

**Significant Changes**

This is the first submission for this re-scoped project after close-out of the contract for the Eagle Eye Vertical Lift Unmanned Aerial Vehicle (VUAV). As such, it tracks prior year funding for historical context. It also continues funding maritime surveillance requirements appropriately suited to the AC&I appropriation and is closely linked to related developmental prototype analysis efforts being managed by the Coast Guard's Research and Development Center (R&DC) using R&D funding.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**National Security Cutter (NSC)**

**\$353,700**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request funds production of the National Security Cutter (NSC) #4, including costs for both economic and customer-driven changes to the cutter. Long Lead Time Material for NSC #4 was funded in FY 2008.

**CAPABILITY**

**ACQUIRED/MAINTAINED:**

The NSC is a surface component of the Integrated Deepwater System (IDS) that will be capable of an extended on-scene presence, long transits and forward deployment. It will be equipped with communication, navigation and surveillance systems that allow the cutter and its deployed air and boat assets to operate worldwide within the range of its performance parameters, and conduct a daily search of potentially 56,000 square miles of ocean in support of all Congressionally-mandated missions.

The NSC is the largest of the new IDS surface assets (418') with vastly improved capabilities over legacy 378' High Endurance Cutter, and will be the most sophisticated and capable cutter the Coast Guard has ever operated. It will have a range of approximately 12,000 nautical miles (NM) and an underway endurance of 60 days. The NSC manning concept is innovative in decoupling the ship's operational tempo from the personnel tempo, enabling the vessel to deploy 230 days away from homeport annually while maintaining the current personnel tempo of 185 days underway (i.e., a 24% increase in ship annual operating days compared to the 378' High Endurance Cutter. The cutter will be capable of patrolling singly or with multiple U.S. Coast Guard vessels, U.S. Navy vessels, or vessels from other nations' navies or coast guards.

The NSC will conduct scheduled and unscheduled patrols within its assigned operating areas employing a robust command and control capability for the task unit commander or on-scene commander. The cutter will be capable of performing all maritime DHS missions, defense operations with the U.S. Navy, such as Ports, Waterways and Coastal Security, as well as Maritime Intercept Operations, Port Operations, Security and Defense, and Peacetime Military Engagements. When engaged in those missions, the NSC will be capable of detecting, classifying, and tracking surface Targets of Interest (TOI) in size from makeshift rafts to large commercial vessels, and air TOIs as small as single-engine civil aircraft.

The NSC's capabilities include the ability to:

- Provide anti-terrorism/force protection;
- Carry and deploy multiple airframes;
- Carry and deploy multiple Short Range Prosecutor (SRP) and Long Range Interceptor (LRI) cutter boats;

**National Security Cutter (NSC)**

**\$353,700**

- Conduct boat and flight operations in higher sea states due to improved sea-keeping capability;
- Support the full range of Coast Guard missions and intelligence element operations through greatly improved intelligence gathering and C4ISR capabilities, including a Sensitive Compartmented Information Facility (SCIF), which enhance the NSC's self-defense capabilities and facilitate operations with networked DHS, DOD, and national assets;
- Maintain presence and perform limited command and control operations in contaminated environments for up to 36 hours;
- Operate with U.S. Navy Battle Groups with a maximum sustained speed of 28 knots.

**PERFORMANCE:**

The NSC is a major contributor to overall Deepwater system performance, particularly when operating at the hub of a cutter/small boat/aircraft force package. NSC intelligence collection, analysis and dissemination, and C4ISR capabilities improve system responsiveness and help to prevent security incidents from developing. NSCs will serve as the hub of multi-unit, multi-mission operations and will be essential to achieving mission success in the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The NSC will permit the search for and location of mariners in distress, enabling their recovery from positions of peril; provision of medical advice, assistance, or evacuation; and when necessary, provide them safe transport to shore-side locations. The NSC will also be able to support recovery or control of damage to distressed vessels and other property by controlling or terminating flooding, fighting fires, dewatering, providing mechanical assistance, and towing stricken vessels. The NSC will have stern ramps and a side davit to rapidly launch and retrieve small boats. The NSC will have a Rescue Access Station to embark and load a non-stern ramp capable boat, to deploy a rescue swimmer, and to pick survivors from the water. With sustained presence, the NSC can also serve as a platform for an on-scene commander guiding and assisting rotary wing assets.

- Marine Safety – International Ice Patrol (IIP) – The NSC will support the protection of maritime shipping from icebergs by making ice observations, initiating or receiving and relaying shipping ice advisory broadcasts whenever icebergs threaten shipping routes, and otherwise operating in concert with other assets conducting this important mission.

**MARITIME LAW ENFORCEMENT:**

- Undocumented Migrant Interdiction Operations – The NSC C4ISR suite will be employed to provide surveillance, detection, classification, and identification in the undocumented migrant interdiction mission. Through sustained on-scene presence, the NSC will also have the capability of prosecuting Targets of Interest (TOI), including interdiction, embarkation, and disembarkation, as well as allowing for rescue of a large number of people when an unseaworthy or overloaded craft sinks or capsizes. These rescue situations require the ability to retain persons onboard (sheltering, feeding, and providing basic sanitation and medical services; as well as administrative processing and ensuring security for all concerned).

- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support undocumented migrant interdiction operations will also be used for the DRUG mission. Through effective use of the Common Operating Picture (COP), Multi-mission Cutter Helicopter

**National Security Cutter (NSC)**

**\$353,700**

(MCH) aircraft, and the Long Range Interceptor (LRI)/small boats, the NSC will be able to intercept and prosecute suspect vessels.

- Other Law Enforcement (OLE) – The NSC will conduct proactive patrols as well as reactive response to intelligence information, using all sensors and communications equipment to fulfill this mission. Sharing information and data through the use of the Command and Control (C2) system and the COP will result in increased maritime domain awareness. The NSC will have both active and passive sensors to detect and track vessels or aircraft engaged in, or suspected of, illegal activities. It will identify, classify and sort TOIs. After interdicting suspicious vessels, it will enable at-sea boardings and performance of custodial functions associated with seizing vessels or making at-sea arrests.

- Foreign Vessel Inspection – The NSC will conduct surveillance of operating areas. The installed Automatic Identification System (AIS) will permit rapid identification of foreign vessels. The NSC will be able to inspect foreign vessels at sea for compliance with applicable marine safety requirements and regulators.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – The NSC will be able to detect maritime pollution in the U.S. Exclusive Economic Zone (EEZ), based on verification of the type of material in the water, evidence gathering, and documentation. It will allow response to 29 CFR 1910.120 Hazardous Material accidents. Additionally, the NSC will conduct surveillance operations to detect significant discharges of oil or hazardous substances for subsequent monitoring, mitigation, and removal actions. The COP will provide the capability to navigate to previously marked pollution areas and update them based on current C4ISR and visual indications.

- Lightering Zone Enforcement (LZE) – The NSC will survey maritime petroleum cargo lightering zones and lightering operations, enabling the conduct of boardings to enforce applicable lightering regulations.

- Living Marine Resources Enforcement (LMR) – The NSC will aid enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The cutter will be able to provide sustained presence throughout the U.S. EEZ and along its boundary, as well as in international maritime areas of interest to the U.S. It will allow for at-sea boardings and inspections to deter illegal or unauthorized LMR activity to document violations and, if directed, arrest and seize vessels engaged in LMR violations. The NSC will also be equipped with AIS to monitor surface vessels that will provide a ship's name, position, course, and speed, and facilitate the job of vessel identification.

**NATIONAL DEFENSE:**

- Defense Readiness – The NSC's defense and security-related capabilities and extreme range and endurance makes it particularly well-suited for deployments overseas and in regions where it can disrupt security incidents well before they threaten U.S. coastlines.

- Port Operations, Security, and Defense (POSD) – The NSC will enable the conduct of thorough and sustained surveillance of an assigned area of operations, allowing dispatch of appropriate assets to investigate any threat to security. The NSC will engage in maritime interdiction operations, provide outer-harbor security, escort high-value assets, and conduct SAR and other

**National Security Cutter (NSC)**

**\$353,700**

- operations in support of the POSD mission. The primary objective is to ensure that port and harbor areas are maintained free of threats and to support re-supply of other deployed forces. The protection of logistics in support of contingency operations is one of the NSC’s highest priorities.
- General Defense Operations (GDO) – The NSC will integrate with DOD over the full range of maritime operations including surveillance, visit, board, search, seize and unit defense. It will be capable of operating worldwide with sustained presence resulting from its capability for underway replenishment, including Aircraft Vertical Replenishment. The cutter will provide hard-kill of subsonic anti-ship cruise missiles with Close-in-Weapon-Systems, and soft-kill capability, reduced radar cross-section, reduced infrared signature, and electronic sensor capability. The NSC will employ the 57 mm gun weapons system with optical and infrared fire control to achieve mission kill on high-speed patrol craft beyond intermediate caliber effective range. The NSC will be able to provide berthing and logistics support for additional personnel deployed for defense operations. The NSC will also have the ability to maintain station for an aircraft carrier conducting flight operations and to take station on, maneuver around, and escort commercial shipping steaming at operational speed. The cutter will have the ability to launch, recover and fuel U.S. Navy and NATO Vertical Take-Off and Landing (VTOL) aircraft, including armed helicopters.
  
  - Peacetime Military Engagement (PME) – The NSC will engage in military activities involving other nations to promote and maintain the security environment in peacetime, including nation-building activities. It will be able to maintain forward presence, render humanitarian assistance, conduct professional exchanges, and participate in combined operations, training, exercises and other military or diplomatic activities. The PME mission may involve long transits and extended operations with deployments of two to four months, for which the NSC will be well-suited.
  
  - Maritime Intercept Operations (MIO) – The NSC will conduct thorough and sustained surveillance of an assigned area of responsibility and detect and intercept all shipping, operating either independently or integrated with DOD and other agency assets. Additionally, the cutter will be able to dispatch trained boarding or inspection teams, providing for their logistics, support, transportation and protection.
  
  - Environmental Defense Operations (EDO) – The NSC will be able to detect potential threats to the physical environment and investigate those threats. The cutter will conduct operations to mitigate known environmental harm and intercept persons suspected of causing such harm, including mitigation of environmental exploitation designed to disrupt defense operations.

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:**

| ITEM                       | QUANTITY | TOTAL (\$K) |

**Significant Changes**

The Coast Guard signed the Consolidated Contracting Action (CCA) in August, 2007 that resolved pricing issues for NSCs #1-3 resulting from post 9/11 mission-related Engineering Change Proposals (ECPs), Hurricane Katrina costs, structural enhancements, delays and other project changes. As a result, this year's budget request funds production costs for NSC #4, while last year's request funded Long

<sup>1</sup> Funding History for FY 2007 reflects changes from the Consolidated Contracting Action.

<sup>2</sup> Funding History for FY 2008 reflects changes from the Consolidated Contracting Action.

<sup>3</sup> Funding History for FY 2008 reflects changes from the Consolidated Contracting Action.

<sup>4</sup> NSC #3 was awarded in 4th quarter FY 2007; however, design work to incorporate structural changes to ensure a 30-year fatigue life preceded the actual start of production in FY2008.

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**National Security Cutter (NSC)**

**\$353,700**

record expenses. Moreover, Dekker iPursuit is also used to view monthly cost performance reports. The iPursuit program also allows for extensive insight into the data used to generate cost performance reports. For example, it can provide a breakdown of cost and schedule variances by work breakdown structure (WBS).

**Budget Allocation to Mission-Program**

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Offshore Patrol Cutter (OPC)**

**\$3,003**

**Project Description, Justification and Scope**

This funding request completes requirements analyses in order to enable commencement of the concept design phase for the Offshore Patrol Cutter (OPC) leading to award of the preliminary design.

The revised program plan to match this requested funding includes requirements analyses from FY 2007:Q4 until FY 2009:Q1 at a cost of \$3,003,000. Funding for concept design and preliminary design will be sought in future years.

**CAPABILITY ACQUIRED/MAINTAINED:**

The OPC is the second largest cutter among the new Integrated Deepwater System (IDS) assets and will conduct critical patrols within assigned operating areas. It is a modern, multi-mission platform that will perform all IDS missions. The OPC will be capable of steaming long transit distances and maintaining extended on-scene presence. These characteristics are well-suited for maritime homeland security roles as well as for performing the full spectrum of law enforcement missions (e.g., living marine resources, drug interdiction, and undocumented migrant interdiction) and search and rescue operations. The OPC will provide a robust command and control capability for duties as Commander Task Unit (CTU) and On-Scene Commander (OSC). Inherent capabilities that are a vast improvement over legacy major cutters include multiple airframe capability, Over-the-Horizon (OTH) cutter boat deployment, and improved sea-keeping to allow flight and small boat operations in higher sea states. The OPC will provide significantly improved command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) capabilities compared to legacy Medium Endurance Cutters (WMEC) and are capable of interoperability in DHS and Department of Defense (DOD) communications and command and control systems.

**PERFORMANCE:**

The OPC is a major contributor to overall Integrated Deepwater System (IDS) performance, particularly when operating as the nucleus of a cutter/small boat/aircraft force package. Intelligence collection, analysis and dissemination, and C4ISR capabilities improve system responsiveness and help to prevent and mitigate security threats.

The use of well-equipped aircraft and small boats coupled with increased cutter speed also allow greater capacity for intercept and prosecuting targets of interest. The OPC can also stay at sea and on-station for long periods of time, with an integrated logistics system that will represent a significant improvement over its legacy counterpart.

Force structure determination: The OPC is a critical part of the IDS system, forming the hub of multi-unit, multi-mission operations. Its operational capabilities, long range, and endurance make it

**Offshore Patrol Cutter (OPC)**

**\$3,003**

particularly suited for deployments to remote regions and approaches to the U.S. coastlines, such as the eastern Pacific, Gulf of Alaska, Caribbean Sea and North Atlantic, where they can prevent security incidents and perform traditional Coast Guard missions of fisheries enforcement, counter-drug and undocumented migrant interdiction patrols, and others. The planned number of OPCs is based on a detailed review of mission needs.

The revised Deepwater Implementation Plan provides additional capabilities to reflect the increased post-9/11 security requirements. The OPC is designed to contribute to intelligence collection/information sharing through a sophisticated Shipboard Sensitive Compartmentalized Information Facility (S/SCIF), Specific Emitter Information (SEI) sensors, and increased data exchange bandwidth. The OPC's Deepwater and DOD interoperability capabilities are enhanced with DHS and local responder-interoperable radio communications. The OPC flight deck extension will accommodate all variants of DHS and DOD HH-60 helicopters to provide enhanced interoperability with interagency and inter-service counter-terrorism teams. The OPC will be fully-integrated with the National Distress Response System modernization program, known as RESCUE 21, which will provide port commanders with real-time tracking of the OPC and seamless Common Operational Picture (COP)-Maritime Domain Awareness (MDA) data-sharing, including the Automatic Identification System (AIS). The maritime security capabilities allow the cutter's weapons and command and control suite to be upgraded and hardened to better survive potential terrorist incidents and process increased data flow. This will include a medium caliber deck gun (57mm) that will provide the ability to engage/stop rogue merchant vessels far from shore. Increased OPC speed will provide exceptional response and reaction capability. This increased transit speed will allow for more time on station protecting port approaches.

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The OPC provide the ability to search for and locate distressed mariners and recover them from positions of peril, provide medical advice, assistance or evacuation, and when necessary, enable safe transport to shoreside locations. The OPC will also support recovery or control of damage to distressed vessels and other property by controlling or terminating flooding, fighting fires, dewatering, providing mechanical assistance, and towing stricken vessels. The OPC will have a stern ramp to rapidly launch and retrieve small boats. With a sustained presence, the OPC can also serve as an OSC platform, guiding and assisting rotary wing assets.

- International Ice Patrol (IIP) – The OPC will support the protection of maritime shipping from icebergs. The OPC will be able to make ice observations, initiate or receive and relay shipping ice advisory broadcasts whenever icebergs threaten the shipping routes, and otherwise operate in concert with other assets conducting this mission.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction (MIO) – The OPC C4ISR suite will be employed to provide surveillance, detection, classification, and identification in the undocumented MIO mission. Through a sustained on-scene presence, the OPC will also have the capability of prosecuting Targets of Interest (TOI), including interdiction, embarkation, and disembarkation, and rescuing a large number of people when an unseaworthy or overloaded craft sinks or capsizes. These rescue situations require administrative processing and the ability to retain persons onboard (sheltering, feeding, and to provide basic sanitation and medical services, as well as security for all concerned).

**Offshore Patrol Cutter (OPC)**

**\$3,003**

- **Illegal Drug Interdiction (DRUG)** – The same sensors and communications equipment that will support undocumented MIO will also be used for the DRUG mission. Through effective use of the COP, Multi-Mission Cutter Helicopter (MCH) aircraft, and the Long Range Interceptor (LRI)/small boats, the OPC will be able to intercept and prosecute suspect vessels.
- **Other Law Enforcement (OLE)** – The OPC will conduct proactive patrols as well as reactive response to intelligence information, using all sensors and communications equipment to fulfill this mission. Sharing information and data through the use of the C2 system and the COP will result in increased MDA. The OPC will have both active and passive sensors to detect and track vessels or aircraft engaged in, or suspected of, illegal activities. It will identify, classify and sort TOIs. After interdicting suspicious vessels, it will permit at-sea boardings and ease performance of custodial functions associated with seizing vessels or making at-sea arrests.

**PROTECTION OF NATURAL RESOURCES:**

- **Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response** – The OPC will be able to detect maritime pollution in the U.S. Exclusive Economic Zone (EEZ), based on verification of the type of material in the water, evidence gathering, and documentation. It will enable response to 29 CFR 1910.120 Hazardous Material accidents. Additionally, the OPC will conduct surveillance operations to detect significant discharges of oil or hazardous substances for subsequent monitoring, mitigation, and removal actions. The COP will provide the capability to navigate to previously-marked pollution areas and update them based on current C4ISR and visual indications.
- **MEP – Lightering Zone Enforcement (LZE)** – The OPC sensors will survey maritime petroleum cargo lightering zones and lightering operations, enabling boardings to enforce applicable lightering regulations.
- **Living Marine Resources Enforcement (LMR)** – The OPC will enable enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The cutter will be able to provide sustained presence throughout the U.S. EEZ and along its boundary, as well as in international areas of interest to the U.S. It will allow the conduct of at-sea boardings and inspections to deter illegal or unauthorized LMR activity, permit documentation of violations, and enable arrest and seizure of vessels engaged in LMR violations if directed. The OPC will also be equipped with AIS to monitor surface vessels. The information will provide a ship's name, position, course and speed, and will make the job of vessel identification easier.

**NATIONAL DEFENSE:**

- **Defense Readiness** – The OPC's defense and security-related capabilities and extended range and endurance make it well-suited for deployments offshore from U.S. coastlines.
  - **Port Operations, Security, and Defense (POSD)** – The OPC will be able to conduct thorough and sustained surveillance of an assigned area of operations, and allow for dispatch of appropriate assets to investigate any threat to security. The OPC will conduct maritime interdiction operations, provide outer-harbor security, escort high-value assets, and conduct search and rescue and other operations in support of the POSD mission. The primary objective is to ensure that port and harbor areas are maintained free of threats and to support re-supply of other deployed forces.

**Offshore Patrol Cutter (OPC)**

**\$3,003**

The protection of logistics in support of contingency operations is one of the highest OPC priorities.

- General Defense Operations (GDO) – The OPC will integrate with DOD over the full range of maritime operations, including surveillance, visit, board, search, seize and unit defense. The OPC will employ the 57 mm gun weapons system with optical and infrared fire control to achieve mission kill on high-speed patrol craft at intermediate-caliber effective range. The cutter will have the ability to launch, recover, and fuel Navy and NATO Vertical Take-Off and Landing (VTOL) aircraft, including armed helicopters.
- Peacetime Military Engagement (PME) – The OPC will operate in military activities involving other nations to promote and maintain the security environment in peacetime, including nation-building activities. It will be able to maintain a forward presence; permit rendering of humanitarian assistance; conduct of professional exchanges; and participation in combined operations, training, exercises, and other military or diplomatic activities. The PME mission may involve long transits and extended operations with deployments of two to four months for which the OPC will be well-suited.
- Maritime Intercept Operations (MIO) – The OPC sensors will allow thorough and sustained surveillance of an assigned area of responsibility and detect and permit interception of all shipping, operating either independently or integrated with DOD and other agency assets. Additionally, the cutter will be able to dispatch trained boarding or inspection teams, providing for their logistics, support, transportation and protection.
- Environmental Defense Operations (EDO) – The OPC sensors will be able to detect potential threats to the physical environment and enable investigation of those threats. The cutter will enable operations to mitigate known environmental harm and allow interception of persons suspected of causing such harm. This will include mitigation of environmental exploitation designed to disrupt defense operations.

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:**

| ITEM                           | QUANTITY | TOTAL (\$K) |
|--------------------------------|----------|-------------|
| Complete requirements analyses | Lot      | \$3,003     |
|                                | Total    | \$3,003     |

**FUNDING HISTORY:**

|   | FY    | TOTAL (\$K) |
|---|-------|-------------|
| Preliminary alternative and requirement development | 2004  | \$15,558    |
| Requirement and concept refinement                  | 2005  | \$2,500     |
| Continuing design development (stop-work issued)    | 2006  | \$9,328     |
|   | Total | \$27,386    |

Funding history shows available funds based on past appropriations, rescissions, and other changes.

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Offshore Patrol Cutter (OPC)**

**\$3,003**

**CONTRACTOR:**

As the system integrator, the U.S. Coast Guard will choose a contractor and contracting vehicle that presents the best value to the government.

SUBCONTRACTORS: TBD

**KEY EVENTS:**

Requirements Analysis

FY

2009

**Significant Changes**

The funds requested in FY 2009 will continue and complete analyses needed in order to re-start the design process with Concept Design, followed by Preliminary Design. Funding history above reflects a \$98,627,476 rescission FY 2006 appropriation enacted in FY 2008.

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports.

**Offshore Patrol Cutter (OPC)**

**\$3,003**

The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Budget Allocation to Mission-Program**

| <b><u>U. S. Coast Guard Mission-Program</u></b> | <b>Budget Allocation<br/><u>FY 2009</u></b> |
|---|---|
| Search and Rescue                               | 381   |
| Marine Safety                                   | 36  |
| Aids to Navigation                              | 5   |
| Ice Operations                                  | -   |
| Marine Environmental Protection                 | -   |
| Living Marine Resources                         | 589   |
| Drug Interdiction                               | 795   |
| Migrant Interdiction                            | 589   |

| Ports, Waterways & Coastal Security             | 458   |
| Defense Readiness                               | 89  |
| <b>Mission-Program Allocation Total:</b>        | <b>3,003</b>                                |

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act.

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Fast Response Cutter (FRC-B)**

**\$115,300**

**Project Description, Justification and Scope**

This request funds production of FRC-B hulls #2, #3 and #4, associated contract line items (i.e. training, warranty, supply support, etc.), and project management costs. Congress directed in FY 2008 that FRC #2 also be funded using prior year funding for the FRC-A. The Coast Guard has a critical need for patrol boats and the FRC-B will help meet that need. Concerns with the technical aspects of the composite FRC design (FRC-A) resulted in the Coast Guard suspending work on the project. The FRC-B (also referred to as the “parent craft”) was developed as a mitigation strategy due to the critical shortfall of patrol boat mission hours. On March 14, 2007, the Coast Guard terminated the FRC-B acquisition with Integrated Coast Guard Systems (ICGS) and reassigned it to the Coast Guard Acquisitions Directorate. The FRC-B acquisitions strategy includes acquiring a patrol boat based on a parent craft built from an existing proven design in order to address the significant patrol boat shortfall as soon as possible. The delivery schedule provides for the lead cutter delivery in 2010 and the 12<sup>th</sup> cutter by FY 2012.

**CAPABILITY ACQUIRED/MAINTAINED:**

Patrol boats are a critical Coast Guard response and prosecution asset for all mission areas, and are an integral component to our suite of capabilities. The FRC-B will have valuable new capabilities that are not found on the legacy 110’ WPB, including Deepwater interoperability, an enhanced command, control, communications, intelligence, surveillance and reconnaissance (C4ISR) suite, and improved quality of life. The FRC-B will also have enhanced maritime security capabilities that will support homeland security and homeland defense through increased speed and effectiveness. The FRC-B will be capable of reaching approximately 28 knots, providing enhanced response and reaction capability. The FRC-B will also have critical DHS and DOD communications interoperability improvements, including Military Satellite Communications (MILSATCOM) and local first responder-interoperable radio communications. Where increased weapons capability and deterrence are required, the main gun of the FRC-B will be used to enhance mission execution.

**PERFORMANCE:**

The FRC-B is a critical part of the Integrated Deepwater System (IDS) and will be a maritime security workhorse, patrolling in both coastal and high seas areas. Improved interoperability, C4ISR, common operating picture (COP) and sensors enhance surveillance and identification performance over existing capabilities of the legacy 110’ patrol boat. With its high readiness, speed, adaptability and endurance, the FRC-B will respond quickly and effectively to emerging security and safety issues, and is essential to achieving mission success in the following Congressionally-mandated missions:

**Fast Response Cutter (FRC-B)**

**\$115,300**

**MARITIME SAFETY**

• Search and Rescue (SAR) – The FRC-B will enable the ability to search for and locate distressed mariners and recover them from positions of peril, provide medical assistance or evacuation, and provide safe transport. The FRC-B will enable the ability to control damage to distressed vessels and other property, provide dewatering equipment and mechanical assistance, and tow stricken vessels. The FRC-B will allow commanders to integrate, coordinate and assist a large number of SAR assets during surge events during weather anomalies (such as hurricanes or gale-force winds), ocean liner rescue operations, and downed airline rescue operations.

**MARITIME SECURITY:**

• Undocumented Migrant Interdiction (MIO) – The FRC-B will enable the ability to conduct shipboard migrant interdiction evolutions, including detection, tracking, interdiction, embarkation and disembarkation, rescue administrative processing, and retention onboard. Targets include slow-moving rafts, small sailing vessels, small sport fishing vessels, high-speed, “go fast” type vessels, and small motor freighters attempting to make the voyage to the United States, Puerto Rico, or other U.S. territories. The FRC-B will be capable of patrolling areas where suspected illegal migration may occur, dispatching boarding teams to suspect vessels and subsequently escorting them to their final disposition. When conducting both proactive and reactive interdiction operations, the FRC-B will be capable of sustained presence and have the capability to rescue and shelter a large number of people in the event that the typical unseaworthy or overloaded craft sinks or capsizes during the attempted voyage. This capability will be facilitated by using rope ladders and/or cargo nets on one side of the cutter. The FRC-B will be capable of embarking a large number of migrants for at least a day, providing physical security, food, water, sanitation, basic medical services, shelter (separate from the ship’s crew) and administrative processing.

• Illegal Drug Interdiction (DRUG) – The FRC-B will have the capability to conduct illegal drug interdiction, including surveillance, visible deterrence in areas where the possibility of contraband smuggling exists, provide response to intelligence information and known incidents of drug smuggling, and to dispatch a boarding team. The cutter will intercept and take possession of contraband and the smuggling vessel, allowing the crew to arrest, detain and transport suspects for further transfer ashore. The FRC-B will possess the capability for integration and interoperability in communications, speed, sensors, and endurance with DOD and other government agencies. The cutter will have an approximate 28 knot capability for rapid interdiction of suspected targets of interest, and be equipped with a deck-mounted gun and small arms.

• Other Law Enforcement (OLE) – The FRC-B will enable enforcement of laws additional to those inherent in the primary mission areas of migrant interdiction, illegal drug interdiction, environmental defense, lightering zone enforcement, living marine resources enforcement and maritime pollution enforcement. This capability will include proactive patrols as well as reactive response to intelligence information. The sensors will be effective both day and night, and in all weather and sea conditions. The FRC-B will enable conduct of at-sea boardings and, if necessary, taking possession of a suspect vessel and escorting or towing it to port. The cutter will have an integrated architecture of surveillance sensors, operational databases, decision support systems, and communication equipment to collect, process, and disseminate operational information to other Coast Guard units, as well as other agencies in a timely manner.

**Fast Response Cutter (FRC-B)**

**\$115,300**

- Protecting the U.S. Exclusive Economic Zone (EEZ) from foreign encroachment – The FRC-B will have the capability of conducting surveillance of foreign vessels in EEZ operating areas and the ability to conduct at-sea boardings.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response – The FRC-B will be capable of conducting surveillance and inspection operations to detect significant discharges of oil, hazardous substances, debris, and ballast water for subsequent monitoring, mitigation, and removal actions in the U.S. EEZ. These operations involve verification of type of material in the water, evidence gathering and documentation, and are limited to visual determination of the type of pollutant, thickness and extent, day or night and in moderate weather conditions.
- Lightering Zone Enforcement (LZE) – The FRC-B will have the capability to survey lightering zones and lightering operations and conduct boardings as necessary.
- Living Marine Resources (LMR) – The FRC-B will enable enforcement of laws and treaties pertaining to LMR, including fisheries and marine mammal protection. The FRC-B will have the capability of sustained presence within the U.S. EEZ, enabling at-sea boardings and inspections to deter illegal or unauthorized activity by documenting violations. The FRC-B may take possession of a suspect vessel and then escort or tow it to port, allowing the crew to arrest, detain, and transport suspects for further transfer ashore.

**NATIONAL DEFENSE**

- Defense Readiness – The FRC-B will be designed to provide support to DOD in a variety of roles and missions. The FRC-B will have the capability to integrate with DOD in the full range of maritime operations, including surveillance, visit, board, search, seize, and unit defense. The FRC-B will conduct national defense maritime operations worldwide in low threat environments.

FRC-B support for national defense missions will be provided through the following six mission areas:

- Ports, Waterways and Coastal Security (PWCS)
- General Defense Operations (GDO)
- Maritime Interception Operations (MIO)
- Coastal Sea Control Operations (CSCO)
- Military Environmental Response Operations (MERO)
- Theatre Security Cooperation (TSC)

Representative activities that the FRC-B will conduct in support of national defense include:

- Limited military sealift and commercial shipping escort
- Limited combat search and rescue
- Surveillance and interdiction
- Visit, board, search and seizure
- Force protection of military shipping at U.S. seaports of embarkation and overseas ports of debarkation
- Domestic port security and coastal defense, providing part of the overall capability for the defense of the U.S. homeland

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**Fast Response Cutter (FRC-B)**

**\$115,300**

- Other duties as may be assigned; e.g., coastal/riverine interdiction, Special Operations Forces (SOF) insertion/support.

COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:

| ITEM  | QUANTITY | TOTAL (\$K) |
|---|----------|-------------|
| Construction/Production of FRC-B #3*                  | 1        | \$47,000    |
| Construction/Production of FRC-B #4                   | 1        | \$47,000    |
| Logistics (Spares, Program Management, Crew Training) | 1        | \$21,300    |
|   | Total    | \$115,300   |

| FUNDING HISTORY:  | FY           | TOTAL (\$K) |
|---|--------------|-------------|
| Design and Lead Ship (FRC-B #1)                                       | 2007 & Prior | \$106,690   |
| FRC-B #2* (use of FRC-A unobligated funding per FY2008 language) 2007 |              | \$41,580    |
|   | Total        | \$148,270   |

Funding history is the available funding based on past appropriations, rescissions, and other changes.

\* Construction/Production of FRC-B #2 will occur in FY2009

CONTRACTOR: TBD

Contract options: TBD

SUBCONTRACTORS: TBD

Production Subcontractor: TBD

Assembly Subcontractor: TBD

| KEY EVENTS             | FY     |
|------------------------|--------|
| Critical Design Review | 2008/9 |
| Start Production       | 2009   |
| Lead ship Delivery     | 2010   |

**Significant Changes**

FY 2008 was the first budget submission for the FRC-B Class. This request was denied, although funding was provided in the FY 2007 appropriations to the Replacement Patrol Boat/110' SLEP. Congress directed funding in FY 2008 use prior year FRC-A Class unobligated funds. The above funding history reflects transfer of \$20M from FY 2007 appropriations used for 110' Patrol Boat Sustainment.

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being completed in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**IDS Small Boats**

**\$2,400**

**Project Description, Justification and Scope**

This request funds production of one Long Range Interceptor (LRI #2). The Short Range Prosecutor (SRP) underwent a re-competition outside the prior contract and will request added funds in future budget requests.

**CAPABILITY ACQUIRED/MAINTAINED:**

The LRI is a 36-foot cutter small boat carried by each National Security Cutter (NSC) and Offshore Patrol Cutter (OPC). The LRI provides enhanced capabilities, compared to the legacy cutter boats, such as higher speeds, extended range, better sea-keeping, and greatly improved communications and connectivity to the parent cutter. The LRI can operate beyond sight of the cutter (over the horizon) to deploy boarding parties, pursue and interdict targets of interest, and perform Search and Rescue operations.

The SRP is an approximately-25-foot cutter small boat that has similar capabilities to the LRI. The SRP will be carried by every Deepwater surface platform.

**PERFORMANCE:**

Integrated Deepwater System (IDS) patrol boats are discussed in terms of “force packages” under the NSC and greatly facilitate achieving mission success in the Congressionally-mandated missions. IDS small boats allow a cutter to conduct search and rescue operations, such as removing migrants from an overloaded boat, and law enforcement operations, such as placing a boarding team on a high interest vessel. The LRI provides significantly improved performance over existing cutter small boats based on increased speed, increased passenger (boarding team) carrying capacity, communications, endurance and range. By operating beyond the line of sight of the cutter, the LRI acts as a significant force multiplier, enabling improved identification and prosecution of targets of interest.

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:**

| ITEM   | QUANTITY | TOTAL (\$K) |
|--------|----------|-------------|
| LRI #2 | 1        | \$2,400     |
|        | Total    | \$2,400     |

**FUNDING HISTORY:**

|  | FY   | TOTAL   |
|--|------|---------|
| Design SRP/Start construction of SRP-1 through SRP-2 | 2002 | \$945   |
| Construct SRP-3 through SRP-8                        | 2003 | \$2,782 |
| Construct SRP-9 through SRP-12                       | 2004 | \$1,591 |
| Design LRI/Construction of LRI-1 starts              | 2005 | \$2,300 |
| Complete construction of LRI-1                       | 2006 | \$693   |

| Delivery SRP-15-16           | 2012         |

**Significant Changes**

The SRP small boat will be procured by the Coast Guard outside of Deepwater's prime contractor, ICGS, in order to achieve greater cost efficiencies and to permit execution within budget. As a result, no funding for the SRP was requested in FY 2009. A business case analysis (BCA) will be conducted to determine if cost efficiencies can be attained through procurement of follow-on LRIs outside of the Deepwater contract. Key Events dates have also changed for both procurements.

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the various Delivery Task Orders (DTOs). The Dekker Trakker software program that meets ANSI/EIA Standard 748 is being used by the Deepwater Program. Dekker Trakker is the tool that is used by the Systems Integrator to resource load schedules, track progress and record expenses. An additional Earned Value viewing tool also being used is Dekker iPursuit which is the viewing tool that

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**IDS Small Boats**

**\$2,400**

allows Deepwater personnel to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data that was used to generate the Cost Performance Reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Medium Endurance Cutter Sustainment**

**\$35,500**

**Project Description, Justification and Scope**

This request funds the Mission Effectiveness Project (MEP) for 270' and 210' Medium Endurance Cutters (WMEC). The project includes replacing major sub-systems such as small boat davits, oily water separators, air conditioning and refrigeration plants, and evaporators. The main propulsion control and monitoring systems will also be upgraded. This work will be performed by the Coast Guard's skilled workforce at the Coast Guard Yard, Curtis Bay, MD. Long Lead Time Material (LLTM) for 270' WMECs will be procured to ensure that subsequent MEP availabilities maintain schedule.

270' WMEC cutter class MEP is a two-phase project totaling \$15.7M per cutter (estimated at approximately \$7.8M per phase, each phase is budgeted for the year in which the work is to be accomplished).

210' WMEC Cutter Class MEP is a single phase project totaling \$5.3M per cutter.

**CAPABILITY ACQUIRED/MAINTAINED:**

This funding will improve the overall mission effectiveness of the 270' and 210' WMEC cutter classes until applicable assets in the IDS program replace them. Since these cutter classes are not being replaced one for one, they must be retained in operational service until IDS assets become available for missions. Each 270' and 210' WMEC provides 185 days of mission performance; a loss of that capability puts achievement of long-term DHS performance goals at risk. Additionally, the WMEC Mission Effectiveness Project will improve the cutter's operating and cost performance by replacing equipment that has the highest failure rate with more reliable equipment.

**PERFORMANCE:**

**Mission Level Performance:** With the capabilities previously described, the 270' and 210' WMECs will be used to achieve success in the following Congressionally-mandated mission areas:

- Search & Rescue
- Defense Readiness
- Ports, Waterways and Coastal Security
- Illegal Drug Interdiction
- Undocumented Migrants
- Living Marine Resources

**System Level Total Ownership Cost:** Replacing obsolete equipment will result in greater standardization, capability, and reliability across the two cutter classes. Each cutter will complete the

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Medium Endurance Cutter Sustainment** **\$35,500**

program with new equipment and improved logistical support that will allow for the continued operation of the current WMEC fleet in a more economical manner until their IDS counterparts are delivered.

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:**

| ITEM  | QUANTITY | TOTAL (\$K) |
|---|----------|-------------|
| 270' WMEC Mission Effectiveness Project Phase I | 2        | \$15,700    |
| 270' MEP Long Lead Time Material (LLTM)         | Lot      | \$3,900     |
| 210' WMEC Mission Effectiveness Project         | 3        | \$15,900    |
|   | Total    | \$35,500    |

**FUNDING HISTORY:**

| <b>Mission-Program Allocation Total:</b>        | <b>34,500</b>            | <b>35,500</b>         |

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Patrol Boat Sustainment**

**\$30,800**

**Project Description, Justification and Scope**

This request funds the Mission Effectiveness Project (MEP) for three 110' Island Class Patrol Boats (WPB). The project includes replacing significant areas of hull plate and internal structures as well as major sub-systems, such as the ship service generators, power distribution system, air conditioning & refrigeration plants, water makers, fire suppression system, and fire alarm system. The main propulsion control and monitoring systems will also be upgraded. This work will be performed by two shifts of the Coast Guard's skilled workforce at the Coast Guard Yard, Curtis Bay, MD. Long Lead Time Material (LLTM) for 110' WPBs will be procured to ensure subsequent MEP availabilities maintain schedule.

The 110' WPB Cutter Class MEP is a single phase, 9 month project totaling \$5.6M to \$7.4M in FY 2006 dollars per cutter, depending on the material condition of the hull.

**CAPABILITY ACQUIRED/MAINTAINED:**

This funding will dramatically improve the overall mission effectiveness of the 110' WPB cutter class until applicable assets in the Integrated Deepwater System (IDS) program replace them. Since this cutter class is not being replaced one for one, these cutters need to be retained in operational service until replacement assets become available to assume their operational workload. Each 110' WPB provides 104 days of mission performance; a loss of that capability puts achievement of long-term DHS performance goals at risk. Additionally, the WPB MEP will improve cutter operating and cost performance by replacing equipment that has the highest failure rate with more reliable equipment that is more easily maintained and supported.

**PERFORMANCE:**

Mission Level Performance: With the capabilities previously described, the 110' WPBs will be used to achieve success in the following Congressionally-mandated mission programs:

- Search & Rescue
- Defense Readiness
- Ports, Waterways and Coastal Security
- Illegal Drug Interdiction
- Undocumented Migrants
- Living Marine Resources

System Level Total Ownership Cost: Replacing obsolete equipment will result in greater standardization, capability, and reliability across the two cutter classes. Each cutter will complete the program with new equipment and improved logistical support that will allow for the continued operation of the current WPB fleet in a more economical manner until their IDS counterparts are delivered.

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Patrol Boat Sustainment** **\$30,800**

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:**

| ITEM                                   | QUANTITY | TOTAL (\$K) |
|--|----------|-------------|
| 110' WPB Mission Effectiveness Project | 3 hulls  | \$30,800    |
|  | Total    | \$30,800    |

**FUNDING HISTORY:**

Supplemental and other AC&I Funds have been used to fund 110' MEP work prior to FY 2008; however, those funds were not part of the AC&I baseline for Deepwater.

|  | FY    | TOTAL (\$K) |
|--|-------|-------------|
| WPB Mission Effectiveness Project (FY 2005 Emergency Supp)   | 2005  | \$49,200    |
| WPB Mission Effectiveness Project (Deepwater FRC-B Transfer) | 2007  | \$20,000    |
| WPB Mission Effectiveness Project                            | 2008  | \$40,500    |
|  | Total | \$109,700   |

**CONTRACTOR:**

Coast Guard Yard, Curtis Bay, MD  
 Type of Contract: Government Work Order

**KEY EVENTS:**

|  | FY   |
|--|------|
| WPB Maintenance Sustainment Availability Project Initiation outside of Deepwater | 2005 |
| Deliver WPB Mission Effectiveness Project Lead Vessel – TYBEE                    | 2007 |
| Deliver WPB Mission Effectiveness Project Vessel – ORACOCKE                      | 2008 |
| Deliver WPB Mission Effectiveness Project Vessel – CUTTYHUNK                     | 2008 |
| Deliver WPB Mission Effectiveness Project Vessel – NANTUCKET                     | 2008 |
| Deliver WPB Mission Effectiveness Project Vessel – NAUSHON                       | 2008 |
| Deliver WPB Mission Effectiveness Project Vessel – EDISTO                        | 2008 |

**Significant Changes**

This project was added to the Deepwater program in FY 2008, and is managed in similar fashion to the WMEC Mission Effectiveness Project (MEP).

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Government Program Management**

**\$58,000**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request provides funding for government program management and oversight. Government program management funds provide support for government administration, technical reviews, technology analysis and performance monitoring for both the Deepwater program and Integrated Coast Guard Systems (ICGS), the prime contractor, as well as for operational test and evaluation, risk management, and human capital management. The primary reason for the increase between FY 2008 and FY 2009 is the Coast Guard's assumption of additional responsibilities associated with systems engineering and integration. Previously, ICGS was responsible for accomplishing this work and associated activities. As the Coast Guard's share of this effort increases, the Government Program Management budget will increase.

**CAPABILITY ACQUIRED/MAINTAINED:**

The Coast Guard is responsible for ensuring the products delivered by contractors and suppliers meet performance specifications. This requires sound management policies and the processes needed to implement them. Specifically, Deepwater personnel and program management funds provide the Coast Guard with the capability to protect the government's interests during the Deepwater acquisition and ensure contractors and suppliers deliver required products and services meeting prescribed terms and conditions. The Coast Guard accomplishes management and oversight through staff located at the Program Management Office and other contractor and government sites. Staff includes a mix of military, civilian, and support contractors experienced in all phases of large, complex acquisition programs.

Major milestones and reviews (i.e., Preliminary Design Review, Production Readiness Review, etc.) associated with the Deepwater program as it progresses through Concept and Technology Development, System Development and Demonstration, Production and Deployment, and then into the Operations and Support Phase are managed and overseen by Coast Guard program management staff to ensure acceptable performance. Specific tasks that are not inherently governmental are performed by support contractors.

Technology is constantly changing and several technology refreshes or upgrades are planned over the projected life cycle of the Deepwater program. Government program management personnel analyze the capability and applicability of these replacement technologies. Support contractors assist this effort and gather and assemble data into the government-designated format to aid informed government decision-making.

Government Program Management funding also supports performance monitoring of all contracts. This is accomplished through the use of a variety of tools such as the Earned Value Management System (EVMS), quarterly Deepwater (QUAD) charts, and the Deepwater Performance Management System (DPMS). EVMS permits the Coast Guard to closely follow cost and schedule performance of the projects by asset, while QUAD charts and DPMS data allow for periodic review of program cost, schedule, and performance criteria.

**Government Program Management**

**\$58,000**

DPMS provides web-based reporting of program performance in all aspects on a near real-time basis, depending upon the particular metric used. In addition, Deepwater risk management provides the Coast Guard the opportunity to forecast future performance of various assets and the operational performance of the entire Deepwater program from a “what if” perspective. This important analysis is aided by use of both experienced government employees and support contractors to develop various scenarios that are based on multiple past acquisition programs as well as operational experience and forecasts.

Operational Tests and Evaluation (OT&E) funds the U.S. Navy’s Commander Operational Test and Evaluation Forces (COMOPTEVFOR) for the execution of Deepwater operational testing. While Developmental Test and Evaluation (DT&E) is the responsibility of the contractor, OT&E is an inherently governmental responsibility. The U.S. Navy’s testing organization, COMOPTEVFOR, serves as the technical advisor to Coast Guard and is responsible for overseeing and contributing to the conduct of tests for the early involvement, review, and assessment of system and asset operational performance. Modeling is one of the methodologies used to monitor system-level performance. Government program management funding is used for modeling activities, plus system maintenance, for the Deepwater Maritime Operational Effectiveness Simulation (DMOES) modeling tool. This tool is used as a means to assess different alternatives and their impact on system-level performance to determine the best mix of Deepwater asset capability to meet mission objectives.

Government program management funding also supports the transition of the Deepwater assets to the Coast Guard, with staff serving as a liaison between the prime contractor’s production of an asset when it is ready for operations and the turnover to the operational user and the Coast Guard support community.

The Government Accountability Office (GAO) and Congress have both expressed a desire for the Coast Guard to provide more government oversight of the Deepwater program as well as assume greater systems integration responsibility. This increase in oversight and integration will be accomplished by increasing the number of government and support contractor staff, and increasing the use of third party independent analysis. In addition, the Coast Guard’s new Acquisition Directorate (staff symbol CG-9) will build a government competency in systems engineering for integrating multiple assets and C4ISR systems into the operations of the Coast Guard, in support of the Deepwater program and other major acquisitions. As this government competency is developed, support contractors will provide the necessary assistance to the current government personnel so that the Deepwater program can continue to progress while the Coast Guard improves management and provides oversight.

New initiatives are being implemented to improve the investment/acquisition metrics and ensure appropriate internal controls are in place while complying with increasingly complex financial management controls and processes. As an example, all Deepwater Program/Project Managers will be developing annual project performance plans detailing key events and success criteria for assessing risk and performance against approved documents and plans. The analysis of these plans for cohesiveness with overarching Deepwater requirements will be funded by the government program management request.

Finally, government program management funding is also used to ensure that Coast Guard is responsive to various Congressional, GAO and DHS-IG requests for information. This is a very important function

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Government Program Management** **\$58,000**

to keep these entities informed as they conduct appropriate oversight of the Deepwater Program and requires sufficient funding to ensure that accurate information is provided to these organizations in a timely manner.

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009:**

| ITEM                          | QUANTITY | TOTAL (\$K) |
|-------------------------------|----------|-------------|
| Government Program Management | Job      | \$58,000    |

**FUNDING HISTORY**

|                               | FY    | TOTAL (\$K) |
|-------------------------------|-------|-------------|
| Government Program Management | 2002  | \$35,016    |
|                               | 2003  | \$27,818    |
|                               | 2004  | \$33,799    |
|                               | 2005  | \$38,000    |
|                               | 2006  | \$34,650    |
|                               | 2007  | \$46,475    |
|                               | 2008  | \$50,475    |
|                               | Total | \$266,233   |

Funding history is the funding available for this item based on past appropriations, rescissions, and other changes.

**Significant Changes**

The major change from the FY 2008 budget submission is the increased Coast Guard role as systems integrator which will require increased government program management funding in the out years.

**Project Schedule**

**Cost Estimate Detail & Changes**

| <b><u>Funding Requirement Description</u></b> | <b><u>FY 2009<br/>Cost Estimate</u></b> |
|---|---|
| <b><u>Project Management</u></b>              |   |
| Government Program Management                 | 58,000                                  |
| <b>FY 2009 Cost Estimate Project Total:</b>   | <b>58,000</b>                           |

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Budget Allocation to Mission-Program**

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Government Program Management**

**\$58,000**

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Systems Engineering and Integration**

**\$33,141**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request funds the systems engineering and integration work for the Integrated Deepwater System (IDS) encompassing human-capital management, information technology, capital investment planning for air and surface platforms, integrated logistics, command, control, computers, intelligence, surveillance and reconnaissance (C4ISR), and, most importantly, fleet operations. The following activities are included:

- System of Systems engineering, including system architecture development, operational performance analysis, cost reduction efforts and enterprise-level requirements management
- Enterprise-level system integration
- Enterprise-level program management
- Developmental Test and Evaluation for the prime contractor
- Operational Test and Evaluation for the Coast Guard sponsor's office
- Integrated product and process development
- Integrated master schedule maintenance and management

**CAPABILITY ACQUIRED/MAINTAINED:**

The IDS solution is designed to incorporate off-the-shelf systems components where possible, making Systems Engineering and Integration essential to ensuring interoperability at the unit, system and organizational levels, both internal to the Coast Guard and with other DHS and DOD assets. Effective systems integration—bringing things technically and operationally together so they operate as a whole—will minimize the cost of asset acquisition, operations and maintenance, maximize the assets' abilities to interoperate internally and externally, and minimize the risk inherent in a comprehensive and complex engineering project of Deepwater's scope and magnitude.

The Coast Guard is planning an integrated system of aviation, cutter and shore assets that are interoperable through a comprehensive C4ISR detection and communications structure. Without Systems Engineering and Integration, the assets and sub-systems in the IDS program would be implemented in an inefficient and ineffective manner. One example demonstrating the need for Systems Engineering and Integration involves the delivery of upgraded capabilities to legacy cutters, including a Classified Local Area Network, upgraded INMARSAT B satellite communications, Automatic Identification System (AIS), and Law Enforcement Radio. This project provides significantly increased capabilities and Maritime Domain Awareness (MDA) to the legacy cutters. The application of Systems Engineering and Integration to these upgrades emphasizes a system-wide view of the project, with the result that corresponding upgrades also be accomplished at shore-side command centers. This permits the cutters to send and receive important operational information, further improving MDA and operational performance. Failure to utilize Systems Engineering and Integration could potentially result in upgrading just the cutters alone, severely limiting the system-wide benefits of the C4ISR upgrades.

System engineering evaluations are performed across the system, subsystem, and component levels to analyze products and capabilities for both interoperability and system commonality. These efforts culminate in the ability to determine and document predicted total system performance for numerous configurations and scenarios. Deepwater's systems engineering has the responsibility for the overall

**Systems Engineering and Integration** **\$33,141**

technical configuration-development process, culminating in a Program Management Plan that encompasses all management areas and is required of all major acquisition projects.

**PERFORMANCE:**

Systems Engineering and Integration is essential to improving operational performance of all IDS assets and directly supports mission success in all Congressionally-mandated missions. Systems Engineering and Integration is also providing identification of possible cost reduction approaches.

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR 2009**

| ITEM                                | QUANTITY | TOTAL (\$K) |
|-------------------------------------|----------|-------------|
| Systems Engineering and Integration | 1        | \$33,141    |

**FUNDING HISTORY**

|  | FY    | TOTAL (\$K) |
|--|-------|-------------|
| Overall Contractor Management of the Systems Engineering Process | 2002  | \$59,065    |
|  | 2003  | \$44,716    |
|  | 2004  | \$42,139    |
|  | 2005  | \$43,000    |
|  | 2006  | \$36,630    |
|  | 2007  | \$35,145    |
|  | 2008  | \$35,145    |
|  | Total | \$295,840   |

Funding History is the funding available for this item based on past appropriations, rescissions, and other changes.

**CONTRACTOR:**

Integrated Coast Guard System (ICGS), Washington, DC

Type of Contract: Indefinite Delivery, Indefinite Quantity with award terms

Contract options: 5-year base completed June 2007 with 43 month subsequent award term period through January 2011

Note: Currently, the majority of the Systems Engineering and Integration work is performed by ICGS via the prime contract. The Coast Guard will assume increased system integrator responsibilities for all IDS assets as a part of improved project management and acquisition reform. The Coast Guard anticipates that a portion of funding will be redirected, as needed, to third party systems integration and management contracts other than ICGS to improve program oversight and effectiveness.

**KEY EVENTS:**

|   | FY        |
|---|-----------|
| System Increment 1 – Integrated Product Environment                                 | 2002      |
| System Increment 2 – Initial Integrated Product & Process Development Team Training | 2003      |
| System Increment 3 – Deepwater System Architecture Plan                             | 2004      |
| Prime Contractor’s Program Management, Systems Engineering and Integration Transfer | 2005-2007 |

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**C4ISR**

**\$88,100**

**Project Description, Justification and Scope**

This request funds the systems and subsystems that are part of the Integrated Deepwater System (IDS) Command, Control, Communications, Computer, Intelligence, Surveillance, and Reconnaissance (C4ISR) system. The C4ISR system is designed to provide critical information and knowledge to field commanders allowing them to most efficiently and effectively exercise authority, while directing and monitoring assigned forces across the range of Coast Guard operations. The types of work that the C4ISR system is designed to accomplish include:

- Collecting operational and intelligence information and data; process and integrate the data into operationally-valued and assured information; and analyze, evaluate, and/or interpret the available operational and intelligence information into actionable knowledge to enhance maritime domain and situational awareness within maritime areas of the U.S. This process is specifically focused on preventing terrorist or other illegal acts such as drug smuggling, while simultaneously assisting mariners in distress or aiding maritime shipping;
- Systematically enabling persistent surveillance required to maintain the operational and commercial viability of the U.S. maritime domain, consisting of ports, waterways and coastal areas on and above the water's surface by visual, audio, electronic, photographic, or other means; and
- Obtaining, by technical sensor and intelligence methods and visual observation, information about the activities and possible threats from terrorists and other criminal activities, while concurrently observing and assisting legitimate users in U.S. ports, waterways and coastal regions.

C4ISR is the eyes, ears and cognitive recognition system of IDS, allowing the Coast Guard to see, hear, comprehend and communicate what is happening in America's maritime regions. This is accomplished using modern electronic components, such as interoperable radio and satellite communication systems and improved optical/radar sensors, that can improve sightings in total darkness and detect maritime targets in all weather conditions. In addition, it uses an interoperable network to bring all operational and intelligence data together, transforming the data into a Common Operating Picture (COP). The FY 2009 request continues to fund improvements to C4ISR, enabling earlier awareness, alerting and queuing of events through the more effective gathering of terrorism-related information, analysis and coordination, leading to the appropriate response—all critical to detecting, deterring, and defeating terrorists and other criminals.

When Deepwater's C4ISR modernization and recapitalization is complete, cutters and aircraft will no longer operate as relatively independent platforms with limited awareness in the maritime region as they do today. Instead, these platforms will receive information from a wide variety of ships, sensors and intelligence sources, enabling them to significantly contribute to the COP that is shared with DHS and DOD command and control systems. The Coast Guard also requires improvements to the existing legacy cutters, such as sensors that have greater range and C4ISR equipment to enhance maritime situational awareness overall.

The Coast Guard has included the funding request for all three C4ISR elements in one budget item: Part 1-- the Common Operating Picture (COP); Part 2--cutter upgrades; and Part 3--shore upgrades. Once

**C4ISR**

**\$88,100**

complete, the Coast Guard will have the capabilities needed to process rapidly growing amounts of operations and intelligence data from the C4ISR system. The individual budget information for all three C4ISR parts is still being provided in this single budget item, with the specific breakdown of funding as follows:

**Common Operating Picture (COP) -- \$51,200K.** Increment 3 Concept and Preliminary Design (C&PD) for IDS C4ISR component design for all assets. This work begins the third of four incremental additions to the core C4ISR software design, development, and deployment completed in Increments 1 and 2. IDS assets receive increased functionality through incremental design, development and deployment.

**COP Increment 3 Implementation Plan**

Funds Increment 3 through the C&PD of IDS assets and associated activities.

The IDS C4ISR Implementation Plan provides for a core C4ISR design for all IDS assets, which will increase software reuse, minimize training and maintenance costs, and increase interoperability between Coast Guard assets. Furthermore, Increment 3 will improve the Coast Guard's overall surveillance, detection, classification, and identification capabilities, which will increase the Nation's ability to maintain Maritime Domain Awareness (MDA).

The C4ISR design is being developed and fielded in a sequence of four increments. C4ISR Increment 3 will result in a considerable improvement in the functionality of the standard command and control (C2) system used aboard legacy and newly-acquired cutters, aircraft and shore assets, as well as sensor functionality improvements. These enhancements include mission support and decision aids, general mission tools, Search and Rescue (SAR) planning capabilities, maritime law enforcement case management tool enhancements, case files data storage, target of interest doctrine, emission control, self defense coordinator, intelligence systems that can "fingerprint" and identify a vessel, and self-defense capabilities for the National Security Cutters (NSC) deploying with U.S. Navy battle groups. Moreover, Increment 3 provides will begin efforts to develop interfaces with other Coast Guard systems, including Nationwide Automatic Identification System (NAIS), Rescue 21, and Command 21, improving interoperability and increasing the nation's ability to acquire and maintain MDA. C4ISR Increment 3 includes the design work for the upgrade of the Multi-mission Cutter Helicopter (MCH) and the Long Range Search (LRS) aircraft (HC-130J), further increasing the capabilities of each asset while performing maritime patrols in support of the Coast Guard's homeland security, maritime law enforcement, SAR, and environmental protection missions.

In addition to Increment 3 functionality, \$17,262K is included to fund the Maritime Domain Awareness Center (MDAC) in Moorestown, NJ, which is responsible for the design and testing of C4ISR equipment, Common Systems Engineering, and Certification and Accreditation (C&A) of the C4ISR system, essential to enabling operations. This includes funding for the inherently governmental responsibility to ensure safety and security of the system required in order to operate the system. Examples of operations that are enabled through C& A include connection to SIPRNET, CGDN +, DHS One Net, record message communications, MILSATCOM communications, LINK-11 connection, COP connection with DOD and DHS, and many other capabilities. Without this funding, the C4ISR system is not certified and accredited and therefore cannot be used operationally.

**Cutter Upgrades -- \$11,000K.** Funds procurement, development, integration, component-level test, installation, system-level test, and C&A of new C4ISR hardware and software improvements for Medium Endurance Cutters.

**Table 2: C4ISR for Coast Guard Medium Endurance Cutters:**

- Coast Guard common command and control system hardware and software;
- Integrated communications systems including: boarding party communications, law enforcement/marine band radio, MF/HF band voice and data Automatic Link Establishment (MF/HF ALE) radio, UHF band Navy data link radio and an integrated voice communications distribution system;
- Information management systems computing environment, including hardware and software to support specific shipboard information systems;
- Improved sensors, including new radio Direction Finding (DF) system and identification friend or foe transponder and interrogator system.

Upgrade of the C4ISR system used on Medium Endurance Cutters is critical to keeping them interoperable and sustainable. Without this upgrade, there will be many different configurations in the Coast Guard fleet, increasing maintenance and accreditation costs, limiting operational effectiveness and interoperability with IDS and other government agencies, and becoming unsustainable over the long term.

**Shore Upgrades -- \$25,900K.** Funds the Medium and High Frequency (MF/HF) band Automatic Link Establishment (MF/HF ALE) and the Deepwater enterprise C4ISR design infrastructure to communication stations. Recapitalizes antiquated (non-sustainable) switch matrices and automates Communications Area Master Station (CAMS) systems. Improvements include procurement, development, integration, component-level tests, installation, system-level tests and C&A of new C4ISR hardware and software. The upgrades to CAMS enhance interoperability with the Coast Guard's standard command and control systems over MILSATCOM channels. This also funds the Coast Guard District 9 Command Center, Headquarters, Mariannas Section, Guam (MARSEC), and International Ice Patrol C4ISR COP installations, including the Interoperability Maritime Security and Safety System Module. The development and deployment of the hardware and software module will provide the ability for systems, units and forces to provide connectivity and accept services from other systems, units and forces to enable them to operate effectively together. It enables the Coast Guard to better meet the DHS goals of prevention, protections and response with a modular C4ISR system that improves the Coast Guard's standard command and control capability in Out of Continental United States (OCONUS) operations, and national security preventative and incident response operations. This enhanced capability will mitigate shortfalls in incidents like 9/11 and Hurricane Katrina, in addition to providing increased prevention and protection capability. This system meets IDS interoperability requirements with DHS, DOD and other government agencies and will leverage any existing capabilities. Additionally, the shore funding replaces the emergency deployable command and control assets for each USCG Area Commander.

**C4ISR**

**\$88,100**

**CAPABILITY ACQUIRED/MAINTAINED:**

C4ISR system upgrades are designed to improve the surveillance, detection, classification and identification capabilities of each asset. This is a core component of IDS that benefits all Coast Guard mission areas, but specifically and directly supports the Coast Guard's MDA initiative. The common design promotes operational and equipment familiarity among Coast Guard personnel assigned to IDS assets. This standardization reduces training costs because Coast Guard operators and maintenance personnel only need to be trained once on a specific piece of equipment, then can be assigned among many assets and be immediately effective in their duties. The C4ISR improvements give each cutter, aircraft, shore command, and intelligence center the command and control systems to fully receive, display, and share an intelligence-infused COP. By becoming full COP participants, each unit will receive relevant MDA and situational awareness information, and can plan operationally-effective missions with a clear picture of the threat they face. Accurate knowledge of the maritime domain, provided through the COP and improved operational intelligence functions, will also ensure that an effective but efficient level of resources is allocated to combating the known threat, improving the probability that the threat will be contained and defeated far from America's shores. Improved interoperability with DHS and NORTHCOM will sharply enhance the Coast Guard's ability to distribute operationally critical information quickly and seamlessly to Federal, state and local agencies to leverage information generated by IDS assets for their own effective operational planning and response.

**PERFORMANCE:**

The C4ISR suite enhances the Coast Guard's ability to achieve mission success and enhance MDA and situational awareness, because it provides the capability for coordinated tactics, integrated intelligence, multi-agency interoperability and common situational awareness necessary to fulfill the missions with the currently-planned force mix in the following Congressionally-mandated missions:

**MARITIME SAFETY:**

- Search and Rescue (SAR) – The very capable C4ISR suite to be outfitted in every asset will include a radar, Electro Optical (EO) device, and Infrared (IR) sensor to find and observe a wide range of targets, as well as a line-of-bearing indicator and distress call monitoring capability on various distress frequencies. The crew will be outfitted with night vision devices to further enhance their ability to detect, classify and identify targets.
- Marine Safety – International Ice Patrol (IIP) – Utilizing the same sensors described above, the C4ISR suite will be able to detect and relay the location of icebergs in support of the important IIP mission.

**MARITIME SECURITY:**

- Undocumented Migrant Interdiction Operations (MIO) – The C4ISR suite, including the same sensors described in the SAR mission, will be employed to provide surveillance, detection, classification and identification during the undocumented MIO. With multiple communications, including UHF/VHF, HF, and INMARSAT, it will be able to share information with other operational units and command centers, contributing to a Common Tactical Picture (CTP) and COP through a networked Command and Control (C2) system using INMARSAT.
- Illegal Drug Interdiction (DRUG) – The same sensors and communications equipment that will support migrant interdiction will also be utilized to support the DRUG mission. Through effective use of the CTP and COP, C4ISR will allow commanders to direct Coast Guard surface assets to intercept suspect vessels.

**C4ISR**

**\$88,100**

- Other Law Enforcement (OLE) – The use of all sensors and communications equipment will be utilized for the OLE mission. Sharing information and data through the use of the C2 system and the CTP and COP will result in increased MDA.

**PROTECTION OF NATURAL RESOURCES:**

- Marine Environmental Protection (MEP) – Maritime Pollution Enforcement and Response: The C4ISR suite will be employed to monitor and map oil-covered water surfaces. The radars can detect differences in backscatter between clear and oil-covered water due to the dampening effects of oil on small wind-generated waves, while the EO/IR sensor can detect the small temperature variation between clear and oil-covered water. The COP provides the capability to navigate to previously-marked pollution areas and update data based on current C4ISR.
- Living Marine Resources (LMR) – C4ISR will employ all sensors to provide surveillance of protected and/or closed offshore areas and ensure the protection of LMR.
- MEP – Lightering Zone Enforcement (LZE) – With use of the C4ISR suite, it is possible to monitor lightering zones for oil and other hazardous chemical discharges aiding the LZE mission.

**NATIONAL DEFENSE:**

- Defense Readiness – The C4ISR suite plays a role in national defense missions, specifically supporting the following missions through better MDA:
  - Port Operations, Security, and Defense (POSD)
  - General Defense Operations (GDO)
  - Peacetime Military Engagement (PME)
  - Maritime Intercept Operations (MIO)
  - Environmental Defense Operations (EDO)

**COST ESTIMATE OF WORK TO BE FUNDED FOR FISCAL YEAR 2009:**

| ITEM   | QUANTITY | TOTAL (\$K) |
|--|----------|-------------|
| <b>Common Operating Picture (COP)</b>                  |          |             |
| Increment 3 Concept & Preliminary Design               | 1        | \$33,938    |
| MDAC Development & Integration Services                | 1        | \$2,512     |
| Common Systems Software Engineering                    | 1        | \$3,500     |
| MDAC Production & Deployment - Phase II                | 1        | \$10,000    |
| Studies and Analysis                                   | 1        | \$250       |
| C2 System Certification & Accreditation (MIPR)         | 1        | \$1,000     |
|  | Subtotal | \$51,200    |
| <b>Cutter Upgrades</b>                                 |          |             |
| C4ISR Upgrade of Legacy 270's (2 cutters)              | Lot      | \$10,000    |

Total

\$457,222

Funding History is the funding available based on past appropriations, rescissions and other changes.

**CONTRACTOR:**

Integrated Coast Guard System (ICGS), Washington, DC

Type of Contract: Indefinite Delivery, Indefinite Quantity with award terms

Contract options: 5-year base completed June 2007 with 43 month subsequent award term period through Jan 2011.

**SUBCONTRACTORS:**

Systems: Lockheed Martin (Moorestown, NJ)

Communications: L3 Communications (Camden, NJ)

Mackay Communications (Edison, NJ)

Sensors: SSR Engineering (Franklin, VA)

Systems: Bell (Fort Worth, TX)

Systems: Telephonics (Farmingdale, NY)

Systems: EADS CASA (Madrid, Spain)

Systems: ARINC (Annapolis, MD)

Sensors: EADS GmbH (Munich, Germany)

Sensors: Telephonics APS-143V3 Multi-Mode RADAR (Farmingdale, NY)

FLIR Systems Star Sapphire III (Portland, OR)

Miscellaneous:

Mission System Operator

Training and Maintenance: ProSoft (Phoenix, AZ)

**KEY EVENTS:**

|  | FY   |
|--|------|
| COP Increment 1 Completion                                     | 2008 |
| COP Increment 1 installed on assets and at the Command Centers | 2008 |
| Complete 270' Command & Control Upgrade                        | 2011 |
| Complete Communication Station Upgrades                        | 2012 |

**Significant Changes**

There was a major change in the C4ISR funding plan primarily focused on the Certification and Accreditation (C&A) costs. Over the last two years, the Coast Guard and DOD have gained a better understanding of the costs associated with ensuring newly-developed systems, and the data that resides in the systems, are not vulnerable to internal and external attacks. These costs are being applied towards maintaining the systems security posture to ensure national security information is not compromised. Specifically, the cost is associated with maintaining a network security posture consistent with national policy established by the National Security Agency and DOD.

There has also been some deviation from the initial proposal regarding the 270' command and control upgrades. The prime contractor experienced challenges to maintain the Increment 1 schedule related to technical issues that conflicted with Coast Guard systems. These issues have caused delay to the 270' command and control upgrades.

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly Cost Performance Reports. The iPursuit program also allows for extensive insight into the data used to generate Cost Performance reports. For example, it can provide a breakdown of cost and schedule variances by Work Breakdown Structure (WBS).

**Budget Allocation to Mission-Program**

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Deepwater Logistics**

**\$37,700**

**Project Description, Justification and Scope**

This request funds continued development of the Coast Guard Logistics Information Management System (CG-LIMS) which is designed to support the Integrated Deepwater System (IDS) as new ships, planes and information systems are delivered, or as current Coast Guard cutters, aircraft, and shore sites are converted into or modernized as Deepwater end-state assets. The Coast Guard is including the funding request for three significant aspects of Logistics in one budget item: 1) Integrated Logistics Support (ILS), which includes CG-LIMS, 2) shore upgrades for units assigned logistics responsibility and requiring access to CG-LIMS, and 3) facilities upgrades (in preparation of receiving new and modernized assets).

Integrated Logistics Support (ILS) - \$14,400K will execute revised logistics project plans to keep the logistics synchronized with the overall revised Deepwater Implementation Plan as well as for CG-LIMS development. This plan will complement the long term ILS plan that is being developed, by ensuring the Coast Guard has sufficient spares, training, and logistics support to sustain new Deepwater assets. The overall intensive and time-sensitive system support development effort is necessary for the successful fielding of assets and achievement of targeted operational effectiveness goals. The three primary areas of logistics engineering include: a) Business Process Development, b) Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) equipment support, and c) network-based CG-LIMS development.

Shore Facilities with Logistics Responsibilities - \$500K will be used to continue installation of LIMS systems at facilities where CG-LIMS use is required. These sites include Naval Engineering Support Unit (NESU) Boston, NESU Honolulu, Engineering Support Unit (ESU) Honolulu, Aviation Technical Training Center (ATTC) Mobile, Coast Guard Air Station (CGAS) Savannah, CGAS New Orleans, CGAS Miami, CGAS Cape Cod, CGAS, Borinquen, CGAS Barbers Point and CGAS Elizabeth City.

Facilities for New Deepwater Assets - \$22,800K will fund Phase II construction of the Off-Cycle Crew Support (OCCS) building to support the new National Security Cutters (NSC) crews in Alameda, California, facility upgrades at the first three Fast Response Cutter (FRC) homeports, facility upgrades at the second NSC homeport, environmental assessments of future Deepwater homeports and aviation sites, as well as detailed engineering evaluations of Deepwater sites.

Logistics support is designed to be provided through an enterprise-wide information system tool called CG-LIMS, which requires software development and installation at specific Coast Guard units with the need for access. Another significant component of Logistics is the physical facilities and infrastructure preparation necessary for home sites and support infrastructures for these assets. These facilities fall into two categories: 1) current Coast Guard or other existing facilities that are modified to be used for the new and/or converted assets, such as lengthening the pier for a longer ship and associated additional power supply requirements; and 2) newly-acquired facilities, including land and the associated buildings for crew offices, training buildings, and hangars that will be the new homes to the Deepwater ships, aircraft, and their crews. Completion of the regulatory environmental studies and preparations are also required.

**Deepwater Logistics**

**\$37,700**

Logistics support includes the following functional elements: 1) maintenance; 2) maintenance facilities; 3) manpower considerations for the assets, such as the design of controls for engineers on ships and flight controls on aircraft; 4) supply support, in terms of sparing and associated analysis; 5) special equipment used for maintaining, testing and calibrating the cutters, aircraft; and C4ISR systems 6) providing the technical data related to operating and maintaining the assets; 7) all aspects of training and training tools; 8) computer support for the asset (not associated with software and computer support being developed with C4ISR); 9) all of the physical movement and care of the parts, equipment components and supplies, which includes packaging, handling, storage and transportation; and 10) design interface with regard to all of these elements in initial design, including developing engineering changes, technical refreshes, and/or upgrades.

CG-LIMS is intended to automatically collect and process logistics data so that the software can be used to project support requirements and maintain a configuration baseline for the asset. This will relieve the Coast Guard workforce of the hard work associated with current keying-in of millions of individual data items. Also, CG-LIMS will interface with the Coast Guard's Learning Management System, which will schedule, track and distribute all training and training requirements for Coast Guard personnel. With its ability to bring the right information to the right people at the right time, CG-LIMS is expected to enhance productivity for the personnel involved in logistics, and provide operationally relevant information to Coast Guard operators and maintainers. Eventually, Coast Guard crews will have maintenance support technologies to provide step-by-step, computer-generated instructions, and 24-hour expert assistance made available through remote support services. Increased availability and reliability of Coast Guard cutters and aircraft will result in more operational time for these assets. Improved cost management will be an important feature that this investment in CG-LIMS will provide:

- Improving logistics operations, rules, tools and processes to reduce costs through adoption and institutionalization of best public and private sector business practices;
- Significantly improving inventory accuracy;
- Reducing costs by eliminating inventory at multiple locations; and
- Improving customer support by collaborating with private industry to develop effective support arrangements (such as service support agreements and other agreements).

Simply put, logistics planning and implementation keeps a resourceful and thrifty Coast Guard operating more reliably toward mission achievement while progressing towards logistics transformation goals, maintaining configuration control of assets, and accomplishing CFO management requirements. Using CG-LIMS to bring data together and transforming the data into useable information as an electronic status system will show if there is a specific item available anywhere in the Coast Guard. That knowledge will permit total asset visibility throughout the Coast Guard to determine who has the part, and auto-generate the shipping documents to transfer that item to the unit that needs the part. CG-LIMS will also collect and analyze maintenance record data to show frequency of use and frequency of failure for spares and repair parts, improving overall management of maintenance resources.

These logistics improvements will allow the Coast Guard to manage facilities with fewer personnel preoccupied with logistics, keep fewer "safety stocks" (increased commonality between equipment sets across asset classes), maintain better inventory accuracy (less inventory means money saved), and remove inefficiencies that result in delays that prevent critical assets from being ready to operate. In

**Deepwater Logistics**

**\$37,700**

addition, this information will be available at higher levels in the organization to determine asset or class-wide equipment problems.

Moreover, CG-LIMS and the logistics infrastructure can significantly contribute to CFO Act compliance within the Deepwater program. Some functionality related to CFO Act compliance includes:

- Provide unique asset identifier in order to include all costs incurred and track total acquisition/contracting cost.
- Track the asset identifier to the specific document used to acquire the asset; i.e. purchase order, task order, etc.
- Record beginning balances (on-hand), acquisition, withdrawals (dispositions), and calculate ending balances (on-hand) expressed in dollar values and physical units.
- Record item identification, classification (i.e., nomenclature, quantity, description, Federal stock classification or Nation Stock Number), initial cost, and subsequent costs related to acquisition (i.e., holding/handling cost).
- Record the condition of inventory.
- Record changes in value of inventory, supplies and materials due to changes in condition or other impacting circumstances.
- Record whether material received is hazardous, classified, requires special handling, requires special packaging, requires munitions list controls, requires trade security controls or has shelf life.
- Provide edits (controls) to prevent duplicate entries and reduce the likelihood of creating erroneous inventory documents/records, thereby ensuring the integrity of data recorded in the system.
- Permit only authorized users to enter, modify, or otherwise alter inventory records.
- Enable and account for the transfer of responsibility for inventory from one authorized manager to another authorized manager, ensuring that sufficient information is transferred to provide an audit trail at the gaining management activity.

**CAPABILITY ACQUIRED/MAINTAINED:**

Establishing a responsive ILS system will provide benefits in reduced life cycle costs and increased operational effectiveness. To achieve these goals, the Coast Guard must continue with a two-part development approach: 1) integrating enterprise-wide processes across lines of maintenance, supply support, technical data, support and test equipment, computer support, facilities, and transportation to assist in moving the Coast Guard towards an efficient centralized business model; 2) incorporating sound Human Systems Integration (HSI) processes, which include manpower, personnel, training, human factors engineering, and system safety, to significantly improve human performance and reduce operational costs.

The C4ISR equipment support area includes training and maintenance analyses and the full suite of support products for both operators and maintainers. The C4ISR equipment provides Maritime Domain Awareness across surface, air/shore assets. Ensuring adequate C4ISR logistics support preserves and protects this substantial investment. Performing complex reliability, maintainability and availability analyses are necessary to measure and baseline C4ISR supportability goals. Analyzing C4ISR systems/equipment and developing technical refresh plans will ensure the Coast Guard's ability to upgrade assets to maintain operational effectiveness while utilizing a deliberate budget agenda.

**Deepwater Logistics**

**\$37,700**

Establishing and maintaining accurate baselines are crucial for configuration control and for exercising effective and efficient equipment and supply chain management.

Investing in CG-LIMS is central to our enterprise-wide system. CG-LIMS can provide the ability, using collected data, to bring the right information to the right people at the right time. It is intended to streamline parts ordering and management, facilitate maintenance functions, sustain configuration control, and provide an innovative training delivery system. Interconnected processes accessed via an on-line support infrastructure will improve each IDS unit’s operational effectiveness by providing responsive maintenance support, establishing and maintaining inventory levels, automatically ordering parts, while at the same time remaining CFO compliant. This ensures that each asset remains available for its planned operational hours. This same feature also can be configured to manage Total Ownership Costs as the inventory tracking system determines equipment and spare parts usage rates and determines efficient inventory levels. For example, logisticians will be able to quickly forecast support requirements and trends and reduce single point failures. Designers will be able to introduce proven state-of-the-market technology, assess design trade-offs, and use concurrent engineering to improve reliability and maintainability for each new asset. The data also supports a “remove-and-replace” concept for components and modules which will simplify repair tasks.

**PERFORMANCE:**

ILS is essential to achieving mission success and life cycle supportability in all Congressionally-mandated missions. With the proper support infrastructure in place, the prospective Deepwater assets will be able to perform as designed and maintain their operational capabilities.

**COST ESTIMATE OF WORK TO BE FUNDED THIS FISCAL YEAR:**

| ITEM  | QUANTITY | TOTAL (\$K) |
|---|----------|-------------|
| Integrated Logistics Support                                      |          |             |

**CONTRACTOR for Integrated Logistics Support**

Integrated Coast Guard System (ICGS), Washington, DC

Type of Contract: Indefinite Delivery, Indefinite Quantity with award terms

Contract options: 5-year base completed June 2007 with 43-month subsequent award term period through Jan 2011

**SUBCONTRACTORS**

Integrated Logistics Support - Business Process Development:

MA&D - Crew Modeling (Boulder, CO)

Mincom - ILS Process Re-engineering (Englewood, CO)

NGDMS - HSI (Reston, VA)

LM Technical Services – Process Integration (Cherry Hill, NJ)

Pittiglio Rabin Todin & McGrath (PRTM) - Supply Chain Logistic (Washington, DC)

Prosoft - Training (Virginia Beach, VA)

Sigmon - ILS Process Re-engineering (Norfolk, VA)

**Deepwater Logistics**

**\$37,700**

C4ISR Support: EADS GmbH - NSC Air Search Radar (Ulm, Germany)  
 FLIR Systems - Various EO/FLIR (Portland, OR)  
 L3 Communications - Integrated COMMS Int/Ext. (Camden, NJ)  
 LM Eagan - MPA Mission Pallet (Eagan, MN)  
 LM IS&S - Intel, Enterprise SATCOM / INTEL (Valley Forge, PA)  
 LM Technical Services - C4 Installs, Tech Docs, Provisioning,  
 Sustainment (Cherry Hill, NJ)  
 Sierra Nevada - Surface UCARS (Sparks, NV)

LMS Support:

LM Technical Services – LIMS Integration (Cherry Hill, NJ)  
 Spectrum - Learning Mgt. System (Vienna, VA)  
 Sum Total (Docent) - Learning Mgt. System (Mountain View, CA)

CG-LIMS Development: LM Technical Services – LIMS Integration (Cherry Hill, NJ)  
 Dimension Technology Solutions - LIMS Interface (Boulder, CO)  
 Mincom - LIMS Software (Englewood, CO)

All Shore Facility projects are executed and managed within the Coast Guard by the Facility Design and Construction Centers (FDCCs) at Norfolk, VA and Seattle, WA. Each project is awarded to an Architectural/Engineering (A/E) firm and/or a construction contractor for completion.

**Method of Performance**

Per Section 1.H.1 of Deepwater Exhibit 300, "Description of Performance Based Management System", an Earned Value Management System (EVMS) is used for the system integrator contract work under each of the Delivery Task Orders (DTOs). The Dekker Trakker software program, which meets ANSI/EIA Standard 748, is employed by Deepwater to resource load schedules, track progress and record expenses. Moreover, Dekker iPursuit is also used to view monthly cost performance reports. The iPursuit program also allows for extensive insight into the data used to generate cost performance reports. For example, it can provide a breakdown of cost and schedule variances by work breakdown structure (WBS).

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Technology Obsolescence Prevention (TOP)**

**\$1,500**

**Project Description, Justification and Scope**

**DESCRIPTION:**

This request funds efforts to prevent technological obsolescence, which results from the evolution of technology as newer technologies appear and older ones cease to be used. For example, new media for storing digital information rapidly replaces older media and reading devices for these older media are increasingly no longer available. Newer versions of software constantly render older versions obsolete and the hardware required by this software also changes over time. Consequently, information which relies on obsolete technologies becomes inaccessible. While maintaining obsolete technologies might be the only option in limited circumstances, because of the associated need to keep every version of every piece of software and hardware, operating systems, and manuals, as well as personnel with relevant skills, it is not generally considered to be a feasible alternative over time.

In general, Technology Obsolescence Prevention (TOP) supports Integrated Deepwater Systems (IDS) assets for the 40-year duration of the program based upon pre-planned replacement rates. For example, if a computer were placed in service in 2005, it would be replaced in 2010. The replacement is chosen based on the same requirements as the original equipment. The cost allocated is the original cost plus an inflation factor for 2010. This cost is allocated every five years until an asset is either disposed of or the end of the IDS contract period is reached.

**TOP Replacement Periods**

**EQUIPMENT DESCRIPTION:**

Computers and Networking Equipment  
Sensors and Weapon Systems  
Communications Equipment  
Software

**REPLACEMENT PERIOD:**

5 Years  
15 to 20 Years  
10 to 15 Years  
5 Years

**CAPABILITY ACQUIRED/MAINTAINED:**

To maintain systems that provide satellite connectivity onboard IDS legacy cutters (210', 270' & 378'), TOP will replace cutter INMARSAT terminal servers.

**PERFORMANCE:**

TOP minimizes or eliminates the impact that hardware/software obsolescence can have on performance. TOP maintains the IDS technology performance level with indifference to changes at the hardware/software level.

**FUNDING HISTORY**

|                                    | FY   | TOTAL(\$K)  |

*U. S. Coast Guard - FY 2009 Congressional Budget Submission*

**Technology Obsolescence Prevention (TOP)** **\$1,500**

**CONTRACTOR:**

Integrated Coast Guard System (ICGS), Washington, DC

Type of Contract: Indefinite Delivery, Indefinite Quantity with award terms

Contract options: 5-year base completed June 2007 with 43-month subsequent award term period through Jan 2011

**SUBCONTRACTORS:**

Lockheed Martin, Moorestown, NJ (Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance Systems)

Production & Assembly Subcontractor: Lockheed Martin, Moorestown, NJ

**KEY EVENTS FY 2009**

**Compliance with Public Laws, Regulations, Standards & Executive Orders**

This project is being conducted in compliance with the National Environmental Policy Act (NEPA).

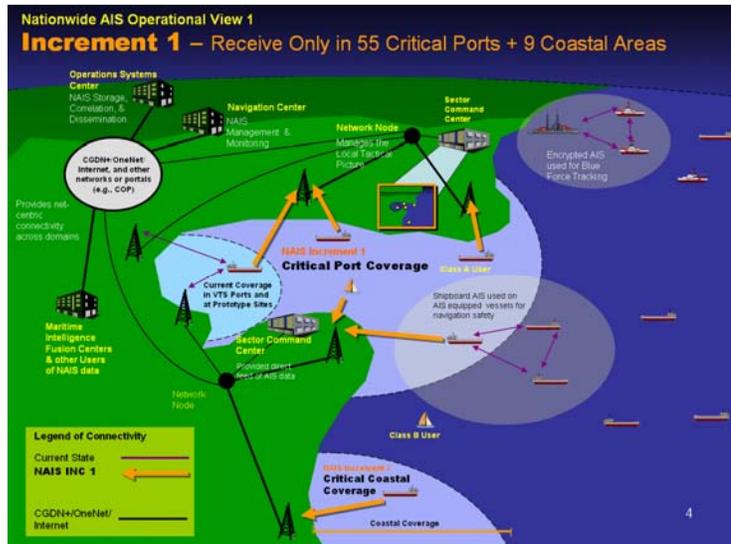

**U. S. Coast Guard Justification  
Acquisition, Construction & Improvements  
FY 2009 Congressional Budget Submission  
(Dollars in Thousands)**

**Nationwide Automatic Identification System (NAIS)**

**\$14,600**

**Project Description, Justification and Scope**

This request funds survey, design and construction to achieve IOC coverage for Increment 2 of NAIS. The Nationwide Automatic Identification System (NAIS) is a multi-year, Department of Homeland Security (DHS) Level 1 Investment and Coast Guard Major System Acquisition implementing a national system to collect, integrate and exchange Automatic Identification System (AIS) information from and with vessels operating on or bound for waters subject to the jurisdiction of the United States Government. NAIS is being developed and deployed in three main increments as follows:

Increment 1 – AIS Receive-Only at Critical Ports and Critical Port Areas is complete and provides receive-only coverage in 55 high priority ports and 9 coastal areas.

Increment 2 – AIS Receive and Transmit Nationwide will build upon Increment 1 by greatly expanding and extending the receive coverage (out to 50 nautical miles (nm) from shore), as well as providing transmit capability (out to 24 nm from shore) along the entire coastline of the United States., U.S. territories, and along designated inland waterways. Increment 2 is expected to be fully operational by FY2014 and is further segregated into two phases. The first phase designs, develops and delivers the core NAIS capability while providing AIS receive and transmit coverage in designated Initial Operational Capability (IOC) Sectors. The second phase will be a separate contract action to establish AIS receive and transmit coverage in the remaining U.S. Coast Guard Sectors nationwide.

Increment 3 – AIS Long-Range Receive extends the AIS receive capability to 2,000 nm by FY2014.

Following Increment-2 Phase I contract award in FY 2008, the funding provided in FY 2009 will be used to achieve IOC coverage for Increment 2 of NAIS by the end of 4<sup>th</sup> Quarter FY 2009. Increment 2 IOC exists when AIS receive and transmit coverage are established for Coast Guard Sectors Hampton Roads, Delaware Bay and Mobile. IOC also provides additionally-required network services, a subset of all data processing requirements (i.e., including, at a minimum, verification of AIS data and consolidation of AIS position reports received from multiple AIS stations in a sector) and availability of NAIS services through end users' systems. NAIS will be capable of allowing each Sector Command Center to effectively track AIS compliant vessels (i.e., including blue forces) using encrypted AIS messaging and to transmit all standard AIS messages. NAIS will also provide AIS data to separate systems and organizations, which will include the maritime Common Operational Picture (COP) and the Intelligence Community via the Common Intelligence Picture and supporting systems [e.g., Maritime Awareness Global NETwork (MAGNET)].

**Nationwide Automatic Identification System (NAIS)**

**\$14,600**

The mission of the NAIS is to develop and install a nationwide infrastructure to detect, identify, track, and exchange information with vessels operating AIS equipment while in or approaching U.S. waters. NAIS will leverage the full functionality of AIS technology to enhance Coast Guard and DHS operational mission performance to protect the public and serve national maritime interests.

The Maritime Transportation Security Act of 2002 (46 USC 70013) directed DHS to implement a persistent maritime surveillance system to collect, integrate, and analyze information concerning certain vessels operating in or bound for waters subject to the jurisdiction of the United States. NAIS will support this Congressional requirement and will serve as a centerpiece to the Coast Guard and DHS' effort to build Maritime Domain Awareness (MDA), as described in the National Plan to Achieve Maritime Domain Awareness, which will contribute to the successful execution of the National Strategy for Maritime Security, Homeland Security Presidential Directive (HSPD)-13.

NAIS is expected to consist of a system of AIS receivers, transmitters, transceivers, repeaters, and other equipment located on shore-side installations and remote platforms, which potentially may include buoys, offshore platforms, aircraft and spacecraft as needed, to receive, distribute and use the information transmitted by vessels that operate AIS equipment and transmit data to these vessels. Some AIS capability already exists, specifically at Coast Guard Vessel Traffic Services (VTS) and several advanced command and control sensor systems across the country. The Coast Guard will leverage as much of this existing capability as possible to complete the NAIS project.

NAIS will send and receive AIS messages via a Very High Frequency (VHF) data link to and from AIS-equipped vessels, navigational aids and multi-mission aircraft. NAIS will use several types of platforms (including existing government infrastructure to the extent possible) to support AIS receive and transmit capabilities. While some platforms support receive-only capabilities (e.g., satellites, buoys, and aircraft), others may support receive and transmit capabilities (e.g., land-side towers). AIS message data will be transported between system components over the Coast Guard Data Network and DHS OneNet and diverse, remote-site connectivity.

NAIS will process (validate, filter, etc.) and store data received. Some NAIS functions will require integration with existing systems. These systems, while not part of NAIS, are included in the context of the system's operations. Primarily, it is expected that these systems [e.g., Maritime Information Safety and Law Enforcement (MISLE), Local Tactical Display Systems, MAGNET and VTSs] will provide data processing functions (e.g., vessel tracking correlation, intelligence processing, anomaly detection) and user interfaces necessary to meet all the requirements for fully using AIS data.

NAIS will complement other surveillance and intelligence systems, greatly aiding the essential process of identifying vessels requiring further investigation and action. NAIS information will be displayed in the Coast Guard's national maritime Common Operational Picture (COP), and shared, along with correlated data and intelligence as appropriate, with Deepwater assets and other federal agencies. Unclassified portions of the COP will also be made available to state and local government port partners in support of security and safety operations. This information will be invaluable to agencies such as Customs and Border Protection (CBP), Immigration and Customs Enforcement (ICE), and the Transportation Security Administration (TSA), as it will provide real-time locational data on all major vessels in the maritime domain.

U. S. Coast Guard - FY 2009 Congressional Budget Submission

**Nationwide Automatic Identification System (NAIS)** **\$14,600**

**Significant Changes**

Initial Operational Capability (IOC) for Increment 1 was achieved on schedule (per the Acquisition Program Baseline) in first quarter Fiscal Year 2007 and FOC was achieved in the fourth quarter of Fiscal Year 2007. In addition the Request for Proposal (RFP) for the Nationwide Automatic Identification System (NAIS) Increment 2 Phase 1 requirement was issued on December 21st, 2007. Proposals are due in March of 2008 and contact award is expected by the end of Fiscal Year 2008.
