

# ***Inherently Safer Technology***

Steve Poorman, EHS Manager, FUJIFILM Imaging Colorants

# *Mandatory IST is Inherently Risky*

- Process safety concept, not a security one
- Not simple, very complex
- Risk Shifting
  - Increased transportation risks
  - Workplace safety risks

# *Regulating IST challenges*

- No agreed upon methodology, even by experts
- How do you regulate whether one IST method is better than another ?
- Indemnity issues

## *IST from a Specialty Batch Perspective*

- Many companies make products to customer specifications and other regulations
  - Pharmaceutical manufacturing
  - Crop Protection
- Other unintended consequences:
  - Job losses etc.
  - Small business vulnerabilities
